COOK'S TOURS.

THOS. COOK & SON,

Established 1841.

Cook's Tours in India, Australia, and New Zealand.—Under special arrangements with the Government of India, and with the Indian and Australasian Railway Administrations, THOS. COOK & SON issue Tickets to and through all parts of these countries, by Steamer, Rail, and Coach. Special Overland Tickets at Reduced Rates to passengers arriving at or departing from Melbourne, Adelaide, Sydney, and Brisbane.

Passages to America and Canada are secured by THOS. COOK & SON for all the Chief Lines of Steamers, and, in connection with these, Tickets can be issued for Tours to all principal parts of the United States. American Offices:—261, 262, and 1185, Broadway, New York; 621, Market Street, San Francisco; 234, South Clark Street, Chicago, &c., &c.

Tourist Tickets by Midland Route issued by THOS. COOK & SON to Derbyshire, Yorkshire, Lancashire, Morecambe Bay, Isle of Man, Scotland, Ireland, &c.; also Cheap Excursion Tickets to and from London.

Cook's English Lakes and Isle of Man Tours cover all points of interest, including Windermere, Coniston, Ullswater, Derwentwater, Rydal, Grasmere Lakes, Douglas, Peel, Ramsey, &c. Also Coach and Carriage Excursions to visit all principal places.

Cook's South, South-west and West of England Tours, combining Railway, Coach, and Steamer to every point of interest in the South, South-West, and West of England.

Cook's Scotch and Irish Tours cover all points of Tourist interest in Scotland and Ireland.

Cook's Tickets to Paris are available by the Shortest and Cheapest Routes, and by Dover and Calais, Folkestone and Boulogne, &c.

Cook's Tours to Holland, Belgium, and the Rhine are arranged upon a very comprehensive basis, for Single and Return Journeys, and for Circular Tours.

Cook's Swiss and Italian Tickets provide for every Route to and through Italy, Sicily, and Switzerland at great reduction in Fares.

The Steam Navigation of the Nile is conducted by means of the new Tourist Steamers specially constructed by THOS. COOK & SON (EGYPT), LIMITED.

Tours to Palestine are rendered easy, safe, and economical by the superior arrangements of THOS. COOK & SON.

Norway, Sweden, and Denmark.—Tourist Tickets issued for all principal parts of these countries.

Algeria and Morocco.—Tourist Tickets available over all the Algerian Railways and Coach Routes. Conducted and Independent Tours throughout Morocco.

Turkey, Greece, India, China, and Round the World.—THOS. COOK & SON are prepared to issue Tickets for all these Countries, by all principal Lines, and also a Direct Travelling Ticket for a Journey round the World.

Conducted Parties leave London and Paris constantly during the season for Switzerland, Italy, Holland, Belgium, the Rhine, Germany, Norway, Sweden, &c., &c. Programmes free on application.

Cook's Hotel Coupons are available at over 2,000 hotels, guaranteeing first-class accommodation at fixed prices.

Banking and Exchange.—Foreign Moneys exchanged at most advantageous rates. Drafts and Circular Notes issued and cashed, Cable Transfers made, &c.

Policies of Insurance against accidents of all kinds issued by THOS. COOK & SON.

Baggage Insurance.—Special advantages to holders of Cook's Tickets for insuring Baggage against loss. Arrangements also made for the collection, forwarding and storing of Baggage.

Programmes of all the above arrangements can be had gratuitously at any of the Offices of THOS. COOK & SON.

Cook's Excursionist and Tourist Advertiser (British Edition), and **Cook's Australasian Travellers' Gazette.**—Published in Melbourne. Each issued at short intervals, and contain specimen Tours and Fares, Steamer Sailings, &c. Price 2d., by post 3d.

From New York by Steamers of the Compagnie Générale Transatlantique to Havre, Rail to Paris and London, or *vice versa.*

RAILWAY TICKET ARRANGEMENTS BETWEEN LONDON AND MARSEILLES AND VICE VERSA.

First-class Passengers by the Company's steamers will be granted First-class Railway Tickets from London to Marseilles at the price of £5

Second-Class Passengers will be granted Second-class Railway Tickets at the price of—via Dover or Folkestone £4 0 0

Via Newhaven £3 18 2

Or First-class Tickets—via Dover or Folkestone £6 2 4

Via Newhaven £5 12 3

These Railway Tickets will be issued only to holders of Passage Tickets for ports beyond Suez, taken in London, or to bearers of return tickets from such Ports.

The Railway Coupons will be supplied at the Offices of the Company, 97, Cannon Street, E.C., or at the West End Sub-Agency, 51, Pall Mall, S.W., the Company paying the balance of price due for such tickets to the Railway Company.

On the **Homeward Voyage** First and Second-class Passengers from Ports beyond Suez can obtain, from the Purser on board, Railway Tickets from Marseilles to London at the prices above-mentioned.

Passengers holding First-class Steamer Tickets (homeward and outward) will alone be granted First-class Tickets by Rail.

The intention to proceed to London must be declared on or before reaching Port Said.

N.D.L. (NORDDEUTSCHER LLOYD, BREMEN.)

From SOUTHAMPTON.

FAST MAIL SERVICE TO AUSTRALIA

(Via SUEZ CANAL).

Under Contract with the Imperial German Government.

N.D.L. FLEET OF AUSTRALIAN TWIN SCREW STEAMERS.

"Grosser Kurfurst" ...	13,182 tons.	"Bremen"	10,500 tons.
"Friedrich der Grosse"	10,500 ,,	"Königin Luise"	10,500 ,,
"Barbarossa"	10,500 ,,	"Prinz-Regent Luitpold"	6,200 ,,

These Steamers, which are amongst the largest and finest vessels in the Australian trade, are appointed to leave SOUTHAMPTON every 28 days, for FREMANTLE, ADELAIDE, MELBOURNE, and SYDNEY, calling only at GENOA, NAPLES, PORT SAID, SUEZ, ADEN, and COLOMBO.

The Saloon accommodation is exceptionally good, First-Class Passengers being berthed entirely in large Deck State Rooms, containing two berths only. The Four New Vessels have also a number of rooms for Single First-Class Passengers. The Second-Class Saloons and Cabins are on the same deck as the First-Class.

The Cuisine is after the model of the very best Continental Hotels.

Passengers and their baggage are conveyed alongside the tender in Southampton Docks, by special train leaving Waterloo Station, London, at 9.25 A.M. on sailing day. Passengers can embark at Genoa or Naples eight or nine days later, respectively, than the advertised date of departure from Southampton.

N.B.—10 PER CENT IS ADDED TO ALL FARES EAST OF SUEZ.

The Price to Australian Ports as above varies according to steamer and accommodation engaged.

Through Tickets are issued to the principal **New Zealand** Ports, the price being £3 higher than to Australia upon **Single** Tickets both 1st and 2nd Class; **Return** Tickets cost, 1st Class, £110 from London, and £100 from Genoa or Naples; and 2nd Class, £10 more than Australia.

Children over 12 years, pay Full Fare; 3 to 12, Half-price; one child under 3, Free; for each additional child under 3, one-quarter Fare will be charged. European Servants of 1st and 2nd Class Passengers are charged 2nd Class Fare; Native Servants, one-third of 1st Class Fare. Sole use of Cabin can usually be had by payment of 50 per cent. of the Fare for every extra berth. **Special concessions to Families travelling to long distance Ports.** Passengers failing to embark can claim return of half passage money.

When no Return Ticket has been taken—Passengers returning within six months' are allowed 20 per cent. reduction off the Tariff Fares; returning within twelve months' allowed 10 per cent. reduction.

ROUND THE WORLD TOURS AT LOWEST RATES.

(Via CHINA and JAPAN, or via AUSTRALIA and NEW ZEALAND.)

Starting East or West by N.D.L. Steamer from SOUTHAMPTON.

The Company maintains a bi-weekly Service between Southampton and New York during the greater portion of the year. During the Winter months the Steamers leave weekly.
The above named fares are subject to alteration without notice.

Letters of Credit and Bills of Exchange upon the Branches are issued by the Head Office, and may also be obtained from the Bank's Agents throughout England, Scotland, and Ireland.

Telegraphic Remittances are made to the Colonies.

Bills on the Colonies are purchased or sent for Collection.

Deposits received at Head Office, at interest, and for periods, to be ascertained on application.

At its Branches in the Colonies it undertakes all descriptions of Banking and Exchange business.

PREFACE.

THE advent of the 20th century stands out as a red-letter date in the history of the British Empire, witnessing as it does the inauguration of the Australian Commonwealth.

It is ten years since the Sydney Convention first framed the Commonwealth Bill, the elaboration of which has been watched so keenly by all interested in the Australasian Colonies. Recognising the immense importance of the Federation to the commercial world, we have thought it advisable to put our subscribers in possession of a complete copy of the Act as now in force. (See pp. 126-141.)

The value of reliable statistical information cannot be over-rated. We have, therefore—with the assistance in many instances of Government Statisticians—had these particulars brought, as far as possible, up-to-date. They will be found most useful to those interested in the banks, wool markets, &c., of the Colonies, or States, as in future they will be designated.

The large selection of Maps of Cities, States, Railways, &c., have been revised, special thanks being due to the Government of Western Australia for the map prepared by the Government Geologist, A. Gibb Maitland, Esq., showing the distribution of Minerals, with the Goldfields and other Mining Districts. This map is published as a supplement to this edition of the Handbook, and should be of great value to mining specialists.

The greatly enlarged Directory of Shippers and Importers has been compiled with considerable care. Particulars respecting the various Towns—about 3,000—having been brought up-to-date by local correspondents, make the Handbook the most reliable work of reference, either for the Commercial, Political, or Travelling World, thus fully maintaining its position as the Standard Work upon Australasia.

Travellers will find a valuable list of Mail and Steamship Time-tables, with charts of the principal routes, in addition to information respecting climate, clubs, cost of living, &c.

The illustrations—portraits of the Earl of Hopetoun (first Governor-General) and the Right Honourable Edmund Barton (first Premier of the Commonwealth), with the group of Agents-General, are of unique interest.

Our cordial thanks are given to the Agents-General and our numerous correspondents who have assisted in so many ways to make this, the 32nd year's edition, surpass in importance all previous issues.

NOTE.—By the adoption of the Zone System on February 1st, 1895, the time in the Australian colonies of Queensland, New South Wales, Victoria and Tasmania, is reckoned by the 150th meridian; the colony of South Australia by the 135th meridian: and the colony of Western Australia by the 120th meridian. Thus the clocks in all towns in the first four colonies are now alike, while those in South Australia and Western Australia are respectively one hour and two hours later.

LAW AND OTHER TERMS.

LAW SITTINGS, 1901.

Hilary Term begins January 11, and ends April 3.
Easter Term begins April 16, and ends May 24.
Trinity Term begins June 4, and ends August 12.
Michaelmas Term begins October 24, and ends December 21.

UNIVERSITY TERMS, 1901.

OXFORD.

Lent begins January 14, and ends March 30.
Easter begins April 10, and ends May 24.
Trinity begins May 25, and ends July 6.
Michaelmas begins October 10, and ends December 17.

CAMBRIDGE.

Lent begins January 8, and ends March 26.
Easter begins April 18, and ends June 24.
Michaelmas begins October 1, and ends December 17.

QUARTERLY TERMS.

These days are the periods at which leases and rents usually begin and cease:—In England.—Lady-day, 25th March Midsummer, 24th June; Michaelmas, 29th September; Christmas, 25th December. In Scotland.—Candlemas, 2nd February Whitsuntide, 1st June; Lammas, 1st August; Martinmas, 11th November. In England the "Old" Terms are each 12 days after the above.

FIRE INSURANCE TERMS.

Fire Policies due at Christmas must be paid before January 9 if due at Lady-day, they must be paid before April 9; if due at Midsummer, they must be paid before July 9; if due at Michaelmas, they must be paid before October 14. The policies are due, of course, at the date first mentioned, but 15 days grace is allowed by the insurance offices.

ECLIPSES, 1901.

In the year 1901 there will be two Eclipses of the Sun and one of the Moon, at the following Greenwich Mean Times.

I.—A Penumbral Eclipse of the Moon on May 23rd, partly visible at Greenwich, begins at 4h. 6m. A.M., and ends 8h. 55m. A.M.

II.—A Total Eclipse of the Sun on May 17th, invisible at Greenwich, begins on the earth generally at 3h. P.M. and ends at 8h. 7m. P.M.

III.—A Partial Eclipse of the Moon on October 27th, partly visible at Greenwich, begins at 1h. 5m. A.M., and ends at 5h. 25m. A.M.

IV.—An Annular Eclipse of the Sun on November 10th, invisible at Greenwich, begins on the earth generally at 4h. 29m. P.M., and ends on the earth generally at 10h. 27m. P.M.

BEGINNINGS OF THE SEASONS, 1901.

Spring commences March 21, at 7h. A.M.; Summer, June 22, 3h. A.M.; Autumn, September 23, 6h. P.M.; Winter, December 22 at 1h. P.M.

HOLIDAYS IN PUBLIC OFFICES IN ENGLAND.

All Banks (in England and Ireland)—Good Friday, Easter Monday, Whit Monday, first Monday in August, Christmas Day, December 26 or 27. In Scotland—New Year's Day, also the first Mondays in May and August, December 25 or 26.

Docks and Custom House—Good Friday, Queen's Birthday, December 25.

Excise Office—Good Friday, Queen's Birthday, December 25.

Stamp and Tax Offices—Good Friday, Queen's Birthday, December 25.

Law Offices—Good Friday, Easter Monday and Tuesday, Whit Monday, Christmas Day, and December 26 or 27.

The Statute Holidays, which came into force in 1871 by the Bank Holidays Act, are Easter Monday, Whit Monday, the first Monday in August, and December 26 or 27.

☞ Indent for and Specify, when Ordering, the Name of the Company, and Cut Out and Keep for Reference.

THE PATENT TRIANGULAR NAIL CO., LTD.,

50, GRESHAM STREET, LONDON, E.C.

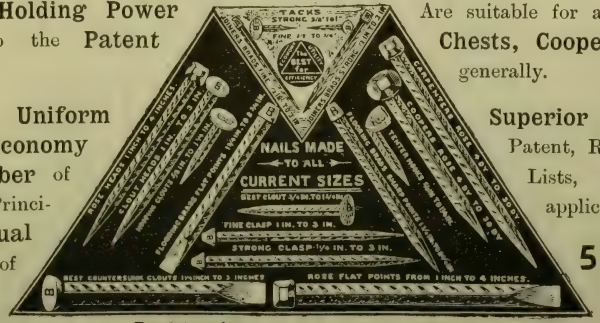
THE ORIGINAL PATENTEES AND MANUFACTURERS OF THE

LONDON, 1885.

PATENT TRIANGULAR B NAILS

AND

PATENT RIBBED B NAILS.



LIVERPOOL, 1886.

Of great value wherever Nails are required, but invaluable to Planters for TEA & INDIGO CHESTS, also FRUIT, SUGAR & COFFEE CASKS.

Easy to drive and **Clench**, with **Holding Power** in a remarkable degree, owing to the **Patent Ribbing.**

These Nails are of excellent **Uniform Quality**, and offer **Great Economy** owing to the **Much Larger Number** of Nails obtained by the Triangular Principle when compared with an **Equal Weight in any other Kind** of Nails

Are suitable for all countries, and invaluable for **Tea Chests, Cooperage,** and **Constructive** Purposes generally.

Superior to the best Hand-Made Nails. Also Patent, Ribbed, Round Coopers' Nails. Price Lists, Samples, and all Information upon application to London Offices:

50, Gresham Street, London, E.C.

Registered No. 1332, January 22, 1885.

These Nails obtained the Highest Award and only Gold Medal awarded for Nails at the International Inventions, London, 1885; and also the Medal awarded at Liverpool, 1886.

ALL OUR PATENT TRIANGULAR NAILS ARE MARKED "B" AS ABOVE.

☞ Indent for and Specify, when Ordering, the Name of the Company, and Cut Out and Keep for Reference.

THE QUEEN AND ROYAL FAMILY.

HER MAJESTY, VICTORIA, of the United Kingdom of Great Britain and Ireland, &c., Queen, Defender of the Faith, Empress of India. Her Majesty was born at Kensington Palace, May 24, 1819; succeeded to the throne June 20, 1837; was crowned June 28, 1838; and married, Feb. 10, 1840, to his Royal Highness Prince Albert, born Aug. 26, 1819, died Dec. 14, 1861. Her Majesty is the only child of the late Duke of Kent, son of King George III.

Her Royal Highness Victoria Adelaide Mary Louisa, PRINCESS ROYAL OF ENGLAND AND PRUSSIA, born Nov. 21, 1840, and married to his Royal Highness William of Prussia (afterwards Emperor of Germany), Jan. 25, 1858 (died June 15, 1888); and has had issue, Frederick William Victor Albert, Emperor of Germany, born Jan, 27, 1859, and has issue; Victoria Elizabeth Augusta Charlotte, born July 24, 1860, married Feb. 18, 1878, to Hereditary Prince of Saxe Meiningen; Albert William Henry, born Aug. 14, 1862, married his cousin Irene, May 24, 1888; Francis Frederick Sigismund, born Sept. 15, 1864 (died June 18, 1866); Frederika Wilhelmina Victoria, born April 12, 1866; married, November 19, 1890, H.S.H. Prince Adolphe of Schaumburg-Lippe; Joachim Frederick Ernest Waldemar, born Feb. 10, 1868 (died March 27, 1879); Sophia Dorothea Ulrike Alice, born June 14, 1870; married, October 27, 1889, Duke of Sparta; Margaret Beatrice Feodora, born April 22, 1872; married, February 26, 1893, Prince Frederick of Hesse Cassel.

His Royal Highness Albert Edward, PRINCE OF WALES, born Nov. 9, 1841; married, March 10, 1863; Alexandra of Denmark (Princess of Wales), born Dec. 1, 1844; and has had issue, Albert Victor, Duke of Clarence and Avondale, born Jan. 8, 1864 (died Jan. 14, 1892); George Frederick Ernest Albert, Duke of York, born June 3, 1865, married July 6, 1893, his cousin Victoria Augusta Louise Olga Pauline Claudina, only daughter of the late Duke of Teck, born May 26, 1867, and has issue, Edward, born June 23, 1894, and Albert, born Dec. 14, 1895, Victoria Alexandra, born April 25, 1897, and Henry, born March 31, 1900; Louise Victoria Alexandra Dagmar, born Feb. 20, 1867, married, July 27, 1889, Alexander William George, Duke of Fife, has issue, Alexandra, born May 17, 1891, and Maud, born April 3, 1893; Victoria Alexandra Olga Mary, born July 6, 1868; Maud Charlotte Mary Victoria, born Nov. 26, 1869, married July 22, 1896, Charles, second son of the Crown Prince of Denmark; and Alexander John C. Albert, b. April 6, 1871 (died April 7, 1871).

Her Royal Highness Alice Maud Mary, born April 25, 1843 (died Dec. 14. 1878); married to H.R.H. Prince Frederick Louis, Grand Duke of Hesse, July 1, 1862, born September 12, 1837, died March 13, 1892; issue living, one son and four daughters.

His Royal Highness Alfred Ernest Albert, Duke of Saxe-Coburg-Gotha, born Aug. 6, 1844, died July 30, 1900; married to the Grand Duchess Marie of Russia, Jan. 9, 1874: had issue a son and four daughters, the eldest of whom married Prince Ferdinand of Roumania, and has a son, born Oct. 15, 1893, and a daughter: the second, Victoria Melita, married her cousin, the Grand Duke of Hesse, April 19, 1894; and the third, Alexandra, married to Hereditary Prince of Hohenlohe-Langenburg.

Her Royal Highness Helena Augusta Victoria, born May 25, 1846; married to His Royal Highness Prince Frederick Christian Charles Augustus of Schleswig-Holstein-Sonderburg-Augustenburg, July 5, 1866; issue living, one son and two daughters.

Her Royal Highness Louise Caroline Alberta, born March 18, 1848, married to the Marquis of Lorne, March 21, 1871; no issue.

His Royal Highness Arthur William Patrick Albert, Duke of Connaught and Strathearn, born May 1, 1850; married to Princess Louise Margaret of Prussia, March 13, 1879; issue, a daughter, Margaret, born Jan. 15, 1882; a son, Arthur, Earl of Sussex, born Jan. 13, 1883; and a daughter, Victoria, born March 17, 1886.

His Royal Highness Leopold George Duncan Albert, Duke of Albany, born April 7, 1853; married to Princess Helene of Waldeck, April 27, 1882; died March 28, 1884; issue, a daughter, Alice Mary, born Feb. 25, 1883; and a son, Leopold, Duke of Albany, born July 19, 1884.

Her Royal Highness Beatrice Mary Victoria Feodore, born April 14, 1857; married July 23, 1885, to his Royal Highness Prince Henry of Battenburg (died Jan. 20, 1896); issue, three sons and a daughter.

George Frederick William Charles, K.G., DUKE OF CAMBRIDGE, cousin to Her Majesty, born March 26, 1819. Augusta Caroline Charlotte Elizabeth Mary Sophia Louisa, daughter of the late Duke of Cambridge, and cousin to Her Majesty, born July 19, 1822; married, June 28, 1843, to Frederick, Grand Duke of Mecklenburg-Strelitz, and has issue a son. Mary Adelaide Wilhelmina Elizabeth, daughter of the late Duke of Cambridge, and cousin to Her Majesty; born Nov. 27, 1833; married the Duke of Teck, June 12, 1866 (died October 27, 1897); issue three sons and one daughter (now Duchess of York).

TRANSFER DAYS.—Monday, Tuesday, Wednesday, Thursday, Friday. Instructions for transfers are received between 9.30 and 1; and between 1 and 3, on payment of 2s. 6d. Transfers must be executed between 11 and 3. Transfers can be accepted between 9.30 and 4 (9.30 and 2 on Saturdays). Transfers can be made on Saturdays between 11 and 1, upon payment of a fee of 2s. 6d. Dividends accepted and paid, 9 to 4 (9 to 2 on Saturdays).

PAYMENT OF DIVIDENDS.

Dividends are paid in one of the following modes:—

I. To the Stockholders personally, or to their attorneys, at the Bank of England. [Stockholders may arrange for the receipt of their dividends, free of charge, at any of the country branches, on application to the agent.]

II. By transmission of dividend-warrants by post, at the risk of the Stockholder, under the following regulations:—

1. Any Stockholder residing within the United Kingdom who desires to have his dividend-warrant sent to his address by post, must fill up a form of application, to be obtained at the Bank or at any of its branches, and for English Government Stocks at any Money Order Office.

2. In the case of joint accounts, the application must be signed by all the members of the account, directing the warrant to be sent to one of them at a given address.

The dividend office is open from 9 a.m. to 4 p.m., except Saturdays when it closes at 2.

POWERS OF ATTORNEY.

Applications for Powers of Attorney must be lodged by hand at the Power of Attorney Office. Applications made through the Post cannot be attended to. Applications are received between the hours of 9.30 A.M. and 4 P.M. (9.30 A.M. and 2 P.M. on Saturdays), but if Sale or Transfer Powers are required, before 4 P.M. the same day, applications must be lodged before 12.30 P.M., or 2 P.M., with a fee of 2s. 6d. (on Saturdays, 11 A.M. or 12 noon, with a fee of 2s. 6d.) Powers of Attorney for Dividends will be ready after 2 P.M. (1 P.M. on Saturdays,) on the day *after* that on which they are applied for. Powers for Acceptance, Sale, or Transfer cost 11s. 6d.; powers for Acceptance, Sale or Transfer, or Sale and Transfer combined, and Dividends. 11s. 6d; powers for Acceptance and Sale or Transfer, or Sale and Transfer combined, 11s. 6d.; powers for Sale or Transfer, or Sale and Transfer combined, and Dividends, 11s. 6d. Powers for Sale of Stock *where the nominal amount does not exceed* £100, cost 4s. Powers for Dividends *only* cost 5s. Powers for a *Single* Dividend cost 1s. Powers for the receipt of Dividends *under* £3 *per annum*, on Government Stock, FREE.

Executed Powers *for Dividends only*, which must be presented for examination at the *Dividend Office*, if in order, may be acted upon at once.

Executed Powers *for Sale, Transfer, &c.*, which must be presented for examination at the *Power of Attorney Office*, if lodged before 2 P.M. (12 noon on Saturdays), and found to be in order, may be acted upon on the following day.

LIFE ANNUITIES.

All communications with respect to the Purchase, &c., of Life Annuities must be addressed to the National Debt Commissioners, Old Jewry, E.C., at whose Office the Warrants for the half-yearly or quarterly payments are issued.

The Dividends are payable in January and July, or April and October; or in January, April, July and October.

Warrants can be sent by Post upon application being made to the National Debt Commissioners.

Lloyd's Register Book is issued on or about July 1st in each year. The books of subscribers resident in London can, if desired, be returned every week to the office for correction. Country and Foreign subscribers, as well as London subscribers, who do not return their books weekly, have fortnightly lists of corrections sent them.

Besides the Register Book, the Committee publish a Yacht Register, containing detailed particulars of all yachts classed by the Society; the names, dimensions, flags, &c., of all British and Foreign yachts, the particulars of which are known, and other interesting information. The *Yacht Register* is issued annually on the 1st of May.

The following is a list of surveyors to the society, resident in the Australasian colonies.

PEOPLE'S PALACE, Mile End Road, E.

CAB FARES IN LONDON.

BY DISTANCE.

If taken from a regular cabstand, *One Shilling* for any distance not exceeding two miles, and *Sixpence* for every mile or part of a mile beyond.

If the cab be engaged beyond the four mile radius from Charing Cross, the fare is *One Shilling* per mile to the place where it is

discharged, whether in or out of the radius; if engaged within the four mile radius, but discharged outside, not exceeding one mile *One Shilling*; exceeding one mile, then for each mile ended within the radius, *Sixpence*, and each mile ended outside *One Shilling*.

For stoppages the rate is *Sixpence* for four-wheel and *Eightpence* for hansom cab for every fifteen minutes, if hired within the radius; if hired without, it is *eightpence* for either two or four wheels.

BY TIME.

Inside the four mile radius for any time not exceeding the hour, *Two Shillings* for close cabs, and *Two Shillings and Sixpence* for hansoms. After the hour *Sixpence* for every fifteen minutes for four-wheeled cabs, and *Eightpence* for hansoms.

If hired outside the radius, *Two Shillings and Sixpence* per hour, and *eightpence* every quarter of an hour beyond. The same applies if hired *within*, but discharged *outside* the radius.

When more than two persons are conveyed, a sum of *Sixpence* for each person above the number of two is to be paid for the whole hiring, in addition to the fare: two children under ten years count as an adult person.

No driver, if hired by distance, can be compelled to drive more than *Six* miles from the place of hiring. Every driver is required to deliver a ticket to the hirer, also to produce a Book of Fares when desired.

LUGGAGE.—*Twopence* for every package carried outside the cab.

(Telegrapic Address, "Surdal"), and 3, (dock stands) Old Corn Exchange, E.C.

STEAMSHIP BERTHS.—The following list shows the stations at which passengers should alight for the various lines of steamers berthed in the Royal Albert and Victoria, East and West India, South West India, and Tilbury Docks:—Aberdeen Line (to and from Australia), Gallions station, R.A.D.; British India Steam Navigation Company, Central Station, R.A.D.; Messageries Maritimes de France, Central Station, R.A.D.; New Zealand Shipping Company, Manor Way Station, R.A.D.; Ocean Steamship Company, Connaught Road Station, R.A.D.; Peninsular and Oriental Steam Navigation Company, Central Station R.A.D.; Shaw-Savill and Albion Company, Manor Way Station, R.A.D.; Houlder Bros. and Co.'s River Plate Line, South Dock Station, S.W.I.D.; London Line to Australia, South Dock Station, S.W.I.D.; Anglo-Australasian Line, Tilbury Docks Station T.D.; Orient Line, Tilbury Docks Station, T.D. The North German Lloyd use the London or St. Katharine Docks, which are within a few minutes' walk of the Tower.

The London Docks and St. Katharine's Docks adjoin each other in Upper East Smithfield. The road to them, taking the Bank of England as the starting-point, is by way of Cornhill, Leadenhall Street, Aldgate, and the Minories. The West India Docks and the South Dock (S. W. I. D.) lie between Poplar and Millwall. They are reached by the London and Blackwall Railway from Fenchurch Street. There is a station at the Dock gates, called the West India Dock Station. Passengers for the South Dock go on to the Millwall Junction, there changing into a train running through the Dock and on to the Isle of Dogs, in connection with Steam Ferry to Greenwich. The East India Docks are at Blackwall, which is the terminus of the London and Blackwall Line. The Victoria Docks are a little further down the river. Trains from Fenchurch Street put passengers down at Tidal Basin, or Custom House Station or carry them on to the Albert Docks (contiguous to the Royal Victoria), at which are four Railway Stations, viz.: Connaught Road, Central, Manor Way, and Gallions.

BRITISH CUSTOMS' TARIFF.

	£	s.	d.
BEER: Beer called Mum, Spruce, or Black Beer, and beer called Berlin White Beer, and other preparations, whether fermented or not fermented, of a character similar to mum, spruce or black beer, the worts of which were, before fermentation, of a specific gravity not exceeding 1,215 degrees, for every 36 gallons	1	12	0

All articles upon which duties are levied by the Board of Inland Revenue, are charged with countervailing duties if imported from abroad, for which see Tariff.

PASSENGERS' BAGGAGE.—The luggage of all Passengers arriving in England is subjected to examination; but the Customs House Officers are instructed to exercise a liberal discretion in carrying out their duties, and very little trouble is given to Australian Passengers unless there be an attempt at concealment of dutiable goods. The foreign Tariff will show what come under this head. All merchandise brought by Passengers must be entered and passed in the usual manner, or it is liable to forfeiture, together with any other goods with which it may be packed. Passengers' boxes and effects are usually sent to the Baggage Warehouse for examination; the owner, or agent appointed by him, being present when the inspection is made. There are several agents in London who make this their special business, supposing the owner has not the time or inclination to see after it himself; the captain or officers of the ship can generally name reliable persons.

RATES OF BROKERAGE.

The Charges usually made by brokers in buying and selling stock (Shares of all kinds, Debentures, &c.) are about as follows; there is, however, no fixed commission either among themselves, or recognised by the Committee of the Stock Exchange.

Sale of Stock under £50, ¼ per cent.

TAXES, LICENSES, AND STAMP DUTIES.

TAXES.

INHABITED HOUSES OF THE ANNUAL VALUE OF £20 AND UNDER £40.—The duty is 2d. in the pound per year in respect of dwelling-houses occupied by any person in trade who shall expose to sale and sell any goods in any shop or warehouse, being part of the same dwelling-house, and in front and on the ground or basement story thereof; or by a person licensed to sell therein, by retail, beer; hotel or coffee-house keeper; or as a farm-house by a tenant or farm servant, and *bonâ fide* use for the purpose of husbandry only. If not so used or occupied, 3d. in the pound. From £40 to £60, 4d. if used as above. If not so used or occupied, 6d.; Exceeding £60, 6d. and 9d. respectively.

PROPERTY AND INCOME TAX:—

		£	s.	d.
Schedule A, Lands, Tenements, &c.	In the £	0	1	0
,, B, Occupiers of Farms, &c.		0	1	0
Schedules C, D, and E (Income)		0	1	0

If under £160, exempt; if under £400, the tax is not chargeable upon the first £160. Above £400 and up to £500, an abatement of £100. Other exemptions: The premiums paid by a person for an Assurance on his own life, or on the life of his wife, or for a Deferred Annuity to his Widow, are declared free from Income Tax, provided such Premiums do not exceed one sixth of his returnable income. The balance of average profits for the three years previous, from April to April, deductions allowed to be made for repairs of premises occupied for purposes of trade, and supply and repair of implements and utensils employed in trade or profession.

FOREIGN MONEYS, AND THEIR ENGLISH EQUIVALENTS.

It is only possible to give the approximate value in English money of Foreign coins. In Cornhill, Messrs. Cook & Son's, Ludgate Circus, and other parts of London, are offices where money can be exchanged by tourists or travellers to the Continent or elsewhere, but in nearly all places the English sovereign is available.

RUSSIA.

Monetary Unit—Rouble of 100 Kopeks.

1 rouble	0	2	1½

The circulating medium of Russia is entirely forced paper currency, nickel and copper being used for fractions of the rouble. The notes are 1, 3, 5, 10, 25, 50, 100.

SOUTH AFRICA.

The coinage is the same as in England, except in the Transvaal and Portuguese Territory. English gold circulates freely, and notes are issued by the local Banks under arrangement with the Government for 10s., £1, £5, £10, £20, and £50, and are legal tender throughout British South Africa.

On Portuguese territory the milreis (1,000 reis), about 3s., is principally used.

In the Transvaal the coins are similar to those of Great Britain, but only circulate at par in the South African Republic.

POSTAL REGULATIONS.

Postmaster-General—MARQUESS OF LONDONDERRY, K.G.

Secretary—Sir G. H. MURRAY, K.C.B.

Second Secretary—J. C. LAMB, Esq., C.B., C.C.M.

Assistant Secretaries—G. W. SMYTH, Esq., H. B. FORMAN, Esq., C.B., E. YELD, Esq., C.B., J. ARDRON, Esq., W. ROCHE, Esq., and S. R. THOMPSON, Esq.

COLONIAL AND FOREIGN.

POSTAL RATES.—The rates of prepaid postages to New South Wales, Victoria, South Australia, Queensland, Western Australia, Tasmania, British New Guinea, by all routes, are, for letters—2½d. per ½ oz.; postcards, single, 1d. each, reply, 2d. each. Foreign postage to all places is also 2½d. the ½ oz. Bechuanaland, Rhodesia, the West Coast, and Zanzibar, are included in these rates. The charge for letters to New Zealand, Canada, Newfoundland, The Cape, British Central Africa, British East Africa, Natal, India, Ceylon, Fiji, the Orange River Colony (Orange Free State), the Transvaal, and any Crown colony reciprocating, is 1d. the ½ oz., and for any other part of the world outside the United Kingdom, with few exceptions, the postage of a prepaid letter is 2½d. the ½ oz. The 1d. postcards and 2d. reply postcards are available for transmission to all places abroad. Private cards bearing adhesive penny stamps, and private reply cards with adhesive penny stamps on each half are now admissible as postcards, provided they are in conformity with the official postcards, and that they have the words "postcard" printed on the address side, without the Royal Arms. The reply halves of private double cards which will be available only for return to Great Britain, must bear in print the words "Post Card—Great Britain and Ireland," and "Reply."

Letters for the colonies and foreign countries must not exceed 2 ft. in length by 1 ft. in width or depth. The registration fee in all cases is 2d. Letters can be sent to passengers.

Letters sent to passengers on board mail steamers must be registered and sent addressed care of the commander of the packet.

NEWSPAPERS, BOOKS, PATTERNS, &c., FOR PLACES ABROAD.—The postage chargeable on newspapers, books, printed papers, commercial papers, patterns, and samples for all destinations outside the United Kingdom, is fixed uniformly at the undermentioned rates:—

For newspapers, books, and printed papers generally, per 2 oz. ... ... ½d.

For patterns and samples, per 2 oz., but with a minimum charge of 1d.... ... ... ½d

For commercial papers, per 2 oz., but with a minimum charge of 2½d. for which sum a weight of 10 oz. may be sent.

The postage on packets containing more than one newspaper is no longer chargeable on each paper, but simply according to the bulk weight of the packet.

The above-named rates should in all cases be prepaid: no packet can be sent forward wholly unpaid; but if by inadvertence the postage is insufficiently prepaid, double the deficit will be chargeable on delivery.

Newspapers for abroad, if not posted within eight days of publication, must be prepaid at the book rates of postage.

COLONIAL AND FOREIGN PARCEL POST.—Parcels must not exceed certain limits in weight and size, which vary according to the country they are sent to. Every parcel must have a customs declaration respecting the contents, such declaration to be made out on a form obtainable at any post office. Arrangements have been made whereby persons sending parcels to New South Wales, Victoria, New Zealand, Tasmania, Cape Colony, Natal, and some foreign countries can pay the customs and other charges usually payable by the addressees. Otherwise the postage cannot be prepaid but is collected on delivery. Certain articles are forbidden.

Insurance can be effected on parcels to most foreign countries and British Colonies.

The postal charges to the Australasian Colonies are—For the first lb., 1s.; for each additional lb. or fraction of a lb. up to 11 lb., 6d. To the Fiji Islands—For the first lb., 1s.; for each additional lb. or fraction of a lb., 8d. Parcels for New Zealand exceeding 5 lbs. in weight, 2 ft. in length, or 1 ft. in breadth or depth are only delivered at places to which there is regular communication by railway, coach, or steamer. A list of places where parcels cannot be delivered may be seen at any post office.

The dimensions must not exceed 3 ft. 6 in. in length, or 6 ft. length and girth combined.

Parcels to New South Wales, Victoria, South Australia, Queensland, Western Australia and Tasmania, are conveyed by the P. & O. and Orient Co.'s steamers. Those to New Zealand are carried by the New Zealand Shipping Co. and the Shaw, Savill & Albion Co.'s steamers.

REGISTRATION OF PARCELS, as well as letters, to a number of British colonies, now insures compensation up to £50. If not registered, the Post Office accepts a liability up to £1.

TELEGRAMS TO THE COLONIES.—See Telegraphic Communication between England and Australia, *post*.

POSTAL ORDERS for certain fixed sums from 1s. up to £1 are issued in the United Kingdom, and at Malta, Gibraltar, Constantinople, India, Straits Settlements, Hong Kong, and Newfoundland, at the following rates—

s.	d.		s.	d.
For 1	0 ... ... ½d.	For 4	6 ... ... 1d.	
,, 1	6 ... ... ½d.	,, 5	0 ... ... 1d.

,, 3	6 ... ... 1d.	,, 15	0 ... ... 1½d.	
,, 4	0 ... ... 1d.	,, 20	0 ... ... 1½d.	

INLAND.

POSTAL RATES.—Letters to or from any part of the United Kingdom are charged at the following rates, viz.:—

Not above 4 oz. ... . 1d.

and so on at the rate of ½d. for every additional 2 ozs.

No letter may be above 2 ft. in length or 1 ft. in width, unless it be sent to or from one of the Government Offices. A letter posted unpaid is chargeable on delivery with double postage; if insufficiently paid, with double the deficiency.

LETTERS IN ENVELOPES ORNAMENTED are permissible, provided the right hand half is left quite clear for the stamp and address.

BOOK POST.—The rate charged is ½d. for every 2 oz., or part of that weight, and packets exceeding 2 oz. now pass unconditionally at the rate of 1d. for the first 4 oz. and ½d. for every additional 2 oz. A book-packet must not contain any letter or communication, and must not exceed the following dimensions: 2 ft. in length or 1 ft. in width or depth, unless it be sent to or from a Government Office.

Registration.—Any letter, newspaper, or book packet may be registered to any place in the United Kingdom for a fee of 2d.

Circulars and Accounts, inclusive of type-written documents, are transmitted at the halfpenny circular rate. No extra charge is made for re-addressing letters, provided they are re-posted not later than the day after delivery, and do not appear to have been opened.

Postcards (United Kingdom).—With impressed ½d. stamp, are sold singly or in packets of ten—stout, 6d.; thin, 5½d. Double or reply postcards and letter-cards are 1½d. each. Private cards bearing adhesive halfpenny stamps may also be used as postcards. They should correspond, both in size and thickness of cardboard, to the official postcard.

Newspapers.—Every newspaper or packet of newspapers must be posted either without a cover, or in a cover open at both ends, and so that the same can be easily removed for the purpose of examination. The sender is permitted to put a distinguishing mark on the cover of a newspaper referring to a special article. Publications issued at short intervals are sent through the post at newspaper rates, provided that they have been registered at the General Post Office for circulation as newspapers.

The charge for each registered newspaper, whether posted singly or with others in a packet, is ½d; but a packet of newspapers is not chargeable at a higher rate than that of book postage, viz.:—½d. for every 2 oz. or part of that weight. No packet of newspapers is permitted to be above 5 lbs. in weight, 2 ft. in length, or 1 ft. in width or depth.

	s.	d.
Inland Parcel Post.—Not exceeding 1 lb. in weight	0	3
Over 1 lb. and not exceeding 2 lbs. in weight	0	4
,, 2 lbs. ,, 3 lbs. ,, ...	0	5
,, 3 lbs. ,, 4 lbs. ,, ...	0	6
,, 4 lbs. ,, 5 lbs. ,, ...	0	7
,, 5 lbs. ,, 6 lbs. ,, ...	0	8
,, 6 lbs. ,, 7 lbs. ,, ...	0	9
,, 7 lbs. ,, 8 lbs. ,, ...	0	10
,, 8 lbs. ,, 9 lbs. ,, ...	0	11
,, 9 lbs. ,, 11 lbs. ,, ...	1	0

The dimensions allowed for an Inland Post Parcel are: Maximum length, 3 ft. 6 in.; maximum length and girth combined, 6 ft. Weight not to exceed 11 lbs. Postage in all cases must be prepaid.

Telegrams (United Kingdom).—The charge is 6d. for the first twelve words and ½d. for every additional word. Addresses are charged for.

Most of the Telegraph Offices in the United Kingdom, the District London Offices excepted, are open between 8 a.m. and 8 p.m. Sundays usually from 8 a.m. to 10 a.m. in England, and from 9 a.m. to 10 a.m. in Scotland and Ireland. Postmasters may accept telegrams after the usual hours on payment of an additional fee.

Money Orders.—The rates are—

On sums not exceeding £1	2d.
Above £1 and not exceeding £3...	3d.
,, £3 ,, ,, £10...	4d.

above which sum no single order can be granted.

Telegraphic Money Orders may now be transmitted between all Post Offices in the United Kingdom authorised to transact Telegraph and Money Order business. The following is the poundage to be paid—

For sums not exceeding £3	4d.
For sums above £3 and not exceeding £10	6d.

which is the limited amount that can be sent.

In addition to the above the person at whose request the telegraphic money order is issued is required to pay the ordinary telegraph rates.

Post Office Savings Banks.—Every money-order office receives deposits of one shilling (or twelve penny stamps on an official form), or any number of pounds and shillings, from any depositor, provided the sums deposited do not exceed £50 in any year ending December 31, and the total amount standing in the depositor's name does not exceed £200, inclusive of interest.

Investment in Government Stock.—By the Savings Bank Act any depositor in a savings bank who desires to invest a certain sum in Government Stock must send to the savings bank, together with his deposit book, an application signed by him on a form to be obtained at any Post Office Savings Bank. The minimum amount of stock which may be purchased or sold is one shilling; the annual limit for such investment is £200, and the whole amount of stock credited to any one account may not exceed £500.

Government Annuities, &c.—The Postmaster-General is empowered to insure the lives of persons of either sex between the ages of fourteen and sixty-five for not less than £5, or more than £100; and also to grant immediate or deferred annuities on the lives of persons of either sex, of the age of five years and upwards

Stamp Duties.—Adhesive Postage and Revenue Stamps may now be used for the purpose of denoting the stamp duties chargeable on the following documents:—

Agreements, under hand only, where liable to the fixed duty of 6d.
Bills of Exchange (including cheques) for the payment of money *on demand* (duty, 1d.)
Certified copies of, or extracts from, Registers of Births, &c. (duty, 1d.)
Charter Parties (duty, 6d.)
Contract Notes advising the sale or purchase of any Stock or marketable security of a less value than £100 (duty, 1d.)
Delivery Orders (duty, 1d.)
Lease or Tack, or Agreement for a Lease or Tack, for any definite term less than or not exceeding a year—
(a) Of a Dwelling-house, or part of a Dwelling-house, at a rent not exceeding the rate of £10 a year (duty, 1d.)
(b) Of a Furnished Dwelling-house or Apartments (duties, 6d., 1s., 1s. 6d., 2s., and 2s. 6d., according to the rent).
Letters of Renunciation (duty, 1d.)
Notarial Acts (duty, 1s.)
Policies of Insurance, not Life or Marine (duty 1d.)
Protests of Bills of Exchange or of Promissory Notes (duties, 1d., 2d., 3d., 6d., 9d., in agreement with the duty on the Bill or Note, and 1s. when the Bill or Note is stamped with 1s. or upwards).
Proxies (where liable to the duty of 1d. only.)
Receipts (duty, 1d.)
Transfers of Shares in Cost-Book Mines (duty, 6d.)
Voting Papers (duty, 1d.)
Warrants for Goods (duty, 3d.)

STATISTICS OF THE UNITED KINGDOM.

The revenue of the United Kingdom for the financial year ending March 31, 1900, was £119,839,905, showing an increase on the previous year of £11,503,712. The returns for the principal departments were:—Customs, £23,800,000; excise, £32,100,000; stamps, £8,500,000; estate duties, £14,020,000; land tax, £790,000; property and income-tax, £18,750,000; post office, £13,300,000; telegraph service, £3,350,000; crown lands, £450,000; Suez Canal Share Receipts, £834,003; miscellaneous, £2,275,902. As compared with 1899, the differences were:—On customs, an increase of £2,950,000; on excise, an increase of £2,900,000; on stamps, an increase of £20,000; on estate duties, an increase of £870,000; on property and income tax, an increase of £750,000: on land tax an incease of £20,000; on house duty an increase of £70,000; on the postal department there was an increase of £590,000, and on the telegraph service an increase of £200,000. The net receipts from Crown lands increase of £20,000, Suez Canal Share Receipts, show an increase of £120,449, and there was an increase of £343,263 in the miscellaneous receipts. The total expenditure for the year was £133,722,407, being £25,572,171 more than in 1899. The National Debt services absorbed £23,216,657; the civil list and civil charges of all kinds, £23,899,810; the expenditure on behalf of the naval and military forces amounted to £69,815,000, while the charges for the collection of the revenue were as follows: Packet service, £760,000; telegraph service, £3,601,000; post office, £8,480,000; customs and inland revenue, £2,800,000. The expenditure of the year amounted to £133,722,407, the revenue £119,839,905, showing a deficit of £13,882,502.

On April 1, 1900, the actual amount of the National Debt (funded) was £552,606,898, showing a decrease of £30,579,404 since the same date in 1899. The aggregate gross liabilities of the State on April 1st, 1900, were £639,165,265, and a like period in 1899 £635,040,965.

Population.—The English census was taken on the night of April 5, 1891, when it was found that the total number of persons in England and Wales was 29,001,018. This shows an increase of 3,026,572, or 11·65 per cent upon the figures for 1881.

The proportion of females to males, which has been steadily increasing since 1851, is now 106·4 to 100, the figures in 1881 being 105·5 to 100; in 1871, 105·4 to 100; in 1861, 105·3 to 100; and in 1851, 104·2 to 100. The total number of males enumerated on April 5, 1891, was 14,050,340 and of females, 14,950,542. The rate of increase during the decennium was 11·2 for males and 12·1 for females. The number of families recorded in 1891 was 6,146,900, showing an increase of 513,708, or 9·1 per cent., since 1881. This increase is considerably less than that of the population; and, while the average number of individuals in a family was 4·6 in 1881, in 1891 it was 4·7. The number of inhabited houses has increased by 621,183, or 12·9 per cent.; whilst the number of uninhabited houses and houses in course of construction has declined, the former from 386,676 to 380,117, and the latter from 46,414 to 38,407. The increase of population is by no means equally spread over the country. In 261 of the registration areas there has been a falling off in the number of inhabitants; and even in the larger areas, such as counties, the rates are excessively unequal. The increase is highest in the counties affected by London—viz., Essex, Surrey, Middlesex, and Kent—or in those in which mining is predominant, such as Glamorganshire, Monmouthshire, Durham, and Northumberland. Then follow manufacturing counties, while last of all come the rural counties, either with rates of increase far below the general average, or with an actual decrease. Of the thirteen counties which show a decrease, ten—Brecknockshire, Pembrokeshire, Radnorshire, Montgomeryshire, Cardiganshire, Cornwall, Huntingdonshire, Rutland, Herefordshire, and Shropshire—also show a decline in 1891. In nine out of the twelve Welsh counties there is a decrease. There were in 1891 sixty-two towns in England and Wales with populations exceeding 50,000. In London the population is 4,211,056; in Liverpool, 517,951; in Manchester, 505,343; and in Birmingham, 429,171. The rates of increase differ enormously in the different towns, and, while there are some in the immediate neighbourhood of London, such as Tottenham, Leyton, and Willesden, which have doubled, or more than doubled, their populations during the ten years, there are others in which the increase has been considerably less than that of the country at large. In all, however, with one important exception, there has been some amount of increase. The exception is Liverpool, in which city, second only to London in population, there has been a decline of 6·3 per cent. The population of England and Wales now forms 72·8 per cent., or nearly three-quarters, of the total population of the United Kingdom, the proportion borne by this part of Great Britain having increased uninterruptedly with each successive decennium. The

population of Scotland constitutes 10·7 per cent. of the whole, which was also the proportion in the two preceding enumerations. On the other hand, the inhabitants of Ireland, who in 1821-31 were nearly one-third of the aggregate population, now form only 12·5 per cent., or one-eighth of it. The total population of the islands in British seas is 147,870, as against 141,260 in 1881.

According to the latest returns of the Registrar-General, the estimated population of the United Kingdom was 40,909,925, in June, 1900, exclusive of Army, Navy, and Merchant seamen abroad.

Agriculture.—The Agricultural returns for the United Kingdom for 1899 show that the total acreage under all crops including bare fallow and grass, was 47,795,270 acres, being 2,796 more than the previous year. The following are the details:—

CROP AREAS OF THE UNITED KINGDOM IN 1898 AND 1899.

Crops.	1898.	1899.	+ Increase. − Decrease.
	Acres.	Acres.	Acres.
Corn Crops:—			
Wheat	2,158,465	2,055,283	− 103,182
Barley or Bere	2,068,760	2,159,396	+ 90,636
Oats	4,097,791	4,109,964	+ 12,173
Rye	81,285	64,440	− 16,845
Beans	233,827	251,191	+ 17,364
Peas	176,628	163,325	− 13,303
Total Corn Crops	8,816,756	8,803,599	− 13,157
Green Crops:—			
Potatoes	1,201,417	1,222,614	+ 21,197
Turnips and Swedes	2,087,505	2,050,422	− 37,083
Mangolds	408,812	437,307	+ 28,495
Cabbage, Kohl Rabi, and Rape	214,970	219,283	+ 4,313
Vetches or Tares	197,420	189,769	− 7,651
Other Green Crops	151,317	154,668	+ 3,351
Total Green Crops	4,261,441	4,274,063	+ 12,822
Clover, Sainfoin, and Rotation Grasses:—			
For Hay	3,047,585	2,852,544	− 195,041
Not for Hay	3,163,427	3,253,288	+ 89,861
Total	6,211,012	6,105,832	− 105,180
Permanent Pasture:—			
For Hay	6,064,891	5,838,960	− 225,931
Not for Hay	21,913,808	22,261,712	+ 347,904
Total	27,978,699	28,100,672	+ 121,973
Other Crops:—			
Flax	35,391	35,463	+ 72
Hops	49,735	51,843	+ 2,108
Small Fruit	*70,238	—	—
Bare Fallow or Uncropped Arable Land	369,202	351,835	− 17,367

The average yield of wheat for the year 1899 was 32·75 bushels per acre, which is above the average, whilst barley yielded 34·16 bushels per acre, also over the average amount.

* Not separately returned in Ireland.

The following tables give the figures of the farm live stock for the whole of the United Kingdom:—

FARM LIVE STOCK IN THE UNITED KINGDOM IN 1898 AND 1899.

Stock.	1898.	1899.	+ Increase. − Decrease.
	No.	No.	No.
*Horses	2,040,330	2,028,092	− 12,238
Cattle:—			
Cows and Heifers, in Milk or in Calf	4,035,501	4,133,249	+ 97,748
Other Cattle:—			
Two years and above	2,414,205	2,357,207	− 56,998
Under two years	4,699,506	4,854,240	+ 154,734
Total Cattle	11,149,212	11,344,696	+ 195,484
Sheep:—			
One year and above	18,897,390	19,097,534	+ 200,144
Under one year	12,204,969	12,582,691	+ 377,722
Total Sheep	31,102,359	31,680,225	+ 577,866
Pigs	3,719,219	4,003,589	+ 204,370

* Great Britain, not separately returned for Ireland.

Education.—The total number of schools under Government inspection in 1899, in England and Wales was 20,064. These were capable of accommodating 6,417,514 children. The average daily attendance was 4,636,938. The Parliamentary grant (annual and fee) for education was £7,237,028. There were also inspected 5,0008 evening schools with 474,563 scholars on register, and 201,185 in average attendance. Grants were made for examination and attendance amounting to £5,072,818. Free grants for day scholars £2,329,300 Grants to voluntary schools, £621,516, &c. There were, on September 30th, 1899, in Scotland 3,062 separate institutions inspected, with 731,272 scholars on registers, average attendance, 612,457. The Parliamentary grant to day inspected schools for examination and attendance, £741,871, and for free grants, £321,397. The income per scholar in average attendance was £2 11s. 5d. There were 950 evening continuation schools inspected—49,202 scholars. The number of schools in operation in Ireland was 8,670, with accommodation for 879,700 pupils. The average number in attendance was 513,852, while 785,113 were on the rolls. The expenditure amounted to £1,215,816, giving an average of £2 7s. 11d.

Post Office.—The gross estimated revenue of the postal department for the financial year ending March 31, 1900, was £13,394,394, payments out for conveyance of mails, £1,474,132, net receipts, £13,192,020, as against £13,049,317 gross revenue, £1,473,719 payments out, and £12,841,309 net receipts in 1899. It is estimated that during the twelve months there were delivered in the United Kingdom 2,246,800,000 letters, at the rate of 55·3 per head, an increase per cent. of 2·7; 400,300,000 postcards, at the rate of 9·8 per head, and an increase per cent. of 4·7; 702,800,000 book-packets, circulars and samples at an average of 17·3 per head, and an increase per cent. of ·2, and 163,400,000 newspapers, at an average of 4·0 per head, and an increase per cent. of 6·0, making a total of 3,558,748,000. There were also delivered 74,448,000 parcels, an increase per cent. of 4·9 making a grand total of 3,588,748,000. The number of letters registered was 16,256,852, an increase at the rate of 6·7 per cent. Of the 2,246,800,000 letters delivered, 1,908,900,000, were delivered in England and Wales, 632,600,000 being delivered in the London Postal District alone, 196,800,000 in Scotland, and 141,100,000 in Ireland. The number of post offices opened during the year was 371, and the number of new pillar and letter-boxes has been increased by 1,152. The total number of post offices open on March 31st was 21,940, and the number of pillar and wall-boxes to 32,593. Of 8,954,041 letters dealt with in the Returned Letter Offices throughout the country, 7,924,008 were re-issued to corrected addresses, or were returned to the senders, 331,739 were returned unopened to the post offices of foreign countries, and 698,294 remained which could not be disposed of. The value of property opened in the Returned Letter Offices amounted to £725,613. The number of postal packets posted without address, 288,677, 2,767 of which contained property to the value of £9,764. The total number of persons in the service of the department was 167,070, of whom 91,273 were established officers. 75,957 persons were employed *not* on the permanent establishment. Much time and labour is devoted every year to perfecting the organisation of the numerous branches into which the staff of this great department is divided. The number of parcels delivered in the United Kingdom in year ending 31st March, 1900, was 75,448,000, an increase on the preceding year of 2·6 %. The parcel post has steadily grown in popularity since its establishment in 1883. The number of parcels sent to and received from places abroad was 2,510,615, an increase of 12 per cent. on the number for previous year.

Money and Postal Orders.— The number and amount of money orders dealt with in the United Kingdom to the 31st of March, 1900, was as follows:—

Orders issued in United Kingdom.	Number. 1898–99.	Number. 1899–1900.
Inland	9,721,647	10,292,890
Colonial	142,169	142,574
Foreign	400,691	407,128
	10,264,507	10,842,592
Orders issued abroad and paid in United Kingdom:—		
Colonial	451,245	474,766
Foreign	759,449	770,101
	11,475,201	12,087,459

Orders issued in United Kingdom.	Amount. 1898–99.	Amount. 1899–1900.
Inland	£28,604,078	£30,505,351
Colonial	497,629	476,631
Foreign	1,015,170	—
	30,116,877	30,981,982
Orders issued abroad and paid in United Kingdom:—		
Colonial	1,360,678	1,399,780
Foreign	1,800,962	1,780,011
	£33,278,517	£34,161,773

The number of ordinary inland money orders increased over the previous year by 3·8 per cent. in number, and 5·5 per cent. in amount. Telegraph Money Orders, increased 21 per cent in number and 13·7 in amount. The total number of Inland Money

Orders in 1899-1900 was 10,292,894, of the value of £30,505,351, and shows an increase of 571,243 in the number and an increase in the amount of £1,901,273. The Money Orders issued to the Colonies show increase in number of 405, but a decrease in amount of £20,998, and Foreign Countries show an increase. There were issued in United Kingdom and paid abroad 549,702 as against 524,860, in 1898-9, an increase of 16,842, and the amount was £1,516,120 as against £1,512,799, an increase of £3,321. The homeward remittances from the Colonies increased to the extent of 23,521 in number, £39,102 in amount. On November 1st, 1898, the exchange of Telegraph Money Orders with Germany commenced, and has been extended in the past year to Austria, Belgium, Holland, Hungary, Luxemburg, Norway, Roumania, and Switzerland. The number of postal orders issued during the year in the United Kingdom was 82,115,674, or 5,340,475 more than in the previous year, and of the value of £28,638,884, or £1,416,448 more than in 1898-9.

The Post Office Savings Bank.—The deposits in the Post Office Savings Bank during the year 1899 numbered 14,654,600, amounting to £39,122,160, as against 13,757,244 and £37,361,838, the number and amount for the year 1898. The amount of interest credited to depositors was £3,000,000, an increase of £161,696. The number of accounts opened in 1899 was 1,373,799 and 957,621 were closed. The corresponding numbers for 1898 were respectively 1,233,395, and 942,654. The total number of accounts remaining open on the 31st December, 1899, was 8,046,680 or 416,178 more than in 1898, distributed as follows:—

	Number.	Average Balance due to each Depositor.
England and Wales	7,332,728	£16 0 10
Scotland	351,236	13 12 8
Ireland	362,716	21 5 2
United Kingdom, Total	8,046,680	16 3 5

The number of Offices for the transaction of Savings Bank business on December 31st, 1899, was 12,995, as against 12,582 at the close of the year 1898. The increase during the year was 413, as compared with an increase of 370 in the previous year.

Telegraphs.—The revenue (estimated) of the Post Office Telegraph for the financial year ending March 31st, 1900, was £3,460,492. Total expenditure, £3,748,930. During the year 1900 90,415,123 telegrams of all descriptions were sent, as compared with 87,043,652 in 1898-9. They were classified as Ordinary Inland, 74,151,385, Press (inland) 6,812,781, Foreign, 7,521,540, Railway, free, 1,443,766, Railway, half-rate, 31,456, and Government, 454,195.

Paupers.—On January 1, 1900, the total number of paupers of all classes in England and Wales in receipt of relief was 807,471, of whom 226,871 were indoor and 580,734 outdoor paupers, and 124 of which received both out and in relief. As compared with the 1st of January, 1899, these figures show the decrease in number of paupers was 13,625, making the number relieved about 1 in every 39 persons, or 2·5 of population. Of the total number, 94,869 were insane, 9,841 vagrants, of the remainder, 180,201 were adult males, 314,399, adult females, and 208,285 children under 16. On January 15, 1900, Scotland registered the number of poor of all classes as paupers and dependents, 100,695; and the number of vagrants, included in the preceding, as 172 paupers and dependents. Ireland on January 1st of 1900 had 43,820 indoor and 58,534 outdoor paupers; also 1,512 in blind and deaf and dumb asylums; total 108,866; in 1899, a total of 99,897.

The number of those in receipt of outdoor relief includes those paupers who were inmates of lunatic asylums, registered hospitals, or licensed houses.

Emigration.—The Emigration returns for 1899 show that the number of emigrants who left the United Kingdom was 240,696, against 215,171 in 1898; of this number 87,400 were English, 16,072 Scotch, 42,890 Irish, 90,020 Foreigners, 4,314 not distinguished. 159,143 went to the United States of America, 33,669 to British North America, 12,268 to Australasia, 18,863 to Cape of Good Hope and Natal, 16,753 to other countries. The number proceeding to Australasia was 1,248 more than in 1898.

The trades, occupations and professions of adult emigrants to Australasia were, Adult Males—Agricultural labourers, gardeners, carters, &c., 253; bakers, confectioners, &c., 72; blacksmiths and farriers, 6; boot and shoe makers, 16; braziers, tinsmiths, whitesmiths, &c., 2; brick and tile makers, potters, &c., 4; bricklayers, masons, plasterers, slaters, &c., 30, builders, 22; butchers, poulterers, &c., 59, cabinet-makers and upholsterers, 5; carpenters and joiners, 83; clerks and agents, 291; clock and watchmakers and jewellers, 13; coachmakers and trimmers, 1; coopers, 4; domestic servants, 47; engine drivers, stokers, &c., 12; engineers, 74; farmers and graziers, 613; founders, iron and brass moulders, &c., 6; gentlemen, professional men, merchants, &c., 1,988; general labourers, 807; mechanics, 61; millers, maltsters, &c., 5; miners and quarrymen, 319; painters, paperhangers, plumbers and glaziers, 36; printers, 15; railway servants, 15; saddlers and harness makers, 2; sawyers, 1; seamen, 24; shipwrights, 2; shopkeepers, shopmen, warehousemen, &c, 207; smiths, general, 3; spinners and weavers, 12; tailors, 32; tanners and curriers, 1; turners (wood), 2; wheelwrights and millwrights, 1. Army and Navy: officers, 39; men, 4. Other trades and professions, 181; occupation not stated; Adult Females—Domestic and farm servants, nurses, &c., 754; gentlewomen and governesses, 13; milliners, dressmakers, needlewomen, &c., 77; shopwomen, 22; spinners and weavers, 9; other trades and professions, 30; occupation not stated, 3,080. Total Adults, 10,105.

Coinage.—The total amount of moneys coined and delivered into store in the Royal Mint Office in 1899 was as follows:—gold, £7,515,978; silver, £1,615,850; bronze, £139,065. Light gold withdrawn from circulation for re-coinage, £1,781,045; the gold coin issued during the year amounted to £8,520,311. Silver money at its nominal value issued, £1,616,246; worn silver coin sent in for re-coinage, £3,386,199 2s. 1d., including 50,000 in double florins, now no longer coined, and in the process of complete withdrawal; bronze moneys issued, 42,562,800 coins, of the value of £139,065. The total amount of gold coined in the Royal Mint and its Australian branches amounted to £18,653,659 in 1899; of this amount the Bank of England received from Australia, £270,000. The weight of silver bullion bought during the year amounted to 4,874,441 ozs., the purchase value of which was £558,744 2s. 1d., at an average price of 27½ per oz. The gold received at the Sydney Mint during 1899 for coinage, weighed 948,742 ozs., the value amounted to £3,384,281, an increase in weight from 1898 of 228,777 oz., and in value of £72,601. Gold, silver and bronze coin of the nominal value of £3,324,000, £61,800 and £2,830 respectively was issued during the year. Worn silver coin to the nominal value of £12,227 7s. 4d. was withdrawn from circulation by the government of New South Wales. The total quantity of gold in 1899 received at the Melbourne Mint in bullion and rough gold was 1,520,739 ozs., which contained 1,498,533 ozs. of standard gold and 87,782 ozs. of pure silver. The quantity of gold received in 1899 was larger than that received in 1898 by 6,539 ozs, and is the largest quantity received in any year since its establishment in 1872. The gold coinage for the year amounted to £5,627,767, and in 1898, £5,509,138, an increase of £117,529. New silver coin to the value of £40,400 was received from the Royal Mint and £42,575 issued to the public; worn silver of the value of £2,990 was withdrawn from circulation; and bronze coin to the value of £2,000 was received, and £2,720 issued to the public. On June 20th, 1900, the Perth Mint was declared open by the Governor of Western Australia for receipt of gold for coinage, the first deposit being made on the day following. Since the starting of the Mint to December 31, 1900, 1,714 deposits have been made.

Bullion.—The declared value of the imports of gold and silver bullion and specie from Australasia in 1899 was £5,055,630 as against £7,566,249 in 1898.

Imports and Exports.—For the year 1899, the total imports were £485,035,583, being at the rate of £11 19s. 2d. per head of the population of the United Kingdom, as compared with £470,544,702, or £11 14s. 2d. per head, in 1898. The exports in 1899 of British and Foreign and Colonial produce, were £329,534,658 as against £294,013,988 in 1898. The total of imports and exports in 1899 was £814,570,241, being at the rate of £20 1s. 8d. per head of the population of the United Kingdom, as against £764,558,690, or £19 0s. 6d. per head in 1898. Towards the imports Australasia contributed £33,327,846 as against £28,850,284 in 1898, the total exports to Australasia amounting to £24,766,552 as against £23,430,006 in 1898. The declared value of British and Irish produce exported to Australasia was £22,526,194, divided as follows:—To Western Australia, £1,466,333; to South Australia, £1,777,022; to Victoria, £4,852,966; to New South Wales, £6,874,007; to Queensland, £2,457,244; to Tasmania, £529,584; to New Zealand, £4,543,131; and to the Fiji Islands, £25,907. The declared value of the Foreign and Colonial produce and manufactures exported to Australasia was £2,240,358 as against £2,306,920 in 1898. The imports of grain from Australasia in 1899 amounted to 3,703,030 cwt., valued at £1,247,744 as against 9,409 cwt. in 1898. Of the total quantity of wool imported—668,817,315 lbs.—427,126,462 lbs., were contributed by the Australasian Colonies.

Shipping.—In 1899 the total tonnage of British and foreign vessels (sailing and steam) entered amounted to 105,188,504, and cleared, 104,159,577, with cargoes and in ballast, at ports in the United Kingdom from and to foreign countries and British possessions, including 86,814,570 British, and 18,373,934 foreign. The numbers of British vessels employed in home and foreign trades and in fishing were:—Sailing vessels, 7,899, employing 54,333 British and foreign seamen; and steam vessels, 7,298, employing 189,802 British and foreign seamen. In the United Kingdom, during 1899, there were built for mercantile purposes, 570 sailing vessels with a tonnage of 45,510, and 675 steam vessels, with a tonnage of 703,904; for foreign countries, for war and mercantile purposes, 53 sailing vessels, tonnage, 4,973, and 188 steam vessels, tonnage, 194,623 (net). The number of fishing boats on the register for United Kingdom, Channel Islands, and Isle of Man in December, 1899, was 26,466; men and boys required to work the same, 106,652. The number of British and Colonial vessels wrecked during 1899 was 127, representing a tonnage of 111,594—56 sailing vessels, with a tonnage of 31,109 and 71 steam vessels, with a tonnage of 80,485. The number of vessels of all nationalities totally lost at sea by wreck, burning, collision, foundering, &c., together with those broken up was 996, tonnage, 607,165—330 steam and 666 sailing.

Railways.—On Jan. 1st, 1900, 21,700 miles of railway were open in the United Kingdom; of these 15,044 were in England and Wales, 3,480 in Scotland, and 3,176 in Ireland. The total capital paid up and raised by loans and debenture stock amounted to £1,152,317,501. During the year 1899, 1,106,691,991 passengers were carried, excluding season ticket holders who numbered 1,537,765; the gross traffic receipts amounted to

£96,252,501; total from traffic per mile of line open, £4,417. Of the total traffic receipts passengers supplied £43,734,399—1st class, £3,370,432, 2nd, £2,809,079, 3rd, £27,271,457, season, £3,331,804; excess luggage, parcels, carriages, horses, dogs. etc., £5,896,764; mails, £1,054,863; and £52,116,994 was received from the carriage of goods; miscellaneous, £5,815,672. The weight of goods and minerals conveyed was 413,623,025 tons. The working expenditure amounted to £60,090,687, and the net receipts to £41,576,378. The proportion of working expenditure to gross receipts was 59 per cent..

Prisons.—The population of the local prisons in England and Wales on the 31st of March, 1899, was 13,484, having been 14,151 at the end of the previous year. The average daily population in 1899–1900 was 14,494, viz., 11,795 males and 2,699 females. In the previous year it was 14,957, viz., 12,285 males, and 2,672 females. The average daily number in convict prisons was 2,716, making the daily average in local and convict prisons, 17,210. The average population of local, or short sentenced prisoners, was, therefore, lower by 463 in 1899–1900 than in the previous year. The return of all prisoners received into local and convict prisons during year ended March 31, 1900, shows that at the commencement of the year there were 16,593—13,987 males and 2,606 females—in prisons (local and convict) and that during the year 184,336—135,086 males and 49,250 females—were received and dealt with, making a grand total of 209,029. In the above number are included 1,743 naval and military offenders (local prisons). During the five years ending 1859 the yearly average number of persons sentenced on indictment to penal servitude was 13·4 per thousand of population, in five years ending December, 1864, 13·7, for the five years ending December, 1889, 3·3, for a like period ending December, 1894, 2·4, for a corresponding period ending 1899, 2·5. The net cost for each prisoner in local and convict prisons for year ending March 31, 1900. was £24 7s. 0d.

The Army.—The army estimates for 1899-1900, were (net) £20,617,200, net increase over the previous year £1,396,700; The items of expenditure were estimated as follows for effective service: pay of army, £6,509,900; medical establishments pay, &c., £305,800; militia pay, £571,000; yeomanry, £75,000, volunteers, £624,200; transport and remounts, £790,000; provisions, forage, &c., £3,425,500; clothing establishments, £1,090,000; warlike and other stores, £2,531,000; works, buildings, and repairs: cost including staff for engineers services, £1,211,900; military education, £111,100; War Office, salaries and miscellaneous charges, £248,300; miscellaneous effective services, £60,200; total expenditure for effective services, £17,553,000, increase over the previous year, £1,413,200. The estimates for non-effective services were, retired pay, &c., £1,555,000; pensions, &c., £1,325,500; superannuations, &c., £183,700. Making a grand total of expenditure (gross) £23,882,333, (net) £20,617,200.

The numbers of officers and men on the regimental establishments of the army, army reserve and auxiliary forces in January, 1899, were (effective, all ranks) 669,582, made up as follows:—Regular (regimental) forces, home and colonial, 157,863 with 18,180 horses and mules; Army reserve, 1st class, 78,839; Militia, (with reserve) 110,960, ditto in Channel Islands, 3,681; Malta and Bermuda, 1,941; Yeomanry, 10 207 (in training, 1898); Volunteers, (in November, 1898) 231,624; Regular forces (regimental) on Indian establishment, 74,467, with 12,180 horses and mules. The proposed distribution of the army for 1899–1900 was, for home purposes, 131,802; North America and West Indies, 7,124; South Africa, 15,077; China, Ceylon, &c., 8,182; in Mediterranean, 20,621; India, 73,157, but owing to the outbreak of war in South Africa, the above arrangements have been altered.

The Navy.—The naval (net) estimates for 1900-1901 show a net increase of £928,100 over those of 1899-1900, the respective figures being £27,522,600 and £26,594,500. Vote A provides men available for sea service, 105,611, and other services connected, 9,269, total, 114,880, and with reserves, 41,003, a grand total of 155,913, an increase over preceding year of 4,346. In addition to this, all pensioners under fifty-five years are liable to be called up for active service in case of war or any emergency. The following figures show the items of expenditure, with increase or decrease on the net estimate for 1900-1:—Wages, £5,527,000, increase, £284,300; victualling and clothing, £1,705,300, increase, £105,600; medical establishments and services £208,800, increase, £32,200; martial law, £13,300, increase, £1,100; educational services, £120,774, increase, £92,300; scientific services, £66,900, decrease, £2,600; royal naval reserves, £271,100, increase, £1000; shipbuilding, repairs, and maintenance, &c., £12,925,000, increase, £108,000; naval armaments, £3,004,700, increase, £293,900; works, buildings and repairs, £845,800, increase, £50,000; miscellaneous effective services, £271,200, increase, £23,000; Admiralty office, £267,100 increase, £5,500; half-pay, reserved, and retired pay, £786,700, increase, £12,000; naval pensions £1,123,600, increase, £37,600; and civil pensions and gratuities, £343,500, increase, £2,000. Extra estimate for services in connection with the colonies, £60,300, and accounted for as follows: annuity under the Australasian agreement, £95,300, less appropriations in aid £35,000, total, £60,300. Programme of shipbuilding, &c., under Naval Defence Act:—New construction, aggregate, £8,850,351 as against £9,257,603 estimated for 1899-00; reconstruction, repairs, &c., £1,800,690, as against £1,608,139; sea stores, coals, &c., £1,672,738, as against £1,441,596, and establishment, &c., £1,318,361, as against £1,299,644. Total, £13,342,140, as against £13,606,982. The total expenditure on navy (net) in 1898-99 was £23,880,875; net surplus expenditure less than estimate, £247,524. The estimates for 1900-1901 amount to £27,522,600, which indicates that our expenditure on the navy is on the increase year by year.

EMIGRATION.

In this and the following pages such information is given as is likely to be of service to intending Emigrants from Great Britain to Australasia. It has been principally compiled from official papers, and is corrected up to the date of publication. Since January 1, 1873, the administration of the Passenger Acts, as regards Emigration from the United Kingdom, has devolved upon the Board of Trade

SPECIAL EMIGRATION AGENTS FOR THE COLONIES.

New South Wales. — The Hon. Henry Copeland, Agent-General, 9, Victoria Street, Westminster; Secretary, S. Yardley, Esq., C.M.G., J.P. (N.S.W.)

Victoria.—Lieut.-General Hon. Sir Andrew Clarke, G.C.M.G., C.B., Agent-General, 15, Victoria Street, Westminster; Chief Clerk and Accountant, H. Myddleton.

South Australia.—Sir John A. Cockburn, K.C.M.G., M.D., Lond., Agent-General, 1, Crosby Square, E.C.; Secretary, T. F. Wicksteed, Esq., C.M.G.

Queensland.—Hon. Horace Tozer., K.C.M.G., Agent-General; Chas. S. Dicken, Esq., C.M.G., Secretary, 1, Victoria Street, Westminster.

New Zealand.—Hon. W. P. Reeves, Agent-General, Westminster Chambers, 13, Victoria Street, Westminster; Secretary, W. Kennaway, Esq., C.M.G.

Western Australia.—Sir E. H. Wittenoom, K.C.M.G., Agent-General, 15, Victoria Street, Westminster, S.W.; Secretary, R. C. Hare, Esq.

Tasmania.—Lieut.-General Hon. Sir Andrew Clarke, G.C.M.G., Agent-General, 5, Victoria Street, S.W.; Secretary, Herbert W. Ely.

Emigrants' Information Office, 31, Broadway, Westminster, S.W., under the supervision of the Colonial Office. Hours from 10 A.M. to 6 P.M.; Saturdays, 10 A.M. to 1.30 P.M. Chief Clerk, John Pulker, Esq., to whom all applications should be addressed. Editor of Publications, Walter B. Paton, M.A. This office issues quarterly circulars free of cost, a summary of which is exhibited in all post offices, and annual handbooks on each colony, price 1d. each with map, an "Emigration Statutes and General Handbook," price 3d., and a Handbook on Professional Employment in the Colonies, price 3d.; the whole bound together, price 2s.

GOVERNMENT EMIGRATION OFFICERS IN THE UNITED KINGDOM, ACTING UNDER THE BOARD OF TRADE.

London (Office, 79, Mark Lane, E.C.): Lieut. C. P. Wilson, I.N.; Liverpool (Office, Customs House Arcade): Capt. H. G. Wilcox; Cardiff: Capt. C. Johnson; Hull: W. Cowie, Esq.; Plymouth: L. Mills, Esq.; Glasgow: G. Herriot, Esq.; Leith: G. Carlisle, Esq.; Dublin: Lieut. G. C. Sconce, I.N.; North Shields: J. Ramsey, Esq.

The following is a summary of the duties of the Emigration Officers:—

They procure and give gratuitously information as to the sailing of ships and means of accommodation for emigrants; and whenever applied to for that purpose, they see that all agreements between the shipowners, agents or masters, and intending emigrants, are duly performed. They also see that the provisions of the Passengers' Acts are strictly complied with; viz., that passenger vessels are seaworthy, that they have on board a sufficient supply of provisions, water, medicines, &c., and that they sail with proper punctuality. They attend personally at their offices on every week-day, and afford gratuitously all the assistance in their power to protect intending emigrants against fraud and imposition, and to obtain redress where oppression or injury has been practised on them.

Chief Steam Ship Companies and Ship Brokers engaged in Australian Trade:—

Aberdeen Line, The, Geo. Thompson & Co., 7, Billiter Square, E.C.
American and Australian Line (*via* San Francisco) 122, Pall Mall, S.W.
Anderson, Anderson & Co., Line of Sailing Ships, 5, Fenchurch Avenue, E.C.
Anglo-Australasian Steam Navigation Company, Ltd., W. Milburn & Co., 2, 3, & 4, Billiter Avenue, E.C.
Australian Mutual Shipping Co., Ltd., Wincott, Cooper & Co., Ltd., 10 & 11, Lime Street, E.C.
Australian United Steam Navigation Co., Ltd., 23, Great Winchester Street, E.C.
Bethell, Gwyn & Co., 110, Fenchurch Street, E.C.
Birt, Potter & Hughes, Fenchurch Avenue, E.C.
Colonial Line, The, Fryer & Co., 16, Fenchurch Avenue, E.C.
Devitt & Moore, 39, Fenchurch Street, E.C.
Eastern and Australian Steamship Co., 5, Whittington Avenue, Leadenhall Street, E.C.
Gellatly, Hankey, Sewell & Co., Dock House, Billiter Street, E.C.
Gracie, Beazley & Co., 25, Water Street, Liverpool.
Green F., & Co., 13, Fenchurch Avenue, E.C.
Houlder Bros. & Co., 146, Leadenhall Street, E.C., and Water Street, Liverpool.
Loch Line from Glasgow, calling at Liverpool and Manchester, 80, Buchanan Street, Glasgow.
Marwood & Christian, 77, Tower Buildings, Liverpool.
McIlwraith, McEacharn & Co., 3 & 4, Lime Street Square, E.C.
Messageries Maritimes de France from Marseilles, London office, 97, Cannon Street, E.C.
New Zealand Shipping Co., J. Westray & Co., Rochester Buildings, 138, Leadenhall Street, E.C.
Norddeutscher Lloyd, Bremen, London office, Keller, Wallis & Co., 2, King William Street, E.C.
Orient Steam Navigation Co., Anderson, Anderson & Co., 5, Fenchurch Avenue, E.C., and T. Green & Co., 13, Fenchurch Avenue, E.C.
Pacific Mail Steamship Co., 20, Great St. Helens, E.C.
Peninsular and Oriental Steam Navigation Co., 122, Leadenhall Street, E.C.
Queensland Mail Steamers, The, Gray, Dawes & Co., 23, Great Winchester Street, E. C.
Shaw, Savill and Albion Co., Limited, 34, Leadenhall Street, E.C.
Tasmanian Line, Staley, Radford & Co., 2, Fenchurch Avenue, E.C.
Trinder, Anderson & Co., 4, St. Mary Axe, E.C.
Tyser & Co., 36, Lime Street, E.C.
Union Steam Navigation Co., of New Zealand, Ltd., 34, Leadenhall Street, E.C.
White Star Line, Liverpool to Australia, Ismay, Imrie & Co., 30, James Street, Liverpool, and 34, Leadenhall Street, London, E.C.

On application to any of these firms, either personally or by letter, full particulars can be obtained of vessels about leaving, the rates of passage, dietary scale, and any further information that may be required. The vessels themselves lie for inspection in the East India, West India, South West India, Victoria, Royal Albert or Tilbury Docks, and can be seen any week-day between the hours of about ten and four. From Liverpool, Glasgow, and other ports, vessels are frequently leaving for the Australian Colonies.

Length of Voyage.—The usual length of the voyage to the Australian Colonies by steamer is as follows:—

To New South Wales, 45 to 52 days; to Victoria, 42 to 49 days; to South Australia, 40 to 46 days; to Queensland (Brisbane), 55 days; to Western Australia 35 to 40 days (*viâ* Suez to Fremantle); to Tasmania, 40 to 45 days; and to New Zealand, 45 days. Sailing ships make the voyage in about three months.

Fares.—The cost of passage by steamer to New South Wales is from £40 to £70 for first class; second class, £35 to £40; third class, £13 13s. to £18 18s. By sailing vessel, first class, £49 10s.; second class, £20. To Victoria: steamer, first class, £40 to £70; second class, £35 to £40; third class, £13 13s. to £18 18s. Sailing vessel, first class, £47 10s.; second class, £18 18s. To South Australia: steamer, first class, £40 to £70; second class, £35 to £40; third class, £13 13s. to £18 18s. Sailing vessel, first class, £50; second class, £20. To Queensland: steamer (to Brisbane), first class, £42 to £70; second class, £37 to £42; third class, £14 14s. to £20. Sailing vessel, first class, £53 10s.; second class, £22. Direct steamer to Thursday Island for Normanton, to Cooktown, Cairns, Townsville, Bowen, Mackay, Rockhampton, Maryboro', and Brisbane, first class, £52 10s.; second class, £32; third class according to accommodation. To Western Australia: (*viâ* Suez to Fremantle) steamer, first class, £60 to £70; second class, £35 to £40; third class (by Orient Line only), £15 15s. to £18 18s., including ship kit. By sailing vessel (between April and July), cabin, £31 10s; third class, £14 14s. To Tasmania: steamer (*via* Melbourne), first class, £42 to £70; second class, £35 to £40; third class, £14 14s. to £18 18s. Sailing vessel, first class, £49 10s.; second class, £19 19s. Direct steerage fare to Hobart, by New Zealand steamer is £15 15s. to £19 19s. To New Zealand: steamer, first class, £46 to £73, *via* Melbourne or Sydney; £58 to £68 by direct boat; second class, £36 15s. to £40; third class, £15 15s. to £19 19s.

N.B.—A surtax of 10 per cent. is charged by most companies to meet increased expenses.

Sailing vessels seldom carry passengers now. There are no boats going direct from Ireland. Sailing vessels leave for Australia from Glasgow, and Scotch emigrants will often find it cheaper to start from that port. Where a family is going, special arrangements can generally be made. Half fares are generally charged for children between the ages of three and twelve, and one child under three years free. Steerage passengers, both in sailing ships and steamers, have usually to provide their own bedding and mess utensils. In the second cabin, stewards' attendance is found for the passengers. The Orient Line find bedding and mess utensils for third class. In the cabin, bedding and table necessaries are generally found but not always in ships where a few passengers only are taken. The fares include all provisions, but not usually wines or spirits, which, as a rule, can be purchased on board.

Engaging Passages.—In engaging their passages emigrants should take care to obtain in return for any money they may pay, either for deposit or in full, the printed contract tickets prescribed by the Passengers' Act, 1855, signed by the owners, charterers, or masters of the ships, or by some authorised person in their name or on their behalf. The contract tickets should be carefully preserved as the best evidence and means of enforcing the rights conferred on emigrants by the Passenger Acts. These rights are: (1) a return of passage money

with compensation not exceeding £10, if a passage is not provided according to the terms of the contract ticket; (2) subsistence money if the vessel in which the passage is engaged is delayed beyond the day after the one fixed in the contract ticket for embarkation; (3) the right, in case of wreck or damage to the ship, to be sent on to the specified destination at the owners' or charterers' expense; (4) and maintenance in the ship for 48 hours after arrival, unless the ship quits the port, in further prosecution of her voyage. The last two rights, however, belong only to emigrants who proceed in what is called a "passenger ship," that is, a vessel carrying more than 50 passengers in all, or more than one statute adult to every 33 tons of a sailing ship, or more than one to every 20 tons of a steamer. Although passengers should not part with their contract tickets, they are bound under a penalty not exceeding £10 to produce them on the demand of any emigration officer.

The following notes have been epitomized from the various Passengers' Acts passed for the protection of emigrants and others, in ships clearing from British ports, and will be found worth perusal:—

Breach of Contract.—In case of failure to comply with the stipulations in the contract ticket, cabin and other passengers may recover in a summary way before a justice of the peace, damages not exceeding, with costs, the amount of their passage money, and £20.

Detention of Ship.—In case of delay of sailing, passengers can claim to be maintained on board, or can recover from the owners or charterers of the ship subsistence money at the rate of 1s. 6d. per day for the first ten days, and afterwards 3s. per day till the ship sails.

Wreck or Damage.—If, through carelessness or stress of weather, the vessel should be injured or lost, the master is bound to give to the nearest emigration officers a written undertaking to send on the passengers within six weeks in the same ship made seaworthy, or some other eligible vessel; and in the meantime the passengers are to be maintained on board, or allowed 1s. 6d. per day for maintenance.

Arrival at Port.—Passengers are entitled to sleep and be maintained on board for forty-eight hours after the ship reaches her destination, unless the ship has not completed her voyage and quits the port earlier for the terminal one.

Sale of Spirits by any Person.—This is prohibited on board to passengers under heavy penalties.

Regulations for the Preservation of Order and Health are prescribed by the Act, and are enforced by the surgeon or captain. Refusal to comply with these rules renders the emigrant liable to fine and to imprisonment at the end of the voyage, and there are special regulations for the protection and comfort of unprotected females.

The following remarks are taken from the *Australasian Circular* issued by the Emigrants' Information Office:—

"Food (three or four good meals a day), sleeping accommodation, and medical attendance are in all cases included in the fares given above; third-class passengers must in some steamers provide their own ship-kit, consisting of bedding, knives, forks, &c., but just now these are in many cases included in the fares. These can be obtained, if wanted, at a cost of about £1, and for children, if more than one, generally at a reduced rate. Each third-class passenger by steamer is allowed 10 to 20 cubic feet of luggage free; second class 20, and first-class 40 cubic feet free; children, about half this quantity. Two boxes, each 2 feet 6 inches long, 2 feet broad, and 1 foot 6 inches deep, make up 15 cubic feet; and two boxes, each 2 feet 6 inches long, 2 feet broad and 2 feet deep, make up 20 cubic feet; but any sized boxes will do, so long as the permitted quantity is not exceeded. Luggage required for use on the voyage should be labelled "Wanted." By sailing ships each first-class passenger is generally allowed 40 cubic feet of luggage free; each second-class passenger 20 to 30 cubic feet; and each third-class passenger, 10 to 20 cubic feet. Steerage passengers by vessels clearing from foreign ports are not protected by the Board of Trade regulations as to accommodation, food, medical attendance, &c., which apply to emigrant ships only which clear from British ports, and which are expressly intended for the benefit of emigrants. If a ship clearing from a British port improperly fails to start on the day contracted for, the emigrant, or any emigration officer on his or her behalf, may claim subsistence money till it does start.

"Particulars as to the despatch of vessels are advertised in the English, Irish, and Scotch newspapers; or may be obtained from the various shipping companies. Emigrants should ascertain the *hour* the ship starts, in case it is necessary for them to sleep on board the night before.

"Emigrants receiving free, nominated, or assisted passages are not called upon to repay their passage money, and are perfectly free to work in the colony to which they are assisted, where and for whom they please, subject to any undertaking they may have entered into; but they must remain in that colony for at least twelve months after arrival.

"No large outfit is necessary, nor need it be new. Emigrants having knives, forks, spoons, bed and table linen, kitchen utensils, sewing machine, light tools, and other small articles or ornaments, should take them, but not heavy furniture, nor rough common tools, as free luggage is limited. Emigrants should take all the clothes they have, but not less, if possible, than the following for the voyage and subsequent use:—(1) For men: two pairs boots, one strong suit, two pairs of white or light tweed trousers, and one jacket of similar cool material, one cloth cap, and one broad-brimmed straw hat, one pair slippers or canvas shoes, one overcoat, and six articles of each kind of underclothing. (2) For women: two pairs strong shoes, one warm and two cotton gowns, one broad-brimmed straw hat, and one close-fitting hat, one pair slippers, one cloak or shawl, six articles of each kind of underclothing, and sewing materials. (3) For children: one warm cloak or greatcoat, two pairs strong shoes, two warm suits, and six to nine articles of each kind of underclothing. Two or three coloured serge shirts for men, and an extra supply of flannel for women and children, will be very useful. If the emigrant is going by sailing ship extra warm clothing will be required. Emigrants' goods are generally admitted into the colonies free of duty. N.B.—There are not many opportunities for washing clothes on board.

A mining prospector's outfit should consist of a blanket, calico tent or fly, 6 × 8, change of shirt, trousers, and socks, shovel, pick, and two dishes, canvas water bag (six pints), billy can (one quart or more), rations consisting of meat, flour, sugar and tea, a towel, sheath knife, pocket compass, magnifying glass, and magnet.

"Any time of the year is suitable for arriving; September to November for preference in New South Wales, Victoria, and Tasmania; September to January inclusive in New Zealand; April to October in Queensland; May to October in South Australia; and March in Western Australia, when the goldfields become busy with the return of rain. Speaking generally the emigrant would do well to settle down before the hot weather comes on, and the shearing and harvest begin. December to February are the summer months, the seasons being nearly the opposite to what they are in England."

Particulars of the emigration arrangements of each colony appear on this and subsequent pages.

NEW SOUTH WALES.

Government Immigration is now entirely suspended, operations being confined simply to the nominations of wives and families by husbands and fathers of good, moral, and industrious qualifications, who are residents in the colony.

The following are the current prices paid for labour in some of the principal trades of the colony, which of course vary somewhat in different districts, and at certain periods, according to the condition of trade, and the state of the labour market:—

Coach-trimmers, £1 15s. to £3 per week; coachsmiths, body (carriage) makers, waggon-builders, wheelwrights, carriage painters, £1 15s. to £3 per week; sawyers, in mill, £1 15s. to £3 5s. per week; compositors, 9d. to 1s. 1d. per 1,000; ditto (jobbing), 25s. to 70s. per week; stonemasons, 8s. to 10s. per day; stonemasons' labourers, 6s. to 7s. per day; plasterers, 8s. to 10s. per day; plasterers' labourers, 6s. to 7s. per day; bricklayers, 10s. per day; bricklayers' labourers, 6s. to 8s. per day; carpenters (city), 6s. to 11s. per day; ditto (suburbs), 9s. to 11s. per day; joiners, 9s. to 10s. per day; painters, 9s. to 10s. per day; plumbers, 9s. to 11s. per day; gasfitters, 9s. to 10s. per day; shipwrights, 8s. to 10s. per day; labourers, 6s. to 9s. per day; saddlers, 40s. to 50s. per week; tailors (paid by the piece) can average about 50s. to 60s. per week; shoemakers (paid by the piece) can average about 30s. to 40s. per week; ditto, jobbing, 40s. to 50s. per week; shipsmiths, 1s. to 1s. 6d. per hour; dressers, 9d. to 1s. 2d. per hour; furnace men, 10d. to 1s. per hour; iron-turners, 1s. 2d. to 1s. 4d. per hour; engine-fitters, 1s. 1d. to 1s. 4d. per hour; coppersmiths, 1s. 1d. to 1s. 4d. per hour; general fitters, 1s. to 1s. 2d. per hour; blacksmiths, 1s. 2d. to 1s. 6d. per hour; ditto, strikers, 9d. to 11d. per hour; iron-moulders, 1s. 2d. to 1s. 6d. per hour; boiler-makers, 1s. 2d. to 1s. 4d. per hour; pattern-makers, £1 12s. to £2 14s. per week; boiler-makers' assistants, 9d. to 10½d. per hour; youths in iron works, 6d. to 8d. per hour; engine-drivers, 9½d. to 1s. 4d. per hour; brass-moulders, 1s. 2d. to 1s. 3d. per hour; brass-finishers, 1s. to 1s. 6d. per hour; machine men in fitting shop, 10d. to 1s. 2d. per hour; coal-miners, 1s. 10d. to 3s. 2d. per ton; pit labourers, 6s. to 7s. 6d. per day; saw-mill hands, 9d. to 1s. per hour. The above trades connected with the iron and engineering departments work eight hours a day, with one or two breaks. In the building trades all labour is paid by day of eight hours.

The following quotations are exclusive of rations or board in town or country:—

Married couples for stations, without encumbrance, with board and rations, £60 to £85 per annum; farm labourers, with board and rations, £30 to £52 per annum; bullock drivers, do, £40 to £52 per annum; horse-team drivers, £40 to £65 per annum; boundary-riders, £40 to £52 per annum; stockmen, £40 to £75 per annum; shepherds, £35 to £45 per annum; road-makers, 6s. to 8s. per day of 8 hours; grooms, £40 to £60 per annum; gardeners (country), £40 to £65 per annum; ditto (in town), £52 to £65 per annum; bakers, £1 10s. to £3 per week; butchers, £1 10s. to £3 per week; cooks (private houses), £30 to £65 per annum; ditto (hotels), males, £52 to £130 per annum; laundresses, £32 to £52 per annum; house and parlour maids, £26 to £35 per annum; general female servants, £26 to £45 per annum; nursemaids, £26 to £35 per annum; grooms and coachmen (in town), £45 to £65 per annum; useful boys on stations, £16 to £30 per annum. Current rate of wages without board or lodging:—wheelwrights (country), 70s. per week; railway labourers, 7s. per day; gangers, 8s. 6d. per day; brickmakers, 22s. 6d. to 30s. per 1,000; potters, 50s. to 60s. per week; pipe-makers, 50s. to 60s. per week; tinsmiths, 9s. to 14s. per day; galvanized-iron workers, 9s. to 11s. per day. (The two trades last mentioned work ten hours to the day.) Lumpers and wharf labourers—day work for handling general cargo, 1s. per hour; ditto coal, 1s. 3d. per hour; night work, 1s. 6d. per hour; plumbers, 10s. to 13s. per day; gasfitters, 9s. to 11s. per day. (These two trades work eight hours to the day.) Coopers, 1s. 3d. per hour, and time and half for overtime. (Piecework is done by the majority.) Country blacksmiths receive £70 to £90 per annum, with board or rations.

House Rent.—Small cottages in Sydney and in suburbs—3 to 4 rooms and kitchen, 6s. to 9s. per week; small houses, in suburbs, 3 or 4 rooms, with kitchen, &c., 10s. to 12s. 6d. per week; in Sydney, larger houses, from 18s. per week upwards; board and lodging for single men, from 16s. to 25s. per week.

Current Prices of Clothing in Sydney for Persons of the Labouring Class (which vary considerably according to the times).—Clothing, women's: blankets, 7s. 6d. to 15s. per pair; bonnets, straw, 1s. to 3s. each; calico, 3d. to 6d. per yard; ditto, white, 4d. to 7½d. per yard; dresses, merino or alpaca, 7s. 6d. to 16s. 6d. each; ditto, print, 2s. 6d. to 7s. each; ditto, muslin, 4s. to 7s. 6d. each; flannel, 10d. to 1s. 6d. per yard; mattresses, 12s. to 20s. each; palliasses, 10s. to 16s. each; petticoats, calico, 2s. 6d. to 4s. each; ditto, flannel, 4s. to 7s. each; shawls, woollen or printed, 5s. to 20s. each; sheeting, grey calico, 7½d. to 1s. 3d. per yard; ditto, white, 1s. to 2s. per yard, shifts, 1s. 6d. to 3s. 6d. each; shoes, 4s. 6d. to 6s. per pair; stays, 1s. 11d. to 5s. 6d. each; stockings, 6d. to 2s. per pair. Clothing, men's: boots, strong, 6s. 6d. per pair; caps, 2s each; coats shepherd's, 12s. to 16s. each; frocks, duck, 2s. 9d. to 3s. 9d. each; handkerchiefs, cotton, 4d. to 6d. each; hats, felt, 2s. to 4s. 6d. each; ditto Manilla or Panama, 2s. 6d. to 6s. each; ditto, straw, 1s. to 3s. each; shirts, Crimean, 3s. 6d. to 6s. 6d each; ditto, white cotton, 3s. to 4s. 6d. each; ditto, coloured, or striped cotton, 1s. 6d. to 3s. each; ditto, flannel (under) or merino, 3s. 6d. to 6s. each; shoes, strong, 4s. 6d. to 5s. 6d. per pair; socks, cotton, 6d. to 10d. per pair; ditto, woollen 1s. to 1s. 6d. per pair; stockings, cotton, 1s. to 2s. per pair; ditto, woollen, 2s. to 3s. per pair; trousers, common (tweed), 5s. 6d to 12s. per pair; ditto, duck, 2s. 6d. to 3s. per pair; ditto, moleskin, 5s. 6d. to 7s. per pair; vests, common (tweed), 4s. to 6s. 6d. each; suits, drill or moleskin, 21s. to 35s. each; ditto, tweed or cloth, 21s. to 40s. each.

Provisions—Retail Prices—Current Rates. (These also vary according to the state of the markets and demand).—Bacon, 10d per lb.; blue, 1s. per lb.; bread, 2½d. to 3½d. per 2lb. loaf; butter, fresh, 9d. to 1s. per lb.; ditto, salt, 9d. per lb.; candles, mould, 5d. per lb.; cheese, English, 1s. 6d. per lb.; ditto, New Zealand, 1s. per lb.; ditto, American, 1s. 3d. per lb.; ditto, Colonial, 6d. to 1s. per lb.; coffee, 1s. 3d. to 1s. 6d. per lb.; eggs, 1s. per dozen; flour, first, 13s., 2nd ditto, 11s. per 100lbs.; milk, 4d. per quart; meat, beef, fresh, 3d. per lb.; ditto, salt, 3d. to 6d. per lb.; mutton, fresh, 3d. to 6d. per lb.; ditto, salt, 3d. to 6d. per lb.; pork, 6d. to 7d. per lb.; veal, 4d. to 8d. per lb.; mustard, 1s. to 2s. per lb.; oil (kerosene), 1s. 6d. to 1s. 9d. per gallon; oatmeal, 3d. per lb.; pepper, 1s. per lb.; potatoes, 4s. 6d. to 6s. per cwt.; rice, 2½d. to 3½d. per lb.; sago, 4d. per lb.; salt, 6s. per cwt.; soap, 22s. to 26s. per cwt.; starch, 4½d. per lb.; sugar, 2d. to 3½d. per lb.; tea, 1s., 1s. 6d., 2s., and 2s. 6d. per lb.; tobacco, American, 3s. 6d. per lb.; ditto, Colonial, 2s. 6d. per lb.; honey, 6d. per lb.; hay, oaten, £6 10s. per ton; ditto lucerne, £3 to £5 per ton; ditto, grass, £5 per ton; maize, 4s. per bushel; oats, 4s. per bushel; bran, 1s. 2d. per bushel; pollard, 1s. 6d. per bushel; chaff, 8s. per cwt.; coals, 20s. per ton; wood, 20s. per ton; apples, 1s. to 1s. 6d. per dozen; pineapples, 1s. 3d. to 1s. 6d. per dozen; bananas, 1s. to 1s. 6d. per dozen; oranges, 1s. per dozen; turnips, 3s. per dozen bunches; onions, 2d. per lb.; cabbages, 6d. to 9d. per dozen; carrots, 2s to 3s. per dozen bunches; parsnips, 3s. 6d. per dozen bunches.

VICTORIA.

Government emigration is entirely suspended.

During 1899 there arrived in Victoria by sea 85,384 persons—55,799 males, 29,585 females. The departures during the same period numbered 86,947—55,880 males, 31,067 females, the excess of departures over arrivals being 1,563.

These are the recorded arrivals and departures, though many persons leave the Colony without their departures being noted.

In Melbourne there is a demand for first-class plumbers and iron workers, and for competent females in the clothing factories. There is a considerable number of unemployed persons at Melbourne, and it is proposed to provide work for them by carrying out railway extensions. A large meeting of clerks has decided to form a union of clerks, book-keepers, and accountants to protect their interests. At Bendigo there is no demand for more labour. At Castlemaine miners are in some demand for gold dredging.

RATE OF WAGES.

The following is a statement of the average rate of wages paid in Melbourne during the year 1898-9, and is fairly representative.

1. Domestic Servants.—Males—Coachmen, footmen, grooms, gardeners, 17s. 6d. to 25s. per week; butlers, 17s. 6d. to 25s. per week. Females—Cooks, 15s. to 20s. per week; laundresses, 15s. to 17s. 6d. per week; housemaids, 10s. to 15s. per week; nursemaids, 6s. to 10s. per week; general servants, 8s. to 12s. per week; girls, 5s. to 8s. per week. All the above with board and lodging.

2. Hotel Servants.—Males—Barmen, 20s. to 30s. per week; waiters, 20s. to 25s. per week; boots, 10s. to 20s. per week; ostlers, 12s. 6d. to 15s. per week; cooks, 20s. to 65s. per week. Females—Barmaids, 15s. to 25s. per week; waitresses, 10s. to 15s. per week; housemaids, 10s. to 13s. per week; cooks, 15s. to 30s. per week. All the above with board and lodging.

3. Farm Servants.—Males—Ploughmen, 12s. 6d. to 20s. per week, and found; farm labourers, 12s. 6d. to 15s. per week, and found; milkmen for dairies, 10s. to 15s. per week, and found; cheesemakers, 25s. to 50s. per week, and found; cooks, £40 to £50 per annum, and found. Females—Cooks, £35 to £45 per annum, with board and lodging; general servants, £30 to £40 per annum, with board and lodging. Married couples (generally useful), £52 to £70 per annum, with board and lodging; hop-pickers, 2d. to 3½d. per bushel; maize-pickers, 4d. to 6d. per bag.

4. Station Servants.—Males—Boundary riders, £30 to £45 per annum, with rations; stockmen, £50 to £60 per annum, with rations; cooks, £52 to £75 per annum, with rations; labourers, 15s. to 20s. per week, with rations; drovers, 25s. to 50s. per week, with rations; sheepwashers, 15s. to 25s. per week, with rations; shearers, 15s. to 17s. 6d. per 100 sheep shorn, with rations. Females—Cooks, £35 to £52 per annum; general servants, £30 to £40 per annum, with rations. Married couples, £50 to 75 per annum, with rations.

5. Workers in Books, &c.—Printers, compositors, £2 12s. to £3 17s. 6d. per week; printers' machinists, £2 12s. to £3 12s. per week; lithographers, £2 12s. to £3 12s. per week; binders, £2 12s. to £4 per week; paper rulers, £2 12s. to £3 10s. per week; sewers and folders (females), 12s. 6d. to 27s. 6d. per week; sewers and folders (forewomen), 35s. to 40s per week.

6. In Watches, Jewellery, and precious Metals. Watchmakers, £2 to £3 10s. per week; manufacturing jewellers, £2 to £4 per week.

7. In Metals other than Gold and Silver.—Blacksmiths, 10s. to 12s. per day; die-sinkers, £2 10s. to £4 10s. per week; engravers, £2 to £3 per week; farriers (firemen), £2 to £2 5s. per week; farriers (floormen), 35s. to 42s. per week; hammermen, 6s. 6d. to 7s. 6d. per day; fitters, 9s. to 11s. per day; turners, 9s. to 11s. per day; boiler-makers and platers, 10s. to 12s. per day; riveters, 10s. to 12s. per day; lamp-makers, 35s. to £3 per week; pattern-makers, 8s. to 10s. per day; moulders, 10s. to 11s. per day; brass-finishers and coppersmiths, 9s. to 10s. per day; tin-smiths, £2 to £2 14s. per week; japanners, £2 to £2 14s. per week; iron-workers, £2 to £3 6s. per week; galvanizers, £2 to £3 6s. per week; plumbers and gasfitters, £3 to £4 per week.

8. In Carriages and Harness.—Smiths, 1s. to 1s. 3d. per hour; bodymakers, 35s., to £2 per week; wheelers, £2 to £2 10s. per week; painters, 6s. to 8s. 4d. per day; trimmers, 35s. to £2 10s. per week; vycemen, £1 5s. to £1 15s. per week; collar-makers, £1 5s. to £3 per week; harness-makers, £1 5s. to £3 per week; saddle-makers, £1 5s. to £3 per week; saddletree-makers, £1 15s. to £2 10s. per week; whip-makers, £1 10s. to £2 10s. per week.

9. Ships and Boats.—Sailors, sailing vessels, intercolonial, £3, deep sea, £4 per month, and found; sailors, steamships, £6 per month, and found; ship carpenters, shipwrights (steam), £9 per month, and found; stevedore's men, lumpers, 8s. to 10s. per day.

10. In Houses and Buildings.—Masons, 8s. per day; plasterers, 8s. per day; bricklayers, 8s. per day; slaters, 8s. per day; carpenters, 8s. per day; labourers, 6s. per day; painters and glaziers, 8s. per day; signwriters, 8s. to 10s. per day; paperhangers, 8s. per day.

11. In Furniture, &c.—Cabinetmakers, £1 5s. to £2 7s. 6d. per week; carvers, £2 5s. per week; turners, £2 5s. per week; upholsterers, £2 to £2 15s. per week; polishers, £2 5s. to £2 10s. per week; coopers, 7s. to 9s. per day.

12. Workers in Dress.—Tailors, 10d. to 1s. per hour; tailors, £2 to £2 10s. per week; tailors, in factories, £2 to £3 per week; mantlemakers, 15s. to 35s. per week; milliners, first-class, £3 to £4 per week; milliners, second-class, 15s. to £2 5s. per week; dressmakers, 12s. to 25s. per week; needlewomen, 12s. to 25s. per week; bootmakers, riveting per pair—children's, 5d.; boys', 7½d. to 9d.; women's, 8d. to 1s. 1d.; men's, 11d. to 1s. 9d.; machine sewing, per pair—children's and boys', 6d. to 9d.; women's, 1s. 1d.; men's, 1s. 5d.; machinists, 10s. to 25s. per week; hatters.—Gossamer trade—Bodymakers, silk hats, 10s. to 24s. per dozen; finishers, 22s. to 26s. per dozen; shapers, 8s. to 12s. per dozen; crown sewers, 3s. 6d. to 4s. per dozen; trimmers, 6s. to 10s. per dozen; bodymakers—low crowns, 12s. to 16s. per dozen; finishers, 12s. to 14s. per dozen; shapers, 4s. to 8s. per dozen; trimmers, 6s. to 10s. per dozen; felt hat trade, bodymakers, £3 per week; blockers, £3 per week; finishers, £3 per week; shapers, £5 per week; binders (females), 15s. to 30s. per week; trimmers (females), 15s. to 30s. Clothing Factories—Cutters, £2 10s. per week; pressers, 30s. to £2 per week; tailoresses, 12s. 6d. to 27s. 6d. per week; machinists, 12s. 6d. to 25s. per week; shirtmakers, 14s. to 40s. per week. Drapers' assistants, carpet salesmen, £1 10s. to £5 per week.

13. In Food.—Bakers (foremen), £2 10s. to £3 10s. per week; bakers, second hands, £2 8s. to £2 15s. per week; Butchers—Shopmen, 40s. to 50s. per week; slaughtermen, £2 10s. to £3 10s. per week; boys, 5s. to 15s. per week, with board; small-goods men, £1 10s. to £2 10s. per week, with board. Malsters, £2 2s. to £2 15s. per week.

14. In Animal Matters.—Brushmakers, £1 10s. to £3 per week; female drawing hands, 15s. to 25s. per week. Curriers, £2 2s. to £3 per week; tanners, £1 10s. to £2 per week; beamsmen, 40s. to 45s. per week; shedsmen, 30s. to 40s. per week; fellmongers, 28s. to 40s. per week; portmanteau and trunk-makers, £1 15s. to £2 5s. per week.

15. In Vegetable Matters.—Basket-makers, £2 to £2 10s. per week; broom-makers, £1 10s. to £2 per week; cigar-makers, 30s. to £2 per week; tobacco-workers, £2 to £4 per week; corkcutters, 36s. to £2 15s. per week.

16. In Stone, Clay, &c.—Brickmakers.—Clayhole men, 1s. 9d. to 2s. 6d. per 1,000; setters, 1s. per 1,000; burners, 9d. per 1,000; drawers, 10½d. per 1,000. Potters, 10½d. to 1s. 3d. per hour; quarrymen, 6s. to 8s. per day; labourers, 5s. to 6s. 6d. per day; stonebreakers, 1s. to 3s. per cubic yard; tarpavers, 6s. 6d. per day; asphalters, 10s. per day.

17. In Mines.—General managers, £3 to £9 per week; legal managers, 5s. to £5 per week; mining managers, £3 10s. to £6 per week; engineers, £2 10s. to £5 per week; engine drivers,

£2 5s. to £3 per week; pitmen, £2 5s. to £3 per week; blacksmiths, £2 5s. to £3 per week; carpenters, £2 2s. to £3 per week; foremen of shift, £2 5s. to £3 per week; miners, £2 to £2 10s. per week; surfacemen, labourers, £1 10s. to £2 10s. per week; boys, 15s. to 35s. per week.

THE MINIMUM WAGE.

The Minister of Public Works has drawn up regulations fixing the rate to be paid to workmen on Victorian Government contracts. Not only has a minimum wage rate been fixed, but it is intended, as far as practicable, to establish a compulsory working day of eight hours on Government contracts. The following are the minimum rates of wages to be paid :—

Plasterers, 8s.; bricklayers, 8s.; carpenters, 8s.; masons, 9s. 4d.; engine fitters, 10s.; boiler makers and rivetters, 10s.; blacksmiths, 10s.; painters, 8s.; plumbers, 9s.; shipwrights, 12s. 3d.; copper and brass workers, 10s.; moulders, 10s.; engine drivers, 8s.; labourers, 6s.; planers, borers, and slotters, 8s. 3d.; tinsmiths, 9s.; iron turners, 10s.; pattern makers, 11s.; coppersmiths, 10s.; brass finishers for engineers' brass work, 10s. Cabinet makers, chairmakers, French polishers, upholsterers, wood carvers, 8s per day.

PRICES OF PROVISIONS AND NECESSARIES.

Meat.—Beef, 4d. to 8d. per lb.; pork, 5d. to 7d. per lb.; mutton, 2d. to 5d. per lb.; hams, 8d. to 1s. 1d. per lb.; bacon, 6d. to 11d. per lb.; lamb, per quarter, 1s. 9d. to 3s.; veal, 3d. to 7d. per lb.

Poultry, &c.—Fowls, 3s. to 7s. per pair; ducks, 3s. 6d. to 7s. 6d. per pair; turkeys, 5s. to 15s. each; geese, 5s. to 10s. per pair; rabbits, 3d. to 11d. per pair.

Dairy Produce.—Cheese, 5d. to 9d. per lb.; eggs, 8d. to 2s. per dozen, butter, 7d. to 1s. 10d. per lb.; bread, 4½d. to 8d. per 4lb. loaf; milk, 3d. to 5d. per quart.

Vegetables, &c.—Asparagus, 2s. to 7s. per 100; beans (broad) 1½d. to 2d. per lb.; beet, 6d. per dozen; cabbages, 3d. to 4s. do.; carrots, 3d. to 1s. per dozen bunches; cauliflowers, 6d. to 4s. per dozen; celery, 6d. to 1s. 8d. do.; cress (water), 4d. to 6d. per dozen bunches; garlic, 2d. to 3d. per lb.; leek, 6d. per dozen bunches; lettuce, 3d. to 9d. per dozen; marjoram, 6d. to 8d. per dozen bunches; mint, 6d. do.; onions, dried, 3s. to 16s. per cwt.; do., green, 3d. to 9d. per doz. bunches; parsley, 6d. do.; parsnips, 6d. to 1s. 6d. do.; peas, 2d. to 4d. per lb.; potatoes, 4s. 9d.. to 14s. per cwt.; radishes, 3d. to 4d. per dozen bunches; rhubarb, 4d. to 1s. 6d. do.; sage, 6d. to 8d. do.; savoys, 1s. to 2s. 6d. per dozen; spinach, 9d. to 1s. per dozen bunches; thyme, 6d. do.; turnips, 2d. to 1s. do.; green peas, 2d. to 4d. per lb.

Wood and Coal.—Coal, 19s. to 20s. per ton; brown coal, 10s. and 15s. per ton. Wood, 2 ft. mixed, 16s. to 22s. per ton; box blocks, 11½d. per cwt., split, 1s.

Miscellaneous.—Tea, 8d. per lb., and upwards; coffee, 1s. per lb., and upwards; soap (colonial), 1½d. to 3d. per lb.; candles, 4½d. to 6½d. per lb.; gas, 5s. per 1,000 feet.

SOUTH AUSTRALIA.

Emigration to South Australia is entirely suspended.

Domestic—General servants, male, with board and lodging, £45 per annum; ditto female, with board and lodging, £25 per annum; cooks, male, with board and lodging, 28s. per week; ditto female, with board and lodging, 14s. per week; house and kitchen maids, with board and lodging, 10s. per week; laundresses, with board and lodging, 12s. per week.

Fruit—Almonds, (soft-shell) 4½d. per lb.; apples, (eating) 9s. to 10s. per case; ditto (cooking), 5s. to 6s. per case; bananas, 16s. to 18s. per case; cocoanuts, 2s. to 2s. 6d. per dozen; lemons, 6s. per case; melons, (pie) 2s. per cwt.; oranges, 10s. to 11s. per case; pineapples, 7s. 6d. to 10s. per dozen; Navel oranges, 14s. per case; Mandarin oranges, 14s. per case. Dairy Produce—Bacon, 6½d. to 7½d. per lb.; butter, (factory) 9d. to 10d. per lb.; ditto (dairy), 7d. to 8d. per lb.; cheese, (colonial) 6d. to 7d. per lb.; eggs, 5½d to 6d. per dozen. Butchers' Meat—Beef, 3d. to 7d. per lb.; ditto (salt), 3d. to 5d. per lb.; calves' heads, 2s. to 2s. 6d. each; calves' feet, 1s. to 1s. 3d. per set; lamb, (fore-quarter) 4d. per lb.; ditto (hind-quarter), 5d. per lb.; mutton, (fore-quarter) 2d. per lb.: ditto (hind-quarter), 3d. per lb.; sausages, 3d. to 6d. per lb.; veal, 4d. to 8d. per lb. Miscellaneous—Flowers, 2d. to 6d. per bunch; rabbits, 1s. per pair; hares, 1s. each.

WESTERN AUSTRALIA.

Immigration matters are dealt with in the Colonial Secretary's Department, the Board of Immigration having been abolished.

All inquiries respecting friends or relations in the Colony should be addressed to the Under-Secretary, Perth. The Agent-General for the Colony acts as Emigration Agent in London, and all correspondence respecting Emigration business should be addressed "The Agent-General for Western Australia," 15, Victoria Street, Westminster, S.W.

During 1899, 36 souls, 12 of whom were males, and 24 females, were given assisted passages to the colonies.

Classes Eligible.—The classes at present eligible for assisted passages are :—Farmers and agriculturalists, who must be possessed of some small capital, and who should be under forty-five years of age (and, if married, their wives and families). The amount required in each case will be decided by the Agent-General, and must be deposited with him. A single man is required to deposit not less than £100, a married couple not less than £150, and for each child over twelve years of age, £25. This deposit is repaid to the emigrants immediately after arriving in the colony. Each adult emigrant pays £8 5s. towards his passage money, and a proportionate amount for every child between one and twelve years of age. Single women, or widows without children, not exceeding thirty-five years of age are also eligible.

Eligible Nominees.—Qualifications. The nominees must be in the habit of working at one of the callings mentioned above,

and must in accepting an assisted passage under these regulations do so with the intention of working in one of these occupations in the Colony. They must be sober, industrious, of good moral character, in good health, free from all mental and bodily defects, within the ages specified (excepting when specially approved), appear physically to be capable of labour, and have been vaccinated or had the small-pox.

INELIGIBLE CANDIDATES.—Passages cannot be granted to persons intending to proceed to any other colony than Western Australia; to persons who have previously resided in Western Australia and have returned from thence; to persons in the habitual receipt of parish relief; to children under twelve years of age without their parents, to husbands without their wives, or wives without their husbands (unless in the last three instances, the parents, wife or husband be in Western Australia), or to single women who have illegitimate children.

Each intending emigrant above the age of eighteen years will be required to subscribe a declaration that he will conform to the regulations of the vessel in which he sails, and that it is his intention to remain in the Colony.

Intending emigrants will not be allowed to embark until they have been approved by the Emigration Agent or Agents for Western Australia at the port of embarkation; and any false statement or misrepresentation as to qualification will render them liable to forfeit their passages.

No preparation should, on any account, be made by intending emigrants, either by withdrawing from employment or otherwise, until they have received from the Emigration Agent or Agents for the Colony in London a notification that they have been accepted as candidates for emigration, and have also received notice of the ship in which they are to embark, and of the time and place to join her.

If any intending emigrants fail to attend at the appointed time and place for embarkation, or to proceed in the ship, or are rejected for any of the reasons specified in these regulations, they shall have no claim to a passage by any future ship.

It is desirable that persons should take out with them the necessary tools of their trade. Bulky agricultural implements, however, cannot be admitted, on account of their inconvenience, size, and weight; neither can furniture be received on board. Feather beds are especially prohibited.

The whole quantity of baggage for each adult person must not measure more than twenty cubic or solid feet, nor exceed half a ton in weight. It must be divided into two or three boxes, the contents of which must be closely packed so as to save space in the ship, and the owner's name should be legibly painted thereon. Large packages and extra baggage will not be taken unless paid for, and then only in case there be room in the ship.

Each family will be allowed to take only its own luggage. Any violation of this rule will subject the person to forfeiture of passage.

ASSISTED PASSAGES TO NOMINATED IMMIGRANTS.

Applications will be received from Colonists desirous of obtaining Assisted Passages for female Immigrants only, from the United Kingdom to this Colony.

All such applications to be made on printed forms which may be obtained at any Magistrate's Court or Police Station.

In all cases the trade or occupation of the person sought to be introduced must be stated.

The nominators or the emigrants must pay a sum of £8 5s. 0d., which includes ship kit, towards their passage by direct line steamer. Children under twelve years of age travel half-price.

Domestic servants are in great demand.

The average rates of wages are about as follows: Ploughmen, 90s. per month, with board and lodging; shepherds and stockriders £35 to £78 per annum, with rations; butchers, 50s. per week; carpenters, 11s. per day; saddlers, 7s. to 11s.; brewers, 7s. to 10s.; navvies, 6s. to 8s.; blacksmiths, 8s. to 10s.; house painters, 8s. to 10s.; plasterers, 10s.; wheelwrights, 8s. to 10s.; tailors and shoemakers, by piece, and 7s. to 10s.; bricklayers, plumbers and masons, 11s. to 12s.; boatbuilders, 8s. to 12s.; printers, 8s. to 10s.; coachbuilders 7s. to 10s. per day; bakers, 8s. to 10s.; miners, 8s. 6d. to 12s. 6d.; shipwrights, 10s.; tanners and curriers, 6s. to 8s.; tinsmiths, 9s. to 10s.; single female domestic servants, 10s. to 20s. a week, with board. General labourers, 6s. to 7s. per day; gardeners, 5s. to 8s. per day. Male cooks, 15s. to 40s. per week.

The cost of erecting a labourer's dwelling is at the very least £80. Town lodgings for mechanics' families cost from £1 to £1 10s. per week.

PRICES OF PROVISIONS.—Bread, 3½d. to 4d. per 2lb. loaf; bacon, 10d. to 1s. per pound; beer, 4s. per gallon; colonial beer, 3s. per gallon; brandy, 26s. to 30s. per gallon; wine, 20s. and upward per gallon; colonial wine, 6s. and upward per gallon; fresh butter, 1s. 8d. to 2s. per pound; salt butter, 1s. 2d. to 1s. 4d. per pound; cheese, 9d. to 1s. per pound; coffee, 1s. 6d. per pound; eggs, 2s. 10d. to 3s. per dozen; flour, per bag of 200 pounds, 27s. to 30s.; milk, 6d. per quart; beef, 8d. per pound; mutton, 7d. per pound; pork, 1s. per pound; oatmeal, 3d. to 6d. per pound; potatoes, 8s. to 12s. per cwt.; rice, 2d. to 2½d. per pound; sugar, 2½d. to 3d. per pound; tea, 1s. to 1s. 6d. per pound; salt, 1d. per pound.

QUEENSLAND.

BOARD OF IMMIGRATION.—John MacDonnell (Chairman), Dr. Marks, W. H. Irving, Dr. Thomson, J. O'Neill Brenan.

Government Immigration Agent: Brisbane, J. O'Neill Brenan. Depôt: Kangaroo Point, Brisbane; Agent-General, Sir Horace Tozer, K.C.M.G.; Secretary, Charles S. Dicken, Esq., C.M.G., Westminster Chambers, 1, Victoria Street, Westminster.

The average cost of the voyage from London to Queensland is—sailing ship, cabin, £45 to £50 (some lines, £25 to £35); intermediate, £22; steerage, £15. Length of voyage ninety to one hundred and twenty days. Steamships are now largely used for conveying passengers direct, the vessels taking about fifty-five to sixty days on the voyage.

The regulations with respect to the effects of passengers (who may have no near relatives on board) dying on the voyage are, that the surgeon-superintendent is required to take an inventory of their effects in the presence of the captain. The effects and inventory so taken are sent through the Agent-General for the Colony, or by other convenient opportunity, to the friends of the deceased. In the case of other passengers dying on the voyage, their goods and effects are handed over to the Curator of Intestate Estates, by whom they are sold by public auction. After payment of all debts and expenses, the residue, not exceeding £100, may be paid over by the Curator, upon satisfactory proof of relationship, to any person claiming to be entitled, without the necessity of probate or letters of administration being taken out.

The arrangements for free and assisted immigration are now under the Immigration Act of 1882 (which repealed the Immigration Act of 1872, and the Amendment Act of 1875, though not affecting anything already lawfully done under that Act), Amendment Act of 1884, Amendment Act of 1886, Amendment Act of 1887, and an Order in Council, June 5, 1891.

Emigration matters in general are under the control of the Agent-General of the Colony, and of the agents subordinate to him.

COLONIAL NOMINEES.—The regulations for the nomination by British subjects who have resided continuously in Queensland for six months, and can satisfy the Immigration Agent upon that point, of personal friends or relatives (who must be persons of good character, and free from any mutilation, deformity, mental or bodily defect) in Europe whom they desire to bring out are as under. Applications for such passages are to be made to the Immigration Agent in Brisbane, Assistant Immigration Agents at Townsville, Mackay, Rockhampton, Bundaberg and Maryborough, or to the Clerks of Petty Sessions in the various towns of the Colony. In making the application, payment is to be made according to the following scale:—For a male child between one and twelve years of age, £2; female child between one and twelve, £1; for males between twelve and forty, £4; for females between twelve and forty, £2; persons of either sex above forty and under fifty-five, £8. Above fifty-five years the full amount of passage money, £13. 13s. (Any person who arrives in the Colony under the provisions of clause 17 of the principal Act, as a free, assisted, or nominated immigrant, having previously resided in any part of the Australian colonies shall be liable to a penalty not exceeding £50, with or without imprisonment for any period not exceeding twelve months.) (Any application is liable to be refused by the Immigration Agent, or the nomination, even if granted, may be rejected by the Agent-General in London, should he think fit to do so.) A passage certificate will then be issued, available for twelve months from its date, which the applicant, or nominee, has to forward to his friend or relative. The latter will have to present it to the Agent-General for Emigration in the United Kingdom, or to any appointed Emigration Agent in Europe. A passage contract ticket will then be given him, entitling him and the members of his family mentioned in the certificate issued in Queensland to a free passage. If the friend or relative do not make use of the passage certificate, the nominee can get his deposit returned, less 10 per cent.

The following are the regulations:—

The only persons eligible to be nominated under the provisions of the ninth section of "The Immigration Act of 1882," shall be relatives or personal friends of the applicant. Every such person must be of good character, must not have been convicted of crime, and must be free from any mutilation, deformity, mental or bodily defect, or any disease calculated to shorten life or to impair physical or mental energy, and must have been vaccinated.

Mechanics or artisans shall not be eligible to be nominated under that section; nor shall more than two children under twelve years of age of the same family, or any person above the age of forty-five years, be eligible to be nominated without the sanction of the Minister.

Persons other than female domestic servants, ploughmen, gardeners, and farm labourers, shall not be eligible to be nominated under the ninth section unless they are relatives of the applicant.

An application under ninth section will not be received except from a person who has been a *bonâ fide* resident of Queensland for at least six months. Every applicant must in his application state the length of his residence in the Colony, and the places where he has resided.

Applications under the ninth section must be in duplicate. One copy will be sent to the Agent-General.

In the case of applications under the ninth section, the Immigration Agent, Assistant Immigration Agent or Clerk of Petty Sessions must satisfy himself by personal inquiry (the result of which the Clerk of Petty Sessions must report to the Immigration Agent) that the person for whose passage application is made is a relative or personal friend of the applicant.

The Minister may direct that a passage warrant be not issued in respect of any person nominated.

Passage warrants under the ninth section will be made out in duplicate.

One copy, to be marked "Provisional," will be issued to the applicant, and the other copy, to be marked "Final," will be sent to the Agent-General, who will cause inquiries to be made through his agents as to the eligibility of the persons named therein to be nominated under the provisions of this Order.

An application for a passage, accompanied by certificates,

must be forwarded to the Agent-General in respect of every person nominated. The application must be signed by every such person who is of full age, or by the head of the family when a person is nominated with his or her family.

If the Agent-General is satisfied that all the conditions of this Order have been complied with, he will, upon surrender of the Provisional Warrant, issue the Final Warrant to the person nominated, which will entitle him to a Passage Contract Ticket.

A memorandum shall be printed on the Provisional Warrant stating that it must be surrendered and exchanged for a Final Warrant at the office of the Agent-General before a passage can be obtained.

The Agent-General will refuse to issue a Final Warrant to any person named in a Provisional Warrant if he finds that such person is not eligible to be nominated under the provisions of this Order, or that the description in the application is incorrect in any material particular.

The Order in Council of the 27th of October, 1887, published in the *Gazette* of the 5th of November, 1887, shall be and is hereby rescinded.

Any person desirous of emigrating to Queensland, who, by reason of having neither relatives or personal friends resident in the colony is not eligible to receive a nominated passage, can, upon obtaining the approval of the Hon. the Agent-General for Queensland, 1, Westminster Chambers, Victoria Street, London, be granted a full paying steerage passage upon payment of the sum of £13 13s.

Ship kits are now supplied by the government, and the articles are, at the termination of the voyage, to be delivered to the Immigration Agent at Brisbane.

Assisted Passengers. — The Agent-General will entertain applications for some assistance towards the total cost of passage from small Capitalist Farmers, Market Gardeners, Dairymen, and Orchardists—especially in the case of those having families. Full particulars as to the occupations of the head and the members of the family, their available Capital, and intentions as to pursuit on landing, &c., should be forwarded with the application, and each case will be considered on its merits. Whatever money contributions it may be decided to grant towards the cost of passage may apply to the case of persons wishing to proceed to the Colony by second as well as steerage ship accommodation.

Free Passengers. — Female Domestic Servants and Farm Labourers will be granted Free Passages to Queensland upon the approval of the Agent-General in London, and forms of application, setting forth the terms and conditions upon which such passages will be granted may be obtained by communication with the office of the Agent-General, No. 1, Victoria Street, Westminster, London, S.W., who must be thoroughly satisfied with the character and *bona fides* of each applicant. The only outlay to be incurred by the Emigrant will be the cost of transit from his place of residence to the port of embarkation, and also the charge for "ship kit," viz., £1. All Emigrants, as enumerated above, will be accomodated, Free of all Expense, at the Immigration Depôt at the port of arrival for fourteen days, or such period as may enable them to complete their arrangements, and they will further be entitled to receive a Free Pass to any part of the Colony where a railway line exists.

Reception and Employment of Immigrants.—In various parts of the Colony are established depôts, to which all emigrants may be forwarded if necessary. The Police Magistrate, or other assistant Immigration Agent specially appointed, will register applications made for servants, and engagements made within the depôt in pursuance of such applications, and will take all measures to facilitate the making of such engagements. The Immigration Agent is authorised to grant a free railway ticket to any assisted, free, or remittance emigrant, being a steerage passenger, who may be desirous of proceeding into the country after arrival in the Colony.

Rent.—Small houses can be procured from 5s. and upwards per week.

Rates of Wages.—As regards artisans the ruling rate of wages are as follows. Agricultural labourers, 14s. to 18s. per week and found; blacksmiths, 9s. to 11s.; butchers, 7s. to 10s.; masons, 8s. to 10s. a day. Bullock-drivers, 17s. to 20s. per week and found; carpenters, 7s. to 9s. per day; cooks (male), 25s. to 50s. per week; coopers, 6s. to 10s. per day; coachmen and grooms, 15s. to 20s. per week and found. Compositors, 1s. per 1,000; 50s. per week. Engineers, 10s. to 12s. per day; boiler-makers, shipbuilders and other constructive iron workers from 9s. 4d. to 11s.; iron-moulders, 9s. to 10s.; pattern-makers, 10s. to 12s.: ploughmen, 20s. week and found; glaziers and painters, 8s. to 9s. per day; gardeners, 5s. 6d. to 7s. 6d. per day; grooms, 12s. 6d. to 21s. per week and found; hut-keepers, £30 to £40 per year; house servants (male), £30 to £60 per year; labourers, 5s. 6d. to 7s. per day; miners, 8s. to 10s. per day; plasterers, 10s. to 12s. per day; plumbers, 7s. to 10s.; bricklayers, 8s. to 12s. per day; bricklayers' labourers, 5s. to 7s.; wheelwrights, 8s. 6d, to 10s.; coachbuilders, 7s. to 10s.; cabinet makers, 5s. to 9s.; quarrymen, 25s. to 45s. per week; shoemakers, 4s. 6d. to 7s. 6d. per day; shearers, 17s. 6d. to 20s. per 100, hand or machine; shepherds, £30 to £45 per year, with board and lodging; tailors, 6s. to 10s. per day; cutters, 80s. to 120s. per week; tin and iron-plate workers, 35s. to £3 per week. Upholsterers, 7s. 6d. to 9s. per day; bookbinders, 6s. to 9s.; watchmakers, 8s. to 10s. In nearly all trades eight hours is counted a day's work, and overtime is generally paid for at the rate of time and a-half. Metropolitan grocers and butchers take a half-holiday weekly (not Saturday); many large drapers close at 1 p.m. Saturday. A movement, is on foot for the compulsory closing of a half-day weekly in respect of all shop trades.

Females.—Plain cooks, 15s. to 21s. per week; general servants, 8s. to 15s.; housemaids, 8s. to 15s.; laundresses, 12s. to 20s. milliners, 15s. to 30s.; nursery-maids, 7s. to 10s.; dressmakers, 15s. to 30s. per week; barmaids, 15s. to 30s.; cook and laundress, 12s. to 20s.; nurse-needlewoman, 10s. to 15s.; housemaid, 10s. to 15s. per week.

Prices of Provisions.—Bacon, 9d. to 1s. 2d. per lb.; beer, 9s. to 12s. per dozen quarts; brandy, 7s. 6d. per bottle; bread, 6d. per 4lb. loaf; butter, fresh, 1s. to 1s. 3d.; butter, salt, 6d. to 1s.; candles (sperm), 8d. per lb.; cheese, 9d. to 1s. 2d.; coffee, 1s. 6d. to 2s. per lb.; Eggs, 6d. to 1s. per dozen (more in winter). Flour, 1½d. to 2d. per lb.; milk, 4d. per quart; beef, 4d. to 6d. per lb.; beef, salt, 2½d. to 3½d. per lb.; mutton, 4d. to 6d. per lb.; pork, 6d. per lb.; veal, 6d. per lb.; mustard, 1s. per lb.; kerosene oil, 2s. 6d. per gallon; oatmeal, 2d. to 4d. per lb.; potatoes, 7s. to 9s. per cwt.; rice, 4d. per lb.; salt, 2d. per lb.; soap, 5d. and 6d. per lb.; starch, 6d. per lb.; sugar, 2d. to 4d. per lb.; tea, 1s. 6d to 3s. per lb.; arrowroot, 3d. to 6d. per lb.; tobacco, 4s. to 8s. per lb.; colonial wines, 33s to 36s. per dozen; coals, 17s. to 20s. per ton; firewood, 4s. to 6s. per load.

TASMANIA.

Information on all matters relating to emigration to Tasmania can be procured on written or personal application to the Agent-General, 5, Westminster Chambers, Victoria Street, London, S.W. Inquiries respecting friends or relations in the Colony should be addressed to the Chief Secretary.

The cost of passage from London to Tasmania is: by steam vessels, cabin, £45 to £60; intermediate, £24 to £30; steerage, £13 to £16. Steamships sail regularly direct to Tasmania, and the large steamers *en route* to New Zealand also call.

Under present arrangements neither *free, assisted* or *nominated* passages are issued. The issue of land certificates to immigrants paying their own passages to the Colony has ceased.

No special arrangements are made by the Tasmanian Government for reception on landing, labour registries, &c., but emigrants can get information as to employment at the office of the Chief Secretary or Minister of Lands and Works. There is an Immigration Committee in Launceston, and also a Labour Bureau in communication with farmers and employers of labour in the northern halt of the island. At the Lands and Works Office, Hobart, a Labour Bureau registers names of those seeking employment.

Rates of Wages.—These, which vary according to the localities, are about as follows:—Coach trimmers, 1s. per hour; coachsmiths, 1s. per hour; body carriage makers, 10d. to 1s. per hour; waggon builders, 1s. per hour; wheelwrights (city), 1s. per hour; carriage painters, 1s. per hour; compositors, 9d. per 1,000; do. (jobbing), 8d. to 9d. per hour; stonemasons, 6s. per day; stonemasons' labourers, 4s. 6d. per day; stone-quarrymen, 6s. per day; plasterers, 5s. per day: plasterers' labourers, 4s. per day; bricklayers, 6s. per day; bricklayers' labourers, 4s. per day; carpenters (city), 6s. to 8s. per day; joiners, 6s. to 8s. per day; painters, 5s. to 7s. per day; labourers, 4s. per day; tailors (paid by the piece) can average about 8d. per hour; shoemakers, do., 25s. to 40s. per week; saddlers and harness makers, 30s. to 45s. per week; shoemakers (jobbing), 25s. to 40s. per week; working engineers, 1s. per hour; blacksmiths, 1s. per hour; do., strikers, 8d. per hour; saw-mill hands, 6d. per hour. Railway: Permanent Way Department—inspectors, 10s. per day; gangers, 6s. per day; labourers (navvies), 5s. per day. Locomotive Department—fitters, 9d. to 1s. per hour; blacksmiths, 9d. to 1s. per hour; strikers, 6d. to 8d. per hour; carpenters, 7d. to 10d. per hour; painters, 9d. to 10d. per hour; labourers, 6d. per hour; drivers, 8s. to 9s. per day; firemen, 6s. to 7s. 6d. per day; cleaners, 5s. per day. Traffic Department—guards, 6s.. to 7s. per day; porters, 5s. to 6s. per day. Building Trades—all labour of this kind is paid by day of eight hours; others, nine and ten hours. Farm labourers, £12 to £20 per annum, with board and lodging; shepherds, £15 to £20 per annum. with board and lodging; grooms, 15s. to 25s. per week; gardener, (country), £20 to £35 per annum, with board and lodging; do. (town), £20 to £35 per annum; bakers, £1 10s. to £2 per week; butchers, £1 5s. to £2 per week; cooks (private houses), £20 to £35 per annum, with board and lodging; do. (hotels), £32 to £52 per annum, with board and lodging; laundresses, £18 to £20 per annum; house and parlour maids, £10 to £20 per annum, with board and lodging; general female servants, £10 to £20 per annum, with board and lodging; nursemaids, £5 to £12 per annum, with board and lodging; grooms and coachmen (in town), £20 to £35 per annum, with board and lodging; wheelwrights (country), 6s. per day; brickmakers, 25s. per 1,000; tinsmiths, £1 10s. to £2 per week; galvanized iron workers, £2 per week; lumpers and wharf labourers, day work for handling general cargo, 6s. per day; do., 10d. per ton; nightwork, 1s. per ton, and 1s. per hour extra; plumbers, 5s. to 6s. per day; gasfitters, 6s. per day; coopers, 6s. per day.

Agricultural labourers, and farm and domestic servants, of both sexes, are provided by their employers with lodging and food. Where rations are stipulated for, they consist of 10lb. or 12lb. of beef or mutton, 10lb. of wheat flour, 2lb. of sugar, and ¼lb. of tea per week. Agricultural and other labourers in the country are usually provided, rent free, with dwellings by their employers; but when such is not the case, a hut for a labourer can be put up for from £10 to £15; a slab hut in the bush for shepherds for £5.

Rent.—Three-roomed house, 4s. to 6s. per week; three or four rooms and kitchen, 8s. to 10s. per week; larger houses from £35 per year. Board and lodging, 12s. 6d. to 30s. per week.

Prices of Provisions and Necessaries.—Bacon, 8d. to 10d

per lb. ; beef, 4d. to 8d. per lb. ; mutton, 4d. to 6d. per lb. ; pork, 6d. to 8d. per lb.; veal, 6d. to 7d. per lb.; hams, 9d. to 10d. per lb.; bread, 4lb. loaf, 4d. to 6d.; butter, fresh, 1s. to 2s. ; cheese, 6d. to 10d. per lb. ; eggs, 9d. to 1s. 6d. per dozen ; fowls, 2s. to 4s. per pair ; ducks, 2s. to 4s. 6d. per pair ; geese, 5s. each ; turkeys, 4s. to 8s. each ; Sydney rock oysters, 6d. per dozen ; Tasmania, ditto, 3s. per 100.; coffee, 1s. to 2s. per lb.; coals, 18s. to 20s. per ton ; lignite, 12s. per ton ; firewood, 10s. to 15s. per ton ; milk, 3d. to 5d. per quart ; oatmeal, 3d. per lb. ; kerosene, 2s. to 2s. 3d. per gallon ; sugar, 2d. to 5d. per lb. ; tobacco, 4s. 6d. to 6s. 6d. per lb. ; tea, 1s. to 3s. per lb. ; cauliflowers, 4d. to 10d. each ; apples, ½d. to 2d. per lb. ; pears, 1d. to 3d. per lb. ; oranges, 6d. to 2s. per dozen ; ditto, per case, 4s. to 10s. ; dates, 9d. to 1s. per lb. ; lemons, 6d. to 1s. 6d. per dozen ; cocoanuts, 4d. to 9d. each ; potatoes, 6d. to 9d. per 24lb. ; pine-apples, 6d. to 1s. 6d. each ; bananas, 6d. to 9d. each ; Brazil nuts, 1s. per lb. ; capsicums, 1s. per dozen ; cabbages, 1d. to 4d. ; carrots, per ton, £2 to £4 ; onions, £4 to £8 ; potatoes, £2 10s. to £7. Spirits : Brandy, 40s. to 50s. per gal. ; rum, 25s. to 30s. ; whisky, 40s. to 45s.; malt liquor (English ale), 8s. to 10s. 6d. per gal.; colonial ale, 2s. 6d. to 4s. Wines : port, 35s. to 70s. ; sherry, 35s. to 70s.

NEW ZEALAND.

FREE, assisted or nominated passages are not now offered by the N. Z. Government. The labour most in demand in New Zealand is that of experienced agricultural and farm labourers, and station hands, and female domestic servants, especially general servants. Artisans and mechanics are not in demand as the tendency to flock to the towns, and stay there, has overstocked the market for all kinds of such labour.

Applications for information respecting the Colony should be made personally, or addressed to the Agent-General, 13, Westminster Chambers, London, S.W., where there is a Bureau for supplying information, and where books, &c., may be consulted. Inquiries respecting the friends or relatives of emigrants should be addressed to the Colonial Secretary, Wellington.

In the event of emigrants dying on the passage out, the Supreme Court grants probate or letters of administration as regards their effects.

During 1898, the number arriving in New Zealand from all parts was 18,855 ; the number leaving the Colony was 16,159, an excess of immigration over emigration of 2,696.

AVERAGE RATES OF WAGES IN NEW ZEALAND.—AGRICULTURAL LABOUR. Per week, with board :—Farm labourers, 15s. to 20s. in Auckland ; 15s. to 20s. in Taranaki ; 20s. to 25s. in Hawkes Bay ; 20s. to 30s. in Marlborough and Nelson ; 25s. to 30s. in Westland ; 20s. to 35s. in Wellington and 12s. 6d. to 20s. in Otago. Ploughmen, 15s. to 25s. in Auckland ; 20s. to 25s. in Taranaki ; 25s. in Hawkes Bay ; 20s. to 35s. in Wellington ; 15 to 20s. in Marlborough and Otago ; 17s. 6d. to 20s. in Canterbury. Reapers, mowers, and threshers. 20s. to 36s. in Taranaki, Nelson and Otago ; 15s. to 20s. in Wellington ; 30s. to 35s. in Canterbury ; 15s. to 25s. in Auckland ; 25s. to 35s. in Hawkes Bay ; and 25s. in Marlborough. PASTORAL LABOUR. Shepherds, stock-keepers, and hut-keepers, per year, with board :—£52 to £65 in Auckland ; £50 to £75 in Wellington ; £65 to £78 in Marlborough ; £52 in Nelson ; £50 to £65 in Canterbury and Otago ; and £52 to £75 in Hawkes Bay. Station labourers, per week, with board :—14s. to 20s. in Auckland ; 15s. to 25s. in other districts. Men cooks, per week with board :—20s. in Auckland ; 15s. to 30s. in other districts. Shearers, with board, per 100 sheep :—15s. to 20s. in all districts. Servants :—married couples without family, per year, with board, £75 to £90 in Hawkes Bay ; £55 to £80 in Wellington ; £65 to £80 in Taranaki ; £60 to £75 in other districts. Ditto, with family, £5 to £10 a year less in all districts. Grooms, per week with board :—20s. in Westland ; 15s. to 25s. in other districts. Gardeners, per week with board :—22s. 6d. to 25s. in Canterbury ; 15s. to 30s. in other districts. Female cooks, per week, with board :—15s. to 20s. in Wellington ; 15s. to 20s. in Hawkes Bay ; 20s. in Nelson, 12s. to 20s. in other districts. Laundresses, per week, with board :—10s. to 20s. in all districts. General house servants and housemaids, per week with board :—6s. to 10s. in Wellington ; 8s. to 12s. in Canterbury ; 8s. to 12s. in Auckland ; 8s. to 12s. in other districts. Nursemaids, per week, with board :—5s. to 10s. in all districts ; needlewomen, per week, with board :—10s. to 20s. in all districts. Artisans, &c., per day, without board, in all districts :—Blacksmiths and bricklayers, 7s. to 12s. ; bricklayers, 8s. to 12s. ; carpenters and compositors, 8s. to 10s. ; coopers, 6s. to 10s. ; dressmakers, 2s. 6d. to 5s. ; engine drivers, 6s. to 15s. ; gardeners, 5s. to 10s. ; general labourers and navvies, 6s. to 8s. ; lumbermen and sawyers, 7s. to 11s. ; masons and shipwrights, 8s. to 14s. ; miners, 6s. to 10s. ; moulders, 10s. ; painters and shoemakers, 6s. 6d. to 10s. ; plasterers, 8s. to 14s. ; plumbers, saddlers, and tailors, 7s. to 10s. ; tailoresses, 3s. to 6s. ; tinsmiths, watchmakers, and wheelwrights, 8s. to 15s. ; wharf labourers, 1s. to 1s. 3d. per hour. Per week, without board, in all districts :—bakers and butchers, 30s. to 50s. ; printers, 40s. to 60s. ; store-men, 25s. to 50s. ; tanners, 30s. to 42s. Per month, with board :—seamen, £4 to £8.

THE AVERAGE PRICES OF PROVISIONS in the districts of Auckland, Wellington, Canterbury, and Otago, are respectively as follows :—Bacon, per pound, 8d. ; 5½d. to 8d. ; 6½d. ; and 5½d. to 8d. Beef, per pound, 5d. ; 2½d. to 4d. ; 4d. ; and 4d. to 5d. Bread, per 4-pound loaf, 6d. ; 6d. to 8d. ; 5d. ; and 6d. to 8d. Butter, (fresh) per pound, 6d. to 1s. ; 8d. to 1s. ; 8d. ; and 7d. to 1s. Cheese, colonial, per pound, 5d. ; 5d. to 6d. ; 4½d. ; and 4½d. to 7d. Coals, per ton, 30s. ; 32s. to 46s. ; 35s. ; and 20s. to 25s. Coffee, per pound, 1s. 6d. to 1s. 10d. ; 1s 4d. to 2s. ; 1s 4d. ; and 1s. 6d. to 1s. 9d. Milk, per quart, 2d to 3½d. ; 2d. to 3d. ; 3d. to 4d. ; and 2d. to 4d. Mutton, per pound, 2¾d. to 4d. ; 2½d. to 3d. ; 3½d. ; and 2½d. to 6d. Potatoes, per cwt., 6s. ; 5s. to 6s. 6d. ; 8s. ; and 3s. to 4s. Sugar, per pound, 2½d. ; 2¼d. to 2¾d. ; 2½d. ; and 2½d. to 3½d. Tea, per pound, 1s. 10d. ; 1s. 6d to 2s. 2d. ; 1s.6d. ; and 1s. 8d. to 2s. Tobacco, per pound, 5s. 6d. ; 5s. to 5s. 6d. ; 5s. ; and 6s. 6d. Speaking generally, the cost of living is lower, as compared to earnings, than in England.

RENT.—House rent is very dear, especially in Wellington, where a two or three-roomed cottage suitable for workmen costs about 8s. to 10s. per week. The reason attributed is the rapid increase of population, owing to Wellington being the centre of the colony and the principal transhipping port. All the large warehouses are removing their headquarters to Wellington. In the country from 3s. to 8s. per week. Board and lodging may be had from 14s. to 25s. per week in towns, and 10s. to 18s. in country districts.

CLOTHING is about 15% dearer than it is in England.

LAND REGULATIONS.

NEW SOUTH WALES.

Synopsis of the Laws Relating to Crown Lands.

ADMINISTRATION. The colony, for the purposes of the Land Acts is classified into three divisions—the Eastern, the Central and the Western. These divisions are merely arbitrary, but are important, in view of the fact that the law, in many respects, differs in each. The lines separatiug each division run irregularly north and south. The total area of the colony is 198,638,000 acres, of which the Eastern division contains approximately 61,370,000 acres, the Central, 56,380,000 acres, and the Western, 80,888,000 acres.

The head office of the Department of Lands and Survey is in Sydney, and is presided over by the Minister for Lands, The Hon. T. H. Hassall, the permanent head of the Department being the Under Secretary for Lands, H. A. G. Curry, Esq. Branches of the Department are now situated in various parts of the colony. Prior to 1885 the whole business of the Department was dealt with at the head office, but during that year it was largely decentralised by the calling into existence of local Land Boards. Each Board is presided over by a Chairman, who is a salaried officer of the Government, his coadjutors, of whom there are two, being local residents, remunerated by fees. At the head office of each Board a District Surveyor and a Staff of clerks and draftsmen are employed, besides whom are surveyors and other field officers located elsewhere within the boundaries which mark the Board's jurisdiction. Applications for certain classes of holdings, such as Homestead Selections, Conditional Purchases, Conditional Leases, &c., come before the Board in the first instance for investigation, and applicants are not entitled to finally (though in some cases they may provisionally) take possession of the land applied for until their applications have been what is termed "Confirmed" by the Board. Against a Board's decision an appeal lies to a Land Appeal Court, which consists of a President and two Commissioners.

Each Board District includes several smaller districts, called Land Districts (for each of which, however, there is a separate Board), which have been established for the convenience of the public. In each district a Crown Lands Agent is stationed, whose duty it is to supply information to persons seeking land, and to receive applications, deposits, and other payments under the Crown Lands Acts.

At the head office in Sydney an Information Bureau is in existence, where the fullest and latest particulars as to the situation of available land in the Colony, and the prices and conditions under which it may be taken up, are always obtainable.

RESERVES, DEDICATIONS, &C.—The Governor is invested with large powers of temporarily reserving Crown lands either from sale or lease generally, or from any specific kind of sale or lease. Reservation takes effect immediately upon notification in the *Government Gazette*. Revocation of reservation does not mature until the expiration of sixty days after *Gazette* notification.

The purposes of reserves are various: for instance, for water supply, for preservation of timber, for commonage, for the convenience of stock travelling through the country, &c. Reserves of the last-mentioned description may be up to one mile in width, and are associated with camping reserves usually 640 acres in extent.

METHODS OF DISPOSAL OF CROWN LANDS.—The principal methods by which Crown lands are alienated are by Homestead Selection, Conditional Purchase, Purchase by virtue of Improvements, and Purchase at Auction. The principal methods under which Crown lands are let are by Settlement Lease, Pastoral Lease, Occupation License, Conditional Lease, Homestead Lease, Improvement Lease, Scrub Lease, Lease of Inferior Lands, Annual Lease, Artesian Well Lease, Special Lease, and Residential Lease. It will be convenient to refer to each of these under separate heads.

LIMITATIONS AS TO SELECTING.—The intention of the authors of the various Land Acts has been to provide land on easy terms for those who might require it for their own *bona fide* use and occupation. Unhappily this intention has been too often defeated and the liberal provisions of the law taken advantage of for speculative purposes, and for the aggregation of large estates. To prevent a recurrence of, or to limit this evil, stringent provisions were necessary. These have been supplied by recent legislation, and may be summed up as follows:—

1. An applicant for a homestead selection, an original conditional purchase, an original homestead lease, or a settlement lease is debited with the quantity of land already held by him in fee-simple or under conditional purchase or conditional lease, and can take up only such an area, as, added to that already held, will keep within the maximum area allowed for the holding applied for. Provision is made against defeat of this restriction by any fraudulent transfer.
2. A person who shall obtain a homestead selection, an original conditional purchase, an original homestead lease, or a settlement lease, will be precluded from obtaining any further holding of any of these four classes unless he has obtained a certificate that adverse circumstances compelled him to abandon or surrender his holding.

Every application of any of the classes referred to is required to be made in good faith, and an application is not taken to be made in good faith unless the sole object of the applicant is to obtain the land in order that he may hold and use it for his own exclusive benefit according to law.

QUALIFICATIONS TO SELECT.—A person of, or over, the age of 16 years (of either sex) may make a Conditional Purchase or Homestead Selection, but no person under the age of 21 years can apply for any lease other than a Conditional Lease, or in certain circumstances a Homestead Lease. For the last-mentioned lease a minor may apply if not less than 16 years of age and of the male sex. Minors, so far as concerns their transactions in connection with certain holdings under the Crown Lands Acts, enjoy the rights, and are subject to the liabilities of persons of full age.

A person who is not a naturalised subject of Her Majesty is debarred until he obtains letters of naturalisation, or until he has resided in New South Wales for twelve months, and then at the date of application he must lodge a declaration of his intention to become a naturalised subject within five years from that date.

Married women are disqualified unless they are judicially separated and actually living apart from their husbands.

HOMESTEAD SELECTION.—The Homestead Selection system owes its introduction to the Crown Lands Act of 1895, and offers special advantages to the small capitalist, inasmuch as the land may be held for the first five years at the extremely low rental of 1½, and thereafter at an annual rental of 2½ per cent. of its capital value. The rental period dates from the date of the application, and the rent is payable in advance half-yearly. The initial capital value is determined and advertised before the land is thrown open, and is not susceptible of alteration for the first fifteen years, except at the instance of the selector himself, who, if dissatisfied with the gazetted capital value, may apply for an appraisement within twelve months from the time his selection is confirmed to him. For every subsequent period of ten years the unimproved value of the land is appraised by the Local Land Board. It is important to note that no minimum value is fixed by law, and it is thus made possible to accommodate the rent to actual and changing values. Land, before being made available for Homestead Selection (and there is no restriction as to the division of the Colony in which it may be situated), is ascertained to be suitable for the purpose, and is measured into blocks, estimated to be each sufficient for the maintenance of a family, not, however, in any case exceeding 1,280 acres in extent; but, for the convenience of town residents, lands within easy distances of their places of business, are sometimes made available in comparatively small areas. After a given date (which is notified in the *Government Gazette*) the land may be obtained on application to the local Crown Land Agent. Where two or more applications are tendered for the same block, within the first week in which the land is open, they are held to have been lodged simultaneously, and the said Board then selects the most eligible applicant, having recourse to ballot if necessary. This provision applies to applications of all kinds. At the time of application one half year's rent and one third of a fee charged for survey have to be deposited. Payment of the balance of the survey fee is spread over two years. To illustrate the foregoing:—If a block of 640 acres (one square mile) should be advertised at £1 per acre or £640 in all—but it should be mentioned here that land is frequently thrown open at prices considerably below this—the first annual rent would be £8, and the survey fee £8 1s. 3d. Of the former £4, and of the latter £2 13s. 9d. (*i.e.* £6 13s. 9d. in all) would be required at the time of application. This initial expense will be recognised as small, and it will be seen that the selector is not called upon afterwards to expend any but a nominal sum in improvements. All that the law requires in this connection is that he shall within the first eighteen months after confirmation of his application erect a dwelling house worth at least £20. A condition of perpetual residence, commencing within three months after the date of confirmation of the application attaches to the holding, the object of which is to secure that the land shall be used for its intended purpose, and as a salutary check against, what has hitherto been, a prevailing tendency to take advantage of the law for merely speculative purposes.

Although residence is not compulsory until after confirmation of the application, an applicant is at liberty to take possession of the land immediately after lodging his application, providing his application is valid.

Should the land selected contain improvements, the property of the Crown, at the date of application, the Land Board will appraise their value and the selector is required to pay for them in four equal yearly instalments, with interest at 4 per cent. per annum.

The issue of a grant is deferred for five years, and during this term the land cannot be transferred, and such issue is contingent upon the Land Board granting a certificate that the conditions attaching to the selection have, up to the time of enquiry, been properly fulfilled.

The condition of residence may perhaps appear stringent, but it is not inflexible, as before issue of the grant, the Local Land Board may grant leave to the selector to cease residence for a necessary cause, and for such period as may be determined, and, after issue of the grant, the Governor, although expressly debarred from abrogating the condition altogether, is invested with the power of granting exemptions from, or relaxation of, its performance in such cases of inability or hardship (such as sickness, &c.) as are likely to arise.

There is one special advantage conferred upon a homestead selector, which has, so far, not been extended to other purchasers from the Crown. This is protection for his holding. He is at liberty, by a simple process of registration at the office of the local Crown Land Agent, if not in insolvent circumstances at the time, to secure himself against deprivation. His land cannot then be sold under a writ of execution, will not be affected by his bankruptcy, or in any way taken from him for the satisfaction of any debt or liability under process or constraint of law.

A Homestead Selection may be surrendered with the consent of the Governor, in which case the surrenderor is entitled to tenant-right in improvements.

When a number of selectors comprising not fewer than twenty families desire, for the sake of social conveniences and advantages, to settle together, the Governor may allow their respective conditions of residence to be performed within the boundaries of a village or hamlet adjacent to their selections, subject to such conditions as he may see fit to prescribe.

Homestead Selection Without Residence Before Grant.—An applicant who satisfies the local Land Board that he is debarred from living on a homestead selection before issue of the grant (*i.e.*, during the first five years) may perform the residence condition for that term by a deputy to be approved by the Land Board, but it must be the intention of the selector himself to subsequently live on the selection. In connection with a selection of this character the following special conditions are imposed :—

The full amount of survey-fee must be paid down.
The rent, until issue of grant, will be 3½ instead of 1¼ per cent. of the capital value of the land.
The dwelling house must be not less than £40 in value.
The applicant must, within three years after confirmation, have to the satisfaction of the Board not less than one-tenth of the area in full tillage, and during the fourth and fifth years, have one-fifth of the area in full tillage.

Conditional Purchases.—The Conditional Purchase (or, as it is sometimes called, the Free Selection) System, dates back to the year 1861. As the words imply, a conditional purchase is a purchase in fee-simple subject to the fulfilment of certain conditions. These conditions include residence for a term of ten years, the fencing or other improvement of the land, and the payment by annual instalments of the purchase money with interest at 4 per cent. per annum. A conditianal purchase may be of land in the Eastern or Central divisions, and may comprise unreserved country land not held under pastoral or other lease. The fact of land being held under annual lease or occupation license and containing improvements is not a bar to purchase, nor is survey or classification of the land a necessary preliminary. If an applicant selects land containing improvements, he accepts an obligation to pay for them, but payment is usually spread over a period and arranged for in instalments In either of the divisions mentioned the minimum area is 40 acres, the maximum area being in the Eastern Division 640 and in the Central Division 2,560 acres. The maximum areas referred to may be acquired by degrees at intervals, that is to say, the selector may take up a comparatively small area at first, and gradually supplement it by what are called additional purchases.

Land applied for under conditional purchase is ordinarily taken at a statutory price of £1 per acre, but the law contains a provision for the setting apart of what are termed Special Areas (which may be in the Western as well as in either of the two divisions already mentioned), and the price of land within these may be fixed at 30s. per acre and upwards. A conditional purchase within a special area cannot exceed 320 acres in the Eastern or 640 acres in the other divisions, and in the Eastern Division carries no right to a conditional lease. One feature with respect to special areas is that they may include land within suburban or population boundaries, but it is to be understood that the minimum and maximum areas of all special area conditional purchases, whether within suburban or population area boundaries, or not, are governed by the terms of the proclamation setting them apart. Land may also be set apart for conditional purchase by notification in the *Gazette*, at prices under £1 per acre, or under special area price of £1 10s. ad acre.

With an application (which has to be made to the local Crown Lands Agent) for a conditional purchase of ordinary land, a deposit of 2s. per acre and a survey fee according to a fixed scale are required. No other payment to the Crown is necessary for three years. At the end of the third year from the date of application an instalment of 1s. an acre is due, and thereafter a like instalment is payable annually. Three month's grace is allowed for the payment of each instalment. The deposit and the first instalment are wholly devoted to reduce the debt, interest not being charged for the first three years. The balance, after payment of the first instalment, is therefore 17s. per acre. Out of each succeeding instalment interest is taken and the residue credited in reduction of the debt. The interest is computed on the balance as reduced from year to year, and is, consequently, a diminishing quantity. Under this system it takes thirty instalments of 1s. per acre, together with the original deposit, to clear off the debt; but the holder of the land may, after he has obtained a certificate from the Local Land Board that he has fulfilled his conditions, pay off two or more instalments, or the whole of his balance according as it suits his convenience.

An original conditional purchase cannot be transferred until the conditions of the first five years are certified to have been fulfilled.

Under the Conditional Purchasers' Relief Act, a resident conditional purchaser may, in certain circumstances, reduce his annual instalment of 1s. to 9d. per acre, and, in some cases to 6d. per acre; but in the event of such reduction being made it will take the selector about 66 years to pay what he owes the Crown. A similar privilege may, under special circumstances, be extended to conditional purchasers not in residence.

Conditional Lease.—Any applicant for, or holder of, a conditional purchase applied for since the 1st January, 1885, is entitled to hold adjoining land under conditional lease. With an application for a conditional lease a deposit of 2d. per acre and a survey fee as for an additional conditional purchase are payable. A conditional lease may comprise up to three times the area of the purchase by virtue of which it is applied for, and the total area of conditionally purchased and conditionally leased land may reach 1,280 acres in the Eastern, and cannot exceed 2,560 acres in the Central Division. The lease has a term of twenty-eight years, subject to payment of an annual rent as appraised by the Land Board, and to the fulfilment of such conditions as apply to an additional conditional purchase. Pending appraisement of rent, a provisional rent of 2d. per acre is payable. The rent, which is calculated from the date of application having regard to the fact that the lessee may enter into immediate occupation, is payable annually in advance, and is subject to reappraisement at the expiration of the first period of 14 years, and again at the end of 7 years from that time. The lessee is entitled to convert his lease wholly or partly into an additional conditional purchase at any time during its currency, and to continue to hold the balance (if any) under lease. Although, therefore, in the Eastern Division a conditional purchase cannot be applied for in excess of 640 acres, double this area may be secured by the agency of a conditional lease.

Tenant-right in improvements is given to the last holder of an expired lease, and the Governor may concede it where the lease has been forfeited or surrendered.

Condition of Residence attached to Conditional Purchases and Conditional Leases.—The term of residence is computed so as to expire ten years from the date of application, and although the applicant may enter into residence immediately, he is not required to do so until his application has been confirmed by the Land Board. He then has three months' grace to do so. Residence is defined as "continuous and *bona fide* living on the land as the holder's usual home without any other habitual residence.

Where a parent and child hold land under conditional purchase or conditional lease adjoining each other, the child may continue to reside with the parent until the age of 21 is reached in the case of a boy, or 24 in the case of a girl.

The condition of residence on any conditional purchase may be suspended by the Local Land Board for a definite period in case of illness, drought, or for other sufficient cause.

Condition of Fencing or Improvement.—Land held under conditional purchase or conditional lease has to be fenced in within three years from the date of confirmation of application; but the selector may dispense with fencing, provided that he effects substantial improvements to the value of 6s. per acre within the first three years after the date of confirmation, and brings their value up to 10s. per acre within the next two succeeding years. In no case, however, need the expenditure exceed £384 within the first, or £640 within the second term. In other words, no greater expenditure is required on 2,560 acres in the Central Division than on 1,280 acres in the Eastern Division.

Conditional purchases and conditional leases held by a parent and child may without the imposition of any extra conditions be enclosed together with a ring fence.

Non-Residential Conditional Purchases.—Provision is made for conditional purchases exempt from any condition of residence. The minimum area is 40, the maximum area 320 acres. The price, deposit, and annual instalments are double those which would be payable for the same land if taken up under residential conditions. This does not apply to the survey fee. Within twelve months after the date of confirmation of the application the land must be fenced, and within five years from that date improvements (excluding the fencing) have to be made to the value of £1 per acre. With the permission of the Land Board the fencing may be dispensed with, in which case the improvements within the five years referred to are required to be of the value of £1 10s. per acre. A non-residential conditional purchase does not carry a right to a conditional lease.

Auction Sales.—Crown lands may be sold by auction without conditions; but from considerations of policy the law provides that during any one year not more than 200,000 acres shall be disposed of by this method. Town and suburban lands are for the most part disposed of in this manner. Lands are put up in blocks, each not exceeding ½ acre in the case of town lands, 20 acres in the case of suburban lands, and 640 acres in the case of country lands. The blocks are offered at upset prices, which necessarily vary according to their situation and advantages; but such upset prices cannot be lower than for town lands £8 per acre, suburban lands £2 10s. per acre, and country lands £1 5s. per acre.

In all cases a deposit of 25 per cent. is payable by the purchaser at the time of sale. The balance, in ordinary circumstances, is payable within three months; but in the case of town or suburban lands, or portions not exceeding 20 acres, the Minister may submit the land to sale on deferred payments, in which case the balance is spread over a fixed period (not exceeding five years), and is payable in annual instalments with 5 per cent. interest

Town or suburban land, or land within a population area, which has passed at auction may be applied for at the upset price. A deposit of 25 per cent. of such upset price is payable at the time of application, the balance being payable on the terms fixed for the auction sale. It is optional with the Minister to grant the application.

Purchases by Virtue of Improvements on Gold-fields.—The discovery of gold naturally attracts a large population to the

locality, and is frequently followed by the setting out of a town with suburban and population limits. Under the provisions of the Mining Act, persons are authorised to occupy small areas for residential or business purposes; and these areas they are permitted—under the Crown Lands Act—to purchase in fee-simple by virtue of the improvements.

Application is made to the Local Crown Lands Agent with a deposit of £1, and a survey fee of £1.

The holders must be in residence on the land; but the place of residence, though it must be of substantial materials, need not exceed a few pounds in value. Indeed, so far as the actual requirements of the Land Act are concerned, it will be sufficient if the improvements should be of the value of £8 per acre on town, and £2 10s. on other lands. The purchasable areas cannot exceed ¼ acre of town lands, or 1 acre of other lands. The value of the land is subject to appraisement by the Local Land Board, but cannot go below £8 per acre for town land, and £2 10s. per acre for other lands, or for any block containing less than 1 acre. The purchase money is payable within three months after notification in the *Government Gazette* that the purchase has been approved.

Settlement Leases for Agricultural or Grazing Purposes.—The settlement lease system, like that of homestead selection, is of recent origin, and is a further attempt to place land within easy reach of the small capitalist.

Tracts of Crown lands subdivided into farms are set apart by notification in the *Gazette* for this form of lease, and these subdivisions are not confined to any particular division of the colony.

Where land is considered to be suitable for agriculture the area of the farms must not exceed 1,280 acres; but, in other instances, where it is evident that the settler must combine agriculture with grazing, and must depend mainly upon the latter for a livelihood, the farms may comprise any area not exceeding 10,240 acres.

The term for which the lease lasts is 28 years, and the annual rental (which depends upon the capital value of the land) is fixed at the rate of 1¼ per cent. on that value. Throughout the whole term residence is compulsory, and the land must be fenced within the first five years. Regulations may be made by the Minister as to keeping the farm clear of rabbits, scrub, &c., and must be observed. The lease must not be assigned or sub-let without the Minister's permission. Upon the expiration of the full term of the lease tenant-right in the improvements is secured to the last holder. These comprise in brief, the general conditions attached to every settlement lease; but any additional provisions or conditions that may seem expedient in the public interest may be imposed.

Prior to any land becoming available for lease, notifications are published in the *Gazette* and in local newspapers giving particulars as to the areas, values, and qualities of the farms, and also as to the date upon which applications may be lodged.

Application has to be made to the Local Crown Lands Agent, and with the application a deposit of one half-year's rent and a survey fee according to the appended scale are required. The application has to be considered by the Land Board, and after it has been confirmed the granting of the lease is a matter for the Governor. If the lessee is not satisfied with the gazetted capital value of the land he may apply within twelve months after confirmation of his application for the appraisement of the value.

The lessee may apply during the last year of the lease for an area not exceeding 1,280 acres, on which his house is situated, as a Homestead Grant. The conditions attached to this class of holding have been already explained.

Pastoral Leases and Occupation Licenses.—Up to the year 1885 the whole of the unsold lands outside town and suburban limits were, broadly speaking, held under pastoral lease. Lessees, however, although they nominally held for a term of years, had no security of tenure, inasmuch as the land could be disposed of by the Crown in various ways, and was open to the selector on any Thursday. Lessees possessed the privilege of buying portions of the land by virtue of such permanent improvements as they had effected, but this was found to invite artificial expenditure on their part, and the privilege, in fact, came to be limited, and at last abolished, by law. In the meantime they had yielded to the temptation of securing parts of their runs by purchase at auction, and indirectly by conditional purchase—a course which, no doubt, was in some measure induced by the fact that speculative selection directed against their interest had come to be somewhat freely indulged in. It has thus happened that most pastoral properties at the present day consist of a proportion of freehold, conditionally purchased, and leasehold land, and indeed, at the present time, many extensive runs practically consist wholly of lands which have passed out of the possession of the Crown.

An opportunity for acquiring land under pastoral lease or occupation license direct from the Crown does not, except in comparatively rare cases, exist. Forfeited or surrendered pastoral leases may be submitted to auction or tender for the unexpired term. The only lands that may now be obtained direct from the Crown under license are lands within any license or pastoral lease that may be surrendered or that may expire or be forfeited. In such cases the lands may be submitted to auction or tender.

There are no pastoral leases in the Eastern Division. They had a term of five years under the Act of 1884, commencing in 1885, and this term has expired. The lessees were allowed the privilege of continuing in occupation under what is termed Preferential Occupation License—a privilege which has been largely availed of. Broadly speaking, therefore, the whole of the land formerly held under pastoral lease in the Eastern Division is now held under Occupation License.

Occupation Licenses in any of the three divisions run from January to December, but may be renewed from year to year on payment of rent in advance.

Pastoral leases are now confined to the Central and Western Divisions, and in connection with these the Act of 1889 has introduced important concessions. Under the Act of 1884 leases in the Central Division had a term of ten years, and in the Western Division a term of fifteen years, commencing, for the most part, about 1885.

With regard to Central Division pastoral leases the term was not altered, but the question of extension beyond the original term of ten years was made dependent upon the lessee effecting improvements to earn it, and this extension has been granted in several cases from one up to five years.

With respect to the Western leases the term of fifteen years was by the Act of 1889 converted, on application by the holders, into a new term of twenty-one years, and by the Act of 1895 an additional term of seven years has been added. This term of twenty-eight years dates from the year 1890, and is divisible into seven-year periods, the rent applicable to each period being subject to reappraisement. On the expiration of the term of a western lease, the last holder is given tenant-right in improvements. During the last year of the lease, 640 acres may be applied for under Homestead Selection. There is now a provision in the Act of 1895 under which a resumed area in the Western Division may be re-attached to the leasehold area. A further provision has been made in the Act of 1895 for withdrawing land from pastoral lease in either the Central or Western Division, the lessee obtaining by way of compensation an extension of lease of the residue of the leasehold, proportioned to the area withdrawn, and a right to a preferential occupation license of the land withdrawn. In the case of a Central Division lease up to one-half, and in the case of a Western Division lease up to one-eighth of the area may be resumed.

No conditions attach to a pastoral lease or occupation license other than the payment of rent annually in advance.

The Minister may direct a re-appraisement of the rent of an occupation license at any time.

Homestead Leases.—A Homestead Lease is confined to land in the Western Division, and may be applied for over vacant land, or land held under occupation license, but must in either case be outside the limits of a town, or its suburban or population area. The lease is for grazing purposes, and offers an invitation to the small pastoralist. The minimum area is 2,560 acres, the maximum area 10,240 acres. Application has to be made to the local Crown Lands Agent, and at the time of application a deposit of 1d. per acre is payable, together with £10 towards cost of survey. The application is subject to consideration and recommendation by the Land Board, by whom also the rent is appraised. The granting of the lease devolves upon the Governor. The approval of the lease is notified in the *Gazette*, and within sixty days thereafter the balance of cost of survey and any rent due are payable. The rent is calculated from the date of application (which gives the applicant a right to enter into occupation), and pending the *Gazette* notice a provisional rent of 1d. per acre is payable. The lease has a term of twenty-eight years, the rent being payable annually in advance, and subject to reappraisement every seven years.

The holder of a homestead lease is required to enter into occupation within ninety days after the *Gazette* notification of approval of the lease, and during each year of the first five years (computed from the date of application) to reside continually on the land for the space of six months.

Within the first two years of the lease he is required to fence the boundaries of the land, but the Land Board may for sufficient cause extend this term.

A lease of this character cannot be transferred (except by way of *bona-fide* mortgage) until the residential term has expired.

On expiration of the lease the last holder is given tenant-right in improvements, and during the last year the holder may apply for 640 acres as a Homestead Selection.

Leases of Scrub and Inferior Lands and Improvement Leases.—These leases are classed together, having regard to the fact that, although there are separate provisions in the Crown Lands Acts, applying to each, they all have features in common; and in fact the question whether land shall be offered under one provision or another is largely a matter of choice. Some of the scrub-infested lands in the Colony are of a high-class character, and the aim of the law is to offer such land on terms and conditions calculated to render their occupation profitable both to the lessee and to the Crown.

Before land can be offered under Scrub Lease it is necessary that the Local Land Board should recommend it to be declared scrub land; and in connection with inferior lands a report from the Board has also to be first obtained. This procedure is not technically necessary with regard to lands proposed to be offered under Improvement Lease.

There is no limitation as to the area of a Scrub Lease or of a lease of inferior lands, but an Improvement Lease cannot exceed an area of 20,480 acres.

A Pastoral or Homestead Lease may be converted wholly or in part into a Scrub Lease.

Scrub Leases may be granted on application or disposed of by auction or tender. Leases of the other two classes may be disposed of by auction or tender only. The rent of a lease obtained by application is determined by the Local Land Board. A lease offered by auction or tender of course ordinarily falls to the highest bidder or tenderer. In all cases the rent is payable annually in advance.

The initial rent of an Improvement Lease or a lease of inferior lands applies throughout the whole term of the lease, and this may be the case with respect to a Scrub Lease; but it is in the power of the Minister when offering a Scrub Lease to arrange

that the term of the lease shall be divided into periods, and that the rent for each period shall be determined by appraisement.

The term of the lease is fixed by the Minister and cannot exceed twenty-eight years. Indeed Scrub Leases or leases of inferior land are limited in the first instance to twenty-one and twenty years respectively, but under the Act of 1895 the Governor now has the power of extending the term to twenty-eight years after once a lease has been granted.

A condition of residence does not attach to any of these leases. The conditions imposed are directed principally to the destruction of scrub or the improvement of the land. The provisions of the law in this respect are :—

Scrub Leases.—Every holder of a Scrub Lease shall as a condition of his lease be required to take all such steps as the Local Land Board shall from time to time, subject to appeal, direct, for the purpose of destroying such scrub as may be specified in his lease or promise of lease, in and upon the land under Scrub Lease. If the holder shall fail to comply with any condition of his lease, the Minister may, by notification in the *Gazette*, declare such lease to be forfeited ; and all improvements on such lands shall be the property of the Crown.

Leases of Inferior Lands.—Such leases shall be subject to such conditions as may be specified in the *Gazette*.

Improvement Leases.—The lease may contain such covenants and provisions as to the Governor may seem expedient, according to the circumstances of each case and all such covenants and provisions shall be notified in the *Gazette*, and in a local newspaper before the lease is offered for sale or tenders called for. The lease shall contain covenants and provisions for the improvement of the land leased, and for the expenditure of money thereon, for the payment of rent, and for the determination of the lease upon any breach by the lessee of the covenants and provisions thereof.

The last holder of an Improvement Lease is granted tenant-right in improvements, and the Governor may grant tenant-right to the holder of a Scrub Lease or a lease of inferior lands. With respect to any of these leases (where the land is not within a Pastoral or Homestead Lease) 640 acres may be converted into a Homestead Selection.

Leases Surrounding Artesian Wells.—The discovery of artesian water in large quantities promises to be a fact of the largest importance to lands in the Western Division of the Colony, and, as an encouragement to the holders of land in that division under the insecure tenures of annual lease or occupation license, the law contains the following provision :—Any such holder desirous of boring and searching for water may, on making application to the Minister and depositing £10, obtain the reservation of an area up to 10,240 acres surrounding the proposed position of the bore. The effect of the reservation is to protect the land for the applicant's own use, and should boring operations be, in the Minister's opinion, sufficiently successful and promising, a lease may be granted of the land at the same rent as already paid for it, but for a term which may be as long as the unexpired term of the associated pastoral lease.

Annual Leases.—Annual Leases of unoccupied land may be obtained for grazing purposes on application to the local Crown Land Agent and payment of a deposit of £3 for each 640 acres or less area, or may be offered by auction or tender. They carry no security of tenure, but are somewhat largely availed of for temporary purposes ; and if the land should not be absorbed by conditional purchase, &c., they are renewable from year to year by payment of rent in advance on or before the 31st December. No one lease can comprise more than 1,920 acres ; but there is no limit to the number of leases any one person may hold. No conditions of residence or improvements are attached to them, the only condition being, as already explained, payment of rent annually in advance.

With respect to a lease applied for, the land is allotted, and the rent appraised, by the Local Land Board. The Minister may refuse any application, and, after three months' notice, cancel any Annual Lease.

Special Leases.—The law provides for a class of leases termed Special Leases. Such leases (which do not involve a condition of residence) are to meet cases where land, in any Division, is required for some industrial or business purpose—such, for example, as for a brick kiln, tannery, wool-washing establishment, &c., &c. Land under the sea or under the waters of any harbour, lake, river, &c., is deemed to be Crown lands, and may be leased for the erection of wharves, bathing places, &c. A Special Lease may be obtained on application at an appraised rent, or disposed of at auction or otherwise. The area leased cannot exceed 320 acres, nor can the term exceed twenty-eight years. The conditions are accommodated to the circumstances of each case. The rent is payable annually in advance.

Application for a Special Lease is made to the Crown Lands Agent for the District with a deposit of £3 and a survey fee according to a fixed scale.

Residential Leases.—A "Residential Lease" of land within a Gold or Mineral Field may be granted to the holder of what is termed a "Miner's Right" or "Mineral License." Such right or license is obtainable under the provisions of the Mining Act. Application for the lease is made to the local Crown Lands Agent with a deposit of £1, a provisional rent of 1s. per acre, and a survey fee according to the appended scale. The maximum area which may be leased is 20 acreas, and the maximum term of the lease is fifteen years. The rent is determined by the Land Board, and is payable annually in advance. The Minister may at any time direct a re-appraisement of rent. The principal conditions of the lease are residence during the currency of the lease, and the erection within twelve months from the commencement of the lease of such buildings and fences as are necessary for the performance of this condition. The lessee is given tenant-right in improvements.

Exchange of Land between the Crown and Private Holders.—In the chapter dealing with Pastoral Leases, reference has been made to the fact that Pastoral Lessees before the granting to them of security of tenure had made it a practice to secure portions of their runs by conditional purchase or purchase in fee-simple. The practice was in many instances disadvantageous to the public estate, inasmuch as the Crown lands were left in detached blocks, severed by the lessees' freehold properties, and moreover, the lessees themselves have come to find that it would be convenient to them to gather their freeholds together into one or more consolidated blocks, especially within their leasehold areas. This result can be secured by the Crown accepting a surrender of private lands, and granting lands in exchange elsewhere. An exchange may apply to land actually granted, or land (such as that held under conditional purchase) of which a grant could, by the payment of purchase money, be demanded, and it is possible to exchange lands on which a balance is owing for lands to which the debt is transferred. Any proposal for exchange before finally maturing has to be made the subject of an investigation by the Land Board, and while the private owner's interests are fully respected, the Crown's interests are not less jealously guarded. The carrying of an exchange into effect ultimately depends upon the mutual agreement of the private owner on the one hand, and the Crown on the other.

Advances to Settlers.—Any summary of the Land Laws of the Colony would be incomplete without some reference being made to the Act passed in April, 1899, authorising the granting of temporary advances to settlers who might be in necessitous circumstances or financially embarrassed owing to droughts, etc.

The administration of this Act rests in a Board composed of three (3) members who are empowered to advance sums of money not exceeding £200, bearing interest at 4 per cent. and repayable within ten years to holders of freehold land, or of Conditional Purchases, Conditional Leases, Homestead Selections, Settlement Leases, or other leases granted under the Crown Lands Acts.

The chief provisions of the Advances to Settlers Act are as follows :—

No advances are made except on the recommendation of the Board. Satisfactory security for the repayment of the advance must be given. The Board shall determine when, and in what amounts the principal shall be repaid. The maximum time allowed for repayment being ten years.

No advance shall exceed £200. The rate of interest payable on every advance shall be 4 per centum per annum.

If any amount either of interest or principal remains unpaid for three months after the due date, the Minister for Lands is authorised to sell or otherwise dispose of any freehold lands in respect of which the advance was made, or in the event of the land given as security being held under some tenure, other than freehold, conferred by the provisions of the Crown Lands Acts such as for instance, Conditional Purchase, Homestead Selection, Settlement Lease, etc., power is given to forfeit the holding, together with any improvements thereon.

VICTORIA.

The law regulating the Crown Lands of Victoria is chiefly contained in the Land Acts, 1869, 1890, and 1891 ; the Settlement on Lands Act, 1893 ; the Mallee Lands Act, 1896, and the Land Act, 1898, with other amending Acts of minor importance. The 1869 Act does not operate as to future selections nor are the selectors under that Act materially affected by the 1898 Act, though by the new Act some have exchanged their present leases for permanent leases under new Act.

For the purpose of administration, the Colony is divided into districts, with Land Offices under Officers who hold Land Boards as occasion may require. The offices are at the undermentioned places :—

Ararat	Beechworth	Omeo
Alexandra	Castlemaine	Sale
Ballarat	Geelong	Stawell
Bendigo	Hamilton	St. Arnaud
Bairnsdale	Horsham	Seymour
Benalla	Melbourne	Warracknabeal.

Classification of Crown Lands.—The whole of unalienated lands belonging to the Crown are divided into the following classes :—

1. Good agricultural land.
2. Agricultural and grazing lands.
3. Grazing lands.
4. Pastoral lands (large areas).
5. Swamp or reclaimed lands.
6. Lands which may be sold by auction (not including swamp or reclaimed lands).
7. Auriferous lands.
8. State forest reserves.
9. Timber reserves.
10. Water reserves.

The Governor in Council has power to increase or diminish the area of land comprised in any class, except increasing lands which may be sold by auction.

Power to alter present classification (see Section 9, Land Act, 1898).

Land Classification Board will consist of three members who will be Officers of Crown Lands Department, or other competent persons.

Crown Lands may be acquired by :—

1. Pastoral lease.
2. Agricultural lease and license.

3. Grazing allotment lease and license.
4. Grazing area lease.
5. Perpetual lease (agricultural, grazing, and swamp or reclaimed allotments).
6. Sales by auction.
7. Lease for 21 years (swamp or reclaimed lands).
8. Conditional purchase lease (repurchased and swamp or reclaimed lands).
9. Residence or cultivation license up to 20 acres (auriferous lands).
10. Grazing license (auriferous lands).
11. Grazing license (non-auriferous lands).
12. License or lease for garden, business sites, etc.
13. Mallee block lease.
14. Mallee allotment lease.
15. Mallee agricultural allotment license and lease.
16. Mallee agricultural allotment perpetual lease.
17. Mallee improvement lease (100 acres).
18. Village community allotment.

Any person of the age of 18 may become a selector of land, subject to the conditions of Act.

New leases will be granted for Pastoral lands for a term expiring December, 1909, and if there be more than one applicant, the right of lease will be sold by auction. The rent to be paid half-yearly, the Crown may, however, resume possession by giving two years' notice.

Grazing Areas may be taken up for any term of years expiring not later than December 29th, 1920. The rent for first class land to be 3d. per acre, second class, 2d. per acre, and third class, 1d. per acre, payable half-yearly in advance. A qualified person not being a selector under any other Act, may take up 200 acres of first class, or 640 acres second class, or 1,280 acres of third class land.

Agricultural Allotments of 200 acres of first class or 320 acres of second class land may be taken up for a period of six years, held by a license at an annual rental, payable half-yearly in advance, of 1s. per acre for first class, and 9d. per acre for second class land.

Grazing Allotments.—The Governor in Council may allot to any qualified person a license to occupy an allotment of third class land, not exceeding 640 acres, for a period of six years, at a rental of 6d. per acre per annum, payable in advance. Any licensee must reside on his allotment, but can apply to the land officer in the district to register a written notice of his intention to be absent from his agricultural or grazing allotment for a term of three months. A license of an agricultural allotment may be exchanged for a perpetual lease. The rent on a perpetual lease will be 3d. in the pound, and land of the first class is deemed worth £1, second class, 15s., and third class, 10s. The lessee is expected to reside six months on the land or within five miles of it during the first year, and eight months during each of the following years, but if he cultivate a quarter during the first two years, and one-half before the end of the fourth year, the residence covenant shall not operate. A perpetual lease may be surrendered for a license on certain conditions.

Auriferous Lands.—The division of the Land Act, 1898, relating to auriferous lands, amends in several respects, Sections 65 and 67 (as re-enacted in the Land Act, 1891) of the Land Act, 1890, under which licenses will still continue to be issued.

Annual licenses are issued for auriferous lands not exceeding twenty acres, for residence on or cultivation, at the annual fee of 1s. per acre, for over ten acres. When the area is over three and under ten acres, a fee is charged of 10s. per annum, and under three, 5s.; in addition, a charge of 2s. 6d. is made each year for license. The licensee has only a right to the surface of the land, and must not sublet without permission, etc.

Every applicant must make application in writing, affixed to post or some other conspicuous object on each corner of the allotment, setting forth he is an applicant, and must make application in the form prescribed at the head land office.

Grazing licenses (auriferous lands) may be taken.

Lands which may be Sold by Auction.—Isolated portions of Crown lands, not exceeding 50 acres; lands required for a church or charitable institution.

Swamp or reclaimed lands may be leased for 21 years, or under a perpetual lease, etc., the rent to be for lease of 19 years, 4 per cent. on value of land.

Garden Sites, &c.—Any person who has been in possession of land for five years, under a license under Section 99 of the Land Act, 1890, for the purposes of a business place, factory, etc., may purchase the site under certain conditions.

Mallee Lands.—The conditions altered by the Land Act of 1898 are, a Classification Board consisting of three members is formed, and the following subjects are dealt with in new Act:—Selection of agricultural allotments under license or perpetual lease; Lands available for general application; Licenses; Special conditions as to residence; Perpetual leases (rent and other conditions); Family selections in the Mallee.

Acquisition of land for closer settlement is also dealt with under new Act.

SOUTH AUSTRALIA.

Method of Dealing with Crown Lands.—The Crown Lands Act (No. 444) was introduced and passed in 1888, and amended by Acts 472, 1889, 502, 1890, and 584 and 585 of 1893.

They provide for the appointment of Local Boards to deal with lands (except town) situate within hundreds, and outside hundreds, within boundaries named in schedule D, which may be taken up on lease with right of purchase or perpetual lease.

Notice of these lands being opened to application is given in the *Government Gazette*, such notice containing full particulars as to area, price per acre, a general description of the lands, and the date up to which applications will be received by the Commissioner of Crown Lands, which applications will, within one month after their receipt, be referred to the Land Board for the district for its consideration at the next sitting.

Leases with right of purchase are granted for a term of twenty-one years, with a right of purchase at any time after six years of the term at a price fixed by the Board, such price not being less than five shillings per acre. The lease may be renewed for a further term of twenty-one years, with a right of purchase at any time during the currency of the renewed term.

The rent of a perpetual lease is that notified in the *Government Gazette*. They are not subject to re-valuation, but are subject to Land Tax.

Under the above provisions small blocks not exceeding the unimproved value of £100 are opened to lease for working men, on which personal residence is necessary by the lessee, or his wife, or children.

Town lands and special blocks must be purchased for cash, the upset price being fixed by the Commissioner. In all cash sales twenty pounds per centum of the purchase-money must be paid at the time of sale, and the balance, together with fees for grants, registration, &c., within one calendar month, under penalty of forfeiture of the deposit paid.

By Act 705 of 1898 any lessee can surrender his lease for a perpetual lease without re-valuation at a rental to be fixed by the Surveyor-General, or can, until December 31, 1901, apply for a reduction in rental or purchase money.

Pastoral lands outside hundreds may be let for a term of 42 years, subject to revaluation for the second 21 years or 21 years without renewal, as may be recommended by the Pastoral Board.

The rent of the land and purchase money for improvements are fixed by the Pastoral Board, after which the land is open to application, and the Board considers the merits of each applicant and allots it to the one it considers most suitable. The successful applicant is then required to pay the first year's rent, together with the purchase money for the improvements, which may be paid in full or by annual instalments extending over the full term of the lease. The land must be stocked before the end of the third year of the term of the lease. Blocks not allotted by the Pastoral Board remain open to application, and can subsequently be allotted by the Central Pastoral Board.

Leases for a term of 42 years without revaluation may be granted of vermin infested or waterless country, or at a peppercorn rental for the first five years, 1s. for next five years, and 2s. 6d. for balance of term conditional upon vermin being destroyed, and the land kept clear during term of lease. Miscellaneous leases of business sites, wells, &c., and land for any purpose approved by the Governor, are offered at auction for any term not exceeding twenty-one years, and lands remaining unsold may be leased at the upset rental at which they were offered at auction.

Surrenders.—Any person holding lands under any previous Act under agreement for purchase, lease with right of purchase, lease issued on the surrender of any agreement for purchase, or lease of land reserved for leasing, may surrender his agreement or lease in exchange for a lease with right of purchase or for a perpetual lease under the Acts, provided that not more than 1,000 acres of land reserved for leasing shall at the time be held with right of purchase by any one person. Lessees of lands held as above may also surrender their leases for perpetual leases under Act 584, of 1893, which provides for a fixed rental, but subjects lessee to payment of Land Tax.

The Chaffey Brothers Irrigation Bill became law in 1887. The Act gave to the Chaffey Brothers a conditional lease of 250,000 acres of land for a period of twenty years, during which time the whole area would be gradually placed at their absolute disposal as they proceeded in their guaranteed expenditure of £4 an acre on the first 30,000 acres, and £1 per acre on the remainder of the land, and additional £1 per acre on the latter being paid to the Government.

The land in question, known as the Renmark and Chowilla runs, is situated 137 miles up the river Murray from Morgan. It has a river frontage of about 75 miles, the front blocks being heavily timbered with red gum and box, and a lot with occasional patches of salt bush intervening between the more dense undergrowth, and as they stretch over the undulating back country, which extends over a distance of 12 miles, large open plains may be noticed here and there, by their red loamy nakedness. Back from the river the blocks are overgrown with mallee and pine scrub ridges, which prove the great fertility of the soil, and give a very picturesque appearance to the scene. It was estimated that £300,000 would be expended in the purchase of pumping plant and channel pipes, building of bridges, roads, &c., to be distributed over the first 50,000 acres intended to be irrigated. The soil is a very rich sandy red loam, and is very deep, averaging from 15 to 20 feet, and careful analysis has proved it most suitable for fruit growing. The land is laid out in blocks of from 10 to 160 acres, with roads of a chain and a half wide round every block of 160 acres, and a grand avenue, with double rows of Ficus and pepper trees, is being gradually extended for miles through the colony. The irrigation works consist of very powerful centrifugal pumps placed along the river bank, which convey the water to the highest corner of every 10-acre block. A considerable area has been marked out for the township, and is cut up into blocks varying in size from small sites for business premises, offices, &c., to 2½-acre blocks for villa residences.

The 10-acre blocks for fruit growing are sold at £20 to £25 per acre with all water rights; payment for the land may be extended over five or ten years, and the holders of fruit grow-

ing blocks may temporarily have larger irrigated areas for growing cereals, paying one quarter of their crops as rental for same.

The Chaffey Brothers Company has been in liquidation some time.

NORTHERN TERRITORY.

By Letters Patent, dated 6th July, 1863, so much of the Colony of New South Wales as lay to the north of the 26° S. lat., and between 129° and 138° E. long., was annexed to South Australia. The Eastern boundary line cuts the coast near the mouth of the Wentworth River, on the western shore of the Gulf of Carpentaria, and the Western boundary line cuts the coast near Cape Donnett on the Cambridge Gulf. The regulations affecting the disposal of lands are governed by the following Acts :—

"The Northern Territory Act" enacts that a "Government Resident" and other necessary officers are to be appointed by the Governor. Such "Government Resident" to perform all duties assigned to him by the Governor.

All moneys received in respect of land customs' duties or any other source are to be kept distinct, and applied towards governing and improving the territory.

The Northern Territory Crown Lands' Act of 1890, repealed the Act of 1882. It provided for leases with right of purchase and perpetual leases, sales for cash, leases for the growth of agricultural products, pastoral leases, leases and licenses for special purposes, &c. Land Boards may be appointed to deal with the lands. Leases with right of purchase to be not less than five shillings per acre ; term 21 years with right of renewal.

Cash Sales.—Town and suburban lands to be offered at auction at not less than £1 per acre. Country lands at not less than 10s. per acre, twenty per cent. to be paid at time of sale, and the balance within one calendar month.

Leases for the growth of agricultural products in blocks of not more than 640 acres. North of the seventeenth parallel, for a term of five years, rental, 6d. per acre, and for 160 acres to personal residents at 3d. per acre. All gold and minerals are reserved to the Crown.

Pastoral Leases.—For a term of forty-two years, at a rental of 6d. per mile for the first seven years, and not less than 1s. for the second period of seven years, and 2s. for the third period of seven years, and the remainder at a valuation, or the land may be offered at auction at a price (not less than 6d. per mile), for the full term, not exceeding forty-two years, lessee to stock the land before the end of the third year with five head of sheep or one head of cattle per square mile, and before the end of the seventh year to increase the stock to ten sheep, or two head of cattle per mile.

Resumption.—If for public purposes, three months' notice. If for any other purpose, one year's notice to be given.

Discoverers' Leases may be granted for coal, petroleum, guano, &c., for 640 acres.

Special Leases may be sold at auction for obtaining clay and stone, as sites for stores, inns, &c., wharves, jetties, boat-building, mineral springs, manufacture of salt, smelting works, &c.

An Act was passed in 1896 entitled "An Act Relating to the Mining and Pastoral Occupation of the Northern Territory." Special provisions : the granting of special permits to search for metals and minerals ; granting of leases for encouraging establishment of horse-breeding stations ; tenants relief board ; limitation of valuation of rent of pastoral leases ; and surrender of leases.

Acts 18 of 1873, 368 of 1886 and 628 of 1895 related to gold mining, and Act 445 of 1888 to minerals, and are of a liberal nature.

WESTERN AUSTRALIA.

Explanatory Notes respecting Land Selection under the Land Act of 1898 ; also Notes on the Agricultural Bank Act.

Purchase by Auction—Town and Suburban Lands. (*Sections 47 to 52.*)—Town and Suburban Village Lands throughout the Colony, after being surveyed into lots and notified in the *Government Gazette* as open for sale, shall be sold by public auction, at upset prices to be determined by the Governor ; 10 per cent. of the purchase money shall be paid upon the fall of the hammer (unless the purchaser has already paid a deposit of 10 per cent. on his application) and the balance, in the case of Town Lots, by two equal instalments at the end of three and six months ; in the case of Suburban Lots by four equal quarterly instalments, subject to alteration by regulations, from the first day of the next quarter following the date of sale ; the Crown Grant and registration fees being payable with last instalment. All suburban land is sold subject to the condition that each lot shall, within two years from date of sale, be fenced on the surveyed boundaries with a fence of the prescribed description ; but the Minister may accept other improvements in lieu of the fencing, and in default thereof the land shall be forfeited, together with all purchase money and fees which may have been paid.

On payment by the purchaser of town or suburban lands of the first prescribed instalment of the purchase money, a license may be issued entitling the holder to occupy the land, and such license may be mortgaged or transferred, as prescribed by the Act.

Conditional Purchase by Deferred Payment, with Residence, under Section 55.—This Section is applicable to land within an Agricultural Area, and also to any other land in the South-West Division, or within 40 miles of a railway within the Eastern and Eucla Divisions, which may from time to time be declared open for selection.

The ordinary price of land under this Section is 10s. per acre (but this price may be increased in special cases), payable half-yearly at the rate of 6d. per acre per annum, and subject to the prescribed fines for late payment. The maximum area held by one person shall be 1,000 acres, and the minimum 100 acres : Provided that the area of any land held by the selector under Clauses 46, 47, or 48 of the Land Regulations of 1887, or under Sections 33 or 34 of "The Homesteads Act, 1893," shall, in calculating the total area held by the selector, be deemed to form portion of the maximum allowed.

Applications must be accompanied by a deposit of a half or a quarter year's rent, as the case may be : that is to say, if the application is made during the first quarter of the half year, a half year's rent is required ; if in the second quarter, a quarter year's rent ; in the event of the application not being approved, the deposit shall be refunded On approval of the application by the Minister, a lease shall be issued for twenty years, to date from the first day of the quarter next preceding the date of the approval.

The lessee shall, within six months from the date of his lease, take personal possession of the land, and shall reside upon it and make it his usual home, without any other habitual residence, during at least six months in each year for the first five years from the date of the commencement of the lease ; and if possession be not taken the land shall be forfeited : Provided that if the lessee is already the owner of rural land in freehold or under Special Occupation or Conditional Purchase, or is the holder of a lease of any such lands from the owner, or is the holder of a Homestead Farm within 20 miles of the land applied for, residence as aforesaid on such Freehold, Special Occupation License, Conditional Purchase, or Homestead Farm shall be deemed sufficient residence under this section.

The lessee shall within two years from the date of the commencement of his lease, fence at least one-tenth of the land contained therein, and within five years from the said date shall fence in the whole of the land, and within ten years shall expend upon it in prescribed improvements, in addition to the exterior fencing, an amount equal to the full purchase money. The Minister may allow half the cost of the exterior fencing to count as part of the improvements.

At the expiration of the lease, or at any time after five years from the date of the commencement of the lease, provided all the conditions of fencing, residence, and improvements have been complied with, and the said fencing and improvements maintained, and also that the full purchase money and fees have been paid, a Crown Grant of the land shall issue on application.

Any person having obtained land of less extent than 1,000 acres may make other applications for land within 20 miles of the block first applied for, but his holdings under this Section must not exceed 1,000 acres. Residence on the additional leases is not required, but all the other conditions shall apply ; provided that if two or more leases held by one person adjoin, they may be considered as one block with respect to fencing and improvements ; if not surveyed, the conditions shall date from the date of the survey instead of from the commencement of the lease.

Conditional Purchase by Deferred Payment Without Residence. (*Section 56.*)—Land within an agricultural area, and also any other land in the South-West Division, or within 40 miles of a railway within the Eastern and Eucla Divisions, which may from time to time be declared open for selection, may be applied for by persons who do not wish to reside upon their land, but subject to all the conditions (with the exception of residence) set forth in the preceding paragraph. Double the expenditure is, however, required in lieu of residence.

Conditional Purchase by Direct Payment. (*Section 57.*)—The price of land under this Section is not less than 10s. an acre, payable within twelve months. The maximum area that may be selected by one person inside of an area is 1,000 acres, and outside of an area 5,000, and the minimum area is, in both cases, 100 acres.

Application must be accompanied by 10 per cent. of the purchase money, and, on approval of the application by the Minister, a license shall be issued for seven years, dating from the first day of the quarter next preceding the date of approval of application. The balance of the purchase money shall be paid within twelve months from the date of the commencement of the license, by four equal quarterly instalments—on the 1st days of January, April, July, and October respectively—the first of such instalments to be paid on the first day of the quarter next following the commencement of the licence. The licensee shall, within three years from the date of the commencement of the license, fence in the whole of the land, and within seven years from such date shall expend upon the land in prescribed improvements in addition to the exterior fencing, an amount equal to 5s. per acre ; and no Crown grant shall issue until the Minister is satisfied that the prescribed conditions have been fulfilled. At the expiration of the license, or at any time during continuance of the license, provided that all the conditions of fencing and improvements have been complied with, and the said fencing and improvements maintained, and the full purchase money and fees have been paid, a Crown grant of the land shall issue. It is further provided that if the area purchased under this Section is the balance of a surveyed block, a portion of which has been granted to the applicant as a Homestead Farm, the Crown Grant for such area shall not issue until all the conditions appertaining to such Homestead Farm have been fulfilled.

Conditional Purchase of Small Blocks for Gardens, Vineyards, and Orchards. (*Section 60.*)—Land may be obtained in small blocks for Gardens, Vineyards, Orchards, etc., on the following terms :—The price of the land shall be not less than £1 per acre ; the maximum area allowed is 50 acres, and the minimum five acres, and two or more applications may be made to obtain the maximum. A deposit of 10 per cent. of the purchase money

is required upon application, and the balance shall be paid within three years from the date of the approval of the application, by equal half-yearly payments, on the 1st March and September. The improvements required are that the land shall be fenced within three years, and that one-tenth of the same shall, within the same period, be planted with vines or fruit trees, or cultivated *bona fide* as a vegetable garden.

Land Outside of Agricultural Areas.—Land outside of an area may be selected under any of the foregoing conditions.

Conditional Purchase Grazing Lands. Second and Third Class Lands. (*Section* 68.)—Leases for thirty years of second and third class lands are granted, called Grazing Leases, but which are really another form of Conditional Purchase. The price of second class land is not less than 6s. 3d. per acre, and of third class land 3s. 9d. per acre, payable half-yearly at the rate of 2½d. and 1½d. per annum respectively. Not more than two leases may be held by one person, and if they adjoin they may be fenced as one lease. The maximum area is 3,000 acres of second class, and 5,000 acres of third class land, and the minimum in both cases is 1,000 acres; and if one person selects two leases in different classes, the total quantity of same must not exceed 4,000 acres, the minimum being the same as before, except in special cases. The conditions are as follows:—The lessee shall pay one-half the cost of survey in ten half-yearly instalments, and the first of such instalments being paid with his application, and subsequent instalments on the first day of March and first of September in each year. Within six months from the date of commencement of his lease, the lessee must take possession of the land, and reside upon it during at least six months of the first year and nine months in each year for the next four years. Residence may, however, be complied with by the lessees agent or servant. Within two years from date of the commencement of his lease, the lessee shall fence at least one-tenth of the area contained therein, and within five years from the same date shall fence in the whole of the land, and within 15 years of the said date shall expend upon the land, in prescribed improvements in addition to the exterior fencing, an amount equal to the full purchase money.

The following shall be deemed improvements:—Subdivision, clearing, grubbing, draining, ringbarking, tanks, dams, wells, and any other work upon the land which increases or improves its agricultural or pastoral capabilities: Provided that where the lessee has erected a sheep and cattle-proof exterior fence, half its value may be allowed towards the improvements.

If the land is not surveyed, the conditions shall date from the date of survey. At the expiration of the lease, or at any time after five years from the date of the commencement of the lease, provided all the conditions of fencing, residence, and improvements have been complied with, and the said fencing and improvements maintained, and also that the full purchase money and fees have been paid, a Crown Grant of the land shall issue on application.

If the land applied for as a grazing lease is held under Pastoral Lease, the pastoral lessee shall be given the first opportunity of taking the land as a grazing lease, but he must signify his intention of doing so within three months after receiving notice from the Minister if in the South-West Division, or twelve months if in any other division.

Conditional Purchase Poison Lands. (*Section* 71.)—Land shall be considered as Poison Land when, in the opinion of the Minister, it is so infested with poisonous indigenous plants that sheep or cattle cannot be depastured thereon. The price is not less than 1s. per acre, payable half-yearly at the rate of one-thirtieth of the total purchase money per annum. The maximum area allowed is 10,000 acres, and the minimum 3,000 acres. Upon approval of the application (which must be accompanied by a deposit of rent equal to the first instalment), a lease shall issue for 30 years dating from the first day of the quarter next preceding the date of application. Any person obtaining less than 10,000 acres may make other applications up to 10,000 acres, and if any two adjoin they may be fenced as one lease. The leesee shall pay the prescribed cost of survey in ten half-yearly instalments, the first instalment being paid with his application.

The conditions are that the lessee shall, within two years from date of the commencement of his lease, fence at least one-tenth of the land comprised therein, and within five years from same date shall enclose the whole area with a fence of the prescribed description, and during the term of his lease shall eradicate the whole of the poisonous indigenous plants as prescribed.

At the expiration of the lease, or at any time during the currency of the same, provided all the foregoing conditions have been complied with, the fencing properly maintained, and the full balance of the purchase money and fees have been paid, and provided that the land has been rendered safe for depasturing cattle and sheep at all seasons, and has continued so for a term of two years, a Crown Grant of the land shall issue.

A Pastoral Lessee has the first right to select land within his Lease applied for as "Poison Land."

Free Homestead Farms—160 Acres Free.—Every person who does not already own more than 100 acres of land within the Colony in freehold, or under Special Occupation or Conditional Purchase, and being the head of a family, or a male who has attained the age of 18 years, may apply for a Homestead Farm of not more than 160 acres from lands declared open for such selection.

Every applicant shall make a Statutory Declaration and forward same to the Minister or his Agent accompanied by a fee of £1. Upon approval of the application, the applicant shall receive an occupation Certificate authorising him to enter upon and take possession of his land for the term of seven years, to be computed from the first day of the quarter next preceding the date of approval of his application.

Within six months from the date of such Occupation Certificate, the selector shall take personal possession of the land, and reside upon it for at least six months in each year for the first five years of the term of his certificate. If possession be not so taken, the Occupation Certificate shall be cancelled and the land forfeited, together with all improvements.

In certain cases of illness, or for other valid reasons the Minister may waive forfeiture for non-residence upon the land, or authorise absence. Within two years from the date of his Occupation Certificate a habitable house must be erected of not less than £30 in value, or the selector shall expend £30 in clearing or clearing and cropping, or prepare and plant two acres of orchard or vineyard. Within five years from said date the selector shall fence in at least one-fourth, and shall clear and crop at least one-eighth.

Within seven years the whole must be fenced, and at least one-fourth cleared and cropped. At the expiration of seven years from date of his Occupation Certificate the selector shall, provided all the conditions have been duly performed, obtain a Crown Grant on payment of the usual fees; but if the conditions have not been effected, the land shall be forfeited.

The Crown Grant may be obtained after twelve months' residence, upon the selector proving to the Minister that the necessary conditions have been fulfilled, and on payment of 5s. per acre, together with the fees referred to in the preceding paragraph. Homestead Farms cannot be mortgaged except to the Agricultural Bank, and can only be transferred to persons who are qualified to hold. The holder of a Homestead Farm may hold other conditional purchase land, and where residence is a condition, residence on the Homestead Farm, if within 20 miles, will be sufficient.

Working Men's Blocks. (*Part IX.*)—Every person who does not own land within the Colony in freehold, or under Special Occupation, or Conditional Purchase, or a Homestead Farm under "The Land Act, 1898," or "The Homesteads Act, 1893," who is the head of a family, or a male who has attained the age of 18 years, shall be entitled to obtain a lease of lands *set apart for Working Men's Blocks*. The maximum area that may be selected by one person is, if within a goldfield, half an acre, or five acres elsewhere; and only one block may be selected by one person.

The price of land is not less than £1 per acre, payable half-yearly at the rate of one-tenth of the total purchase money per annum or sooner. Application shall be accompanied by a deposit of half a year's rent at the above rate. Upon approval, a lease shall issue for ten years, dating from the first day of the quarter next preceding the date of approval. The lessee shall, within three months from the date of lease, take personal possession of the land, and reside upon it during at least nine months in each of the first five years of the lease: Provided that possession may be taken by and residencs performed by the lessee's wife or a member of his family. Within three years from the date of commencement of the lease the whole of the land must be fenced on the surveyed boundaries, and within five years from same date an amount equal to double the full purchase money, in addition to his house and exterior fencing, must be expended on the land in prescribed improvements.

At the expiration of the lease, or at any time after five years from commencement of the lease, provided that all the conditions of residence, fencing, and improvements have been complied with and the said fencing and improvements maintained, and also that the full purchase money and fees have been paid, a Crown Grant of the land may issue.

In certain cases of illness, or for other valid reasons, absence may be allowed and forfeiture waived.

Definition of Fence.—Fence, wherever mentioned, means any substantial fence, not being a brush fence, proved to the satisfaction of the Minister to be sufficient to resist the trespass of great and small stock, including sheep, but not including pigs or goats.

Pastoral Lands. (*Part X.*)—Leases of Pastoral Lands within the several Divisions are granted on the following terms:—In the South-West Division, in blocks of not less than 3,000 acres, at a rental of £1 per annum for each 1,000 acres or part of 1,000 acres; if, however, the land is in that part of this Division situated Eastward of a line from the mouth of the Fitzgerald River in the direction of Mount Stirling, the rental shall be 10s. per 1,000 acres or part thereof. In the Western and North-West Divisions, in blocks of not less than 20,000 acres, at a rental of 10s. per annum per 1,000 acres or part thereof. In the Eucla Division, in blocks of not less than 20,000 acres at a rental of 5s. per 1,000 acres or part thereof per annum. In the Eastern Division, in blocks of not less than 20,000 acres, at the following rental:—For each 1,000 or part of a 1,000 acres, 2s. 6d. for each of the first seven years, and 5s. for each of the remaining years of the lease. In the Kimberley Division, in blocks of not less than 50,000 acres when on a frontage, nor less than 20,000 acres when no part of the boundary is on a frontage, at a rental of 10s. per annum for each 1,000 acres or part thereof.

In any case where land applied for is shut in by other holdings, and does not contain the minimum area fixed by these regulations, a lease for a lesser quantity may be granted.

A Pastoral Lease gives no right to the soil or to the timber except for fencing and other improvements on the lands leased; and the lands may be reserved, sold, or otherwise disposed of by the Crown during the term of the lease. Any Pastoral Lessee upon being deprived by the Minister of the use of any land held under Pastoral Lease shall, as prescribed by "The Land Act, 1898," receive fair value for all improvements on the land of which he has been deprived. In the event of the land being selected from his lease under Conditional Purchase, he is entitled to claim from the Conditional Purchaser fair value of any lawful improvements on or appertaining to the land applied for, and for

severance, the value of the improvements to be ascertained by arbitration, as prescribed by Sub-Section 1 of Section 148 of "The Land Act, 1898." All Pastoral Leases expire on the 31st December, 1928.

Reduction of Rent for Stocking.—Any lessee in the Kimberley Division, or in that part of the South-West Division situated to the Eastward of a line from the mouth of the Fitzgerald River in the direction of Mount Stirling, who at any time during the term of his lease shall have in his possession within the Division ten head of sheep or one head of large stock for each 1,000 acres leased, shall, from the 1st of January, after he shall have satisfied the Minister to the above effect, have a reduction of rent for the remaining years of his lease of one-half of the rent due under this Act.

Penalty for Non-Stocking.—A penalty of double rental for the remaining portion of the term of the lease is imposed, except in the South-West Division, if the lessee has not within seven years, complied with the conditions as to stocking.

Boundaries of Pastoral Leases may be amended, on payment of a fee of £1.

Permission may be granted to ringbark, in the discretion of the Minister, on application.

Any Pastoral Lessee in the South-West Division, at any time during the continuance of his lease, may apply in the form prescribed by this Act for land within his lease, not being within an agricultural area, or land withdrawn from Conditional Purchase Selection, in one or more blocks, not exceeding three separate selections adjoining his homestead, and not exceeding twenty per cent. of the aggregate quantity held on lease by him from the Crown within such Division; and on approval of the application, a lease shall be granted subject to all the conditions appertaining to Conditional Purchases under Section 55 of this Act, except residence; provided that the maximum area shall be 3,000 acres, and the minimum, except in special cases approved by the Minister, shall be 200 acres. If the land so selected is within a properly fenced enclosure, the fencing of the land upon the boundaries shall not be obligatory: Provided always, that this Section shall not permit any Pastoral Lessee who, prior to the coming into operation of this Act, has taken advantage of a similar provision in the Land Regulations of 1887 to obtain, under this Section and such Regulations, a greater area than 3,000 acres.

Any Pastoral Lessee in the Kimberley, North-West, Western, Eastern, and Eucla Divisions who shall have in his possession in any such Division at least ten head of sheep or one head of large stock for each 1,000 acres leased, may apply to purchase, in any such division, any Crown Land within his lease (not being within an agricultural area or a goldfield), in one or more blocks, not exceeding in the aggregate one per cent. of the total area held by such lessee under Pastoral Lease in such division, on the same terms and subject to the same conditions as are prescribed for purchase under Section 55, except the condition of residence: Provided that the minimum area in each block shall be 500 acres and the maximum 5,000 acres, and in no case shall more than three separate selections be allowed to be taken by one lessee.

Pastoral Leases within Goldfields and Mining Districts. (*Section* 102.)—Any Crown Land within a goldfield or mining district, not required to be reserved for any public purpose, may be leased for pastoral purposes in blocks of not less than 2,000 acres, at a rental of 10s. per 1,000 acres: Provided that if the land is so shut in by other holdings as not to contain 2,000 acres, the Minister may, in his discretion, grant a lease of such lesser quantity; but in no case shall a lease be issued for a less sum than £1 per annum.

The lessee shall not have the right to select land within such lease under the provisions of the 61st or 62nd Sections of this Act, and, in the event of the land or any portion of it being taken for an agricultural area, the lessee shall not be entitled to more than three months' notice; and in other respects the terms and conditions of such lease shall be the same as those prescribed for Pastoral Leases within the Division in which the land is situated.

Timber Lands.—Subject to this Act and the Regulations made under it, the Minister and every person he may appoint, either personally or as the holder of a public office, may, on application, and on payment of the prescribed fees, grant the following licenses for any period not less than one month and not exceeding twelve months:—

(1.) A timber license authorising the licensee to fell, cut, split, and remove any timber growing or standing on any Crown lands in the locality named in the license, for the purpose of logs for sawmills, fencing, shingles, laths, buildings, or railway or other sleepers (but not to cut hewn balks, piles, telegraph or other poles), subject to the right of the Minister, during the currency of such license, to reserve from cutting over any part of the land in such locality.

A similar license must be obtained by every person engaged only in removing the timber dealt with under a timber license.

(2.) A woodcutter's or charcoal burner's license, authorising the licensee to cut or split firewood from any live or dead wood growing or lying on any Crown lands in the locality named in the license, and to remove the wood or charcoal cut, split or burnt.

A similar license must be obtained by every person engaged only in removing the wood dealt with under a Woodcutter's or Charcoal burner's license.

No license shall be necessary for cutting, obtaining, and removing dead wood lying on Crown Lands for domestic purposes but not for sale.

(3.) A Sandalwood License authorising the licensee to fell, cut, and remove any sandalwood growing upon any Crown Lands in the locality named.

(4.) A Wattle-bark License authorising the licensee, during the months from August to December inclusive or during any of such months, to strip and remove wattle-bark upon the Crown Lands in the locality named fn the license.

(5.) A Bark License authorising the licensee to strip and remove the bark, or to remove the gum from other trees than wattle, the bark or gum of which contains tannic acid, upon such terms as the minister may think fit, upon the Crown Lands described in such license.

The Minister may, subject to this Act and the Regulations, grant a license to fell and hew timber to be used or exported as piles, poles, or balks. The fees for the several licenses hereinbefore mentioned are as follows:—Timber license, per month per man, 10s.; woodcutter's or charcoal burner's license, 5s.; sandalwood license, per month per man, 5s.; wattle-bark license, per month per man, 5s.; bark and gum license, 5s. per month per man; felling and hewing piles, poles, and balks license, £3 per month per man.

Timber Leases.—Timber leases may be applied for under the following conditions:—The maximum area allowed is 75,000 acres, at a rental of £20 per annum for each square mile or fraction thereof, payable in half-yearly instalments. The application must be accompanied by a deposit of a quarter or half year's rent, as the case may be. The timber lease shall be granted for a term of not less than one year and not more than 25 years: Provided that any person or corporation holding a special timber license or licenses under the Land Regulations of 1887 shall have the right to hold the same under the provisions of this Act, notwithstanding the total area of such special timber license or licenses may exceed 75,000 acres.

Special Timber Licenses granted under the Land Regulations of 1887 shall not be renewable at the end of the year or term for which rent has been paid; but the holders shall have the option of a lease under this Act of the land comprised in the expired license or licenses. A lessee of a timber lease shall, within two years from date of his lease, or within such longer period as the Minister may decide, erect within the area a substantial and fully equipped sawmill plant, of sufficient power to cut up at least five loads of sawn timber per month for each square mile comprised in the lease, and shall keep the said sawmill plant in good working order during the whole term of the lease.

Miscellaneous Provisions—Rents, Mortgages, Transfers, Etc.—All land rents shall be calculated as from the 1st of January to the 31st of December, and shall be paid half-yearly in advance to the Minister, at the Office of the Department of Lands and Surveys, Perth, or to any Government Resident or Resident Magistrate, or other person authorised by the Minister to receive rents, on or before the 1st of March and 1st of September in each year. All leases applied for during the year shall be granted as from the first day of the quarter next preceding the date of approval of the application; and rent for the current half-year shall be payable as from the date of granting, and must be deposited with the application. If a lessee fails to pay the rent due by him on the 1st day of March or 1st of September in any year, he shall pay the same within thirty days from the due day, together with a fine of twopence in the pound; and if he fails to pay as last aforesaid, he shall pay the same within sixty days from the due date, together with a fine of sixpence in the pound; and if he fails to pay as last aforesaid, he shall pay the same within ninety days from the due date, together with a fine of 1s. in the pound; and if he fails to pay for ninety days, his lease and lands comprised therein, and all improvements thereon, shall be forfeited.

The names of all holders of land on which instalments of purchase money or rents are payable on the 1st of March and 1st day of September shall be published in the *Government Gazette* during the months of January and July respectively in each year; and as early as practicable after the 1st day of March and 1st day of September in every year the Minister shall publish in the *Government Gazette* the names of the lessees in default, with the respective amounts of rents in arrears.

Mortgages.—Subject to the restrictions contained in Parts VIII. and IX. of this Act, and in the Homesteads Act, 1893, any lease or license under this Act, or under the Land Regulations of 1887, and the Homesteads Act, 1893, other than license to quarry, and licenses under Part XI., may be mortgaged as hereinafter provided:—

(1.) When any such lease or license is intended to be charged with, or made security for the payment of any sum of money, the lessee or licensee shall execute a memorandum of mortgage in the form or to the effect of the twenty-fifth Schedule of this Act.

(2.) Every memorandum of mortgage must be in duplicate, and one original must be registered in the Department of Lands and Surveys; and in the case of several mortgages of the same holding, they shall take effect according to priority of registration.

(3.) A fee of 5s. shall be payable upon the registration of every such memorandum in respect of every holding comprised in or affected by it.

(4.) A mortgage may be transferred on payment of the like fee as for registration of the transfer.

(5.) On the occasion of the registration of every mortgage or transfer of a mortgage, the lease or license must be produced.

Agricultural Bank Act, 1894, Amendment Act, 1896.

Under these Acts advances can be made to holders of land in Fee Simple, Special Occupation Lease, Conditional Purchase License, or under the provisions of "The Homesteads Act, 1893," and "Land Act, 1898."

All particulars and forms of application can be obtained from the Manager of the Agricultural Bank, Perth.

Advances.—Advances are only made for the purpose of effecting improvements, and *not on the security of improvements already existing*, and no advance will be made upon any land which is otherwise encumbered, nor will any security over land other than a first mortgage be accepted as sufficient, and unless under very exceptional circumstances advances will not be made unless the external boundaries of the land are fenced.

Form of Improvements.—Advances are made for the purpose of effecting either one or more of the following improvements:—Clearing, cultivating or ploughing, ringbarking, fencing, draining, wells of fresh water, reservoirs, buildings, and any other form of improvement which, in the opinion of the Manager, will increase the agricultural or pastoral capabilities of the land. In regard to fencing, it is only in exceptional cases that advances are made for boundary fencing, subdivision fencing alone being allowable. Free Homestead Farms must be fenced on the boundaries before any application will be entertained for assistance to clear, cultivate, etc.

Proportion of Value of Proposed Improvements to be advanced.—In cases where, in the opinion of the manager, ample security is offered, *three-fourths* of the fair estimated value of the proposed improvements may be advanced, but *one-half* is the proportion generally allowed.

Mode of Payment of Advances.—All advances are paid proportionately as the improvements are effected, *i.e.*, applicants can have "draws" while the work is proceeding. No advance is made on improvements effected prior to the date of application for advance.

Rate of Interest.—Interest at the rate of Five pounds per centum per annum will be charged upon all advances, and must be paid half-yearly, on the 30th June and the 31st December in each year. Interest is only charged on the actual amount of the advance made, or such proportion of the loan or loans as the applicant may have drawn.

Fees payable.—All applications must be accompanied by a valuator's fee equivalent to one per cent. of the amount applied for. No charge is made for the purpose of drawing any mortgage or transfer.

Repayment of Loans.—All loans have a currency of thirty years. During the first five years simple interest only is payable. At the expiration of five years from the 1st day of January or the 1st day of July, as the case may be, following the date of every advance, the borrower shall begin to repay the principal sum at the rate of one-fiftieth of the amount half-yearly, until the whole has been paid: Provided always, that the advance may be repaid sooner than is herein provided, and in larger instalments, at the option of the borrower. All applications must be for one or more of the following sums, viz.:—£50, £75, £100, and extending up to £800.

QUEENSLAND.

During the Session of 1897 a Bill dealing with the land and codifying all previous Acts was introduced and carried through Parliament. This Act came into operation on the 1st March, 1898. The administration is largely vested in a Land Court (hitherto called the Land Board) which consist of three persons, instead of two as before, and the duties of the Court may be performed by one member with respect to the following matters:—1. Determination of the amount of rent or compensation, or any other amount. 2. Disputes as to boundaries. 3, Consideration of applications to select land. 4. Appeals from decisions of Commissioners. But the decision of a single member of the Court is subject to appeal to the Land Appeal Court. The Land Appeal Court is an entirely new tribunal for the purpose of appeals by way of re-hearing, and consists of a District Court Judge and the Members of the Land Court, other than the member against whose decision appeal is made. The decision of the Appeal Court is final, except that on points of law the matter may be referred to the Supreme Court (Full Court). Further, in the case of tenures under the Acts of 1884 and 1886, the lessees retain their full right of appeal to the Supreme Court, as provided for under those Acts. Such lessees have also the right to have the amount of compensation, in the event of resumption, or with respect to the value of improvements, on determination of the lease (otherwise than by forfeiture), settled by arbitration in the manner prescribed by the Public Works Lands Resumption Acts.

The portion of the new Act having reference to pastoral leases is very similar to the provisions of the 1884 and 1886 Acts, and applies only to runs brought under its provisions. These runs are, however, rapidly reverting to the Government, who in cases where they are required for closer settlement, refuse to re-lease them and subdivide them into smaller holdings.

The several modes in which land may be acquired, may be described as follows:—(1) By Agricultural Selection, *i.e.*, Agricultural Farms and Agricultural Homesteads; (2) Grazing Selections, *i.e.*, Grazing Farms and Grazing Homesteads; (3) Scrub Selections; and (4) Unconditional Selections. The more accessible lands near lines of railway, centres of population, and navigable waters are set apart for agricultural selection in areas up to 1,280 acres, while opportunities of acquiring grazing selections in areas up to 20,000 acres are given over a great extent of Queensland territory within accessible distance of the seaboard and the various lines of railway.

Except in the case of Scrub Selections and Unconditional Selections, no person who is not a British subject by birth or naturalisation, or who is under the age of 16 years, or who seeks to acquire the land as the agent or servant or trustee of another, will be allowed to select. A married women is not competent to select an Agricultural Homestead or a Grazing Homestead, unless the disqualification is removed by the Land Court in the case of a married woman who has obtained an order for judicial separation or an order protecting her separate property, or who is living apart from her husband.

Applications for selections must be signed by the applicant, but may be lodged in the Land Office by his duly constituted attorney, and must be accompanied by a deposit of a year's rent, and one-fifth of the survey fee. Applications lodged prior to the time proclaimed as that at which land is to be open for selection are regarded as simultaneous with those lodged at the time of opening.

Where land is open for different modes of selection alternately, priority among simultaneous applications for the same land is given to an application for it as an Agricultural Homestead as against an application for it as an Agricultural Farm; to an application for it as an Agricultural Farm as against an application for it as an Unconditional Selection; and if the land is open for Grazing Selection, to an application for it as a Grazing Homestead as against an application for it as a Grazing Farm.

Priority among simultaneous applications for the same land by the same mode of selection is determined by lot, unless in the case of simultaneous applications for the same land as a Grazing Selection or an Unconditional Selection, a higher rental is tendered than that proclaimed. In that event the highest tender secures priority.

When an application has been accepted by the Land Commissioner and approved by the Court, and the applicant has paid for any improvements that may be on the land, he becomes entitled to receive a license to occupy the land in the case of an Agricultural Selection or a Grazing Selection, or a lease in the case of a Scrub Selection or an Unconditional Selection. Within six months after the issue of a license the selector must commence to occupy the land, and must thereafter continue to occupy it in the manner prescribed.

Agricultural Selections.—Agricultural Farms: The largest area that may be acquired by any one person as an Agricultural Farm is 1,280 acres. If the same person is the selector of both an Agricultural Farm and an Agricultural Homestead, the joint area must not exceed 1,280acres. The purchasing price may range from 10s. an acre upwards, as may be declared by proclamation. The term is twenty years. The annual rent is one-fortieth of the purchasing price, and the payments are credited as part of the price. The land must be continuously occupied by the selector residing personally on it or by his manager or agent doing so. Within five years, from the issue of the license to occupy, or such extended time not exceeding two years, as the Court may allow, the selector must enclose the land with a good and substantial fence or make substantial and permanent improvements on it equal in value to such a fence. On the completion of the improvements the selector becomes entitled to a lease of the farm, and may thereafter mortgage it; or, with the permission of the Minister, may subdivide or transfer it; or, with the approval of the Court, may underlet it. After the improvements have been effected, any lessee (whether he acquired by selection or transfer) who has held the farm for five years and has duly fulfilled the condition of occupation, may pay the part of the purchasing price then remaining unpaid and obtain a deed of grant in fee-simple. After ten years of the term have elapsed, the purchase may be completed by the then registered lessee irrespective of the time he has held it. Agricultural Homesteads: Land open to selection as Agricultural Farms is not available for Agricultural Homesteads unless so proclaimed. The area allowed to be selected as an Agricultural Homestead varies with the quality of the land. If the price at which any land (open to both modes of selection) is available to Agricultural Farm selection is not less than £1 an acre, 160 acres is allowed for a Homestead: if its price as a Farm would be less than £1 but not less than 15s., then 320 acres can be taken as a Homestead; and if its price as a Farm would be less than 15s. an acre, then 640 acres is allowed for a Homestead. The price for a Homestead is 2s. 6d. an acre, the annual rent 3d. an acre, and the term ten years. The land must be continuously occupied by the selector residing personally thereon. Certain improvements having been made, the holder is entitled to a lease at any time after five years from the commencement of the term, on the selector proving that the conditions have been duly performed and that the sum expended in improvements on the land has been at the rate of 10s., 5s., or 2s. 6d. an acre respectively, according to the quality of the land, he may pay up the remaining rents so as to make his total payments equal to 2s. 6d. an acre, and obtain a deed of grant of the land in fee-simple. The selectors of a group of two or more Agricultural Homesteads may associate together for mutual assistance, and on making proof of *bona fides* to the Commissioner, may receive from him a special license enabling not less than one-half of the whole number to perform the conditions of occupation and improvement for the group. The residence may be upon any one or more of the Homesteads, and if more than 10s. has been expended in improvements on any Homestead while the special license is in force with respect to it the surplus may be attributed to the others.

Grazing Selections.—Grazing Farms: The maximum area allowed to be acquired by any one person as a Grazing Farm is 20,000 acres. The term may be 14, 21, or 28 years, as the proclamation opening the land to selection may declare. The

annual rent for the first period of seven years may range from ½d. per acre upwards, as may be proclaimed or tendered. The rent for each subsequent period of seven years will be determined by the Court, but it cannot be decreased at any re-assessment, nor can it be increased by more than one-half of the rent for the period immediately preceding. A Grazing Farm must be continuously occupied by the selector residing personally on it, or by his manager or agent doing so. As in agricultural selections certain improvements are demanded, and selectors are similarly permitted to select in groups. When a Grazing Farm is enclosed in the manner required, the selector becomes entitled to a lease of it, and may thereafter mortgage it; or, with the permission of the Minister, may subdivide or transfer it; or, with the approval of the Court may underlet it. Grazing Homesteads: Lands open for selection as Grazing Farms must also be open for selection as Grazing Homesteads, and at the same rental and for the same term of lease. As already stated, an application to select as a Grazing Homestead takes precedence of a simultaneous application to select the same land as a Grazing Farm. The conditions and other provisions above-mentioned in respect of Grazing Farms are applicable also to Grazing Homesteads, with the following exceptions:—(1) During the first five years of the term of a Grazing Homestead, the condition of occupation must be performed by the continuous personal residence of the selector on the land. (2) Before the expiration of five years from the commencement of the term, or the death of the original lessee, whichever first happens, a Grazing Homestead is not capable of being mortgaged, assigned, or transferred.

Re-purchased Lands.—Lands repurchased by the Crown under the provisions of "The Agricultural Lands Purchase Acts of 1894 and 1897," are made available to Conditional and Unconditional Selection, on a term of twenty years in either case. The rent to be paid for the first year is equal to £10 for every £100 of the purchasing price, and (no payment being required the second year) an annual payment, £7 19s. for every £100, continued from the third to the twentieth year will, at the end of the term, have paid off the principal sum and interest at the rate of 5 per cent. per annum. If the payment of the balance of the purchase-money is made before the end of the term, a rebate in interest is made accordingly. The selection must be occupied during the term by the residence of the selector or his registered agent.

SUMMARY.—The following summarises the terms on which land can be secured:—

Agricultural Farms, up to 1,280 acres at from 10s. per acre; term of 20 years; annual payments of one-fortieth of price; balance at any time after 5th year, conditions of occupation and improvements.

Agricultural Homesteads, up to 640 acres at 2s. 6d. per acre; term of 10 years; annual payments of 3d. per acre; balance at any time after 5th year; conditions of personal occupation and improvements.

Grazing Selections, up to 20,000 acres at from ½d. per acre per annum rent; term of 14, 21 or 28 years; conditions of occupation and fencing.

Scrub Selections, up to 10,000 acres at from peppercorn rent; term of 30 years; conditions of clearing and fencing.

Unconditional Selections, up to 1,280 acres at from 13s. 4d. per acre; payable in twenty annual instalments.

Auction Purchase, at from 20s. per acre for agricultural land, and from 10s. per acre for other land; terms up to 3 years,

Occupation Licenses on annual tenancy.

During 1899 the return of approved applications for agricultural and grazing farms, &c., under the Crown Lands Act 1884 to 1897, was as follows: agricultural farms, 681, area, 177,551 acres; agricultural homesteads, 879, area, 204,306 acres; unconditional selections, 250, area, 55,745 acres; grazing farms, 322, area, 2,531,123 acres; grazing homesteads, 27, area, 248,715 acres; scrub selections, 26, area, 105,602. Total, 2,203 farms; area, 3,323,042 acres; annual rental, £20,745.

TASMANIA.

The conditions upon which land can be procured in the Colony of Tasmania are stated in the Act No. 10, 34 Vict., which was passed in October, 1870, and which consolidated or repealed all previous legislative enactments as to the disposal of the waste lands of the colony. This Act is known as "The Waste Lands Act." Some modifications and additions to this were made by Acts No. 4 of 1871, No. 16 of 1872, and No. 5 of 1881. Its main features are as follows:—

The Minister of Lands and Works for the time being is the Commissioner of Crown Lands, and all matters affecting the land are under his control. The ordinary routine business of the Land Branch is under the care of the Surveyor-General, and Secretary for Lands, whose office is in Hobart, with a branch office at Launceston. Power is given to the Governor to make such reserves of land as he may deem suitable for public uses, or sanitary or recreational purposes, but not as sites for places of public worship. The lands are divided into three classes:—The first class is known as Town Lands; the second class is called Agricultural Lands; and the third class, Pastoral Lands. The first class comprises all lands within the limits of a town or village; the second class includes all lands which may be from time to time proclaimed as agricultural divisions or as suitable for agricultural purposes; the third class applies to land more adaptable for grazing than tillage. The upset price of agricultural lands is fixed at one pound per acre, that of pastoral lands being a sum equivalent to twelve years' rental, but not less than five shillings per acre. Any person of the age of eighteen years and upwards has the right of selecting and purchasing by private contract with the Commissioners, under conditions specified below, one plot of land only, not exceeding 320 acres in area, at one pound per acre; when the land has been selected, the Commissioners will have it surveyed at the applicant's expense, and after such survey will arrange for its sale. A condition of sale is, that the selector, his tenant or servant, shall, within one year after the date of such selection, reside upon the land until the full purchase-money is paid. The land can either be purchased outright or upon credit. If purchased outright, a deposit of one-fifth has to be paid at the time of sale, and the residue within one month; if upon credit, the selector will have to pay an additional sum of one-third. The following example will show how payments are made on a credit purchase of a plot of 100 acres:—

100 acres, at 20s. per acre				£100	0 0
Add one-third for credit				33	6 8
Total price, exclusive of survey and grant deed fees				£133	6 8
First payment, survey fee ...	£11	0	0		
Cash deposit	3	6	8		
Two yearly deposits of £5 ...	10	0	0		
Twelve ,, ,, of £10 ...	120	0	0		
Grant deed fee	0	15	0		
	£145	1	8		
Fees to Recorder of Titles:—					
Assurance fee, ½d. in the £ on £133 6s. 8d.	0	2	10		
Regulations	0	7	6		
Total	£145	12	0		

Credit is allowed on all purchases of land above £15 in value, the applicant paying survey fee within thirty days. In addition to private sale, lands can also be sold by public auction after survey, and due advertisement of not less than a month in the *Gazette*, the upset price (not less than £1 per acre for agricultural land, and not less than 5s. per acre for pastoral land) being fixed by the Commissioners. The size of the lots of agricultural lands is limited, as in the case of private sale, to 320 acres in area.

In the case of town lands put up for auction and not sold, a list of them, with the upset prices, is published from time to time, and these can be afterwards purchased (within one year) by private contract. If there be more than one applicant for such land, auction is resorted to.

The survey fees range from £4 for 25 acres and under, up to £17 5s. for not exceeding 320 acres, single town settlement £1 11s.; ditto suburban, £3 2s. 6d. Any larger lot than the last-named is charged at the rate of £7 10s. extra for every 1,000 acres, clear or open forestground, and £10 per 1,000 acres, if densely wooded or scrub land.

The Crown Lands Amendment Acts (57 Vict. No. 12, and 58 Vict. No. 13) provide that persons who have not hitherto selected or purchased land under the Crown Lands Act or amendments thereof may, on payment of survey fee, be allowed to purchase one lot not exceeding 50 acres nor less than 15 acres in extent. The selector will be allowed eighteen years credit, the first three years may be occupied free of payment, instalments to commence on the fourth year; personal residence on the land for the full term of eighteen years will be required, or substantial improvements, other than buildings, to the value of £1 per acre must be effected on the whole of the land before grant deed will be issued.

Rent of Crown Lands for pastoral purposes in 1898, amounted to £5,091. Sales of Crown Lands by auction and private contract amounted to £34,882. Rents of mineral lands, £25,475.

Territorial revenue for 1898, rents, fees, and royalties, amounted to £45,898.

The Report of the Recorder of Titles for the year ending December 31, 1898, shows the expenditure on all accounts was £2,626 9s. 10d. Revenue collected, £2,868 6s. 6d. For the twelve months 592 grants were registered, 725 transfers made, and 694 mortgages registered. The area of land held under Real Property Act grants issued during the year was valued at £14,739, the approximate value of all land so held being £3,163,564. Applications for certificates of grants during 1898 represented in value £14,739. The Assurance Fund established under the Lands Titles Act, amounts to £7,385 16s. 10d. The grants registered in 1898 represented value £35,118. Transfers registered in 1898, £174,538. Mortgages registered in 1898, £261,326. Mortgages discharged in 1898 represented value £187,251. Leases registered in 1898 represented value £3,603.

NEW ZEALAND.

Each of the independent Provinces into which the Colony was divided had its own regulations for the purchase and procuring of land, previous to the abolition of the Provincial form of Government; and these regulations were continued with certain changes varying according to local circumstances by the Land Act of 1877 and by its Amendments. These Acts were consolidated by "The Land Act, 1885," which became law on the 1st November of that year. Since then the Land Acts 1887, 1888, and 1892 have been passed. In the Districts of Nelson, Marlborough, Otago, Canterbury, and Westland the Crown has extinguished by purchase the native title over all the lands. In the other Provincial Districts which are situated in the North Island, viz., Auckland, Wellington, Taranaki and

Hawke's Bay, this result has only been partially effected, and the native title still exists over large tracts, though large areas have been thrown open to European occupation. Up to 1862, the Crown had the pre-emption of all Maori lands. Since then the natives could dispose of their lands under certain restrictions to private individuals, but the abuses arising under that system induced the Legislature to pass the Native Land Administration Act, 1886, which came into force on January 1, 1887. This Act was repealed by the Native Land Act, 1888. In 1894, the "Native Land Court Act" was passed, repealing many of the previous statutes and consolidating and amending them.

During 1892, a new Land Bill occupied the attention of parliament, and finally became law. It is intituled, "An Act to amend the Law regulating the Sale or other disposal of the lands of the Crown in New Zealand," the short title being, "The Land Act, 1892." It came into operation on November 1, 1892, and the Crown lands are now administered under its authority by the Hon. the Minister of Lands at Wellington. For convenience, the Colony is divided into ten land districts, each being under the local direction of a Commissioner and a Land Board. The Commissioner's office is known as the principal land office. In each district there is a principal land office, and in some of the larger districts one or more sub-offices. It is with these land offices the selector has to transact all business, from the first consultation of the maps, the subsequent selection and purchase of land, to the final receipt of the Crown title. The towns in which the principal land offices are situated are Auckland, New Plymouth, Wellington, Napier, Nelson, Blenheim, Christchurch, Hokitika, Dunedin, and Invercargill. The "Land for Settlements Acts," 1894, 1895, 1896, 1897, and 1899 authorises the purchase of private estates for small settlements, and further empowers the minister, if necessary, to acquire such land compulsorily.

General Areas of the Colony.—The total area of the Colony is upwards of 66,000,000 acres, which is held approximately as follows:—

	Acres.
Finally alienated and reserved ...	23,382,971
Held on leashold tenure	15,229,338
Unoccupied Crown lands	9,387,691
Native lands	9,000,000
Mountains, lakes, &c.	9,000,000
	66,000,000

The Crown lands and Native lands, represent the lands which are available for future settlement in one form or other; but new lands are being acquired from the Natives from time to time. The area amounts to 18,000,000 acres, and may be classified as follows:—

	Acres.	Acres.
Crown lands suitable for settlement	3,000,000	
Native lands ditto	3,500,000	
		6,500,000
Crown pastoral lands ditto ...	6,500,000	
Native pastoral lands ditto ...	5,000,000	
		11,500,000

The lands which the Colony has to deal with at the present day are of various characters; in the North Island those suited for settlement are covered with forest, which has to be cleared before any return can be secured from it. The cost of clearing varies from 25s. to 40s. per acre in different parts of the Colony.

THE LAND ACT, 1892, is comprised in ten parts, having 253 Clauses, and seven Schedules.

PART I.

This relates to the general administration of the Act. It rules that there shall be appointed a Minister of Lands, and declares ten land districts in the colony, as under:—

	Town where principal land office is situated.
The Auckland Land District ...	Auckland.
The Taranaki Land District ...	New Plymouth.
The Wellington Land District ...	Wellington.
The Hawke's Bay Land District ...	Napier.
The Nelson Land District ...	Nelson.
The Marlborough Land District ...	Blenheim.
The Canterbury Land District ...	Christchurch.
The Westland Land District ...	Hokitika.
The Otago Land District ...	Dunedin.
The Southland Land District ...	Invercargill.

The limits of these land districts are the same as those under "The Land Transfer Act, 1885." The governor may nevertheless by order in Council alter the boundaries of any land district as he shall think fit. In the first part of the Act, the powers and duties of a Commissioner of Crown Lands are stated; also of Rangers of Crown Lands appointed by the Governor, who are to have free ingress and egress to and over any lands for purposes of inspection, and a penalty not exceeding £10 is recoverable from any person obstructing or delaying them in the execution of their duties.

Each district is to have a Land Board, the members of which are to be reappointed every two years. Every matter, question, doubt, or difference, relating or incident to the sale, letting disposal and occupation of Crown Lands, is to be heard and determined by the Boards. Rehearings are also provided for, and appeals are to be adjudicated on by the Supreme Court.

No application for Crown Lands is valid unless made at an established Land Office in the Land District. All applications must be made on the proper forms, and the Boards have power to reject any application.

Applications to purchase lands upon runs in mining districts, are not entertained unless evidence is furnished by applicant that the exact locality, area, and boundaries have been accurately described in an advertisement inserted for three consecutive weeks in any newspaper published or circulating in the district in which the lands so applied for are situate.

All applications are deemed simultaneous if made on the same day, but no application, excepting under Parts V. and VI. of this Act, is received on the same day from the same applicant, for an area greater than 2,000 acres, inclusive of not more than 640 acres of first-class land. Simultaneous applications for the same land are balloted for.

Deposits must accompany applications as follow:—1. For cash purchases, surveyed land, one-fifth of the price; unsurveyed land, the survey fee. 2. For occupation with right of purchase, surveyed land, two-and-a-half per cent. on the cash price of such land, which is deemed the first half-yearly rent, due on the 1st of January or July then next ensuing; unsurveyed land, the survey fee. 3. For a lease in perpetuity:—surveyed land, two per cent. on the cash price of such land, which is also deemed the first half-yearly rent, together with the lease and registration fee. Unsurveyed land, the survey fee. For a small grazing run, one-and-a-quarter per cent. on the cash price of such land.

Survey allowances are credited to the selectors. Balance of purchase money of surveyed cash lands must be paid within 30 days after the sale; of unsurveyed lands, within the same period, after notice has been given of the completion of the survey.

Sales by auction are published in the *Gazette*, and in a newspaper printed and circulated in the locality where the lands are situated, not less than one month before the date of sale.

All lands for sale by auction must have been surveyed previously to any notice of sale having been published. One-fifth of the purchase money must be immediately paid for land sold for cash, the balance being paid within 30 days. Non-compliance entails forfeiture of deposit and renders contract null and void.

One half-years' rent in advance must be immediately paid in the case of a sale of a lease.

No larger quantity of rural land than 640 acres of first-class, or 2,000 acres of second-class lands may be put up for auction in any one lot. This maximum does not apply to the sale of leases of land classified as pastoral, or as being unsuited for agricultural purposes.

Valuations of improvements made on Crown Lands for sale, must in all cases, where it is not otherwise provided by the Act, be made at least one month before the expiry of the existing lease or license, payment of such valuation to be made by the purchaser before taking possession. The Board has power to reduce the valuation if it impedes the disposal of the land; also to pay to the original lessee the amount of the valuations of the improvements after it is paid by the purchaser. The outgoing occupier has no right or claim against the Crown or the Board in respect of the value of the improvements made by him in case any person shall fail to pay such value to the Receiver of Land Revenue, but he may sue for the value of such improvements in the name of the Receiver on giving him an indemnity against costs.

Claims for compensation are settled in the manner provided in Part III. of "The Public Works Act, 1882."

For every lease, license, or other instrument, or for any transfer the fee is £1 1s. Every lessee or licensee under any Land Act formerly in force within the colony may exercise any right of transfer granted by his lease or license, or by the act under which his lease or license was granted. All leases and licenses under this Act are exempt from Stamp Duties.

Any person of the age of seventeen and upwards may become a selector under Parts III., IV., and V., of the Act. Married women are disqualified from selecting except as provided by the Act. They may become licensees or lessees under a will by virtue of an intestacy. They may become the owners of 320 acres of first-class land, or of 1,000 acres of second-class land notwithstanding any land held or acquired by their husbands.

No person is allowed to acquire land except for his own use or benefit.

Breaches of the Land Acts are punishable by imprisonment.

No person who owns 2,000 acres or upwards of freehold land, inclusive of 640 acres of first-class land, in the colony, no matter how acquired, may become the holder of any land except as provided for under Parts V. and VI., but any person holding less than 2,000 acres, inclusive of not more than 640 acres of first-class land, is competent to acquire additional land to make up the above-mentioned maximum quantity.

For the purposes of this section any land held which has not been classified, is deemed to be first-class land if of an unimproved value of 20s. per acre or more, and deemed second-class land if of less unimproved value than 20s. per acre.

Leases and licenses are subject to forfeiture in default of the observance of any of the conditions contained in the Act.

PART II.

Classification and Sales of Lands.—Crown Lands are divided into three classes, *viz.*:—

1. Town Land—being sites reserved for towns or villages.
2. Suburban Land—being land in the vicinity of any town lands.
3. Rural Land—being land not reserved for towns or villages or other public purposes.

All lands heretofore set apart and reserved for selection under

the Homestead system, and not disposed of at the time this Act came into force, are withdrawn from such reservation, and henceforth will be disposed of as Crown Lands.

All sections, as far as the features of the country admit, and with due regard to fencing lines, are to be of rectangular form, and when fronting a road, river, lake, or the sea coast, be of a depth not less than twice the length of frontage, but where land is open for selection before survey, no application can be received for any rural land, unless bounded by other frontage lines, of a less depth than forty chains from a frontage line, except with the approval of the Commissioner.

Along all high-water lines of the sea coast, and the margins of all lakes exceeding 50 acres in area, and along all banks of rivers and streams of an average width exceeding 33 feet, a strip of land, not less than 66 feet in width, is reserved from sale.

Town, suburban, and village lands (not being within any village settlement), may be sold by auction in sections, the size or extent and upset price being fixed by the Land Board; no town lands being sold at a less rate than £20 per acre, suburban lands at not less than £2 per acre, and village lands at not less than £3 per acre. If not sold at such auction, they may be let for any time not exceeding fourteen years at a rent not less than five per cent. on the upset price; the lessee to have no compensation for improvements at the expiration of his lease.

Rural lands may be disposed of at a minimum price of 20s. per acre for first-class lands, and at 5s. per acre for second-class lands.

Licenses are granted for occupation for grazing purposes, from year to year at rentals fixed by the Board.

In the case of timber land, the value of the timber growing thereon may be added to the upset price of the land, such value to be paid at time of sale.

The Governor is empowered to cancel any lease or license held over pastoral lands, should any mineral, mineral oil, gas, metal, or valuable stone be discovered on such lands, and without compensating the lessee or licensee.

THIRDS FOR ROAD MAKING.—Towards the construction and maintenance of the roads and bridges leading to and opening up the land in any district disposed of under the Act, one-third of the price or rent of the land is to be paid to the local authority.

PART III.

LAND ON THE OPTIONAL SYSTEM.—1. Land may be purchased for cash or be selected for occupation with right of purchase, or on lease in perpetuity; or (2), may in respect of any lands supposed to contain metal, mineral, or valuable stone, be selected on lease in perpetuity only.

Compulsory Residence. Residence on land, not being land purchased for cash, selected under this part of the Act, is compulsory, and in bush or swamp lands must commence within four years; in open or partly open land within one year from date of selection, and must be continuous. The exceptions to this are, (1), on lands occupied with right of purchase, for six years in bush or swamp lands, and for seven years in open or partly open land. (2). On lease-in-perpetuity lands, for ten years. The Land Boards may dispense with personal residence in certain special cases.

Improvements. Every selector under this part of the Act must make substantial improvements on the land within one year from the date of his lease, to the value of ten per cent. of the price of the land, and within two years to the value of another ten per cent., and thereafter, but within six years, to a further ten per cent. In addition to this, the selector must within the six years put substantial improvements of a permanent character on first-class land to the value of £1, and on second-class land to an amount equal to the net price of every acre, but not exceeding 10s. per acre.

The Land Boards may dispense with conditions as to improvements of special monetary value, in the case of suburban lands, where such improvements have been made which are considered reasonable in the circumstances.

Cash Lands, Crown Grants, Exchanges. A Crown Grant cannot be issued to a purchaser of Cash Land until he has, to the satisfaction of the Board and at any time within seven years from the date of his purchase, expended a sum equivalent to 20s. per acre on first-class and 10s. per acre on second-class lands in improvements of a substantial and permanent character.

In the case of a transfer of Cash Land, the transferee is bound by all the conditions of the original purchase which have not been fulfilled by the transferor.

Upon the Board being satisfied that the required improvements have been put upon the land, a Crown grant is issued to the purchaser. A deferred-payment license, or perpetual lease held under a former Land Act, may, on certain conditions, be exchanged for a lease in perpetuity.

LANDS FOR OCCUPATION WITH RIGHT OF PURCHASE.—Land selected under this part of the Act for occupation with right of purchase, is held on the following conditions: (1), a license for rural land is granted for a period of twenty-five years; (2) at a yearly rental equal to five per cent. of the cash price of the land, payable half-yearly in advance on Jan. 1 and July 1 in each year. (3) The licensee may, after ten years from the date of his license, have the option of purchasing the freehold for cash, or of exchanging such license for a lease in perpetuity under the Act without power of purchase, or of continuing in occupation under his license until the expiration of the term.

Upon the application of a licensee after the expiration of ten years, and subject to the fulfilment of the conditions of the license, a Crown grant will be issued.

LEASE-IN-PERPETUITY LANDS. Under this section a lease is granted for a term of nine hundred and ninety-nine years at a yearly rental equal to four per cent. of the cash price of the land, payable half-yearly in advance.

JOINT APPLICATION FOR OCCUPATION WITH RIGHT OF PURCHASE OR ON LEASE IN PERPETUITY.—Two or more selectors may hold, as tenants in common, an allotment or group of allotments of rural land, for occupation, with right of purchase, or on lease in perpetuity, one of the lessees or licensees only being required to reside on the land. In all other respects each selector is subject to the same conditions, limitations, restrictions, and disqualifications as prescribed in the case of one licensee.

On the licensees with right of purchase becoming entitled to a Crown grant held by them as tenants in common, the Governor may issue a grant to them as tenants in common, or may, on their joint request, and on the production of an approved subdivisional survey of an allotment, or group of allotments, issue a Crown grant for each of the subdivisions, in favour of the respective licensees, or may on a like request issue a grant to any one or more of them.

PART IV.

SPECIAL SETTLEMENT ASSOCIATIONS.—The price of land in a special settlement is fixed by valuation at not less than 10s. per acre, and the rental on lease in perpetuity at not less than four per cent. on the price.

Regulations as to residence, occupation, and permanent improvements are the same as stated in Part III.

Neither the whole or any part of a block of land can be set aside as a special settlement for more than three years from the date of a proclamation setting aside the same.

A person may not hold more than 320 acres in area, except as to swamp lands, in which the area may be increased to 500 acres.

Settlements formed under "The Land Act, 1885," by regulations of December 5th, 1885, are subject to that Act.

VILLAGE SETTLEMENTS.—Village settlements are surveyed and divided into village allotments of one acre each, and village homestead allotments of 100 acres each. Allotments are open for application on a day fixed by the Governor. Village allotments may be disposed of at public auction amongst the applicants at an upset price of not less than £3 per allotment, but village-homestead allotments are only offered for lease in perpetuity under Part III. of the Act. (*a*) Applications for leases must be made in manner as provided in Part I. (*b*) Improvements and residence on the land comprised in the lease must be as provided in Part III. (*c*) The rental in respect of every such lease is to be a sum equivalent to four per cent. on the cash price of the land, which must not be less than 10s. per acre.

PART V.

SMALL GRAZING RUNS.—The area of a first-class small grazing-run may not exceed 5,000 acres, and a second-class small grazing run, 20,000 acres.

The term of a lease is twenty-one years.

Runs may be declared to be open for lease on application at a rent of not less than two-and-a-half per cent. of such price as may be fixed by the Board.

No person may be a lessee under this part of the Act (1) of more than one run; or (2) who holds a run under Part VI. of the Act; (3) who owns any freehold land, or land held by lease or license of any kind whatever from the Crown, or from any other person, company, corporation, or local authority, whereby such person would become the owner or occupier of lands which, taken together, would exceed 1,000 acres, exclusive of the lands in the run for which he is an applicant; or (4) who is disqualified under any provision of the Act. This, however, does not apply to a person who may become a lessee by marriage, or under a will, or by virtue of an intestacy.

A lease entitles the lessee to exclusive right of pasturage over the lands included in the lease, and to all crops off any parts of the lands he may put into cultivation subject to the regulations of the Act.

Every lease expires on the 1st day of March.

No right of purchase is conferred by a lease.

The lessee may select up to 150 acres immediately adjoining and including his homestead, through which no road may be taken without his consent.

Residence is compulsory within three years if on bush or swamp land, and within one year if on open or partly open land.

Improvements to a value equal to one year's rent must be made within one year, and to a value equal to another year's rent within two years from the date of the lease, and thereafter to a value equal to the amount of other two years' rent, but within six years in all. On bush land, in addition to this, improvements to the value of 10s. per acre for first-class land and 5s. per acre for second-class land must be made.

A lessee may, after compliance with the conditions as to improvement, and of residence for three years, sub-divide his run amongst the members of his family not being under the age of seventeen years.

Provision is also made in the Act for renewals of leases.

PART VI.

LANDS HELD FOR PASTORAL PURPOSES. *General Provisions as to Runs.* As a rule, no larger extent of lands than is sufficient to carry all the year round 20,000 sheep or 4,000 head of cattle is offered by auction in one lot under the provisions of the Act.

Pastoral lands may be classified into (1), lands suitable exclusively for pasturage, and not capable of being used profitably in areas of a carrying capacity of less than 5,000 sheep; and

lands adapted in part for pasturage, and in part for agricultural purposes, but suitable for sub-division in areas not exceeding 5,000 acres.

With the approval of the governor, pastoral lands in areas exceeding 5,000 acres may be disposed of for occupation as runs, for any term not exceeding twenty-one years.

The Governor has power to resume any pastoral agricultural lands by giving twelve months' notice; but if part of the land only is affected by such a notice, the lessee may at any time, either before or after the expiration of the twelve months' notice, surrender his lease as to the whole or part of the land therein comprised but not affected by the notice on giving not less than six months' notice of his intention to do so.

A person or company may not hold more than one run under this part of the Act; nor may the holder of a small grazing run do so.

A pasturage lease entitles the holder to the exclusive right of pasturage over the land, but gives no right to soil, timber, or minerals. The lessee must preserve all timber and bush from destruction by fire; must prevent the spread of gorse and broom; and destroy the rabbits on the land. Rabbit-proof fences put up by lessee will be valued as an improvement. In the case of the land not being again put up at auction at the termination of the lease, the lessee has power to remove any buildings or enclosures made by him while lessee.

Rent is payable half-yearly in advance on 1st of March and 1st of September; forfeiture is entailed if three months in arrear. Disputes as to boundaries of adjoining runs are settled by arbitration.

Temporary grazing licenses over unsold runs may be granted by the Land Board.

PART VII

deals with licenses for cutting timber and flax, the removal of clay, sand, gravel, and stone; the removal of guano; the working of quarries, and the occupation of various sites. The period in any case must not exceed seven years and the area, 80 acres. Provisional licenses are also granted for a term not exceeding three years, and an area not exceeding 200 acres, and the holder of a provisional license may apply to the Land Board for a lease not exceeding twenty-one years at an annual rent to be fixed by the Board.

Under this part of the Act licenses are issued for a period of twelve months, authorizing the holders, under certain conditions, to search for and to dig and remove Kauri gum, fee, 10s.

PART VIII

empowers the Governor to reserve from sale any Crown Lands which may be required for public Works, buildings, &c., &c.

PART IX

relates to the acquisition and disposal of Native Lands.

PART X

repeals former Land Acts, and gives the saving clauses to be observed.

THE LAND FOR SETTLEMENTS ACTS, 1894, 1895, 1896, 1897, and 1899.

These are the titles of Acts authorising the purchase (compulsorily where necessary) from private individuals of suitable properties for subdivision into small farms. The amount which may be expended yearly under the Act is £500,000. Up to July 6th, 1900, seventy-seven estates have been purchased, containing an area of 324,168 acres, and costing for land, road formations, survey, and administration, £1,598,092, and they have been nearly all disposed of by lease in perpetuity, yielding a rent of 4·8 per cent. on the purchase money.

MINING REGULATIONS.

NEW SOUTH WALES.

GOLD MINING.

By the Mining Act of 1874 the Governor was empowered to proclaim Crown lands to be Gold-fields, and to grant "Miners' rights" at a fee of 10s., between January and June inclusive, of each year, and 5s. after that date in each year, subject to certain regulations to be from time to time prescribed. By the Mining Act Amendment Act of 1896, the price is now reduced to 5s. for a year, or 2s. 6d. for six months. A miner's right used to terminate with the last day of the year, but now it is in force for twelve or six months from the date of issue: without a miner's right, no person is allowed to mine for gold, on Crown lands, under a penalty not exceeding £10. Business licenses may also be granted enabling persons to occupy Crown lands within goldfields for business purposes, on payment of a fee of £1 for a year, and 10s. for six months. Leases of auriferous lands may be obtained in accordance with the regulations for the time being, the rent to be fixed by the Governor in Council (£1 per acre for one to twenty-five acres alluvial and quartz reef). Special leases may be granted up to 100 acres. The holder of a lease may at any time, with the consent of the Governor, surrender such lease, and obtain a lease for any term not exceeding fifteen years of the whole or any part of the land demised by the "surrendered" lease. With the Governor's assent a lease may be renewed for any period not exceeding fifteen years.

The export duty on gold is now abolished.

MINERALS OTHER THAN GOLD.

Mining leases of Crown lands may be granted by the Governor for areas not exceeding 640 acres or less than 40 acres for coal, nor less than 30 nor more than 80 acres for other minerals, for a period of not more than twenty years, with the right of renewal for another twenty years, subject to a rent of 5s. per acre, to be paid annually in advance, and to the condition of employing upon the land demised a certain number of miners specified in each lease according to circumstances. Notice in writing to the Secretary for Mines during the nineteenth year is necessary before renewal, and the fee for such renewal is to be determined by appraisement, but is not to be less than £2 10s. per acre.

Mineral licenses were granted on payment of £1, to be in force for 12 months from date of issue, but by the Mining Act Amendment Act of 1896, the sum to be paid for such a license has been reduced to 5s. for one year, or 2s. 6d. for six months, to be in force for twelve or six months from date of issue. By reason of the same Act, Miners' Rights now confer on the holders thereof the same rights and privileges in regard to mining for minerals other than gold as mineral licenses do. Each mineral license entitles the holder to occupy for the purpose of searching for any mineral other than gold and opal 40 acres of Crown lands. For searching for opal, 400 ft. by 400 ft. is allowed For mining and winning minerals other than gold and opal, 4 acres is allowed; and for mining and winning opal, 100 ft. by 100 ft., except where 4 acres or less has been held under mineral license in terms of proclamation of Amendment of Regulations relating to mineral licenses, dated Sept. 1, 1893, in which case, if a new license has been taken out on the expiry of the original license, 4 acres or less may continue to be held. Prospecting areas may be held under mineral license as under:—Coal lands, 640 acres, six mineral licenses; minerals other than coal, gold, or opal, 80 acres, two mineral licenses. The title rests upon the license being in force and upon the boundary marks being maintained and the search being carried on continuously.

MINING ON PRIVATE LANDS.

In terms of Section VII. of the Crown Lands Act of 1884, permits may be granted to the owners of any lands which were alienated under the Acts of 1884 and 1889, or any of the Acts repealed thereby, subject to the reservation of all minerals in the land to the Crown, to remove such minerals subject to payment of royalty, quarterly, at 6d. per ton on coal, 2s. per oz. on gold, and five per cent. of value of other minerals at the pit's mouth: but the rate of such royalty on gold or other minerals, except coal, may be reduced under certain circumstances.

THE "MINING ON PRIVATE LANDS ACT, 1894," AND MINING LAWS AMENDMENT ACT OF 1896,

Applies to the mining for gold on all lands alienated or in process of alienation, and to the mining for silver, lead, tin, and antimony, on lands the grants for which reserve to the Crown such minerals in express or general terms, but does not, without the consent of the owner, apply to any lands which are enclosed and under cultivation.

The Mining on Private Lands Act has been considerably amended and affected by the Mining Laws Amendment Act. Under the latter Act the Warden may grant an authority to enter on any private lands, the area not to exceed 20 acres for ordinary auriferous land, nor 40 acres for alluvial, where the mining operations will be very costly and difficult, and up to 80 acres for minerals other than gold. Rent and compensation is assessed by the Warden, and after payment thereof, the authority holder may proceed to work at once, but must employ one man for every five acres for gold, and one man for every ten acres for other minerals. The authority is liable to be cancelled for non-observance of labour conditions or non-payment of rent. An authority to enter may be converted into a lease under the Mining on Private Lands Act, provided all rents are paid up. A lease of cultivated land may now be granted without the owners consent, but will not apply to the surface. Owners of private land may also enter into agreements with the holders of Miners' Rights, under which the parties may take possession of and mine upon private lands other than alluvial, to the extent allowed under authorities to enter. The Minister for Mines must concur in these agreements before they can be recognised as valid, and they must be registered within 14 days from the date thereof.

With every application to lease, the applicant, not being owner of the land, shall deposit by way of rent for first half year, 10s. for every acre or part of an acre. Survey fee is required if applicant desires road of access from the nearest practicable point of a public road; but applicant may, if he so desire, mark the road himself.

To the owner of private land being the holder of a Miner's Right for gold-mining, 20 acres of ordinary auriferous land, 40 acres where mining operations will be conducted through basaltic rock formations, or where steam machinery will be required to contend against water, or where a large outlay of money is required, without rent, subject to the employment of one man to every 5 acres or lesser area and conditions of lease.

To the Owner of Private Land, being the holder of a Mineral License for silver, lead, tin, or antimony, 80 acres without rent, but subject to the employment of one man to every 20 acres or lesser area, and conditions of lease;

To the Holder of a Miner's Right to whom a Prospecting License (which enables the holder to enter upon private land, except land held under Act 57 Vict. No. 32, or under agreement, and mark off a Prospecting Protection Area, and dig and search for gold upon payment of assessment of amount to be deposited by applicant towards covering damage to the surface of the land, the prospector to have a preferent right to claim or lease on discovery of payable deposit or quartz vein) has been granted, if applied for within 30 days after discovery, in his prospecting area of auriferous quartz vein an area of 20 acres, subject to payment to owner a half-yearly rent at rate of £1 per acre per annum, and employment of not less than one man to each 20 acres or lesser area, and conditions of lease;

To the Holder of a Mineral License for silver, lead, tin, or antimony, of 80 acres, subject to payment to owner of half-yearly rent at rate of £1 per acre per annum, and employment of not less than one man to every 20 acres, and conditions of lease; and

To the Holder of a Miner's Right or Mineral License, for purpose of cutting races and conveying water or detritus for tramway, machine site, smelting works, water conservation, &c., subject to payment to owner of compensation, and rent to be assessed.

Suspension of Work may be granted by the Warden if sufficient cause be shown.

Lands that adjoin or Lands disconnected by Roads only and held under Separate Leases may be worked conjointly as one mine, provided the aggregate shall not exceed the area allowed for leases under these Acts.

The Lessee may remove machinery and plant, &c., within six months, if all rent due and all compensation be paid.

Every agreement between the Owner and Holder of Miner's Right or Mineral License, made in terms of Section 33 of the Mining on Private Lands Act—which should be stamped—shall be registered within 14 days after date of such agreement with the Mining Registrar of the division in which the land is situated.

Alluvial Deposits of Gold.—The Warden may grant the holder of a Miner's Right a Prospecting License, which will entitle the holder to enter upon any private land not occupied under the provisions of this Act, and to mark off and occupy a Prospecting Area, and, upon discovery of payable gold, the Minister may cause such land to be resumed for mining purposes, and the owner (and tenant or occupier, if any) shall be compensated for such land, and such land shall become Crown Land and reserved from Sale or Occupation. Should such reservation be revoked the former owner shall be entitled to re-purchase or re-lease such land. When land is resumed by the Crown, the prospector will have a preferent right to a prospecting claim. If auriferous veins are discovered, the prospector may apply for a lease under this Act.

MINING ACT OF 1889.

Under the Mining Act of 1889, the Minister may grant an authority to dig and search on land conditionally leased, for the following minerals:—copper, iron, cinnabar, galena, nickel, cobalt, platinum, bismuth, manganese, marble, kaolin, mineral pigments, mercury, wolfram, scheelite, chromite, opal, turquoise, diamond, ruby, sapphire, emerald, zircon, apatite and other phosphates, serpentine alunite, alum, and such other substances as may be declared to be minerals within the meaning of the Act. A deposit is required to be made to cover the cost of repairing any damage done to the surface of the land.

The Governor, with the advice of the Executive Council, may cancel wholly or in part the conditional lease, which then becomes Crown Land (within the meaning of the Mining Act. 1874), reserved from sale and lease.

The Mining on Private Lands Act of 1894 makes "land alienated or in process of alienation," available only for the purpose of mining for gold, silver, lead, tin, and antimony.

Under the Mining Act of 1889, however, an authority to dig and

search for coal, kerosene, shale, copper, iron, cinnabar, galena, nickel, cobalt, platinum, bismuth, manganese, wolfram, diamonds, &c., &c., may be obtained in respect of land sold (since the date of the Act) conditionally or by auction, or in virtue of improvements or otherwise.

The Governor may cancel wholly or in part the sale of such land, when the land becomes Crown land within the meaning of the Mining Act, 1874, and reserved from sale and lease.

COAL MINES REGULATION ACT, 1896.

An Act to make better provision for the Regulation of Coal Mines and Collieries, and for other purposes connected therewith, called the "Coal Mines Regulation Act," came into operation on the 1st October, 1896. The above Act provides for Proper Ventilation, "Standard Weight" is abolished, and coal weighing insisted on. Issue of Certificates of Service provided.

TIMBER, FOREST AND QUARRY LICENSES.

License fees for cutting timber on Crown lands: Fuel, 2s. 6d. per month, or 5s. per quarter; Cedar and Beech, £6 per annum; other timber, £3. For cutting timber on Timber Reserves, Class A, £6 per annum; Class B, £9; on Class C the fee is £6, and a royalty varying from 3d. to 1s. 6d. per 100 superficial feet. Licenses are granted for a year, quarter, or month. Licenses may also be granted for a specified number of trees. For stripping Wattle bark the fee varies from 10s. to 40s. per month, and sometimes a royalty; such licenses are granted from Sept. 1, to January 31. For saw-mill site licenses on Timber Reserves not under lease the fee is £3 for five acres, and 1s. for each acre additional up to ten; and for agistment licenses, £5 for first 40 acres, and 1s. for each acre additional up to 160. The license fee for quarrying stone, brick, earth, &c. on Crown Lands or Timber Reserves, Class A, is £4 per annum, 20s. per quarter, or 10s. per month per acre, not exceeding one acre. For quarry permits the fee is not less than £10 per annum.

VICTORIA.

GOLD MINING.

The Land Act, 1890, section 65, provides that licenses (renewable) may be granted for not more than one year, and for an extent not exceeding 20 acres, entitling the holders to reside on, or cultivate land on any gold-field, on payment of such fees and subject to such conditions as the Government may approve. Miners' rights are issued at the rate of 5s. per annum, and consolidated miners' rights may be issued on the application of the manager or trustees of any company agreeing to work in partnership any claims registered under the Act, on payment of a sum at the prescribed rate multiplied by the number of miners' rights so consolidated. Miners' rights entitle the holders to take possession of, and reside on and mine, so much of the Crown lands as may be prescribed by the bye-laws of the Local Mining Board. Business licenses enable the holders to occupy and carry on business on the gold-fields, on lands not exceeding one acre in extent, and are issued at £2 10s. for six months, and £5 for twelve months. A lease may be granted of not more than 100 acres in one lot for such term as the Governor may determine, and at a nominal rent, to any holder of a miner's right who may be desirous to prospect for gold in any place where sinking through basalt will be necessary, and to which no part of any gold workings shall be nearer than five miles, one mile being allowed to be marked off for the prospecting, and the lease of 100 acres to be granted only in case of remunerative gold being found.

Gold mining leases may be granted under Part I. of the "Mines Act, 1890" of Crown lands, pastoral allotments, grazing areas, lands held under section 42 of the Amending Land Act, 1865, and section 49 of the Land Act, 1869, lands alienated in fee since the 29th December, 1884, lands licensed or leased (with right of purchase), since 29th December, 1884, Mallee lands and Wattle lands.

Mineral leases may be granted under Part I. of the "Mines Act, 1890," of Crown lands, pastoral allotments, grazing areas, Mallee lands, Wattle lands, lands alienated in fee since 29th February, 1892, and lands licensed or leased with right of purchase.

Leases to mine for gold and silver may be granted under Part II. of the "Mines Act, 1890," of lands alienated in fee prior to the 29th December, 1884.

The rent on gold mining leases of any lands—except lands alienated in fee prior to 29th December, 1884—is at the rate of 5s. per acre per annum, payable half-yearly in advance; and for lands alienated in fee prior to 29th December, 1884, the rent is, for any area up to forty acres, £1 per annum, and above forty acres, at the rate of sixpence per acre per annum, payable quarterly in advance in each case. On mineral leases rent is not less than 3d. or more than £5 per acre per annum, payable half-yearly in advance.

The amount required to be lodged in connection with an application for a mining lease is £5, and such further sum as may be required to cover cost of survey.

Licenses to cut, construct, and use races, drains, dams, and reservoirs for mining purposes, may be granted for a term not to exceed fifteen years, and the rent payable is according to the quality of water required or capacity of reservoir. Fee for the preparation of a license, or lease, £1.

Licenses to search for any metal or mineral, other than gold are granted over Crown lands, pastoral allotments, grazing areas, Mallee lands, and Wattle lands, for any area not exceeding 640 acres, for a term of three months. The fee payable for such a license is not less than £1, nor more than £2 10s. per annum.

MINES ACT, 1897.

On September 27, 1897, "An Act to amend the law relating to mining," was assented to, and it repealed the whole of the Mines Acts of 1890, 1891, 1892, and 1895, which embraced seven Acts or amending Acts; it also repealed Sections 73, 299 to 376 both inclusive; the Schedules 33, 34 and 35 of the Mines Act of 1890. The new Act is divided into three parts: Part I.—Dealing with Mining on Crown Lands. Part II.—Mining on Private Property, and Part III.—Regulation and Inspection of Mines, Mining and Machinery, Drainage, Tribute, Court of Mines and Priority of Wages. Under the Act miners' rights apply to all minerals, and the fee is reduced to 2s. 6d. per year, consolidated rights are reduced proportionately. The holder of a miner's right has power to enter upon any pastoral land or grazing area to search for gold and to mine thereon, and to erect and occupy mining plant or machinery without making compensation to the lessee thereof for surface or other damage; leases may also be granted on the same terms. Gold mining leases are issued for fifteen years at a yearly rent of 2s. 6d. per acre demised. The area of a mineral lease is not to exceed 640 acres, the term fifteen years and the rent not less than 1s. or more than £1 for every acre demised. The Labour Covenant provides that "a certain number of able and competent workmen and miners (not being Chinese) shall be employed," a breach of the labour covenants renders the lease voidable. The 68th section of Part II. declares that gold and silver, whether on or below the surface of all land whatsoever in Victoria, shall be and remain the property of the Crown; this also applies to all minerals, mineral ores, and metals other than gold and silver, except on land alienated in fee simple from the Crown on or before March 1, 1892.

SOUTH AUSTRALIA.

MINING.

All previous acts dealing with mining in South Australia were repealed by the "Mining Act, No. 587, of 1893," which came into operation on Feb. 28, 1894, and under its provisions prospecting and mining are permitted by virtue of a miner's right; by gold mineral, coal, oil, and miscellaneous leases; and by business and occupation licenses.

A miner's right shall, in the first instance, authorise the holder to prospect for any metal, mineral, coal or oil, the property of the Crown; under a gold claim of prescribed area, a mineral claim not exceeding 40 acres, and a coal claim or an oil claim, 640 acres. Ownership of a claim shall confer the right to reside thereon, and a preferential right to a lease.

The dimensions of a gold claim are according to its nature; an ordinary reef claim is 100 by 600 feet, and an ordinary alluvial claim 30 by 30 feet, with a labour condition requiring one man to be kept employed. A mineral claim of 40 acres requires two men; coal and oil claims (640 acres), require eight men. A business license (quarter acre in township, and one acre on other land), is 10s. for six months and £1 for one year. Occupation license (half acre), 2s. per annum; term, fourteen years. A person may hold any number of claims (except alluvial claims, of which only one can be held at one time), but for each claim must hold a miner's right.

Gold leases not exceeding 20 acres, term, 42 years; rent, 1s. per acre and sixpence in the pound on net profits; labour. one man to every 5 acres. Mineral leases not exceeding 40 acres, term, 42 years; rent, 1s. per acre and sixpence in the pound on net profits; labour, one man to every 10 acres. Coal and oil leases (640 acres), term 42 years; rent, sixpence per acre until coal or oil is found in payable quantities, then 1s. per acre; labour, one man for every 40 acres. Miscellaneous lease for salt and gypsum, 40 acres, mineral springs, 20 acres, and smelting works' site, 5 acres; term, 42 years; labour for salt and gypsum and mineral springs, two men.

Any number of leases may be held, but a miner's right for each is required. All claims must be constantly worked, and must be registered within thirty days after being pegged out.

A Bill to amend the Mining Act (dealing with salt rights of existing leases) was passed by the House of Assembly in September, 1895.

Regulations with regard to securing claims, leases, &c., may be obtained from the Warden's Office, Adelaide.

WESTERN AUSTRALIA.

GOLD MINING.

On January 1, 1896, "The Goldfields Act, 1895," came into force. It repealed the whole of the following Acts:—50 Vict. No. 18, "The Goldfields Act, 1886," "The Gold Declaration Act, 1888, an Act to confirm and amend the Goldfields Act, 1886," and "The Goldfields Act, 1886, Amendment Act, 1894;" it also altered part of the "Mineral Lands Act of 1892," but does not interfere with any right, interest, or liability previously incurred. The New Act is divided into Five Parts.

Part I. deals with general matters, such as the appointment of officers and the keeping of records.

Part II. deals with miners' rights and business licenses. Rights are issued to any person not an Asiatic or African alien, and consolidated rights to companies at an annual fee of 10s., and without which right no person can sue. A business license is granted to any person not being an Asiatic or African alien, for one year, on payment of £4. The Governor may exempt lands from occupation, but permission may be obtained to mine upon such lands. Permission is granted to lay pipes, &c. Suspension of work may be granted for six months if the claim or holding is unworkable; if the owners require to be absent for sufficient cause; if the supply of water is insufficient; or if owners desire to concentrate labour on an adjoining claim. Reward areas may be granted to discoverers; arbitration and valuation are arranged for; and the government to pay for improvements on any lands of which they resume possession.

Part III. deals with Gold Mining Leases, and sets out the purposes and exemptions. Gold mining leases are granted for areas not exceeding 24 acres, at an annual rent, payable in advance, of twenty shillings per acre. The term may not exceed twenty-one years. The leases are liable to cancellation unless worked by the proper number of men, or machinery power equal to the men. Leases may be amalgamated on the payment of £1.

Part IV. deals with the administration of justice, empowers the governor to establish a warden's court, and defines the duties and powers of the warden. Not less than twenty or more than fifty mining assessors are to be appointed for each field, and their duties are defined. The rest of the part deals with technical legal questions, debt cases, appeals, &c.

Part V. deals with penalties, forfeitures, &c. Any person found engaged in gold mining, except for wages, without a miner's right, is liable to a penalty of £10 and forfeiture of his claim. Asiatics or African aliens are prohibited from mining on any Crown land under a penalty of £10. Penalties are to be enforced for forging miner's rights, extortion, assault on wardens; and wardens are liable to fines if they hold any interest or share in a gold mining or mineral concern. Bankers and others exporting gold are compelled to declare the weight and value thereof if it has been obtained from the soil of the colony, under a penalty not exceeding £10, or a sum equal to five per cent on the value of the undeclared articles.

Under "The Goldfields Act, 1895," there are 187 regulations for the management of goldfields. Prospectors may mark off protection areas from 500 ft. by 500 ft. (altered in December, 1896, to 700 ft.), up to 1,000 ft. by 1,000 ft.; alluvial ordinary claims to comprise a maximum for one miner of 70 ft. by 70 ft. up to 200 ft. by 200 ft. for eight miners, the latter being the greatest area of any ordinary claim. An ordinary quartz claim for a miner shall not exceed 75 ft. along the base line, by a width of 400 ft. in localities south of the Tropic of Capricorn, and not exceed 150 ft. long by a width of 400 ft. in localities north of the Tropic of Capricorn; not more than eight such claims to be worked conjointly; when payable, each claim must be worked by one man for each 75 ft. along the base line in localities south of the Tropic of Capricorn, and one man for each 150 ft. along the base line in localities north of the Tropic of Capricorn; a claim is deemed payable when it produces sufficient gold to pay miner's wages and working expenses. Tunnelling and reward claims are also dealt with. Other matters dealt with in the Regulations are:—Business, Residence Machinery, and other areas; Water Rights, Subterranean Water Rights; Gold Mining Leases (under which it defines the necessary labour to be employed as not less than one man for every six acres or fraction thereof for thirty days after the application to lease; if the lease is approved, the labour employed must be one man to every three acres, this regulation No. 93, was altered in May, 1897, in such a way as to enable the mines to be worked with half the labour which was formerly necessary); General Regulations respecting Holdings; Reserves and Exempted Lands; and Surveys. There are also 37 judicial regulations.

An Act to amend the Goldfields Act 1895, was assented to on October 27, 1896, and deals chiefly with the construction of tram lines and erection of electric lines.

"The Mines Regulations Act of 1895," assented to on October 12, 1895, provides for the Regulation and the Inspection of Mines and Collieries, and only applies to mines in which more than five persons are ordinarily employed below ground.

MINERALS OTHER THAN GOLD.

By "The Mineral Lands Act, 1892," only repealed by "The Goldfields Act, 1895," as to sub-section 1 of section 6, any person, not being an Asiatic or African alien, may, on application to the Commissioner of Crown Lands, and on payment of a fee of 10s., obtain a license to mine for minerals for a period of one year; and any person desiring to prospect for same must first obtain such a license. The holder of a mining license may "take possession of, mine, and occupy, in the manner prescribed by the regulations, an area of Crown Lands for mining purposes," and "all minerals found upon Crown Lands so occupied, shall be the absolute property of the holder of such license." Leases are granted for purposes of mining for silver, tin, or antimony, for an area not exceeding 40 acres, for a term not exceeding twenty-one years, at an annual rental of five shillings per acre, payable yearly in advance. For minerals other than these (except coal, the greatest area for which is 640 acres, with a rental of sixpence per acre and a royalty of threepence per ton on the quantity raised during the first ten years, and sixpence per ton during the remainder of the term), the area may not exceed 160 acres. An application for a mining lease must be accompanied by the amount of rent due for the first year, together with the survey fees. Both of these are forfeited if the lease, when approved, is not taken out. Allowing the minerals to remain unworked, or the rent unpaid for thirty days after it becomes due, renders the lease liable to forfeiture. Every lessee is required to furnish a monthly statement of the working and proceeds of each mine. Failure to comply with this condition entails a penalty not exceeding £10.

A short Act was assented to on October 28, 1898, entitled the 'Goldfield's Act 1895, Amendment Act 1898." An important section (11) being included, providing that once a lease is granted, the lessee is entitled to have the exclusive privilege of mining. Section 20 provides that all dealers in gold must hold a license on payment of a fee of £1. Under this Act provision is also made (section 14, amending section 45) for fines being inflicted in lieu of forfeiture, on first breach of labour conditions.

During 1899 the Mineral Lands Act Amendment Act was passed. It is mainly directed to bring the law relating to land held for mining for minerals into line with that relating to Gold Mining. The rent payable for lands leased under this Act is 5s. per acre per annum, except in the case of leases for Coal Mining, the rent of which is 6d. per acre per annum, with a royalty of 3d. for every ton of coal raised during the first ten years of the term of the lease, and 6d. for every ton raised during the remainder of the term.

QUEENSLAND.

THE NEW MINING LAWS.

Mining for gold and all minerals is regulated by "The Mining Act of 1898," which repealed all other Acts then in existence. The new laws came into force on the 1st March, 1899, and the regulations thereunder on the 1st of May of the same year. Power is given under the Act to the Governor to constitute any portion of Crown lands a goldfield or mining district, or to alter or amend any boundaries or to exempt any prescribed area of land within the boundaries from the operations of the Act.

On payment of 5s. any person who by lineage does not belong to any of the Asiatic, African or Polynesian races may obtain a Miner's Right, which permits the holder to take possession of, mine, or occupy Crown lands for mining purposes; to cut, construct, and use races, dams, and reservoirs, roads and tramways which may be required for mining purposes through and upon any Crown land; to take or divert water from any natural spring, lake, pool or stream, situate or flowing through Crown lands, and to use such water for mining purposes and for his own domestic purposes; to use by way of easement, any unoccupied Crown lands; to take possession of and occupy Crown lands for the purpose of residence; to put up and at any time to remove any building or other erection upon such land so taken up and occupied; to cut timber on and remove the same from Crown lands for the purpose of building for himself any place for residence or for mining purposes.

Miners desirous of prospecting for gold may mark off and hold prospecting areas ranging according to their distance from any other mine of from 150 to 400 yards square. All such areas must be pegged, registered and continuously worked. On payable gold being discovered, the holders must report same, and are entitled to a reward claim ranging from 150 feet along the line of reef by a width of 400 feet to 500 feet along the line of reef by the same width.

Special provisions are made to meet the case of holders of miners' rights who desire to mine for minerals other than gold, the areas ranging according to distance from an existing mine, where the claim is within the limits of a mineral field already proclaimed. Beyond the limits of such an existing field the areas are:—For the purpose of prospecting for silver, antimony or tin, 80 acres; for any other mineral except gold and silver, 160 acres.

The area allowed for each holder of a miner's right in any ordinary reef claim taken up for the purpose of mining for gold is 50 feet along the supposed line of reef, by a width of 400 feet. The width of all such claims must be marked off at right angles to the base line, but the whole or any part of such width may be marked on either side of such line at the option of the shareholders. There may be a union of ordinary reef claims under certain conditions.

The size of ordinary alluvial claims vary according to the number of miners' rights held, as follows:—For one miner's right, 100 feet by 100 feet; for two, 200 feet by 100 feet; for three, 300 feet; and so on for any number of miners' rights held.

Special provisions meet the case of hydraulic claims, puddling claims, and auriferous sands claims.

The rent of gold leases is fixed at £1; the labour conditions are one man to four acres, and the area of each lease cannot exceed 500 acres.

For mineral leases the rent is 10s.; the labour conditions are, one man to three acres, and the area of each lease cannot exceed 160 acres.

For Miner's Homesteads the rent is 1s. per acre per annum up to 40 acres, and exceeding 40 acres, up to 80 acres (the maximum), 6d. per acre per annum.

TASMANIA.

GOLD MINING.

A MINER'S right, or prospector's protection order, issued under the Gold-fields Act (the fee for a miner's right being 5s., and a prospector's license 10s. per annum, with half rate if issued after 30th June), authorises the holder to reside upon a gold-field, and to occupy a quarter of an acre for residence. It also entitles him to a claim for mining purposes of the following areas:—Alluvial, single claim, 35 yards by 35 yards; united claims, up to 10 men, 110 yards by 110 yards. Creek claims: 35 yards by 35 yards along course of creek; united claims, not to exceed six men's area. Extended alluvial claims: 70 yards by 70 yards, up to 170 yards by 170 yards for six men; also to take any quantity of water and of timber required for mining purposes. Extended alluvial claims of one acre for ground previously worked and abandoned may be taken up. Prospecting claims, gold, not exceeding 10 acres. Fee for registration, which is not compulsory, 2s. 6d.; survey, 25s. United claim of ten, fee, 5s.; survey, £2. Leases not to exceed 10 acres, except in special cases by permission of the Minister; term, ten years; rent, £1 per acre. Leases may be amalgamated to the extent of 60 acres. Lessee has the right

to renewal for ten years, rent not to exceed £3 an acre. Fee for preparation of lease, £1 ; transfer, 10s. Survey fee, 10 acres, £3 15s. ordinary land ; £5 10s. heavy bush. On the West Coast the survey fees are : One acre and under, £1 15s. ; 2 acres, and under 5 acres, £3 15s. ; under 10 acres, £5 10s., up to a maximum of £23 for not exceeding 320 acres.

Leases are liable to forfeiture, by Governor in Council, if rent is not paid in advance, or labour conditions not complied with.

Licenses to occupy land upon a gold-field, for the purpose of cultivation, are issued under the Waste Lands Acts. Area, 5 acres, or under ; rent, £2.

MINERALS OTHER THAN GOLD.

If coal, shale, slate or limestone, area not exceeding 100 acres, rent, 2s. 6d. an acre ; term, 21 years. If any mineral other than the above, area not exceeding 80 acres, rent 5s. an acre ; term, 21 years. A discoverer is entitled, under certain conditions, to a lease free of rent. All leases issued under the Minerals Land Act are liable to forfeiture by the Governor in Council if the rent be not paid in advance, or if the conditions as to the employment of labour be not complied with. The shape of lots, where not impracticable, is square, with the boundaries running to the cardinal points. Leases are allowed to be amalgamated to the extent of 320 acres. Claims under Residence Licenses do not exceed one quarter of an acre. Fee, 10s. per annum, half rate after 20th June.

REWARD CLAIMS.

Reward claims for gold discoveries may be granted at peppercorn rent for areas ranging from 10 to 20 acres, according to distance by a direct line from a spot where gold in similar deposit is known to exist ; minimum distance, two miles. For minerals other than gold the areas granted range from 20 acres to 320 acres, according to distance, the minimum distance being two miles. Additional areas up to 100 acres are granted where the sinking is 100 feet deeper from the natural surface than any known deposit of the same mineral within a radius of five miles. The leases for gold working do not exceed ten years, and for other minerals twenty-one years.

OTHER PROVISIONS.

Machinery sites are granted at annual rental of £1 per acre not exceeding 5 acres. Water rights are granted for 10 years and 21 years respectively at £1 per lead (of sixteen square inches). Easement licenses are granted free for deposit of tailings, debris, construction of roads, tramways, tunnels, shafts, etc. Licenses to work river beds vary with circumstances. Holders of miners' rights or a residence license are granted cultivation areas, not exceeding 20 acres, at 5s. per acre, for a term of two years, renewable.

NEW ZEALAND.

GOLD MINING

The Mining Act, 1898 came into operation on February 1st, 1899, and it consists of ten parts, under the following headings.

Part I., preliminary ; Part II., districts and appointments ; Part III., lands subject to this Act, and lands exempted therefrom ; Part IV., mining privileges ; Part V., working, regulation and inspection of mines ; Part VI., regulation of appliances, and processes for treating ores and metals ; Part VII., compensation ; Part VIII., mining partnerships ; Part IX., administration of justice ; Part X., miscellaneous. Of the several Parts the following clauses are the most important.

Part III. declares all Crown lands within any mining district open for mining ; leased lands are deemed Crown lands ; the Warden may temporarily reserve or exempt lands ; state forests are subject to the aforementioned clauses ; the Native Land Court may declare native land open for mining purposes, fees, royalties, &c., to be paid to the native owners ; a penalty of not more than £50 may be inflicted on persons mining on native land without authority ; the laying off of mining townships and suburban sections is deferred ; persons in illegal occupation of lands in mining districts may be rated as occupiers.

Under Part IV.—Any person over 14 years of age may receive a miner's right, the annual fee being 10s. where it does not relate to native ceded land, and £1 when it does so relate. Consolidated miners' rights are issued, the fee to be equal to the aggregate of the prescribed fees of all the rights comprised therein ; prospecting is only allowed on open lands, but the holder of a miner's right may prospect on Crown lands ; two classes of prospecting licenses are defined, ordinary prospecting and tunnel prospecting. Compensation is to be paid to the owner of land for damage done by prospecting ; Crown lands are divided into ordinary, extended and special claims, sub-divided into alluvial, quartz, stream-beds and sea-beaches ; Land resumed or ceded is to be available for mining after 28 days' notice in the *Gazette* ; the number of claims that may be taken up is not limited, but ordinary claims must not exceed six acres ; under the labour conditions, operations must be commenced on ordinary alluvial claim within 48 hours of taking up ; any other ordinary claim within six days, extended claims within 14 days, special claims within time fixed by the Warden, seven workmen per day per dredge must be employed ; special provisions as to mining on timber lands are made. Part IV. also deals with races and other mining privileges in respect of water, water-races belonging to local authorities ; water courses for the discharge of tailings ; business sites and other mining privileges in respect of land, the surrender, exchange and protection, amalgamation, &c. of mining privileges.

Part V. deals with examiners, mine managers, battery superintendents and engine drivers, who must each and all have approved certificates, which may be obtained by examination or payment of a fee when applicant holds a corresponding certificate by an authority outside the colony ; hours of employment in mines are limited to eight consecutive hours per diem ; females or persons under 14 years must not be employed ; drainage of mines is also dealt with ; ventilation, blasting, signalling, &c. ; dressing-rooms have to be provided ; plans of underground workings must be kept, under penalty ; accidents in mines are dealt with and compensation defined ; inspection of workings are ordered.

Part VI. relates to the regulation of appliances and processes for treating ores and metals.

Part VII. deals with compensation.

Part VIII. deals with mining partnerships.

Part IX. deals with the administration of justice, the practice and procedure in the Warden's Court, rehearings, special cases reserved, appeals, jurisdiction of district Court.

Part X. deals with miscellaneous matters, such as development of the mining industry, validation of mining privileges, and makes mining on certain lands without authority, an offence with a penalty of not more than £5.

Under this Act there are no less than 107 regulations which our space is too limited even to summarise.

OTHER MINERALS THAN GOLD.

Section 90 of Part IV. deals with licenses for mining other minerals than gold, subject to subsisting prospecting licenses. The area is limited to 320 acres, the rent, 2s. 6d. per acre or fraction of acre per annum, whilst a royalty of not less than one hundredth or not more than one twenty-fifth of their value at the pit's mouth must be paid by the licensee.

In 1900 a Proclamation by Order in Council revoked all regulations made under the Mining Act, 1898, and made thereof instead the regulations embodied therein and published in the *New Zealand Gazette* of June 18th.

Under the new regulations Miners rights, whether ordinary consolidated, or antedated, may be issued by, and the fee therefore paid to, the postmasters appointed by the Governor for such purpose, and such payments are to be deemed as valid as if paid to a receiver of gold revenue. In the regulations applying to the form of dredging or river claim, the course of the stream in the licence is to be measured along the bed of the stream. Beyond this definition the regulation is unaltered. In regard to applications in respect of mining privileges, it will, as soon as practicable, after the date of the lodging of duplicate originals the registrar is to minute thereon the time and place of hearing appointed by the Warden, such being no less than the sixteenth day after the day of filing, and for public information is to affix one of the duplicates in a very conspicuous place outside the courthouse where the application is to be heard. Under the heading " Labor Conditions " there are several new regulations relatlng to certificates of reduction. The application for authority to employ less than the prescribed minimum number of workmen need not be publicly notified by advertisement, unless the warden otherwise directs. When disposing of any application the warden, for the purpose of determining the extent to which the prescribed number should be reduced, and the period for which the reduction should be granted, is required not to confine himself to merely temporary exigencies, but is to have regard to all the circumstances fairly affecting the matter, more especially the extent, if any, to which the proposed reduction would lock up ground that otherwise might be reasonably and advantageously worked. In any case where the inspector is of opinion that a dredge is unsafe, and should be suspended or condemned, he is to report to the warden, who may issue a summons requiring the owner to show cause why it should not be suspended or condemned. On the return of the summons the warden may make such order in the premises as he thinks fit. The application for a certificate of easement under section 8 of the Mining Act Amendment Act, 1899, is to be in form prescribed by the regulations, and need not be publicly notified by advertisement. It is to be disposed of under the general regulation relating to applications in respect to mining privileges. The certificate is to be deemed to be appurtenant to the mining privilege, for facilitating the operations of which the certificate is granted, and accordingly the certificate is not to be transferrable apart from such privilege. The warden may, by certificate of easement, grant to any person, being the holder of a claim, the right to connect with and use any shaft, tunnel, or drive on any other persons mining privilege, provided that if such shaft, tunnel, or drive existed on such mining priviiege when it was taken up, no compensation is to be payable by the grantee for or on account of the cost of construction. This matter of the grant of easement under the Act of 1899 is of the utmost importance to the dredging industry, since the warden is empowered to grant to the holder of a mining privilege (*e. g.*, a dredging claim) the right to enter upon, occupy, and use any specified portion of the area comprised in any other mining privilege for any of the following purposes : To cut, make, dredge or otherwise construct or maintain and use upon over or under such specified portion of any road, tramway, bridge, race tunnel, drive ditch channel or other mining work, and to convey over or discharge upon such specified area any tailings, debris, or waste waters resulting from mining operations. The gold obtained from such area by the grantee is to be the property of the holder, and before acting under the grant the grantee is to pay him compensation for all actual and prospective loss and damage that may be suffered by reason of the grant or the exercise by the grantee of the rights conferred upon him. With the exception above noted the new regulations are mostly as indicated a reprint of those issued and proclaimed in January, 1899.

THE AUSTRALASIAN COLONIES.

A GENERAL description of the continent of Australia and the islands of New Zealand and Tasmania is here given, as introductory to the detailed account of each colony.

The term AUSTRALASIA is sometimes used when speaking of Australia and New Zealand; this, however, is not strictly correct, as several of the South Sea Islands are, by many geographers, included under this head. The Australasian colonies comprise really—the Island or Continent of Australia, the Island of Tasmania, and the three Islands of New Zealand, with the smaller islands contiguous to each colony.

Area and Boundaries.—AUSTRALIA is the largest island in the world. It lies to the south-east of Asia, between the parallels of 10° 39′ and 39° 11½′ south latitude, and the meridians of 113° 5′ and 153° 16′ east longitude. Its greatest length from W. to E.—that is, from Steep Point, opposite Dirk Hartog's Island, to Point Cartwright—is about 2,400 miles; its greatest width, between Cape York on the north and Wilson's Promontory on the south, is 1,971 miles. Its coast line is about 7,750 miles in length, and its extent is computed at 2,944,628 square miles, or 1,884,561,920 statute acres; or including Tasmania and New Zealand, 3,075,238 square miles, or 1,968,152,320 acres. Some conception of the area of Australia may be better gathered by comparison. It is about twenty-six times the size of Great Britain and Ireland, fifteen times the size of France, about one-sixth smaller than the whole of the United States of America, and only about one-fifth smaller than the continent of Europe. The Australasian group occupies nearly two-fifths of the whole of the British dominions. The least distance to England is about 11,000 miles. The northern shores of Australia are washed by the waters of Torres Strait—which separate it from New Guinea; by the Gulf of Carpentaria, the Arafura Sea and the Indian Ocean. It is bounded on the south by Bass' Strait—which divides it from Tasmania—and by the South Pacific Ocean; on the east by the South Pacific Ocean; and on the west by the Indian Ocean. The name of Australia was first given to the Continent by Flinders.

A fair idea of Australia and the location of its several colonies may be gathered by considering it as divided into three parts—Western, Central, and Eastern. The Western part consists entirely of the colony of Western Australia; the Central, of South Australia and its allied Northern Territory; the Eastern of the three colonies of Queensland, New South Wales, and Victoria. The proportion of the colonies to each other and to the whole continent may be readily understood by the following comparison:—If the continent were divided into 100 equal parts, Victoria would comprise 3, New South Wales 10, Queensland 23, South Australia 30, and West Australia 34.

Location of the Colonies.—Describing these colonies more particularly in the same geographical order of west to east;—WESTERN AUSTRALIA is recognised by its name: it occupies the whole of the western portion of the continent, and is surrounded on its northern, western, and southern sides by the sea, its eastern boundary being the colony of South Australia and the Northern Territory; its capital city is Perth; others of importance being Fremantle, Albany, Geraldton, and Coolgardie. To the eastward of West Australia, and stretching from ocean to ocean, occupying the whole of the central portion of the continent, is the colony of SOUTH AUSTRALIA, the northern part of which is known as the NORTHERN TERRITORY. Adelaide is the capital city of South Australia; other principal towns are Gawler, Port Adelaide, Kapunda, and Mount Gambier. The principal town of the Northern Territory is Palmerston.—To the eastward of the Northern Territory and South Australia, and to the north-east of Australia itself, lies the colony of QUEENSLAND. Its capital is Brisbane; Ipswich, Toowoomba, Mackay, Maryborough, Gympie, Rockhampton, Townsville, Cooktown, and Croydon are other important towns.—South of Queensland, and eastward of South Australia is the mother colony of NEW SOUTH WALES. Sydney is the capital city, Maitland, Newcastle, Goulburn, Bathurst, Grafton, and Yass ranking immediately after.—Occupying the most southerly part of the continent, south-west of New South Wales, and eastward of South Australia, is the colony of VICTORIA. The metropolis is the city of Melbourne; Ballarat, Geelong, Sandhurst, Castlemaine, Maryborough, and Hamilton being other leading centres.—TASMANIA is an island 150 miles to the south of Victoria, and separated from it, as before mentioned, by the strait named after its discoverer, Bass. It is surrounded by the South Pacific Ocean; the capital city is Hobart, Launceston being next in importance.—NEW ZEALAND consists of two large islands, known as the North and Middle Island, divided by Cook's Strait; and Stewart's Island, separated from the Middle Island by Foveaux Strait. These three islands lie to the south-east of Australia, at a distance of about 1,200 miles. The South Pacific Ocean is on all sides their boundary. The capital city is Wellington, though Auckland in the North Island, and Dunedin in the Middle Island, are cities of greater size and commercial importance.

The FIJI ISLANDS, annexed in 1874, lie in the Pacific Ocean, nearly due north of New Zealand, about 1,000 miles distant, and due east of the northern part of Queensland. The capital of Fiji is Suva.

The Island of New Guinea lies off the North-Eastern coast of Australia, at a distance of about 60 miles from it. In April, 1883, half of it was annexed by the Government of Queensland, but the annexation was not confirmed by the Imperial Government. However, in November, 1884, the southern coasts to the eastward of 141° E. long. were proclaimed as under a British protectorate, and on September 4, 1888, sovereignty was formally proclaimed by Sir William Macgregor, the late Lieut.-Governor of British New Guinea. The seat of Government is at Port Moresby.

Discovery and Settlement.—The precise period of the discovery of Australia is doubtful. Old manuscript charts bearing date 1531 and 1542 have marked on them an extensive country to the southward of the Moluccas, under the name of Jave la Grande (Great Java), which agrees nearer with the position and extent of Terra Australis than with any other land. Photo-lithographs of some of these maps have been added to the public libraries of Sydney and Melbourne. In one of them the outline as far as Moreton Bay on the east coast, and as far as the Dampier Archipelago on the west, is considered as fairly accurate. The names of the geographical features on these maps, where marked, are in Portuguese, and it may therefore be considered certain that the Portuguese are entitled to the honour of being the original discoverers; but the exact date (though known to be prior to 1540, and probably between 1507-29) is not now likely to be ascertained. Ramusio, in a preface to Marco Polo's book, uses these words respecting the South *Terra incognita:* "In these unknown regions, as regards the South, the first to make discoveries have been the Portuguese Captains of our own age." What was thought three centuries back is now regarded as very probable. Portugal and Spain were once united, though separated again, and some confusion has arisen whether discoveries in part of the sixteenth century were due to Portuguese or Spaniards. The Dieppese chart of Desliens, 1566, which places the flags of the various nations owning territory, has the flag of Portugal over Great Java, the Great South Land of the Ancients, now Australia. Spaniards and Portuguese, with their knowledge of New Guinea and the islands near it, before 1550, could hardly have failed to sail along the north-eastern shore of our Australia. After the murder of Magellan about 1520, his successor in command of the Portuguese expedition must, as some suppose, have seen the great island, going from Java. The South Land in many old charts was marked as Great Java, in contra-distinction to the ordinary Java. In a terrestrial globe of Nuremburg, 1492, the Tropic of Capricorn is drawn through this *Java Major*. Errors in maps were common enough through the ignorance of a right computation of longitude in those early times, as one may discern even in their charts of Europe itself, places being put many miles to the eastward or westward of their true position. The date of the map by Rotz or Rut is 1542. Dedicated to Henry VIII., it is now to be seen in the British Museum. A real work of art, it has a remarkable approximation to correctness as regards Australia, "the Londe of Java." Where other maps had, from Magellan's voyage, filled the intermediate sea from Africa to America with a vast continent, called *Magellanica*, entering the Antarctic circle, Rotz's map makes the western side of Australia end in lat. 35°, about the spot we find it end. As to the eastern side—the New South Wales portion—the accuracy is defective, the shore reaching to lat. 60° S. Still, as it has been remarked—"There are many points of correctness in contour. As regards the west coast, a single glance of the eye is sufficient to detect the general resemblance. On the eastern side, as might be expected (*from remoteness*) the discrepancies are much greater, but nothing can be more remarkable than the great number of islands and reefs laid down along the north-east coast as coincidences with the Barrier Reefs, and with the Cumberland and Northumberland Islands, and a host of others which skirt this part of the shore of Australia." The Dauphin Map of, perhaps, 1550, is even more remarkable. It is a sheet of vellum, eight feet long by five in breadth. For adornments and artistic beauty this *Mappemonde* is the finest extant. Countries bear human, animal, and floral illustrations. One part has an exposition of legs and arms for sale hung up in a tree, as may still be seen in the Fans territory. The Arms of France are admirably wrought on the parchment. Prepared for the Dauphin, son of Francis I., contemporary of Henry VIII., it was presented to the British Museum by Sir Joseph Banks, fellow-voyager with Captain Cook in 1770. On it we read—"Mappemonde peintre sur parchemén par ordre de Henry II. Roi de France." This is how Burney described the New South Wales portion of this ancient map:—"The coast here, however, has nearly the same direction with the corresponding part of New Holland, but it is continued far to the south; and by a very extraordinary coincidence beyond the latitude of thirty degrees the country is named *Coste des Herboiges*, answering in climate and in name to *Botany Bay.*" It should be remembered that Cook had at first called the spot *String-ray Bay*, but changed it to *Botany Bay*. It is very odd that there should be *Baie Perdue*, and that *Coste Perileuse* should be near Endeavour River. Burney added: "The many instances of similitude to the present charts, which are to be found in the general outline of this land, it is not easy to imagine were produced solely by chance." Though a French map, it is easy to detect many slightly altered Portuguese or Spanish names, showing it was taken from that source by a French cartographer. The *Java Major* is on the north and south sides of the Tropic of Capricorn. Homen's Portolana, a manuscript map of 1558, has Java Minor's north coast, and some neighbouring islands, but no Australia. The Dieppe map by Desliens, 1556, has the *Jave le Grande*, with the flag of Portugal on it. Thevet's *Cosmographie Universelle*, Paris, 1575, has

both Great and Little Java, with "Partie de la Terre Australe." The writer thought the South Land might be as large as Asia or Africa. A *Mappemonde* in the Bible of Arias Montanus, dated 1572, gives a curved line for North Australia. Shakespeare's Map, referred to in *Twelfth Night*, has many lines, dividing it into rhomboids. Maria says of Malvolio—"He does smile his face into more lines than are in the new map, with the augmentation of the Indies." That chart of 1601 has a portion of Australia, particularly the Gulf of Carpentaria, though several years before the Dutch claimed to have discovered it. In Fredia's Map, 1613, the word *Beach* occurs on the site of Carpentaria. On the Louvain Map, 1598, are these words:—"*Terra Australis*, a land south of all other lands, and scarcely known, lies to the east of New Guinea, but its shores are scarcely known." This refers to the expedition of Fernandez de Quiros, undertaken in 1605. Quiros was a Portuguese navigator, and he sighted what he believed to be some part of what is now called Australia, naming it Terra Australia del Esperitu Sancto, but which is now considered to have been one of the islands of the New Hebrides; and Luis Vaez de Torres, in the same year, sailed through the strait separating New Guinea from the continent, and skirted the mainland at its northernmost extremity: both mariners having originally belonged to the same expedition. M. Bocage, in a Paper read before the Institute, Paris, in 1807, has these remarks of a map:—"This manuscript is a hydrographic atlas, drawn at Dieppe, in 1547, by a person of the name of Nicholas Vallard, of Dieppe, representing the *eastern* and western coasts of the continent of New Holland. This atlas is not the only one upon which these coasts are laid down. The English pretend that none of these charts was discovered till after the death of the celebrated Captain Cook, and that they had no knowledge of them when this navigator set sail. But their prior existence in well-known libraries in England may cause this assertion to be doubted." He mentioned the beautiful atlas of Prince Talleyrand's, since lost, which represented both the eastern and western coasts. Another, by Testu, a pilot of Provence, was dedicated to Admiral Coligny, and bears his arms. As Rotz had his map in 1542, M. Bocage dated the discovery of New South Wales *before* 1542, or over 230 years before Cook's visit. The French philosopher added—"The names of all the atlases which we have just quoted are, for the most part, in Portuguese, some of them in French; that of 1542 alone, which is in England, has some of the names in bad English. We must, therefore, come to the conclusion that those atlases have been copied from Portuguese maps, and consequently that the discovery of the continent of New Holland belonged to the Portuguese." In the *Cartas de Indias*, revealed by the Madrid Geographical Society in 1877, we see the *Mapa de la Australia*. This was prepared by Ansaldo, Jesuit missionary of Japan and Manilla, in 1669. Its lucidity, in broad lines, cannot be praised. Part is the ideal Magellanica; but it is "more like Australia than any map issued before Cook's time." If laid upon a map of Australia, of its own size, it would "assimilate with the configuration of the true coast." Dr. Lardner concluded that "the Spaniards and Portuguese visited the northern and even eastern coasts of New Holland nearly a century before that country was discovered by the Dutch." But the Dutch should have the credit of making known what had been long kept secret by others, probably for commercial purposes. About 1606 the Dutch in their ship the *Duyphen* (Dove) found their way from Java into the Gulf of Carpentaria; some of the crew landed, and were killed by the natives. This vessel or yacht left Bantam, in Java, November 18, 1605, to explore New Guinea, and in March of the following year sighted Cape York. In 1616 Dirk Hartog, in the *Endraght* or *Concord*, coasted along the north-west portion of the continent, naming it the Land of Concord, giving his own name to the large island on the western side of Shark's Bay. In 1618 Zaachen further explored this coast. In 1619 Captain Jan Edels explored the western side of the island-continent, and named a portion of what is now Western Australia. The south-western extremity of Australia was discovered in 1622 by the captain of a Dutch ship, and by him named Cape Leeuwin (Lioness), after his vessel. In 1627 the first discovery of the southern coast of Australia was made by the commander of the *Gulde Zeepaard* (Golden Seahorse), who called it Nuyts Land. In 1628 De Witt's land was probably named by De Witt himself in sailing along this coast in the *Karien* on his return from India. In November, 1642, Tasmania was discovered and named by Abel Jansen Tasman, who shortly afterwards also discovered and named the islands of New Zealand. In the year 1664 the continent was named New Holland by the Dutch Government. In 1695 the Swan River was partly ascended, and the neighbourhood explored by William Vlaming, of the *Gielvink*, during the search for a missing Dutch ship, the *Ridderschap*, thought to have been wrecked on the Abrolhos. In January, 1688, the *Cygnet*, with Dampier and others on board, made the land of New Holland, and sailed along the coast as far as Cape Leveque; afterwards in 1699 Captain Dampier was appointed to H.M.S. *Roebuck*, and visited and explored the north-west coast of Western Australia, being the first Englishman who trod Australian soil. In 1705 an expedition, composed of three Dutch vessels, the *Vossenback*, *Wayer* and *Nova Hollandia*, under the command of Martin van Delft, sailed from Batavia, and explored and named the north-west coast. In 1710 New Zealand was visited by Capt. Cook, and in April of the same year a point of land at the southern extremity of the continent was sighted and named by him; soon after Cape Howe, Port Jackson, and other prominent features were discovered and named, and formal possession taken by the hoisting of the British flag. In 1788 the first settlement in Australia was formed at Botany Bay, in New South Wales. In 1791 Captain Vancouver explored and made some importan discoveries on the south coast of Australia, in the vicinity of King George's Sound. In 1801 a French expedition, comprising the *Geographe*, *Naturaliste*, and *Casuarina*, under Baudin and Freycinet, explored and named a considerable portion of what is now the south-western coast of West Australia. In 1803 Tasmania or Van Diemen's Land was first settled as a penal colony, Lieutenant Bowen being sent from Sydney with a few soldiers and convicts, encamping near the spot upon which Hobart now stands. In 1825 Queensland, under the name of Moreton Bay, was settled as a portion of New South Wales, being raised into a separate colony in December, 1859. The Swan River Settlement, the first settlement of Western Australia, was formed in 1829; in 1851 it became a penal settlement and so continued until 1868, when transportation ceased. Victoria, then known as Port Philip, and forming part of New South Wales, was first colonized in 1834, from Tasmania (although a convict settlement had been attempted and abandoned so early as 1803), and on July 1st, 1851, the colony was separated from its parent New South Wales. South Australia was colonized by emigrants from Great Britain in 1836, and New Zealand in 1838, although the first settlement of Europeans was made there in 1814. In 1840 New Zealand was separated from New South Wales, and made into a distinct colony. The Fiji Islands, which have been settled on for some years past by English, Australians, and Americans, for the cultivation of cotton, were ceded to Great Britain in 1874, Sir Hercules Robinson, then Governor of New South Wales, taking formal possession from the late native King Thakombau. On the 17th August, 1887, the formal annexation of the Kermadec Islands was accomplished. On April 22, 1889, the Suwarrow Group (in S. lat. 13° 13′, W. long. 19° 39′) were taken possession of, and the Queen's sovereignty proclaimed. The Gilbert Islands and the Marshall Islands (the latter fifteen in number and lying between lat. 1° and 2° 30′ N., and long. 172° and 174° 30′ E., and having a population which has been estimated at 60,000), were added by H.M.S. *Royalist* to the British possessions during 1892, and in 1893 a British protectorate was proclaimed over the Solomon Islands, an archipelago in the Western pacific, lying about 500 miles to the east of New Guinea, and stretching south-eastwards in two parallel chains for about 600 miles towards the Santa Cruz group. The north-eastern chain embraces Bougainville, Choiseul, Ysabel, and Malaita; the south-western, Villa Lavella, Kulambangra, New Georgia, Guadalcanar, and San Christoval, besides a number of smaller islands. They have a total area of about 15,000 square miles, and were originally discovered by Mendaña in 1567.

Exploration.—Since the first occupation of Australia a series of explorations have been and are still going on, for the purpose of ascertaining the capabilities and character of the country. The more important of these, as regards the results achieved, are here mentioned in their chronological order.

1788.—Early in March, Governor Phillip, accompanied by some officers, went by water to survey the harbour of Broken Bay.

1789.—On July 6, Governor Phillip set off with a party on a second excursion to Broken Bay, in the hope of being able from the head of that harbour to reach the mountains inland; he returned on the evening of the 16th, having discovered a capacious fresh water river, emptying itself into Broken Bay. This river he named the "Hawkesbury," in honour of the noble lord of that name.

1802.—Charles Grimes, Surveyor-General of New South Wales, explored the greater portion of the coast line of Port Philip, camping, on one occasion, on the site of the city of Melbourne.

1813.—In June, William Charles Wentworth, Lieut. W. Lawson, and Gregory Blaxland succeeded in crossing the wild and rugged ranges known as the Blue Mountains, through a pass by way of the valley of the Grose, discovering the fine Western Plains on which the city of Bathurst now stands, and opening a road into the vast Western interior.

1817.—John Oxley, the Surveyor-General of New South Wales, explored the country towards the interior, with the object of finding the source of the river Lachlan. He followed the course of the river for many miles, but was compelled to diverge by swamps of the most dismal character; heading these, he was again confronted and baffled by other swamps, ultimately abandoning his project in the belief that these swamps merged into an inland sea; (subsequently disproved by Captain Sturt, who traversed them in a very dry season).

1818.—Oxley made a second journey, accompanied by Mr. Evans, Dr. Harris, Mr. Nazer, botanist, and twelve men. In the course of this journey he partially explored the Macquarie, and the following rivers were discovered and named: Castlereagh, Peel, Cockburn, Apsley, Hastings, Forbes, Ellenborough, and King.

1823.—In October, Oxley, accompanied by Lieut. Stirling and John Uniacke, set out on a voyage of discovery for a penal settlement north of Sydney, resulting in the finding of the Brisbane River, on the banks of which the city of Brisbane is now situated.

1824.—Hamilton Hume and W. H. Hovell started from Lake George and crossed the river now known as the Murray (then called the Hume); following a south-westerly course, they passed the Hovell (now called the Goulburn), ultimately striking the sea at the site of Geelong, thus completely crossing what is now the Colony of Victoria.

1827.—Allan Cunningham, the well-known botanist, crossed the Liverpool Range, through the gap called Pandora's Pass, discovering several rivers and the splendid pastoral and agricultural country now known as the Darling Downs.

1828.—Captain Sturt, of the 39th Regiment, accompanied by Mr. Hume, Dr. Macleod, and a party of ten, traced the Macquarie River down to its junction with the Darling, following that river down to Fort Bourke. The following year he traced the Murrumbidgee to its *débouchure* into a magnificent stream 350 feet wide, and from 15 to 20 feet deep, which proved to be the Murray, "the Antipodean Nile, the prince of Australian rivers," which is found to have a navigable course of nearly 2,000 miles. This river he followed down to Lake Alexandrina in South Australia, but not being able to find the true channel into the sea, was obliged to return, after enduring great hardships.

1831.—Captain Barker, also of the 39th Regiment, explored the south-east portion of South Australia, with a view of ascertaining if there were any communication between Lake Alexandrina and the sea; but he was murdered by the natives, almost at the commencement of his labours, somewhere near the Murray Mouth.—In the same year Sir Thomas Mitchell started on a series of three expeditions which lasted until 1836, and which opened up much new country in the North and West of New South Wales and a great portion of Victoria. Of the latter, Sir Thomas spoke in fervent language, likening it to the Garden of Eden, and bestowing on it the name of "Australia Felix." Among other discoveries were the flowing of the Darling into the Murray, the rivers Glenelg, Yarrayne, Hopkins, Avoca, and Wimmera, and the Grampian and Pyrenees Mountains.—Lieut. J. S. Rowe, Surveyor-General of West Australia, and Governor Stirling explored the country eastward of Perth, W.A.

1835.—John Batman arrived in Port Phillip Bay from Georgetown, Tasmania, entering the Heads on or about May 29. He traversed the country around Geelong and Melbourne, ultimately settling on the site of Melbourne. In the same year John Pascoe Fawkner arrived from Tasmania and settled at Melbourne.

1837-9.—Sir George Grey conducted two expeditions, whose purpose was the exploration of North-Western Australia. The first started from Prince Regent's River on the north coast, and the second from Shark's Bay on the west coast. Both enterprises were ill-starred, and beyond the discovery of the Glenelg, Gascoyne and other streams, were almost without result.

1839.—Angus McMillan explored and traversed the country now known as Gippsland, to which he gave the name of Caledonia Australis.

1840.—Count Strzlecki travelled southward from Sydney to Western Port, discovering Mount Kosciusko and several rivers.—Dr. Diffenbach and Capt. Simmonds explored the North Island of New Zealand from Manukau to Lake Taupo.

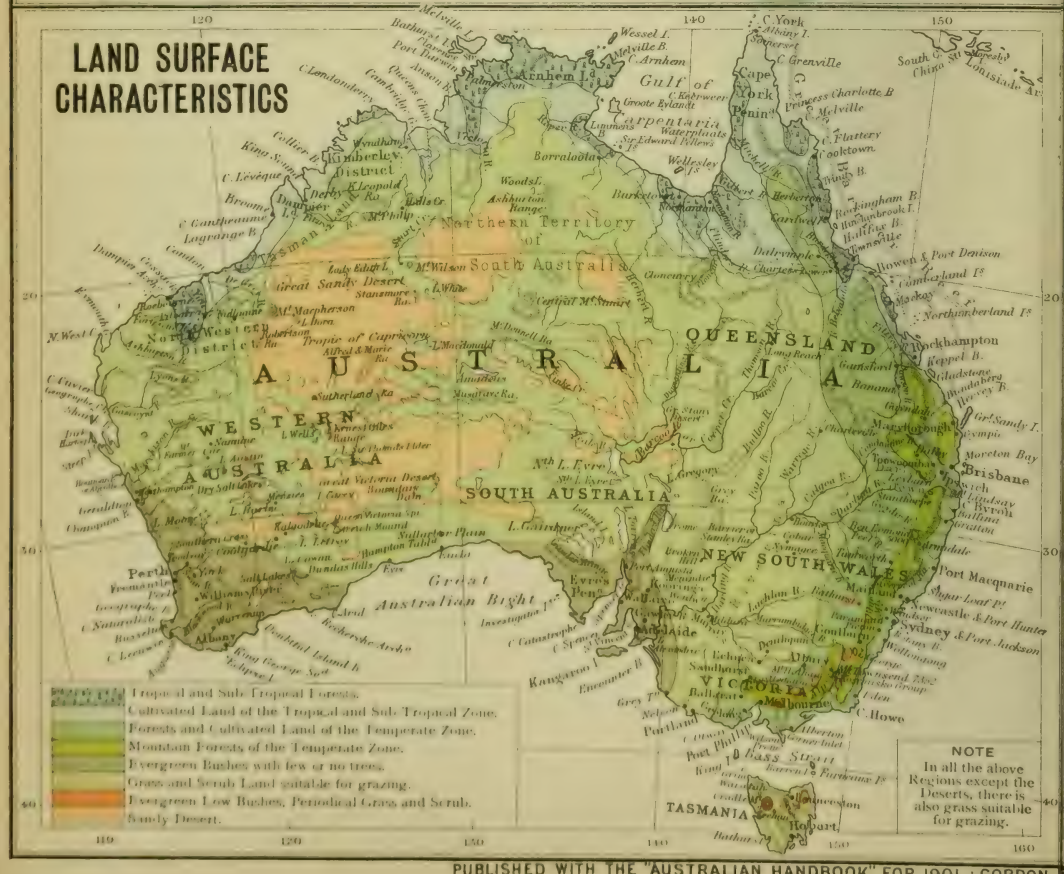
1840.—Edward John Eyre, with a party of five and two native boys, started from Adelaide on June 18, with the original intention of reaching the centre of the continent. He travelled to the head of Spencer Gulf, pursuing from there a northerly and again a north-easterly course to Mount Hopeless, where, foiled by want of water and the desolate solitude he met, he turned his back on the dreary region, abandoning his original project and travelling south-west to Eyria Peninsula, thence making a fresh departure along the shores of the Great Australian Bight. He reached Albany, King George's Sound, on July 8, 1841, returning by sea.

1842.—Captain Stokes examined 200 miles of the shores of the Gulf of Carpentaria, but almost missed the best inlet, the Norman, which was subsequently thoroughly surveyed by G. Phillips and W. Landsborough in 1866-67. Captain Stokes' surveys were chiefly of the shores of Sweer's Island, the Albert and Flinders Rivers. He gave a charming account of the country on the banks of the Albert, which he named the Plains of Promise.

1844-5.—Dr Ludwig Leichhardt, on August 13th, with J. S. Calvert, J. Gilbert, J. Roper, J. Murphy, W. Phillips, and two aboriginals—Brown and Charley (total eight)—set out from Sydney to go to Port Essington (then an Imperial Government station on trial for a new colony), which he reached on December 17th, 1845. The journey occupied twice the time estimated, and the party was given up for lost. Having exhausted all his supplies, he and his companions barely attained their destination, hungry and half-naked. When crossing York Peninsula, about lat. 16° 8. the blacks attacked the unwary party in camp, killing Gilbert, and badly wounding Roper and Calvert. Immense tracts of fine pastoral country, and many large rivers, such as the Dawson, Mackenzie, Fitzroy, Burdekin, Mitchell, Lynd, and Gilbert were discovered. The party returned by sea to Sydney, March 29th, 1846, when it received an enthusiastic ovation, and £1,000 from the Government, and £1,500 from subscriptions.—Sir Thomas Mitchell, with a well-organised party, fitted out at the expense of the Imperial Government, set out for the purpose of finding a suitable port for the shipment of horses to India. The expedition left Parramatta on November 17, returning to Sydney in January, 1847. Several rivers were discovered and named, and vast tracts of pastoral country, in what is now Central Queensland, were made known. Sir T. Mitchell hoped that the rivers he discovered—the Nogoa, the Belyando, and the Victoria, now called the Barcoo—would have run into the Gulf, and that he could have traced them thither.

1846-7.—Dr. Leichhardt started from Sydney on September 30, on a second expedition, proposing to reach Swan River *via* North Australia in two and a-half years. His party comprised D. Bunce, botanist, J. F. Marm, draughtsman, H. Hely, J. Turnbull, J. Perry, H. Haecking, and Wammai and Brown, aboriginals, nine in all. They went by steamer to the Hunter; *via* Stroud and New England to Darling Downs, November 29th, Condamine, December 7th, Charley's Creek, December 12th. At the Downs, they had 15 horses, 13 mules, 40 oxen, 270 goats, 108 sheep. At Charley's Creek troubles began. On December 13th the horses and cattle stampeded, and were not all recovered for a month. Messengers informed them of Sir T. Mitchell's return from Victoria River (Barcoo); Dr. Leichhardt sent Mr. Hely back for particulars. He rejoined without any on January 13th, when a fresh start was made. Instead of proceeding N.W., Leichhardt turned N.E. upon his former track down the Dawson, where the party was constantly drenched with heavy rain. The rivers flooded, the mules bogged, the men all got fever and ague, and the livestock strayed. They struggled on, sometimes stopping several weeks. At Park Range, out of four oxen they killed one, all the other stock were lost. They fortunately got horses to ride on, and early in June they retraced their steps to the Condamine, which they reached, thoroughly exhausted and ill, July 21st, and Russell Station on the 28th.—Dr. Leichhardt then started on August 9th with Mr. F. N. Isaacs, Bunce, Perry, and Wammai, to reconnoitre Sir T. Mitchell's return route from the Victoria River and Fitzroy Downs, which occupied six weeks. Early in October he proceeded to Sydney to organise a fresh expedition. On December 4th, he started again with Classen and Wammai and Brown, aboriginals, by the same route by Stroud and New England at Christmas, and Canning Downs on February 24th. A. Hentig joined at the Bundara River, and D. Stewart and Kelly were hired on the Downs, total, seven; they had 50 oxen, 20 mules, and 6 horses. Left Canning Downs, February 28th, the Condamine, March 23rd, and wrote last from McPherson's, Fitzroy Downs, April 4th, 1848, after which Leichhardt started to go N.W. to the north bend of Victoria River, and to keep that course till he reached a northern watershed. A. C. Gregory reported in 1861 that he found a camp of Leichhardt's near the junction of the Alice and Victoria, and thought Leichhardt continued his N.W. course thence; but no vestige of the party or equipage, or credible information has ever been received.—In 1846, Thomas Brunner traversed the Middle Island of New Zealand.

1848.—Kennedy, with a party consisting of W. Carron, botanist; T. Wall, naturalist; nine men, and a native named Jacky Jacky, started from Rockingham Bay, North Queensland, on May 30, for the purpose of exploring Cape York Peninsula. Taking a north-easterly course till he reached the region adjacent to what is now known as the Palmer, he went due north thence to Weymouth Bay. From here he made his way north to within a few miles of the apex of the peninsula, where he was speared by the natives, his faithful aboriginal servant Jacky tending him to the last and saving his journals.—J. S. Roe, the Surveyor-General of West Australia, left York, a township some sixty miles east of Perth, and proceeded in a north-easterly direction towards the Interior. After traversing a "vast sea" of dark scrub and thicket, intersected by salt lakes and samphire marshes, he reached the Russell Ranges in lat. 33° 27′, which proving an impenetrable barrier, he returned by way of Esperance Bay.



1853-62.—The late Baron von Mueller, M.D., K.C.M.G., was engaged from 1847 in various explorations, particularly for botanical purposes, but also of geographical interest, first in South Australia, subsequently in Victoria, extending to triangulations in, at that time, the almost pathless Australian Alps, resulting in the discovery and fixing of geographic positions of several culminating points of the highest mountains of Australia, including Mount Hotham, the hygrometric measurements being also carried on. He was, with the two Gregorys, discoverer of the Kimberley district and Sturt's Creek, North-West Australia, sharing in Gregory's expedition thence to Moreton Bay.

1856.—A. C. Gregory started from the Cambridge Gulf on the north-west coast, to attempt to penetrate to the centre. He passed through a belt of fine well-watered country, and then following the Sturt Creek, entered on a region of apparently boundless wastes of sand ridges and hillocks covered with the bayonet-like blades of the spinifex grass, which compelled his retreat. His most south-westerly point was reached on March 7, 1856, about forty miles south of the 20th parallel. He returned to Moreton Bay overland. In the course of this journey (some 2,000 miles), which was the fastest of the kind ever made in Australia, he traced the Nicholson River, and fixed the position of the Albert River, which Leichhardt had fancied was thirty miles to the eastward. Leichhardt's supposed Albert River he named the Leichhardt.—J. Turnbull Thomson, and party, traversed the southern portion of the province of Otago, New Zealand.

1858.—A. C. Gregory headed an expedition whose principal object was to search after Leichhardt. It left Sydney January 12, reaching the Barcoo in the following April, and after seven months' exploration arrived in Adelaide on July 31. The tree marked L, previously mentioned, was found, but no other traces of the missing explorer.

1859.—In May, John McDouall Stuart, the most celebrated of Australian explorers, started on the first of his expeditions into the Northern interior and explored the country in

GOTCH, MELBOURNE, SYDNEY, BRISBANE PERTH (W.A.) AND LONDON.

John Bartholomew & Co. Edin.r

the neighbourhood of Lakes Eyre, Gairdner (or Gardner) and Torrens.—On November 4th he again started from Chamber's Creek and returned on January 21st, 1860, having found, as on his previous journey, several springs.—G. E. Dalrymple explored the country watered by the Burdekin, Sutter, and Belyando rivers.

1860.—On March 2nd, Mr. Stuart again essayed to penetrate into the interior, reaching on April 6th an immense monolith of white sandstone, about 150 feet high, which he named Chamber's Pillar; a few days after, coming to the mountain nearly in the centre of the continent, which he named Central Mount Stuart, and upon which he planted the British flag. After several attempts to advance he was ultimately compelled, after enduring great hardships, to fall back upon his base and to retrace his steps to Adelaide. —On August 20th an expedition, under the leadership of Robert O'Hara Burke as chief, and W. J. Wills as third, afterwards second in command, left Melbourne for the purpose of crossing the continent, and a detachment of the party, consisting of the leader, Wills, Gray, and King, on February 11th, 1861, successfully accomplished the feat of reaching the tidal waters of the Gulf of Carpentaria. Their return journey, however, is a most harrowing narrative of misadventure and suffering. Reaching Cooper's Creek, the place appointed as a depôt, they found that Brahe, with the relief party, had left seven hours previously and had taken the relief provisions back with them; and of the well-appointed expedition, only one man, King, who was found barely alive in a wurley at a native camp, survived; Burke, Wills, and Gray having, at the end of June, perished miserably of starvation at Cooper's Creek. The relief party under Alfred Howitt discovered King on September 16, and two days afterwards the remains of Burke and Wills were buried; subsequently Mr. Howitt was again sent to Cooper's Creek, and the remains were exhumed and brought to Melbourne, where they were honoured with a public funeral. In the course of his two journeys Mr. Howitt made several discoveries.—In the fear that some evil had befallen the Burke and Wills' party, expeditions were sent out under the command of W. Landsborough, Walker, and McKinlay respectively. Each of these parties traversed large tracts of untrodden country, both Landsborough and McKinlay crossing the continent in different directions, though unfortunately they were too late to accomplish their mission of relief. Landsborough started from the Albert River and made his way to the Barcoo, thence travelling to Melbourne. McKinlay made Adelaide his starting point, and after reaching Cooper's Creek went northwards and successfully crossed to the Gulf of Carpentaria, returning to Port Denison (Bowen). Walker started from Rockhampton, reached the Gulf and returned safely.—Dr. Julius Haast and party explored a considerable portion of Canterbury and central portions of the Middle Island of New Zealand.—The late Baron Von Mueller discovered the sources of the Yarra, Latrobe, and Goulburn Rivers, through the ascent of Mount Baw Baw.

1862.—On January 8th Mr. Stuart once more started forth to accomplish his great task of crossing the Continent, reaching the River Strangways on June 14th, and the Roper River on the 26th, and on Thursday, July 24th, came out on the northern shore of Australia at Van Diemen's Gulf. The expedition returned safely to Chamber's Creek on December 5th. The route Stuart followed is the one since adopted for the Overland Telegraph, lying considerably to the west of Sturt's Stony Desert.—About the same time Frank Gregory started from Nickol Bay, on the north-west coast, but was defeated by the sterile waterless wastes that had necessitated his brother's return.

1864.—Mr. Hunt, starting from York, West Australia, succeeded in penetrating eastward about 400 miles between the parallels of 31° and 32°; he describes the country as "being mainly covered with dry salt lakes, scrubby plains, forests, and samphire flats, there being scarcely a sign of water:" a report that later on was confirmed by Mr. John Forrest, who took a more northerly course.—Messrs. Jardine traversed and explored the western side of Cape York Peninsula, discovering and naming numerous creeks and rivers flowing into the Gulf of Carpentaria, among them the Archer, Coen, Batavia, and Jardine Rivers.

1870.—John Forrest, under the auspices of the West Australian Government, headed an expedition that left Perth to make its way to South Australia, following the coast direction, but keeping some distance inland. The journey was accomplished in a short time with comparative ease, better country being found back from the sea coast than that described by Eyre or Warburton.

1872.—Ernest Giles set out on his first expedition and starting from Chamber's Pillar, in about 134° E. long., 25° S. lat., he proceeded in a north-westerly direction till his further progress was stayed by Lake Amadeus, a large dry salt lake. He found little or no good country to reward him for his labour.

1873.—Major Warburton, with a troupe of camels, succeeded in crossing the half of the Continent lying westward of the Trans-Australian Telegraph. He began his journey at Alice Springs, a station on the line, on April 15, and succeeded in taking his party and a remnant of the camels to the settled districts, reaching Roeburne at the end of January.—In this year, another journey was undertaken by Mr. Giles, starting from the Alberga River and following the 27th parallel to the 126° of E. long., beyond which, though frequent attempts were made, further progress was barred.—W. C. Gosse, in the service of the South Australian Government essayed about the same time to reach the western settlements from the telegraph lines. He attained to the 127th degree of E. long. in about 26° 32′ S. lat., and then had to return.

1874.—John Forrest attempted the passage of the Continent from west to east. His party left Perth on March 18th, and travelling about 400 miles south of Warburton's track, reached the telegraph line in about 27° S. lat. on September 27th, finding lightly-wooded spinifex desert, sandy rises, and little water.—About this time Mr. Giles left Fowler's Bay with a well-equipped party and numerous camels, and after many vicissitudes and the usual hardships from the want of water, Perth was reached on November 13.—Later on Mr. Lewis succeeded in penetrating from a point on the telegraph line lying east of Lake Eyre, round the north end of that lake, and across the country thence to Eyre Creek, in Queensland, tracking down the Barcoo River or Cooper's Creek, to its fall into Lake Eyre (as previously suggested by Warburton), and opening up the territory lying between 25° 35′ and 28° 35′ S. lat., and 125° 50′ and 139° 50′ E. long.

1875-76.—In this year an expedition comprising W. O. Hodgkinson (formerly of Burke and Wills', and McKinlay's expeditions) as leader, Mr. A. E. Keyser as surveyor, two white men, and a black boy, was sent out by the Queensland Government to explore the Diamentina country. Starting from Brisbane by water, stock and stores were disembarked at Bowen, whence the party proceeded overland to Georgetown, 1,100 miles N.W. of Brisbane, and the real point of departure. From Georgetown, in December, 1875, the expedition crossed, *via* Taldora, to the Cloncurry, and after examining the heads of that river and the Leichhardt, in April, 1876, left the Cloncurry, striking S.E. to the Diamentina, and following that river to the southern boundary of the Colony, connecting it with the survey of Mr. Lewis, whose map exhibited the further course of the stream to its mouth at Lake Eyre. After a short spell in South Australia, Mr. Hodgkinson retraced his steps, connecting on the western border of the Colony the point where Captain Sturt was foiled for want of water in 1845, with the extreme point of Mr. Landsborough's explorations on the Herbert in 1862. The party were out sixteen months.

1876.—After reaching Perth, Mr. Giles again traversed the Continent by a different route to his former one. He left the Pia Springs (in 27° 7′ S. lat., 116° 45′ E. long.) on April 10th, thence up to the 23rd parallel he made a general north-east course crossing the head waters of the Murchison, consisting of several parallel channels (then perfectly dry), past the remarkable magnetic mass of iron called "Mount Gould," tracing the Ashburton River to its source, and then striking E. to S.E., across spinifex sandy desert (lying in about 120° E. long., 24° 30′ S. lat.), came on his former camp at the Rawlinson range. He met with but few watercourses, and the country to the eastward was desolated with drought. He reached Mount O'Halloran on the telegraph line on August 19th, and Peake Station on August 23rd.

1878-79.—The *Queenslander* Trans-Continental Expedition left Blackall on July 19th, under the leadership of Mr. Favenc, with Mr. Briggs as second, for the purpose of making a flying survey for a trans-continental railway from Blackall to Port Darwin. The expedition made the South Australian Telegraph line on January 12, 1879, reaching Southport and Port Darwin on the following day. The journey altogether was a successful one, and the feasibility of the construction of a line—so far as engineering difficulties went—was demonstrated.—Mr. John Forrest, during 1879, was engaged in traversing some portion of unknown land in the north. He passed through well-watered magnificent sheep country between the De Grey River and the sea-coast; this he surveyed, from the Ashburton to the De Grey River, and the sea-coast between these rivers.—On January 18, 1879, Alexander Forrest, with a party of five and two natives, with twenty-six horses and six months' provisions, started from Perth to explore the north-west portion of Australia, Port Darwin being their ultimate destination, which was reached on October 6. The chief results of this expedition were the discovery of the course and source of the Fitzroy and other large streams, together with an estimated area of 20,000,000 acres of good well-watered country—now called the Kimberley district—suitable for pastoral purposes, besides a large area suitable for the culture of sugar, coffee, and rice. During 1886 payable gold was found in the district, causing a "rush" of some magnitude, but the results were not equal to expectation.—Mr. Tietkins, formerly associated with Mr. Giles in exploring work, about the middle of 1879 started from Fowler's Bay to examine the country between that part of the coast and the Musgrave Ranges.

1880.—Some portions of the western coast of the Cape York Peninsula were explored in June by Capt. Pennefather, of the *Pearl*, particularly as regards the Coen, Archer, and Batavia Rivers, which debouch into the Gulf of Carpentaria.—In the same year Mr. Robert L. Jack explored some portion of the Cape York Peninsula, principally with a view to ascertaining if it were auriferous. Mr. Jack traversed the Peninsula to Somerset; in the course of his journey the party underwent great hardships, principally from

the heavy rains; the natives were hostile, and Mr. Jack was himself speared. No country likely to prove of a payable auriferous character was met with.

1881.—In connection with a proposed Trans-Continental Railway from Roma to Point Parker, an expedition was organised for the purpose of surveying the route. The party was under the conduct of Mr. Frank Hann, and consisted of Mr. Robert Watson, at that time Engineer-in-Chief of Victorian Railways (appointed to make the survey and report officially to the Government), Messrs. Baynes & Wyatt, three men, and two black boys. The party left Roma on January 14, reaching Blackall on February 16, where it was joined by Mr. Hann, and, after a not very eventful journey, arrived at Point Parker, on the Gulf of Carpentaria, on May 4. As regarded its facilities for railway purposes, Mr. Watson reported that he considered the country all the way remarkably suitable for the cheap construction of railways.—In July, 1881, another expedition left Brisbane. It was under the leadership of Major-General Fielding, the representative of the English capitalists then negotiating with the Queensland Government for the construction of the Trans-Continental Railway, and the object of it was to make a thorough examination of the route of the proposed railway. The party was efficiently equipped, and made the overland journey to Point Parker with comparative ease.

1882.—Mr. E. Giles, at the latter end of 1882, explored the country west of the Peake and the neighbourhood.—Mr. McMinn explored the country surrounding the Mary, Wildman, and Adelaide Rivers in the Northern Territory.

1883.—In the early part of the year Messrs. E. Favenc and Crawford started to explore the country about the McArthur River, across from the Queensland boundary, *via* the Nicholson River, to Powell's Creek. The trip was more successful than had been anticipated, and better country than was expected was found, the McArthur River draining a large extent of good pastoral land, available for both sheep and cattle.—About the middle of the year Mr. David Lindsay started from Palmerston on an exploring trip to Arnheim land, on behalf of the South Australian Government. He started from the Katherine in July, and returned thither in November, having travelled about 1,916 miles. Four considerable streams were met with—the Wilton, the Parsons, or Rose River, the Walker, and the Blyth.—A small party, under the leadership of Mr. W. J. O'Donnell, started from Delamere station, West Australia, to explore the country about the Ord River, and arrived safely at the Katherine station on the overland telegraph line.—In May Mr. W. W. Mills, with Mr. Charles Short as second in command, six Afghans, and thirty camels, started from the Peake station, Mr. Mills having undertaken the charge of the transport service in connection with the construction of the Overland Telegraph line in Western Australia from Northampton to Roebourne. After a journey of 1,600 miles, during which they suffered greatly through want of water—in several places being disappointed at not finding any, where permanent springs were supposed to exist—the party arrived at Northampton.—About the same time, Mr. Charles Winnicke, with a number of camels, made a successful journey through a considerable portion of the unknown interior. Mr. Winnicke made his start from Cowarie Station, on the Warburton River, in latitude 28°, and traversed the country to the north as far as latitude 22°, effecting a connection with his previous explorations near Goyder's Pillars, a remarkable natural feature in the Tarlton Range, discovered by Mr. Winnicke during his Herbert River explorations. Two large rivers and an extensive range were discovered near the Queensland boundary, and altogether Mr. Winnicke succeeded in mapping about 40,000 square miles of unknown country.

1884.—Mr. Stockdale explored the northern portion of West Australia known as the Kimberley district, north of the Leopold Ranges. The principal mountain ranges which lie near Cambridge Gulf he called the Martin Ranges, after a former Chief Justice of New South Wales. He spoke in glowing terms of the capabilities of Cambridge Gulf, and considered the harbour to be almost perfect, because of its being so well sheltered. He thought the country had a splendid future before it, and would eventually become a great pastoral district, on account of the prevalence of grass and water. The natives were described as being tolerably peaceable, well made, and somewhat different in colour to those of the other colonies. Later on Mr. Stockdale reported the finding of six magnificent rivers between Cambridge Gulf and the Prince Leopold Range.

1885.—The Goyder and other rivers were examined by Captain Carrington. He found the Goyder River to be navigable for about 13 miles from the entrance, and about 8 miles beyond for boats. The country on the banks is chiefly dense forest and jungle, the alluvial flats being apparently flooded in the wet season. He found that no such river as the Hutchinson existed; this being another mouth of the Goyder, and the river marked in the chart as running parallel with the Goyder also did not exist. The Blyth River, 10 miles from the mouth, divides into two branches, and the western branch is probably the Cadell, described by Mr. Lindsay.

1885-86.—Mr. Lindsay set out with a well-equipped party. His mission was to trace the final course of the Finke River, and to ascertain whether in times of high floods its overflow reached Lake Eyre, or becomes lost in the sandy waste which stretches from lat. 22° to 28° S. He was also to determine the western extension of this sandy waste; and further to endeavour to find traces of Leichhardt. He left Adelaide in November, 1885, journeying by rail to Hergott Springs, whence, with five companions and ten camels, he started for the Gulf. In April, 1886, he reported that the River Finke loses itself in the sand-hills E.N.E. of Dalhousie, but at times of very high flood the surplus waters reach Spring Creek Flat, and thence, reaching Macumba, they flood out into large box flats. He found many water-holes, a well-grassed country, tin and silver. Later on, in July, he telegraphed from Powell's Creek that his party had been travelling through splendidly-grassed downs, mixed with desert country covered with spinifex, dense scrub, and large anthills; but nothing was found that would lift the veil shrouding the fate of the hapless explorer, Leichhardt. He arrived at Palmerston on Nov. 2, having travelled from the McArthur River by sailing vessel. The natives were very numerous, and often were of great service to the party in showing where water was obtainable. In the course of this journey, between 500 and 600 miles of country were surveyed, principally on the border line of South Australia and Queensland, and a large collection of botanical specimens, some entirely new to science, was gathered.

1886.—The Rev. E. Tenison-Woods, in company with a small party and twelve horses, explored some portions of the Northern Territory. The course was from Mount Wells to Mount Douglas, and thence south-eastward across the ranges to the Eveleen Mine. Hence the River Mary was traced to its sources; and, after crossing a small patch of table-land, the upper waters of the Katherine were reached, which were followed down to the Telegraph Station, proceeding thence along the line to Pine Creek, and from there to Palmerston. The geology and mineralogy of the places were examined, the country being found exceptionally rich in minerals.

1887.—In May Mr. Hugh Milman inspected the Batavia and Ducie Rivers, on the extreme north-western coast of Queensland. On entering what had been called the mouth of the Batavia, he found "a magnificent harbour, into which the Batavia and Ducie Rivers empty themselves." This harbour, which he named Port Musgrave, was, he stated, without doubt—excepting, perhaps, Port Curtis—the finest natural harbour on the Queensland coast. The entrance to it was safe in all weathers, and it would form a most useful harbour of refuge, when it became more known, for vessels that might be caught with heavy weather during the N.W. monsoon in the Gulf of Carpentaria. The bay, or port, is about 15 miles in circumference. The Batavia was described as a fine wide stream, varying in width for the first 30 miles from 1 mile to 300 yards, the depth varying from 2 to 11 fathoms for a distance of 25 miles. The Ducie was a fine stream at its mouth, apparently nearly as large as the Batavia.—Mr. David Lindsay made a second transcontinental journey. He started from Palmerston in the middle of September, and reached Adelaide on March 28th, 1888. He had four horses, and his only companion was a black fellow. Speaking broadly, he said that the land along the telegraph line was all fit for occupation by pastoralists.—In connection with a proposed railway from Port Augusta to Eucla, Mr. J. R Browne with a party of five men and 14 horses left Northam, the terminus of the Spencer Brook Railway, on August 6th, and came across country, a large portion of which was unexplored, and between the tracks of Giles and Forrest, to Eucla, where he arrived after suffering the most terrible privations, the whole party narrowly escaping in finding a grave in an unknown part of Australia. Mr. Browne spoke very highly of the greater portion of the country through which he passed. He considered that with wells and dams it would become very valuable. While on the journey the party saw very good indications of gold.

1888.—In February Mr. Ernest Favenc, with Mr. W. R. Cuthbertson, who led the New Guinea expedition, as second, left Melbourne for Adelaide to start an expedition for the exploration of Central Australia under the auspices of the Royal Geographical Society. It was intended to form the party and obtain supplies at Geraldton (West Australia), then travel to the head waters of the Gascoyne, and examine about 25,000,000 acres of land in that quarter. Having done this they would strike towards the overland telegraph line between Adelaide and Port Darwin, taking a route between the tracks of Warburton and Forrest. If possible they would reach Powell's Creek, and then probably strike southward to Eucla, at the head of the Great Australian Bight.

1889.—In the early part of 1889 an exploring and prospecting expedition into the interior was dispatched under the leadership of Mr. W. H. Tietkins, chiefly under the auspices of the Geographical Society of Australia. He reported on July 25th as follows:—"The expedition of the Central Australian Exploring and Prospecting Association under my command arrived at Erldunda on July 22; party all well. The expedition left Glen Edith May 10th; while there experienced four days and five nights of almost incessant rain. Forty miles west of Glen Edith discovered and named the Cleland Hills and Gill's Creek flowing south, and 12 miles of running water. Extent of good country limited. In long. 129° 15′ S., lat. 23° 32′ 49″ discovered and named the Beetson Hills, and three miles of running water. Extent of available country limited. In east long. 128° 45′, south lat. 23° 20′, discovered and

named the Kintore Range, the highest peaks, Mount Leisler and Mount Strickland, 1,500 feet above the plains. Here we experienced three days' heavy rains. In south lat. 23° 22′, east long. 128° 15′, discovered and named Lake Macdonald, after the Hon. Secretary of the Victorian Branch. It extends westerly to east long. 127° 50′, its south shore being in lat. 23° 40′. A little good saltbush and grass country, with claypans round the lake. South of the Kintore Range visited and named the Davenport Hills, in lat. 23° 40′. From there travelled south-easterly through the extent of the probable outline of Lake Amadeus to Bloods Range, the highest peak, named Mount Harris and Mount Carruthers, being 1,400 feet above the plains. Mount Unapproachable, in Long's Range, marks the west extremity of Lake Amadeus, its south shore, south of Mount Olga, being in latitude 24° 39′ 16″. I regret to say that at Lake Amadeus two camels partook of a poisonous plant, from the effects of which one died at Mount Olga, the other, unable to travel after a week's rest, was left there. Visited Ayer's Rock; Mr. Gosse's marked tree has been burnt down by the blacks. Near Mount Connor discovered a small spring. Travelling northward from there discovered and named the Basedow Range. From there travelled easterly over better country until I arrived here. The general character of the country passed over has been spinifex, sandhills and plains, with extensive forests of casuarina; no blacks were seen, though they were frequently about us. Rock reservoirs, native wells, and a few claypans were the only descriptions of water met with."

1891-2.—While in Europe, Sir Thomas Elder made an offer to furnish funds necessary for the equipment and maintenance of an exceptionally well-organised party to explore the untrodden country in the interior of Australia. The Geographical Society, to whom this offer was made, formally accepted it on August 26, 1890. Negotiations were carried on between the colonial branches of the Society for the organization of the expedition, which, after being admirably equipped, and placed under the leadership of Mr. David Lindsay, left Adelaide on April 22, 1891. The first duty of the expedition was to endeavour to explore the unknown regions in South and Western Australia across to the Murchison River, between the tracks of Forrest, Gosse, Giles, Warburton and others. It had to examine and report upon an immense tract of country west of the Trans-Continental Telegraph line, and between the Murchison in the South, and the Fitzroy River in the north-west, as well as the country between the telegraph line and the Victoria River and Sturt Creek. It was also to look for traces of Leichhardt. About a week after starting from Adelaide, the expedition set out from the Peake with forty camels, and supplies for six months. The first official report from Mr. Lindsay was telegraphed from Esperance Bay in October of the same year, when he informed the Council that he had been disappointed in not finding water at Queen Victoria Springs, and the party had to make for Fraser Range. This course had to be taken owing to the terrible drought prevailing, the camels being obliged to travel 560 miles in thirty-four days without water. After a month's rest at Fraser Range, the explorers took the direction of Hampton Plains, the object being to complete as much as possible the examination of the first block of the territory they were commissioned to traverse; but want of water once more baffled the party, and Mr. Lindsay took his command to the Murchison by way of the Yilgarn Gold-fields. During the progress of this toilsome march news came of the resignation of the scientific members of the expedition, and matters eventually reached such a climax that Mr. Lindsay was recalled to Adelaide to consult the Council of the Geographical Society. Subsequently, several members of the expedition brought charges against him, but, after hearing all the evidence, he was fully exonerated by the Royal Geographical Society. The route traversed was principally between lat. 26° and 30° South. During Mr. Lindsay's absence from Western Australia, Mr. Wells was in command, and under instructions issued by the leader prior to his departure to Adelaide Mr. Wells engaged in a flying trip, exploring the country westward of the camp, fourteen miles from the Murchison Gold-fields.

1894.—A scientific expedition promoted by Mr. W. A. Horn, started from Adelaide on May 3rd, 1894, with the intention of exploring the MacDonnell Ranges. The party consisted of Professor Ralph Tate, palaeontologist and botanist, Professor W. Baldwin Spencer, biologist, Mr. G. A. Keartland, ornithologist and entomologist, Dr. E. C. Stirling, medical officer and ethnologist, and Mr. Charles Winnecke, surveyor and explorer, the last-named gentleman acting as the leader of the expedition. Three camel drivers, a cook, and two prospectors sent by the South Australian government accompanied the party. The camels and equipments were picked up at Oodnadatta, and the explorers reached Goyder on May 16. The promoter, Mr. W. A. Horn, accompanied them as far as the junction of the Palmer and Finke Rivers. The following account is by Professor Spencer, who went as biologist to the party. "We travelled the Finke from Crown Point to Running Waters, and thence proceeded to the Palmer River. We examined the Levi and George Gill Ranges. A section of the party went south to Ayers Rock and Mount Olga, and the remainder went west to Laurie's Creek and north to Glen Edith, following Carmichael Creek to Mereenie Bluff, and thence into the Northern watershed, following the Derwent Creek from its source to Haast's Bluff, and thence east to Glen Helen in the MacDonnell Ranges. The Ayers Rock party returned *via* Gill's Range, up the Walker, across the Missionary Plains, and south from the MacDonnell Ranges to Glen Helen. The whole party went thence east to Mount Sonder, which is 4,500ft. high. We ascended this, and thence went across south of the MacDonnell Ranges to the Finke. We followed this to Hermannsburg. One section stayed here, a second went to the Glen of Palms, and a third, including the prospectors and geologist, *via* Ellery Creek into the North MacDonnells, and thence from Brinkley's Bluff down the Hugh River to Alice Springs, where they joined the main party, who had come *via* Owen Springs. A small party travelled from Hermannsburg north across the MacDonnells by Stewart's Pass to Burt Plains and Alice Springs. We obtained a good general zoological collection, including some certainly new animals, and also much exact information as to the habits of specially interesting forms. We found rich specimens of land shells and birds, including the rare Alexandra parakeet. The ethnological collection is extensive, and much information was gained as to the habits of the natives. Four hundred species of plants were noted, and the range of supposed restricted species was greatly extended. The physiographical and geological features of the country were carefully studied with interesting results, and important additions made to the known fossil fauna. An examination of the geological formations was adverse to the hope of metalliferous developments south of the MacDonnell Ranges." The expedition returned to Adelaide *via* Ooramina, Mount Burrell, and Oodnadatta, on August 9th, having been absent just over three months. The original programme of the party was fully carried out, and some 1,800 miles of country—lying between Latitude 23° and 26°, and Longitude 130° and 135°—traversed and accurately mapped out, and former discrepancies corrected. The MacDonnell Ranges are simply a kind of elevated region. The country is, for the most part, perfectly dry, with occasional more or less permanent water-holes; no rain fell during the exploration. Much of the country was suitable for pastoral purposes; but Mr. Watt expressed the opinion that the country examined by him offered no hopes for prospectors. An excellent series of photographs representing the bird life of the interior and the desert regions was obtained.

1896.—An exploring expedition to the interior of Australia was promoted by Mr. A. F. Calvert, F.R.G.S., he having provided funds to complete the work of the Elder Expedition, chose Mr. L. A. Wells to lead the party. The explorers left Cue, West Australia, in June, via Lakes Way and Agusta. In November the main body of the expedition made the township on the Fitzroy after experiencing great difficulties. Some days before reaching the township Mr. L. A. Wells sent two of the party to make a journey in a westerly direction, with orders to rejoin the party at Joanna Spring. After the separation the main body of explorers were soon in straits. They missed Joanna Spring, where the second party should have met them, and were obliged to abandon the collections and make for the Fitzroy river, which they struck about November 6. Mr. L. A. Wells got fresh camels and threw himself into the desert to find his comrades but without success. Early in May 1897, he inaugurated a second search party which left Derby on the 10th, travelling via Mount Arthur to a spot where dead men and camels were reported by natives to have been seen, the report was groundless. Accordingly a new track was made to Ngowaddapa and Kulla Upmum to a point about fourteen miles NN.E. of Joanna Spring, near where some natives were captured, who after great persuasion, together with some force, were induced to lead the party to the place where the bodies of the unfortunate men, Mr. Charles Wells and Mr. George Jones, were found within a short distance of each other. From the journal kept by Mr. Jones, it was found that failing to make Joanna Spring they went to Separation Well, where after resting five days they left, afterwards owing to the death of a camel they were obliged to walk, later the two camels strayed, when, being too weak to follow them, the men were compelled to remain and die. Mention was made of the excessive heat experienced, also at the last time of writing, early in November, only two quarts of water remained. The bodies were buried in Adelaide Cemetery on July 18.

1897.—Mr. Hugh Russell was engaged in a prospecting tour for gold in Western Australia from May to October. Starting from Crawford's camp 6 miles N.E. of Mount Margaret, he steered a course *via* Mount Shenton to Mount Squires, traversing chiefly a desert country, carefully examining the nature of the soil with but poor results.

The Physical Structure and Geology of Australia.—The following paper was specially written by the Rev. Julian E. Tenison-Woods, F.G.S., F.L.S., Vice-Pres. Linn. Soc., N. S. Wales, for the *Australian Handbook*, and was subsequently revised by him.—The physical geography of Australia gives a key to its geology. It is an immense plateau, with a narrow tract of land sometimes intervening between the edge of this elevated area and the sea. The east side is the highest, averaging about 2,000 feet above the ocean. The west side is not more than 1,000 feet above the same. The north is a little higher. The south side is either level with the ocean, or abuts in cliffs upon the sea ranging from 300 to 600

feet in height. The general character of all the seaward side of the table-land is precipitous, but on the south-east angle of the continent the tabular form disappears, and there is a true cluster of mountains (the Australian Alps), whose highest elevation is a little over 7,000 feet. This group is near the sea (Bass Strait) and to the southward there is another group of almost equally high mountains which forms the island of Tasmania. The inland portion of the table-land slopes by a very gradual incline towards a central depression, which is south and east of the true centre of the continent. Thus the incline is greater and shorter for the east side of Australia, and it is on this side alone we find what can be properly termed a river system. The elevation of the west side of Australia being only half that of the east, or even less, and the distance of the central depression being twice as great, we have no drainage towards the interior at all. Whatever water falls from the clouds collects in marshes, which are generally salt. The soil on that side consists generally of disintegrated granite rocks, and is sterile and dry, forming little better than a sandy desert. All the table-land is more or less interrupted with ranges of mountains which do not run for any distance, and are not sufficiently high to give rise to a river system. The general direction is either north and south, or east and west. These mountains seem to be quite independent of each other and of the general axis of the continent. The most conspicuous of them is the Flinders range, which rises at Cape Jervis on the south coast, and continues without interruption for five or six hundred miles into the salt lake area, where it abruptly terminates. This chain is of an exceptional character. It differs from the other ranges of Australia in many particulars, and is probably older, though from the absence of fossils, its geological position cannot be defined.

The base of all this table-land of Australia is granitic. Isolated mountains of granite crop out all through the southern and western deserts. It forms the axis of the Australian Alps, and a great portion of the table-land on the west and east coasts consists of the same rock. There are also considerable tracts in which the granite is replaced by upturned palæozoic strata, mostly slates and schists, with an almost vertical dip. It cannot be said that the granite is the cause of this uplifting, for it has been mostly derived from the same slates, and bears marks in some cases of stratification, inclined at various angles. The inclination of the palæozoic rocks is of a very ancient origin, and has no connection with the present outline of Australia. Above the older palæozoic rocks and granite, and lying unconformably upon them, are certain basins of coal-bearing rocks, belonging to both the mesozoic and palæozoic periods. These are found mostly on the eastern and southern end of the table-land, but there is good reason for believing that they are only thinly covered elsewhere, and that a most extensive coal-bearing area may be looked for in eastern Australia. Over the coal measures all round the continent there is a sandstone with oblique laminations. This formation is also seen in the interior, and I regard it as an eolian or fluviatile deposit. The great central depression or basin of Australia is like the Sahara desert, of cretaceous age. Its limits are unknown; but abundant fossils in blue marl are found on the very summit of the watershed on the east side of Australia north of latitude 28°0 S., nearly to Cape York, and all round the Gulf of Carpentaria. The western limits of this great cretaceous basin are unknown. Fossils belonging to it have been collected considerably west of the overland telegraph line. On the South side of Australia, from the commencement of the Great Australian Bight, the land is, with little interruption, a series of tertiary rocks representing all the European deposits, from the eocene upwards. It is not known how far they may extend inland. They extend some 300 or 400 miles at the least, but they are not seen at a greater height than about 600 feet. On the Australian Bight the miocene beds of limestone, full of fossils, abound on the sea in cliffs of from 300 to 600 feet in height. On other parts of the coast, raised beaches with recent shells are common, notably round the colony of Victoria. In the interior, all these deposits are overlaid by either volcanic tertiary lavas, or by sands, clays, and marls which have been derived from the sub-aerial weathering of the granite and other rocks. The highest portions of all the edge of the table-land, and consequently the sources of all the rivers, are in recent volcanic emanations. This is true for the whole extent of Australia. These volcanic emanations are tertiary, and they are all near the edge of the table-land. They sweep round the eastern side from north to south, curving round the south side. As far as the Australian Alps they maintain a very uniform age, which appears to be miocene or later. West of Melbourne they change their character, and become much more modern. Distinct ash cones of craters are preserved, and ash beds, with remains of the existing fauna and flora. The extreme western limit of this volcanic activity is about 100 miles S.S.E. of the mouth of the river Murray, and here it would seem that the volcanic forces in Australia died out. The raised beaches are found near these craters, and have been, doubtless, elevated in connection with the volcanic outbreaks. In this brief sketch no details have been given. They will be now considered a little more closely.

Two formations of granite have been recognised in Australia, and there may be more. That which forms the central axis of the table-land has a peculiarity which differs from the outer parts in this, that it is rich in mineral veins. It is in such formations that the valuable deposits of tin are found. They also contain veins of silver, lead, and copper. Gold has also been found in granite, but this metal is more common in a formation to be mentioned presently. The most of the Australian tin deposits are stream tin, that is to say, tin washed out of granite by streams and found in their beds. But veins of tin have also been found in Herberton (Queensland) and in North Australia as rich as any in the world.

Earlier palæozoic rock—in connection with the granites, slates and schists of the Cambrian, and probably Laurentian periods—are found. In these are veins containing gold and other metals. As a rule, the veins consist more of felspar than any other mineral, and their direction is more often meridional than otherwise. It appears that the auriferous veins in the Cambrian formation of the colony of Victoria are much more north and south than those of the Silurian.*

The gold veins in Cambrian rocks of the same colony are probably eight times more numerous than the Silurian. As a rule the greater number of veins run parallel with the strata in which they are enclosed, and the greater number of the richest veins strike west of north. In California and Brazil, veins run parallel to the mountain chains. In Australia they do so on the eastern side of the continent, but where the edge of the table-land bends round to the north-west the veins still keep their north and south direction. They are therefore independent of the present configuration of the land. East and west veins are usually poorer than the meridional ones, which is not the experience of other countries. It would appear also that, as a rule, gold is not embedded in the quartz, but occurs in a comparatively loose state in the midst of cavities and laminations. Very rich copper veins have been found in rocks of probably Cambrian age in South and North Australia. The ore is a sulphide. As a rule, deposits of carbonates of copper in Australia have not proved permanent. Manganese, antimony, bismuth, and graphite are also found in the Cambrian rocks, but are not worked. Characteristic Cambrian grapholites are found in connection with gold-bearing veins. The species are identical with those found in Sweden, Bohemia, Wales, Ireland, Scotland, and the United States of America. Rocks which, by their included fossils, are seen to be the equivalents of the Silurian of Europe and America are found in Victoria (Kilmore), New South Wales (Yass, &c.), Queensland (Rockhampton), and Tasmania. Fossils identical with species of the Wenlock and Ludlow beds, and such forms of Silurian life, as *Phacops* (*Portlockia*) *fecundus* Barrande, are equally abundant in the Yering beds, near Melbourne. Devonian rocks, with characteristic fossils, often identical with those of Europe, are found very extensively developed in Victoria (North Gippsland), in New South Wales (Mount Lambie, Sofala, Lachlan River), and in Queensland (Gympie, Burdekin, Mount Wyatt). In connection with upper Devonian rocks we have metalliferous veins of gold, silver and copper. The mines in Gympie are of great richness. Devonian copper veins have not hitherto proved very productive.

European carboniferous plants are found in a few places in New South Wales: not, however, in connection with coal, as at Stroud, Arowa, and in Queensland, in the Drummond Range. Marine carboniferous fossils are found in the basin of the Hunter River, generally throughout Tasmania, and in Queensland (Bowen River). It is a remarkable peculiarity of these Marine beds that they are interstratified with plants of a character which is considered lower mesozoic in Europe and India. Their exact geological position is very uncertain.

An entirely different series of plant remains, which seem to have very little in common with those of the Hunter River, are found with rich coal seams in Queensland (Ipswich, Burrum River, Bundaberg). The characteristic fossils of these beds are *Thinnfeldia odontopteroides*, *Equisteum rotiferum*, and species of Palmaceæ and Cycadaceæ. These plants are also found in Tasmania. The age to which they should be referred is still a matter of doubt. In many respects they have considerable resemblance to the Indian (Raniganj) coal plants. Some plant remains found at Bacchus Marsh, the Wannon River, and at Bellarine (all at places at considerable distance from one another in the Colony of Victoria), are referred to the same age. The evidence of this is not satisfactory. There is no coal associated with such remains, whereas it abounds in Queensland and is worked profitably. Directly covering these remains in many parts of N. S. Wales and Queensland is a sandstone in thick layers with much cross bedding and oblique lamination, and containing coniferous wood with equisetaceous stems, leaves of cycads or palms and ferns (*Thinnfeldia*), &c. The fossils are often the same as those of the Ipswich coal basin. The contained grains of sand are often rounded, and the whole deposit is in my opinion eolian, fluviatile, or composed of volcanic ash deposits mingled with marsh or lacustrine remains. Near Sydney such strata reach in the Blue Mountains a thickness of over 1,000 feet. The same kind of formation is scattered throughout the continent in isolated masses of various extent. They are generally precipitous, and consist, in my opinion, of hardened cores of sandy accumulations. The stratification is entirely that of wind-blown and fluviatile rocks with ferruginous bands. These are the remains of surface vegetation, from which the carbonized roots of trees may often be seen depending. Another prevailing character is large waterworn quartz pebbles. Furthermore, this formation is only found near the beds of freshwater streams. Unless by the included organic remains, and superposition, we have no means of determining what is the age of these beds. But it would be wrong to attribute them all to one period. Similar conditions would produce the same kind of rock in any epoch. In New South Wales such beds lie upon the coal beds, but not always conformably. In Queensland they lie upon the

* The terms used in the Geological Survey of Victoria are those of Murchison, and his divisions of upper and lower silurian followed. But this system and nomenclature does injustice to Sedgwick's prior investigations. Following the example of many geologists, Mr. Tenison-Woods has restricted the term silurian to Murchison's upper silurian (Ludlow rocks, Wenlock, May Hill, or Upper Llandovery). The Bala or Caradoc are Siluro-cambrian, and all the rest of Murchison's lower silurian are Cambrian.

cretaceous, and are probably tertiary. It would be very difficult, indeed, to draw any line of distinction between the Queensland desert sandstones and those of New South Wales or Hawkesbury sandstones, as far as lithological character is concerned, and the included plant remains are common to both. But in portions of the Hawkesbury sandstone, fossil ganoid fishes of the genera *Cleithrolepis* and *Myriolepis* are found, which have strong resemblance (so far as imperfect specimens would admit of comparison) to Devonian forms. In the freshwater sandstone, the Permian genus *Palæoniscus* is found. Nevertheless, it would be injudicious to consider the Hawkesbury sandstone as of palæozoic or lower mesozoic age. The anomaly of the fish remains we must explain, by recalling that we have amongst us two species of the liassic and triassic genus *Ceratodus*, actually living in Queensland rivers. Throughout Australia, therefore, we may consider that in desert or sandy regions, and eolian or fluviatile, deposits have formed or are forming. It hardens into stone in certain portions, and thus gives rise to the precipitous sandstone cliffs and flat-topped mountains which are so characteristic of Australian scenery. These formations are mentioned in this place, because there is a blank between them and the lowest mesozoic rocks. Nevertheless we have some missing links of the secondary deposits now to be specified.

First of all, in Western Australia, on the Greenough River, apparently on the margin of the table-land, there are beds containing fossils, which are similar to the upper lias and the lower oolite of Europe. Many fossils common in Europe are found there, such as the following from the upper lias—*Ammonites salensis, A. radians, A. walcottii, Nautilus semis triatus Gresslya donaciformis*, and *Myacites liassianus*, the last rather, referable to the middle lias. From the Oolitic beds of the same locality we have the following fossils, common to European formations—*Ammonites macrocephalus, A. brochii, Belemnites, canaliculatus, Cucullæa oblonga, Pholadomya ovulum, Avicula munsteri, A. echinata, Pecten cinctus, P. calvus, Lima proboscidea, L. punctata, Ostrea marshii, Rhynchonnella variabilis, Cristellaria cultrata*. The peculiarity of these deposits is that they are lithologically similar to the Jurassic strata in Europe. Thus the lias fossils are enclosed in a matrix resembling the ferruginous or variegated limestone of the upper lias near Bath, and the middle lias, or mailstone, is not left unrepresented. The matrix of the oolite fossil was equally characteristic. Mr. Charles Moore, in his paper on Mesozoic Australian Geology (Quar. Jour. Geol. Soc. Lond.), says, "that even had no distinctive fossils been present, a geologist acquainted with the secondary rocks of England and Europe would hardly have failed to refer the greater number of the specimens to the horizon of the lower oolitic rocks." In this way, lithologically and almost without the evidence of the fossils they contain, the Western Australian specimens might be decided to be similar to the lower oolites, and the upper and middle lias of this country, from which they are so many thousand miles separated. It is probable also that in the same locality cretaceous rocks are to be found. The evidence of contemporaniety would be complete but for a strange mixture of the fossils, lias and cretaceous remains are strangely associated together, so as to lead to the supposition that fossils of different localities had been accidentally mingled. Much amusing and acrimonious controversy has thereby arisen. At the present day the co-relation of Australian with old world palæontology is attended with the most perplexing difficulties. On the other side of the continent, and on the edge of the table, though like Western Australia within the ocean watershed, a number of fossils have been found, which may be thus enumerated—lower oolite, Gordon Downs, containing—*Ammonites, Pleurotomaria, Homomya, Pholodomya, Myacites*, and *Tancredia*. About 120 miles south of these beds we find strata of a similar or liassic character in the following localities:—Fitzroy Downs, Wollumbilla Creek, Mitchell Downs, the Amby River, the Nive, the Upper Maranoa, Mount Abundance, Blythedale, and Bungeeworgorai. A peculiarity in most of these fossils is that they occur in rounded, nodular, or concretionary nodules embedded in a brittle marl in the creeks. Outliers of the cretaceous rocks also are found on the highest levels of the watershed on the table-land. Thus, at the Palmer River, in north-east Australia, we find cretaceous fossils in nodules of blue clay, with septaria, in widely separated localities, but no traces of the original beds. The explanation of this is that they are the remains of beds broken up at the elevation of the table-land and nearly wholly removed by denudation. Undisturbed beds of the same age occupy large areas of the interior of the continent.

The species identified with the European lower and middle lias from Western Australia are much fewer in number, but this is partly owing to the fragmentary and imperfect character of the remains. Above these beds and horizontally stratified, but with little disturbance, there is an immense area of the interior of Australia covered with cretaceous-like deposits and characteristic cretaceous fossils—*Ammonites, Belemnites, Crioceras, Cyprina, Trigonia*, &c., with reptilian remains of Ichthyosauri. The fossils have been but slightly examined, but of their wide extent there can be no doubt—perhaps covering the whole interior area of the continent.

The tertiary beds already referred to as covering so large a portion of the south portion of the continent are apparently divisible into regular horizons similar to those of Europe. The chronological sequence, ascertainable by the proportion of existing species, enables us to correlate them as follows:—They are divisible into three basins. 1. The Murray basin. 2. The Aldinga and Southern Yorke's Peninsula. 3. The Great Australian Bight, or, to use the nomenclature of Professor Tate, the Bunda Plateau. The Murray basin not only includes the basin of that river, but passes across into the Colony of Victoria, extending to the western side of Port Phillip and North Tasmania. The second basin, according to Professor Tate, occupies disconnected areas on the east side of St. Vincent's Gulf, and the strata are found across Yorke's Peninsula, and probably continue round the shores of St. Vincent's Gulf. According to Professor Tate (who has given much attention to the subject, and whose researches I can confirm as far as an extended examination of the fossil corals are concerned), the lower Aldinga strata are eocene, and contain scarcely 3 per cent. of recent forms. Mount Gambier limestones are the equivalents of these, and so are the lower beds of the Australian Bight. The Murray basin, including the Hamilton (Muddy Creek) and Geelong beds (Corio Bay), are miocene. All these beds are rich in fossils; but in the Murray basin, in all places, extremely well preserved. The pliocene beds are not so extensively or so richly represented. They are found generally as highly ferruginous outliers, with a few fossils not easily identified. The Flemington series, near Melbourne, are the best instances, some of the organic remains of which have been illustrated by Professor M'Coy. The fauna of all these deposits is characterised by its local character, which though almost entirely distinct rom the present Australia fauna has still certain features in common. It has been stated that the same tertiary fauna was found in New Guinea, as seen in some fossil specimens brought by the Hon. W. Macleay from Katow. I am able, however, to state that this is not the case. There is nothing in common with our tertiary rocks amongst any of the New Guinea fossils, all of which I have carefully examined.

There is no satisfactory evidence of any former participation in the great ice age by the continent of Australia. One or two instances of grooves or striations are recorded, but standing alone in so vast a territory their ice origin is very doubtful. On the whole, the evidence afforded by the animal remains is decidedly in favour of a warmer climate for Australia than that which now prevails, and this is borne out by the plant remains. While the south portion of the continent was slowly submerging under the tertiary sea, there is reason to believe that the eastern side of the continent was raised above sea-level. The period of this elevation must have been subsequent to our cretaceous era, as marine fossils of that period are found on both sides of the watershed and on the table-land. We have no marine tertiary beds on any portion of the eastern side of the continent, except a few post-tertiary marine shells preserved in ash beds, which are scarcely above the sea-level, and are only seen where the Shallow sea has been dammed back by a bank of volcanic mud. Such an instance has been seen by me at Cleveland, in Moreton Bay. The volcanic disturbances must have occurred when our present fauna existed. In N. S. Wales, and in many places in Victoria, vegetable remains are found in the old drainage channels covered by lava streams. These have been named and described by the late Baron Von Mueller. They show a remarkable series of fruit-bearing trees, different from those which occupy the same area at the present day. Though fruits were abundant, it was not considered in most cases safe to attempt to determine even the order to which the trees belong. The only exceptions were in the case of a coniferous tree, and one belonging probably to the *Sapindaceæ*. No conclusion could be drawn from the remains as to the age of the beds, but as they were identical when found in widely separated places, sometimes 600 miles apart, it was evident that they were relics of an extinct flora, which must have occupied all the table-land. Distinct from these deposits, and embedded in silicious rocks, other plant remains are found on the edge of the table-land. These are mainly distinguished by their resemblance to such trees as cinnamon and other lauraceæ myrtaceous plants, palmæ, cycads, and ferns. The peculiarity of such remains is that they are not usually accompanied with any carbonaceous matter, but rather impressions in silex, probably derived from thermal springs. There are not wanting proofs that these are portions of the same flora to which the fruit, &c., belong. They are certainly tertiary, and may be pliocene, or even later.

The most recent of all our formations are the raised beaches and the various drifts and eolian formations throughout the continent. The raised beaches are confined to the south side of Australia, as far as we know, and they are of very limited extent. The drifts are more extensive, and probably deposited at different times and under different conditions. Two are distinguished by Mr. Selwyn for Victoria, and they are of different ages, according to his opinion, namely, miocene and pliocene. Such formations are extremely important, as they contain the remains of those strata which denudation, during immense geological periods, has left to us. Thus they also retain the gold which has been derived from the Cambrian and Silurian rocks. Wherever these drifts are found overlying auriferous quartz veins, they are also rich in alluvial gold, and they have proved the richest deposits in the colonies, besides being the source of all those large masses of gold which are called "nuggets," some of which have been of enormous size and weight. The alluvial is shallow, and easily worked, but there are instances where it has been covered with thick outpourings of lava of 300 and 400 feet.

Sometimes these drifts are exposed in the form of very hard fluviatile sandstones containing large rounded pebbles of water-worn quartz. These deposits occur throughout the whole Continent of Australia, but never far from freshwater streams. Their broken and fragmentary character has given rise to the idea that they once extended all over the Continent, but they are merely local deposits dependent on the streams along which they are always found. This is the so-called "Desert Sandstone,' the rugged and arid nature of which has repeatedly made it a barrier to the exploration of the interior. Some small portions of the upper part of gold veins are usually found to be of much greater richness than the lower parts; and this is not because gold favours one portion of a vein more than another but because the surface represents the gradual detrital

accumulation from slow weathering in the course of ages. The drift or sub-aerial deposits belonging to recent geological periods are in Australia very important and extensive. An illustration from one portion of Australia will explain the whole. In the Murray basin, and through much of South Australia on the west side of Spencer's Gulf, and north-west of Port Lincoln, there are many isolated granite hills which are the outcrops of the basis of the whole continent. All around them is a sandy desert supporting low shrubby thickets or "scrubs" of *Acacia, Eucalyptus, Cryptandras, Styphelias, Boronias, Proteads, Melaleucas*, &c. The sand is a mass of rounded grains of true desert character, that is of grains rounded by having been blown about. It frequently lies in ridges and hills like the waves of the sea, but generally covered with vegetation. The hills are interrupted by yellow clay flats, with an open forest and a soil which a very little moisture renders boggy. Both these accumulations arise from the slow sub-aerial weathering of the granite. The quartz grains resist decomposition, and get carried about by the wind. The felspar and mica decompose rapidly, and form the basis of the clays to which the small portion of iron peroxides gives the yellow colour. It is remarked that wells sunk into this clay only furnish an almost undrinkable brackish water, doubtless from the salts of soda, potash, and iron which the felspars contain. An analysis of these waters shows them to contain such salts as chloride of sodium, sulphates of soda, lime, magnesia, and potash, with variable proportions of silica and iron. All these can be referred to chemical decomposition from granites, notably felspars and mica. The taste of salt (chloride of sodium) by no means predominates in them. The general surface of this kind of country, with the exception of the sand drifts and isolated granite mountains, is perfectly level, and the sand lies loosely upon it. But in crossing such drift ridges, one would often be deceived as to their character. It may safely be stated that the greatest part of Australia is covered by formations such as these.

Referring now to the character of the country according to its physical structure, it may be stated generally that the narrow strip which lies between the table-land and the sea is well watered by mountain streams, and the alluvial land in the neighbourhood of these channels is rich and fertile. On the table-land, where the mountains are not too rocky and rugged, the soil includes some fertile areas; but this is generally on the volcanic strata, which are fortunately of wide extent. We may feel astonished at the immense scale on which volcanic disturbance existed in Australia in tertiary times, but probably it is less in proportion to the area than that which took place in miocene times in Britain. Thus in the north of Ireland there is a basaltic flow of 500 miles long by 30 wide, or about 1,200 square miles, which attains in many places a thickness of 900 feet. The lands of the interior are, as a rule, poor, except in the river valleys. Towards the central basin of the continent they are in all respects like the Sahara, or the table-lands and prairie lands of America. The colony of Victoria is better situated with regard to its lands than any other. It is well watered, and has a larger share of the fertile areas (basaltic) between the table-land and the sea. The portions of the table-lands themselves which fall to its inheritance are also rich in volcanic tracts. The colony of South Australia may be said to be, as far as the richness of its lands are concerned, confined to the valleys and slopes of the Flinders range. As this is about 500 miles long, and of gentle elevation, the tracts available for agriculture are considerable. Towards the north of a line parallel with the head of St. Vincent's Gulf, the rainfall is small and uncertain, which renders proprietors, both agricultural and pastoral, subject to great losses from drought.

New South Wales and Queensland are in the same position relatively to the table-land. The capitals of these colonies are built on the slopes between the table-land and the sea. Portions of the upper part of the high lands included in both colonies are volcanic areas of some richness. The lower lands are poor and sterile except, as already stated, in the river valleys. In both colonies these are very numerous.

It has been noticed that the actual amount of the rainfall on the interior slopes must be largely in excess of the drainage by the rivers, and that therefore a great portion soaks into the ground and drains along the incline towards the interior. On this account and the structure of the rocks, the central basin must be especially favourable for the formation of artesian wells. This was drawn attention to in a paper read for me by Sir Roderick Murchison, at the meeting of the British Association at Newcastle-upon-Tyne, in 1863. In 1866, in a series of papers furnished to the *Australasian*, I have advocated the same view. But it did not receive much attention until later years, when the subject was revived with most beneficial results to the settlers of the interior. One fact in the physical structure of the continent indicates such stores of water in the interior. In the central depression of the continent, and in North Australia, there is a line of groups of thermal and cold springs covering several hundred square miles. These send forth water from great depths, and are, no doubt, derived from a central underground reservoir whose sources are on the slopes of the table-land. That the waters come from great depth is seen from the fact of the temperature, and the mounds of sinter or travertine around them. This, no doubt, is the silica, &c., once held in solution by the thermal waters under pressure, but liberated on arrival at a level where the pressure was removed. In these mounds are found deposits of bones, teeth, and other remains of those gigantic marsupials which once roamed over this continent, but which are now totally extinct. We find also the remains of extinct crocodiles, even within the limits of New South Wales, as well as a gigantic lizard, tortoises, &c. The largest of our extinct marsupials, the Diprotodon, must have been as large as an elephant, and the abundance of its remains in almost every cave and river bed shows that it was very numerous and wide-spread. Its disappearance from the continent was in very recent times. In 1866 I found the remains of a struthious bird, much larger than the emu, in one of the kitchen middens of the natives in South Australia. The bones were marked by the scrapings and cutting of flint knives of the blacks. It was named *Dinornis australis* by the late Professor Owen, who found that the bird had formerly a wide range in Australia.

It is generally thought that Australia is a continent quite recently upheaved from the ocean. There is, however, no evidence of such an origin, at least for the whole. The facts of which we can be certain are these. Since the miocene period the southern portion of the continent for its whole extent has been upraised to a height of about 600 feet. Subsequently or contemporaneously, there has been a large amount of volcanic disturbance with outpourings of basaltic lavas. After this there has been a subsidence not very considerable in amount, but extensive. This is seen, as Professor Tate has pointed out, by the fringe of eolian calcareous sandstones which, for a short distance out to sea, surrounds the south coast. There has then been over a limited area on the south-east side of the continent a renewal of volcanic activity and slight elevation of the coast. On the east side there is no evidence of upheaval for its whole extent, but there are very decided marks of subsidence in, probably, tertiary times. A long fault at the edge of the Blue Mountains near Penrith, and for many miles north and south, may be a down throw which brings the Hawkesbury sandstone nearly to the level of the sea, where it forms the romantic fiords of Port Jackson, Broken Bay, &c. The existence of the Barrier Reef on the north-east coast is also generally regarded as marking a slow period of subsidence. This view is confirmed by the general confirmation of the coast-line, mountain systems, and islands. The subsidence must have been in tertiary times, because the recent alluvial drifts are disturbed by it. The upheaval of the coast-line of the Australian Bight must have been of a very rapid character. Friable limestone cliffs, 600 feet high, abut upon the sea. Had there been any pause, even of a few months, in the uplifting, there must have been some traces left by erosion, but no such marks are found. It might be an interesting speculation to inquire if the subsidence on the east coast was a compensating phenomena for the upheaval on the south, since the extent is about the same. The phenomena represented are at any rate out of even extraordinary terrestrial experience. The west coast seems also to have participated in the upheaval. Shells of a recent age were forwarded to me from Fremantle, which showed the existence of raised beaches. The only difference between the marine fauna and that at present existing was that it included tropical species only now found in North Australia. As to the epoch to which the oldest dry land in Australia may be referred, there are no very certain data. The fauna and flora would incline us to believe that we have relics of the later mesozoic or earlier tertiary times; but it would be premature to build any solid theory on these facts.

The above are general outlines of the geology and physical structure of Australia. A closer examination of the details may amplify or elucidate the conclusions; but this brief exposition of the facts is made on observations which are not likely in future to be disturbed or changed.

Government and Constitution.—Each of the Australian Colonies must be considered in many respects as a distinct province, having its own government, local laws, and fiscal duties. They all enjoy responsible government. The form of government is a modification of the British Constitution; the Queen being represented by the Governor, who is appointed by the Crown; the House of Lords by the Legislative Council, nominated or elected; and the House of Commons by the Legislative Assembly, elected by the people. The Imperial laws are in force, unless superseded by local enactments, and all Acts passed by the local Legislatures must receive the Queen's assent prior to their becoming law. In each of the colonies the qualifications for exercising the franchise are as low as they can be, and manhood suffrage is the rule. On August 11, 1893, a Bill conferring the parliamentary franchise on women passed through the New Zealand House of Representatives, and was subsequently successful in the Upper House on the 8th of September. On the 19th it received the Governor's assent.

The Constitutional Bill of Western Australia, which virtually granted manhood suffrage to that colony, was passed by both Houses of Parliament during 1893 (a Constitution Act Amendment Bill was introduced into the West Australian Parliament last year); and the Adult Suffrage Bill of South Australia was passed by the Legislative Assembly of that Colony on December 18th, 1894, receiving the formal assent of the Crown on March 19th, 1895. The tendency of the colonial governments generally is to provide for female suffrage.

By "The Federal Council of Australasia Act," passed in 1885, an Institution composed of representatives of the Australasian Colonies was formed "for the purpose of dealing with such matters of common Australasian interest in respect of which united action is desirable, as can be dealt with without unduly interfering with the management of the internal affairs of the several colonies by their respective legislatures."

The first meeting of the Federal Council was held at Hobart on January 25, 1886, when representatives from Victoria, Queensland, Tasmania, West Australia, and Fiji were present.

A draft of a Bill called "The Constitution of the Commonwealth of Australia," was framed and approved by the Australasian Federal Convention at Adelaide, South Australia, in April, 1897. A copy of which appeared in the 1898 edition of the *Australian Handbook*.

A "Federal Enabling Bill," was passed by the Governments of New South Wales, Victoria, South Australia and Tasmania. The Bill enabled them to call together a convention consisting of ten representatives of each colony to be directly chosen by the electors. The Bill was also passed by the Legislative Assembly of Queensland, but was shelved through the amendments proposed by the Legislative Council.

A Referendum of the whole of the Colonies represented at the Convention was held in June, 1898, to adopt or reject the Constitution of the Commonwealth of Australia. Owing to the required number of votes for the Constitution not being obtained in New South Wales the question was shelved, but on July 27th a poll was taken in New South Wales, Victoria, South Australia and Tasmania, in Queensland on September 2nd, and in West Australia on July 31st, 1899, the returns of which were :

	Yes.	No.	Affirmative majority.
New South Wales ...	107,420	82,741	24,679
Victoria	152,653	9,805	142,848
Queensland	38,488	30,996	7,492
South Australia ...	65,990	17,053	48,937
Tasmania	13,437	791	12,646
Western Australia ...	45,718	19,768	25,950
Grand Totals	455,904	188,605	267,299

So that by a majority of 267,299 the colonists of the six colonies have declared themselves in favour of Federation. On September 18th the *London Gazette* published the Royal Proclamation announcing that on and after January 1st, 1900, the Australian Colonies and Tasmania shall be united in a Federal Commonwealth under the name of the "Commonwealth of Australia." A copy of the "Act to Constitute the Commonwealth of Australia" will be found on p. 126.

Population.—By the census returns of 1891 the population, exclusive of aborigines and Maoris, was as follows: Victoria, 1,140,405; New South Wales, 1,132,234; Queensland; 393,718; South Australia (including Northern Territory), 320,431; Western Australia, 49,782; Tasmania, 146,667; New Zealand, 626,658; total, 3,809,895.

The table attached gives the latest results arrived at by Mr. James J. Fenton, the Assistant Government Statist of Victoria, as to the population of that Colony on December 31st, 1896, and also the latest information received regarding the enumeration in the other colonies. The aborigines are not included except in the case of Victoria and New South Wales. In the former colony, 565, and in the latter 8,280 were enumerated at the last census. The Maoris in New Zealand, who numbered 39,854 in 1896, are also excluded.

Colony.	Males.	Females.	Total.
Victoria	595,968	578,920	1,174,888
New South Wales	695,150	602,490	1,297,640
Queensland	264,613	207,566	472,179
South Australia including N. Territory	186,699	173,521	360,220
Western Australia ...	96,952	40,994	137,946
Total	1,839,382	1,603,491	3,442,873
Tasmania	88,297	77,816	166,113
New Zealand	376,987	337,175	714,162
Grand Total	2,304,666	2,018,482	4,323,148

As regards the nationality of the people, the principal proportion of them is, as might be expected, from the British Islands, though the native-born population is now a large section. After these come the Chinese, who on the gold-fields, and in New South Wales, are very numerous. The census of 1891, enumerates the Chinese as follows :—Victoria, 9,377, a decrease of 2,751 on the census returns of 1881; New South Wales, 14,156, an increase of 3,951; Queensland, 8,574, a decrease of 2,655; South Australia, 3,800, a decrease of 351; Western Australia, 917, an increase of 772; Tasmania, 939, an increase of 95; and New Zealand, 4,444, a decrease of 560, total, 42,207, as against 43,706 in 1881, and showing a total decrease of 1,499. Next in number to these is the German element, which, in some parts, especially of South Australia and Queensland, is largely represented. With the exception of one or two inconsiderable islands, Australia is the most thinly inhabited part of the British dominions, or perhaps of the civilised world, there being, at the last census, only a fraction above 1, namely, 1·239, to the square mile. This is, of course, largely accounted for by the vast unoccupied tracts in the central and western parts of the continent. As regards the number of persons to the square mile, the colonies, at the close of 1896, ranked in the following order :—1, Victoria, 13·37; 2, New Zealand, 6·84; 3, Tasmania, 6·30; 4, New South Wales, 4·20; 5, South Australia including Northern Territory, ·40; 6, Queensland, ·71; 7, Western Australia, ·14. The average proportion of the sexes for all the colonies was 87·58 females to 100 males. In all the Australasian Colonies males are still much more numerous than females. According to the estimate on December 31, 1896, the sexes are more on an equality in Victoria, 97·14 females to 100 males; next in South Australia, 92·94; New Zealand being third, 89·44; Tasmania coming next, 88·13; New South Wales fifth, 86·67; Queensland sixth, 78·44; and Western Australia last, 42·28.

THE LATEST POPULATION STATISTICS.—Statistics showing the population of the Australasian colonies in December, 1897, have been issued by Mr. J. J. Fenton, the assistant Government statist. In April, 1891, the enumerated population, according to the census returns, was 3,809,895 for the seven colonies, as against 4,476,958, the total estimated at the end of December, 1898. This shows an increase of 667,063.

The populations of the several colonies at the end of 1898 were estimated as follows :—

Victoria ...	1,175,463	rate of increase during 1898	1·72
New South Wales	1,346,240	,, ,,	0·06
Queensland ...	498,523	,, ,,	2·85
South Australia...	367,800	,, ,,	1·31
Western Australia	168,129	,, ,,	3·83
Tasmania ...	177,340	,, ,,	3·27
New Zealand ..	743,463	,, ,,	1.98

Birth, Death, and Marriage Rate.—The birth-rate per 1,000 of the mean population for the year 1899 in the Australian Colonies was as follows :—Queensland, 12·88; New South Wales, 27·10; Tasmania, 12·26; South Australia, 12·17; Victoria, 27·10; New Zealand, 25·11; Western Australia, 13·70; Fiji, 33·45 (in 1897).

The death-rate of the Australian Colonies per 1,000 of the mean population for the year 1899 was :—Western Australia, 17·05; Victoria, 14·27; New South Wales, 11·82; Queensland, 19·07; Tasmania, 15·86; South Australia 16·35; New Zealand, 10·24; Fiji, 36·47 (in 1897).

The marriage-rate for the year 1899 per 1,000 of the mean population was :—Western Australia, 9·85; New South Wales, 6·89; Queensland, 7·23; Victoria, 7·01; New Zealand, 7·28; South Australia, 6·19; Tasmania, 6·38; Fiji, 10·69 (1897).

Immigration.—The arrivals by sea during 1898, were 324,778, the departures being 300,914. The Imperial returns for 1899 give 12,268 persons as emigrants from the United Kingdom to the Australian and New Zealand Colonies, and the number therefrom was 7,777. Legislation is being framed in some of the Colonies for the restriction of the immigration of coloured races and other Asiatic aliens.

Aborigines.—The Aboriginal inhabitants of Australia belong to the Ethiopic, which is the lowest family of the human race. They are ranked by ethnologists in the Papuan or Austral-Negro scale, but forming a special type, and are believed by some to be the remnant of an ancient and peculiar race. No satisfactory estimate has been formed of the number of the Aboriginal inhabitants of Australia; but at the census of 1891 they were believed to number about 59,464, as against 31,700, in 1881 distributed as follows :—Victoria, 565, as against 780; New South Wales, 8,280 as against 1,643; Queensland, 20,585, (1881 figures only, no estimate having been made for this Colony in 1891); South Australia, 23,789, as against 6,346; and Western Australia, 6,245, as against 2,346. In Tasmania the Aborigines are extinct. In the settled parts they are now few and inoffensive, and are passing away, although the above figures show an increase during the intercensal period, which is, however, believed to be only apparent, and has arisen from the fact of the enumeration of the aborigines having been less imperfect in 1891 than in 1881. At the time of the first settlement of Australia it has been estimated that the natives numbered about 150,000, but this estimate is principally a conjecture. They have no fixed habitations; in the summer time they live almost entirely in the open air, and, in the more inclement weather, in bark huts of the simplest construction. Their implements are of wood, stone, or the bones of animals or fish. Their religious and intellectual condition is apparently of the lowest kind. They practise polygamy, and it is believed resort to cannibalism under exceptional circumstances. They are occasionally employed by the settlers in light kinds of work and as horsebreakers; but they dislike continuous occupation, and soon give it up. They are also often engaged by the police in tracking criminals in the bush, for which they have great aptitude; as troopers, too, they have been found useful in "dispersing" their countrymen, the objection to their employment being the difficulty of restraining them from the wholesale slaughter of the blacks against whom they may be led. The physical characteristics of the natives have been thus generally described by Mr. J. J. Woods :—"The men are tall and well-formed, having broad foreheads, wide mouths, small piercing eyes, flattened noses, thick black hair, deep chests, their lower limbs being thin and ill-developed as compared with those of average Europeans. They are remarkable for the beauty and strength of their teeth, for the boldness of their carriage, and for the comparative smallness of their hands and feet. Although perfectly black, they are different in appearance from the natives of Africa, wanting the woolly hair and the great thickness of lips for which the latter are noted. The women are smaller than the men, in appearance worse looking, and with frames not so well developed. The aborigines all round the Australian coastline bear the same description, and are supposed to have sprung from one source. This supposition is to a great extent confirmed by a general uniformity of customs, a similar uniformity in the laws which govern the relationships of individuals to members of their own tribes, and to those of the tribes to which their parents belong, and also by the uniformity in those laws which apply to the possession and occupation of territory. Their weapons are generally similar, everywhere consisting of spears, shields, boomerangs, wooden axes, and waddies or clubs. The Botany Bay natives had bows and arrows. These are uncommon. In some portions of Australia the spears are pointed with flint or stone heads and barbs, and the natives in some places use flint knives and stone hatchets or tomahawks, the heads of which are fixed into cleft sticks, and secured with a rude kind of cord, firmly kept together by some resinous substances. On the seashore canoes made of bark are commonly used for fishing, but only where the indigenous trees are large and abundant, and access to the beach is easy. The languages, or rather the

dialects, which are or were in use in those portions of the country which have been opened out by the progress of settlement, afford strong presumptive evidence of a common origin." The natives of Northern Queensland are fierce and bloodthirsty, and in the neighbourhood of the Palmer River and Hodgkinson Diggings and farther north have sacrificed many lives, particularly of the Chinese. In physique they far surpass the aborigines of the south, though in intelligence there is little to choose between them, the Australian blacks occupying probably the lowest position of the whole human family. The original inhabitants of New Zealand, or Maoris, as they are called, are a different class of beings altogether; they are intelligent, apt to learn and imitate, and have great natural powers of perception; they are, however, vain, avaricious, and ferocious. Most of those who live near the towns are wholly civilised, while those who live in the bush in the North Island still adhere to their native language, manners, and mode of life. According to the census taken in February, 1891, they totalled 41,993—22,861 males, 19,132 females. The late Mr. Thomas Worsnop, J.P., Town Clerk of Adelaide, compiled a valuable treatise on the prehistoric arts and works of the Australian Aborigines. This has been recently published in Adelaide. Copies can be obtained from the Assistant Secretary of the South African Branch of the Royal Geographical Society of Australasia, Adelaide.

Climate.—The climate of the continent, taken as a whole, is healthy and well suited to Europeans. It is generally very dry and free from malaria. It is, however, subject in summer to hot winds and periodical droughts, and in winter to heavy rains. The seasons are the reverse of those in England, December being midsummer and June midwinter. In the northern part of New Zealand there are regular wet and dry seasons, as in the tropics; the middle portion is fine and mild, but in the southern—Otago and Southland—a great quantity of rain falls, and there is snow and ice in winter. The Colony of Tasmania has an exceedingly genial climate. The spring and winter time of all the colonies is generally most enjoyable, but the temperature during the summer months is high, and the heat is often felt to be oppressive. It is believed that the rainfall is greater on the eastern than on the western side of the continent.

Minerals and Products.—The staple productions of Australasia are gold, silver, copper, tin and other metals, wool and other pastoral products, sugar, grain, and meat. Gold was first discovered in New South Wales in May, 1851. Since then it has been found, more or less, in all the Australian colonies, especially Victoria, Queensland, New Zealand, and Western Australia. It has been estimated that one-third of Victoria contains gold-bearing rocks. These rocks occur also throughout the eastern side of New South Wales, farther north in Queensland, and scattered over the middle and north-western part of the Middle Island, and the north-eastern part of the North Island of New Zealand. The importance of the gold industry in Australasia is best indicated by the fact that 102,957,352 ounces, were raised between 1851 and 1899, and the estimated value of this would be about £399,784,745. The quantity produced during 1899 was 4,438,140 ounces, valued at £16,174,426.

Western Australia has again eclipsed Victoria in the amount of gold produced, with 1,643,877 ounces, value £6,246,733; Queensland comes next, 946,894 ounces, value £2,838,119; Victoria, 854,500 ounces, value £3,418,000; New South Wales, 496,196 ounces, value £1,751,815; New Zealand, 389,558 ounces, value £1,513,173; Tasmania, 839,992 ounces, value £327,545; South Australia with Northern Territory, 23,123 ounces, value £79,041.

There are extensive coal-fields in New South Wales, New Zealand, and Queensland. Coal is also found in Victoria and Tasmania in small quantities. The quantity raised during 1899, in New South Wales, was 4,597,028 tons, valued at £1,325,799; Queensland (value), £175,715; Tasmania (value), £17,008; New Zealand (value), £487,617; Victoria (value), £113,522; Western Australia (value), £25,951. South Australia and Tasmania are known for their rich copper mines. Tin mines of great value have been opened in Queensland, particularly in the north, in the neighbourhood of the Wild River, and in Northern New South Wales and Tasmania, and deposits of iron ore have been found in New South Wales, Tasmania, and New Zealand. Other valuable ores and minerals have been discovered, as well as diamonds and precious stones, in different parts of the continent and islands.

Wool, however, is the general and great staple trade of Australasia, and forms its largest export. For the year 1899 New South Wales alone produced and exported or used for home consumption 271,864,306 lbs., value £8,361,721, and the excess of exports over imports for the seven colonies was 712,539,200 lbs., valued at £23,488,526. For the growth of wool of excellent quality the Australian pastures are unrivalled. In all the colonies, except perhaps, the districts within the tropics, and some parts of Western Australia, sheep depastured on the natural grasses improve in a remarkable manner. The value of exports of domestic produce, as per customs return for 1899, were New South Wales, £19,221,854; Victoria, £14,038,600; Queensland, £11,697,139; South Australia, £4,101,081; Western Australia, £6,793,946; Tasmania, £2,557,315; New Zealand, £11,799,740; total, £70,209,675

The sugar industry, which, during recent years had been under considerable depression, particularly in Queensland, owing to the difficulty of getting suitable labour, the low price of the article, and to the competition of the beet product, is somewhat reviving. On Feb. 12, 1892, Sir Samuel Griffith issued a manifesto advocating the reintroduction of Polynesian labour into Queensland, and shortly after, the "Pacific Island Labourers (Extension) Bill" became law. The Act fully provides for the prevention of a recurrence of former abuses, and the industry is quickly assuming large proportions under the cheap labour of the Pacific Islanders which can now be readily obtained. For the year 1899, 1,176,466 tons of sugar cane were obtained in Queensland, from 110,657 acres. For the year ending June 30, 1899, 170,509 tons of sugar cane were produced in New South Wales, from 22,517 acres, and the value of sugar and molasses exported from Australasia for 1898 amounted to £1,443,659, and raw sugar, £361,786.

The net export of butter to countries outside Australasia in 1898 was 32,246,445 lbs., of a total value of £1,226,621; and of cheese, 4,799,155 lbs., of a value of £81,278. The net export of butter (1898), from Victoria, 17,414,654 lbs.; New South Wales, 7,759,421 lbs.; Queensland, 942,529 lbs.; South Australia, 87,249 lbs.

The cereals and maize are extensively cultivated. Barley and oats are generally grown for making hay, but lucerne is mostly preferred. Potatoes yield abundantly. The native fruits are few and unimportant, but nearly all the valuable fruit-trees of Europe, and many belonging to the semi-tropical and tropical climates, have been introduced with great success; and luscious fruits, beautiful flowers, and good culinary vegetables prevail all over the colonies. In Fiji very fine cotton is raised. Tobacco is grown by the settlers in many parts, but is mostly used for sheep-washing, not yet being able to compete with the American product. The indigenous trees of Australia are of great variety and abundance, and the timber they yield is strong, intensely hard, durable, admirably adapted for constructive purposes, and, in many cases, beautiful of grain. Palms, cycads, and ferns grow in some parts, and flax abounds in New Zealand.

Zoology.—The indigenous fauna of Australia is not so restricted as has been sometimes supposed, and in some respects is quite unique in its character—the marsupials forming the principal group of its mammalia, being nowhere else found, except in the opossums of the American continent. There are two genera of monotremes, the *ornithorhynchus paradoxicus*, known as the platypus or duck mole, and the echidna, also known as the porcupine anteater. At a rough estimate there are 110 kinds of marsupials (of which the kangaroo and the opossum are the best known varieties; others being the wombat and native bear), twenty-four varieties of bats, one dog (the dingo or warragal), thirty species of rats and mice, and a number of seals, dugongs, and whales, which, inhabiting the ocean, are not restricted to Australia. The marsupial animals, which are now extinct in almost every other part of the world, are considered to be the oldest mammals known. Fossil remains prove that their predecessors in ages past grew to enormous size, rivalling that almost of the rhinoceros.

It has been estimated that there are upwards of 630 different species of birds, the largest being the emu or Australian ostrich, and the smallest the wren. Peculiar to the country are the black swan, the honeysucker, the lyre bird, the bush turkey, and others. In variety and brilliancy of plumage the Australian parrot tribe will compare with those of any part of the world. Snakes are very numerous, and though not of large size, are very venomous in character; there are upwards of sixty different species; the largest of them is known as the carpet snake; the most dangerous are the black, copper-headed, and diamond snake. Other reptiles are lizards, which, in the case of the iguana, attain to a large size; about 140 different species have already been enumerated. In the rivers of Northern Queensland and other parts of North Australia, crocodiles, locally called alligators, abound. In the insect world, Australia occupies a foremost position, whether as regards size, number, peculiarity, or activity, the latter quality being conspicuous in the mosquito, and destructiveness in the white ant.

Shipping.—(Subsidised). The lines of subsidised steamers, carrying mails between Great Britain and Australia, are:—Peninsular and Oriental Co., the Orient Co., the Union Co. of New Zealand, the Canadian Australian Co., the Messageries Maritimes Co. and the North German Lloyd Co.

Between Great Britain and New Zealand, the steamers of British India Co., Union Co. of New Zealand, the New Zealand Co., Shaw Savill & Albion Co.

The steamships of the Peninsular and Oriental Co., and of the Orient Co. arrive and depart at intervals of a fortnight alternately, making a weekly service. The Union Co. of New Zealand, *via* San Francisco and the Canadian Australian Co., *via* Vancouver, run every four weeks, and afford a fortnightly service with America. The French mail steamers *via* Marseilles, and German boats *via* Bremen and Naples also carry mails at four-weekly intervals.

TABLE SHOWING THE NUMBER AND TONNAGE OF VESSELS ENTERED INWARDS FOR EACH COLONY DURING 1899.

Colony.	Total.	
	No.	Tonnage.
Victoria	2,024	2,662,792
New South Wales	3,219	3,468,591
Queensland	662	730,450
South Australia	1,020	1,708,556
N. Territory	72	94,503
West Australia	685	1,333,052
Tasmania	798	663,102
New Zealand	609	811,183
Total	9,088	11,472,286

TABLE SHOWING THE NUMBER AND TONNAGE OF VESSELS ENTERED OUTWARDS FOR EACH COLONY DURING 1899.

COLONY.	Total.	
	No.	Tonnage.
Victoria	2,031	2,678,663
New South Wales	3,199	3,526,960
Queensland	630	733,613
South Australia	1,025	1,720,810
N. Territory	73	94,982
West Australia	668	1,305,596
Tasmania	755	655,601
New Zealand	604	807,866
Total	8,985	11,523,848

Agriculture.—By the returns collected for 1899, 10,465,974 (not including grass and fallow) acres of land were then under cultivation. The principal crops with their produce, were :—Wheat, 5,884,116 acres, produce, 48,580,193 bushels ; oats, 768,641 acres, produce, 24,520,541 bushels ; maize, 353,918 acres, produce, 9,238,623 bushels ; other grain crops, 179,030 acres produce 3,849,238 bushels ; potatoes, 176,381 acres, produce, 629,275 tons ; hay, 1,658,483 acres, produce, 1,812,453 tons ; extent of land under other tillage, 1,251,266 acres. Sugar cane, 133,174 acres, produce, 1,346,975 tons ; vines, 60,965 acres, wine made, 2,758,362 gals. In New Zealand and Tasmania the average yield all the cereal and root crops is considerably higher than in the other colonies, owing to their colder climates. In addition to the crops above enumerated, large areas are utilized for the growth of tobacco, arrowroot, cotton, bananas, the sugar-cane, and other productions not cultivated in the United Kingdom. The aggregate live-stock returns of the seven colonies for 1899 were 1,932,247 horses, 11,049,065 cattle, 93,645,309 sheep, and 1,051,642 (1898) pigs. New South Wales has the largest amount of stock and Tasmania the smallest.

Railways and Tramways.—The railway system now traverses all the colonies, and railway extension is continually going on. To the 30th of June, 1899, there were 15,266 miles of Government and private railway open. Two main trunk lines from seaboard to border cross Victoria, and the metropolitan cities of Melbourne, Sydney, Brisbane and Adelaide are in railway communication. In May, 1883, the Victorian and New South Wales lines were connected respectively at Wodonga and Albury, and but for the difference of gauge in the two colonies, which may yet be remedied, a passenger could travel through, without change of carriage, from Melbourne to Sydney, or *vice versâ*. The journey is now done under nineteen hours. The Queensland Railway is completed to the border of New South Wales, and the New South Wales lines are also completed to the Queensland frontier, the journey between Brisbane and Sydney occupying about 34 hours. Three trunk lines start from the Queensland coast and stretch for many miles towards the West. In Tasmania, Launceston in the North and Hobart in the South are connected by a line that intersects the island, and from this there are branches eastward and westward. The New Zealand lines connect all the capitals of the provincial districts. In the perhaps not very distant future the iron road may be carried across the entire continent to Port Darwin in the Northern Territory, as the line in South Australia has been extended, as far as Oodnadatta, and a line southward from Palmerston runs as far as Pine Creek. In Western Australia, Albany, York, and Perth are in communication, and the last-named place is now also connected with Geraldton, and with Coolgardie, and further lines are being projected. All Victorian lines have been constructed upon a 5ft. 3in. gauge. South Australian lines are mostly on a 3ft. 6in. gauge, but the colony has also extensively used the 5ft. 3in. In New South Wales a 4ft. 8½in. gauge has been chiefly adopted. Queensland, Western Australia, Tasmania, and New Zealand have all a gauge of 3ft. 6in. A conference has lately been held to report on a scheme, for a uniform gauge on all the railways and the Commissioners were of the opinion that the 4ft. 8½in. gauge should be adopted throughout New South Wales, South Australia, and Victoria. Proposals have been made to construct another line of railway between Adelaide and Sydney, in order to place the two capitals in direct communication and independent of the route *viâ* Melbourne, and a company was formed to extend the Tasmanian, Emu to Bischoff railway, through the west coast giving through communication *viâ* Zeehan to Strahan and Mount Lyell, thereby opening up large mineral districts. The company have taken over the lease of the Emu Bay to Bischoff railroad for ninety-nine years.

In the cities of Sydney, Melbourne, Adelaide, Brisbane, and Hobart and some of the towns of New Zealand, the tramway system is in full operation, and is extensively patronized by the public. The traction power is steam motors, cable, and horses, the first-named being chiefly used in Sydney ; the second in Melbourne.

Electric Telegraphs, and Postal.—The number of miles of telegraphic wire in use in 1898 was 121,467 and 765 miles of cable ; the number of miles of line open was 53,836. Each colony, including Western Australia by the extension of the Coast line *viâ* Eucla, Tasmania, by the cable submerged in April, 1869, and New Zealand by the laying of the Submarine Cable during 1876, is linked to the other. Three cables afford telegraphic communication with Great Britain. In 1893, the Governments of Queensland and New South Wales adopted the plans of the Société Française des Télégraphes Sousmarins for laying a submarine cable between Queensland and Vancouver; Queensland and New South Wales with France guaranteeing a subsidy of £12,000 per annum. The Victorian Government protested against this, as negotiations had been on foot for some time with regard to laying a British cable across the Pacific to North America, and in this the Colony was supported by New Zealand and Tasmania. The laying of the cable, however, was proceeded with, and the first section, from Queensland to New Caledonia, was completed on October 16, 1893. The cable is to be be laid from New Caledonia *viâ* Fiji, Samoa, Fanning Islands, and Honolulu.

It has been proposed, all along, that a Pacific Cable shall be laid which shall be within the sphere of British control, and the agitation for the scheme has been intensified since the commencement of the French Cable. At the Intercolonial Postal and Telegraph Conference held at Wellington, New Zealand, in March, 1894, the matter was considered by the Postmasters-General of the various Colonies, and a motion (which was eventually carried) was put as follows:—"That, considering the important interests involved, both of a national and commercial character, in the establishment of the Pacific cable, the representatives of the respective Colonies recommend their Governments to consider the desirableness of entering into a guarantee with the other countries interested for a period not exceeding fourteen years, and to guarantee the interest at four per cent. on a capital of not more than £1,800,000 to any Company undertaking the laying of the Pacific Cable, the tariff not to exceed 3s. per word for ordinary telegrams, 2s. for Government telegrams, and 1s. 6d. on Press telegrams to and from Great Britain and the Colonies : and that the United Kingdom be asked to join the guarantee, the routes to be either of the following :—Brisbane to Ahipara Bay in New Zealand, Suva, Apia, Fanning Island, and Sandwich Islands and thence to Vancouver ; or from New Zealand to Suva, Apia, Fanning Island, and Sandwich Islands to Vancouver." By this route the proposed cable would pass, with the exception of Samoa and the Sandwich Islands, entirely through British Territory. The matter was fully discussed at the Ottawa Conference, and the Canadian Government invited and obtained tenders for the laying of such a cable across the Pacific. It was again brought up at the Postal and Telegraphic Conference, held in Hobart in February, 1895, when a resolution was adopted to the effect that "the Conference reaffirms the desirableness of the construction of a Pacific Cable to connect the Australasian Colonies and Canada, and in view of the ascertained practicability of the scheme, respectfully urges upon the various Colonial Governments, that steps be taken for the furtherance of the project at the earliest opportunity."

A Commission, whose object was to obtain the fullest evidence upon the whole subject of the Pacific Cable, was held at the Colonial Office in London towards the close of 1895, and in January, 1896, the Pacific Cable Conference in Sydney decided that the route of the projected cable shall be from Vancouver to Fanning Island, thence *via* Fiji to Norfolk Island from whence one branch will go to Brisbane and the other to some north point on the North Island of New Zealand. The tender for the construction of the cable, which is to be completed within two years, has been accepted by the committee (*see* page 676).

The Telephonic Exchange is largely employed in all the principal cities of Australasia. In 1898, Victoria had 10,541 miles, of telephone wire in use, 164 miles aerial cable, 9,792 miles underground ; New Zealand had, March 31, 1899, 5,803 miles South Australia, 1898, 3,073 miles ; Western Australia, 1898, 2,099 miles ; Tasmania, 705 miles, and Queensland, 1,334 miles.

Telegraph stations, post-offices, money-order offices, and savings banks, are to be found in every place of any importance.

Banks.—In January, 1899, there were twenty-two banks of issue, operating in Australasia (many doing business in more than one colony), eleven in Victoria, thirteen in New South Wales, eleven in Queensland, eight in South Australia, six in Western Australia, four in Tasmania, and five in New Zealand.

Savings Banks.—In connection with the Post Office, or under other Government auspices, there are Savings Banks in nearly every town in Australasia, where sums of money from one shilling upwards can be safely deposited and easily withdrawn at short notice, the interest varying from 3 to 5 per cent., according to the Colony. There is a limit to the amount of an interest-bearing deposit, varying from £100 to £250 in the different Colonies. In 1899-00, the total number of depositors was 1,104,422 ; the amount remaining on deposit was £34,121,635, the average amount to the credit of each depositor being £30 18s.

The Press.—There are in the colonies nearly a thousand newspapers, including magazines and small class publications. In Melbourne and suburbs alone about 150 newspapers or magazines are published. The leading dailies, among which may be mentioned the *Sydney Morning Herald*, the *Sydney Daily Telegraph*, the *Melbourne Argus*, the *Melbourne Age*, the *South Australian Register*, the *South Australian Advertiser*, the *Hobart Mercury*, the *Brisbane Courier*, the *Brisbane Telegraph*, the *New Zealand Herald*, the *New Zealand Times*, the *Lyttelton Times*, the *Auckland Star*, and the *Otago Daily Times*, in size, appearance, and contents will compare favourably with the best English papers. For many Saturdays in succession the *Sydney Morning Herald* has been issued as a twenty-four page paper, and sometimes as a twenty-six page paper, while the *Melbourne Age* has now a reputed daily circulation of considerably over one hundred thousand. The leading weekly papers, comprising the *Australasian*, the *Leader*, the *Weekly Times*, the *Sydney Mail*, the *Town and Country Journal*, the *Adelaide Observer*, the *South*

Australian Chronicle, the *Tasmanian Mail*, the *New Zealand Mail*, the *Canterbury Times*, the *Otago Witness*, and the *Queenslander* are remarkable for their cheapness, volume, variety of contents, and the enterprise with which they are conducted, and also for the quality of their illustrations. The first-named newspaper cannot be bettered in the United Kingdom as a family, sporting, literary and agricultural newspaper; the *Sydney Mail* and the *Town and Country Journal*, both of which are well illustrated, are also of exceptional merit; while the *Queenslander* is one of the handsomest journals published. Society papers may perhaps be considered as represented by the *Sydney Bulletin*, the *Melbourne Punch*, *Table Talk*, *Critic*, and *Sun*. Personalities, sensational articles, social topics and gatherings, and vigorous "smart" writing characterize them, and secure a very large circulation. Finance and Insurance are represented by the *Banking and Insurance Record* and the *Australian Financial Gazette and Insurance Chronicle*. Special local editions of the *Illustrated London News*, *Review of Reviews*, *Sketch*, and other well-known periodicals are now published in Melbourne.

Public Libraries.—In the cities of Sydney, Melbourne, Hobart and Wellington are free libraries, where books can be read at all hours of the day, neither ticket nor recommendation of any kind being required, and from some of them books can be had for home perusal, through the medium of the Lending Library. These reading privileges are largely availed of and greatly appreciated. The Melbourne Institution will compare favourably with any similar establishment in the world. In nearly every township in Australia and New Zealand, a Public Library, Mechanics' Institute, or School of Arts is to be found, well supplied with the literature of the day, the annual subscription to which averages about twenty shillings.

Religion.—There is no State Church, though, as in England, as regards numbers, the Episcopalians are the dominant body. Australia and New Zealand are divided into twenty dioceses, namely, Perth in West Australia; Adelaide in South Australia; Tasmania; Melbourne and Ballarat in Victoria (2); Sydney, Goulburn, Bathurst, Grafton and Armidale (together), Newcastle and Riverina in New South Wales (6); Brisbane and Northern Queensland in Queensland (2); also a Coadjutor Bishop; Auckland, Christchurch, Dunedin, Nelson, Waiapu, Wellington, and Melanesia in New Zealand (7). Sydney is the oldest and Metropolitan See, and originally included the whole of Australia. The Hon. James Campbell left an estate in Fiji, valued at £10,000, to found a Church of England Bishopric in the Islands. The scheme has, however, practically lapsed owing to the fall in the value of island property. Next in number to the Episcopalians are the Roman Catholics. The Church of Rome in the Colonies is under the government of a Cardinal at Sydney; Archbishops at Melbourne, Adelaide, Brisbane, Hobart, and Wellington; and nineteen Bishops, the Bishoprics being Armidale, Auckland, Ballarat, Bathurst, Christchurch, Grafton, Northern Queensland, Central Queensland, Dunedin, Goulburn, Hobart, Maitland, Perth, Port Augusta, Port Victoria, Rockhampton, Sale, Sandhurst, and Wilcannia. The Presbyterians rank third, and Methodists fourth. Other denominations fall far below the foregoing in number; the principal of them in numerical order at the last census, were Baptists, Congregationalists, Lutherans and German-Protestants, Salvation Army, and Jews. There are also several smaller sectarian bodies, and a large number of Mahometans, Confucians, and Pagans.

Education.—In educational matters the Colonies are fully alive to their responsibilities and duties, the children being taught, either wholly or partially, from the State funds of each province. The leading principles of public education throughout Australia are as follows:—It is free, or very nearly so; it is compulsory; and it is secular, though not in all cases, to the absolute exclusion of Bible reading. With respect to the education of adults, New Zealand stood first in 1891, but as regards children, Victoria was much in advance of all the other Colonies both in reading and writing. At the close of 1898 the number of State schools throughout the Colonies was 8,065, with 17,120 teachers and 873,125 scholars. The average daily attendance of scholars was 507,283, who were taught by 17,120 teachers, 7,406 male, 9,714 female. The total cost to the Colonies of this State education was £2,113,377—£2,012,922 contributed by the State, and £100,453 fees paid by scholars. Cost per scholar in average attendance, Western Australia, £5 1s. 10d.; New South Wales, £4 8s. 2d.; Victoria, £4 8s. 5d.; Tasmania, £3 15s. 3d.; New Zealand, £3 18s. 7d.; Queensland, £3 10s. 0d.; South Australia, £3 9s. 10d. In all the Colonies a separate department, under a Minister of the Crown, controls the teaching machinery. Secondary education is provided for by numerous Colleges, Grammar and High Schools, some of which are subsidized out of the State funds and others, particularly the Melbourne Schools, are maintained by denominational enterprise. In connection with several of these are exhibitions, bursaries, and scholarships of various kinds and values. Higher education is also amply provided for by the Universities of which there are now five, namely, Sydney, Melbourne, Adelaide, New Zealand, and Otago, each of which (with the exception of the last) has power to confer degrees which have equal value with those of the Home Universities. Arrangements have been made for the admission of one cadet from each of these Universities to the Royal Military College at Sandhurst. Four cadetships are given by the Admiralty authorities to sons of gentlemen in the Colonies on the recommendation of the Secretary of State for the Colonies. Three engineer studentships in Her Majesty's dockyards will in future be given annually to sons of gentlemen in the Colonies on the recommendation of the Secretary of State for the Colonies. These appointments are subject to nominees passing the qualifying examination held by the Civil Service Commission. Technical education is having attention given to it. In connection with the Public Library at Melbourne, there is a school of technology, and there is a Technical College in connection with the School of Arts at Sydney, where for very small fees any lad or workman can attend lectures and courses of practice in the laboratory, in chemistry, metallurgy, mining, and various matters in connection with manufactures and technology. An institution on somewhat the same lines is now in operation in Brisbane.

Science and Scientific Inquiry.—In nearly all the Colonies there are societies having for their chief objects the cultivation and encouragement of various branches of science and the dissemination of knowledge among their members. They hold meetings for reception of papers, communications, and discussions, and publish proceedings and transactions. The oldest of these is the Royal Society of New South Wales. The Royal Geographical Society of Australasia has a large number of members; branches have been founded in New South Wales, Victoria, South Australia, and Queensland. Explorations have been carried on under the auspices of the Society by Charles Winnecke and David Lindsay, in Central and Western Australia, resulting in valuable pastoral and mineral discoveries. A recent and highly successful Scientific Expedition to the MacDonnell Ranges, promoted by Mr. W. A. Horn, has also added considerably to the knowledge of the interior. Valuable explorations have been effected in New Guinea, by the Rev. James Chalmers, Rev. Dr. McFarlane, H. O. Forbes, Capt. Everill, Capt. Strachan, Theodore F. Bevan, and Sir William Macgregor. Botanical science has some of its ablest exponents in Australia; among them may be mentioned the names of the late Baron Sir Ferd. Von Mueller, K.C.M.G., of Melbourne; Dr. Schomburgk, of Adelaide; Charles Moore, of Sydney; and F. M. Bailey, of Brisbane. In all the capitals, and very many of the larger towns, botanical gardens of considerable area are maintained at the expense of the State or from local funds. The museums in the larger cities, among which those at Melbourne and Sydney are the most extensive and the richest in geological, mineralogical, and natural history specimens, are also maintained at the public expense. They are presided over by curators of high reputation. Astronomical science is by no means neglected, there being at the present time in the cities of Melbourne, Sydney, and Adelaide "well equipped" observatories maintained by the Governments of the respective Colonies, which are devoted to astronomical, meteorological, and allied physical investigations, while smaller institutions of the same class exist in New Zealand, in Queensland and in Perth. The observatories at both Melbourne and Sydney are furnished with first-class astronomical instruments, including transit circles and powerful telescopes—that at Melbourne possessing one of the giant telescopes of the world, known as the "Great Melbourne Reflector," which has an aperture of four feet. Meteorological observations are methodically carried out more or less extensively in all the Colonies. In New Zealand a very efficient network of observing stations has been established. In order to increase the knowledge of Australian meteorology, and to supply promptly to those interested information of the weather along the coast-lines and neighbouring seas, as well as over the interior, a system of weather telegram exchanges between Sydney, Melbourne, Brisbane and Adelaide has been in operation for some years, the results of which are published in each city every day, but in different modes—by weather-chart in Sydney, weather-bulletin in Melbourne, and by a combination of the two in Adelaide and Brisbane, the reports at the last place being very exhaustive. Western Australia also shares in this work, and observations extending from King George's Sound eastwards to Cape Howe, and thence northwards to Cooktown, are published every day.

Naval and Military.—The question of defence is continually forcing itself upon the notice of the Colonists. Principally from the suggestions of Major-General the late Sir William Jervois and the late Sir Peter Scratchley, who were engaged for the purpose, a report on Colonial defences generally was prepared, and now most of the capitals are strongly fortified seawards, the batteries defending Port Jackson being on a very extensive scale. Landwards the principal dependence is placed upon the volunteer and defence forces, which in each of the Colonies are now numerically strong, with the formation of a superior class of soldiery. Out of the volunteers has been embodied the nucleus of a small standing army, with most of its branches under the name of Permanent, Defence, or Militia forces, which at short notice can be available for active service. During the Soudan War the Colony of New South Wales offered the Home Government the services of a detachment of its forces to assist the British troops. This offer was accepted, and in a very short time six hundred men fully equipped were despatched and landed at Suakim, and took part in the campaign of 1885. The imminence of war with Russia about that time stimulated all the Colonies to increased effort to self-defence. During the war with the Transvaal great patriotism was shown by all the Colonies, and contingents of volunteer troops were dispatched to South Africa to assist the mother country, and did good service. Commissions have been given to several Colonials in the regular army. In 1885 the Secretary of State offered two Commissions in the Imperial army to each of the Colonies of New South Wales, Victoria, South Australia, Queensland, and New Zealand, to candidates who have served two years in the local troops. By new regulations issued in 1892, Tasmania has been granted one Commission biennially. An Australian fleet of some proportions is being built up; the Colony of Victoria has a navy of its own, the *Cerberus*, double-screw, iron armour-plated turret ship; *Countess of Hopetoun*, a first-class torpedo boat; *Childers*, *Nepean*, *Lonsdale*, three second-class

torpedo boats, *Gordon*, torpedo launch. In addition to these three vessels belonging to the Harbour Trust, *Batman*, *Fawkner*, *Gannet*, are armed as auxiliaries with breech-loading guns. Two steamers can also be armed as scouts when required for active service, and they have been fitted so as to carry quick-firing guns. New South Wales has a steam corvette, the *Wolverene*, and four torpedo launches; South Australia has a steel cruiser, the *Protector*; Queensland has three gunboats, the *Gayundah*, *Otter*, and *Paluma*, a torpedo boat, and an armed tender; Tasmania a torpedo boat and New Zealand four torpedo boats. Some of the hopper barges attached to the dredges have also been fitted to carry guns when required. It was felt that these scattered, and to a certain extent disunited, forces would be an insufficient defence for the protection of so extended a sea coast as Australia and New Zealand, and in 1887 an agreement was drawn up between the Imperial and Colonial Governments for increasing the present naval defences by establishing a force of seagoing vessels. This fleet was to consist of five fast cruisers, as represented by the *Archer*, and two torpedo gunboats of the *Rattlesnake* class. Of these, three cruisers and one gunboat are to be kept always in commission, the remainder being held in reserve in Australasian ports ready for commission whenever occasion arises. These vessels were to be built, equipped, and manned by and at the expense of the Imperial Government, the Colonies paying interest at 5 per cent. on the prime cost of the vessels, such sum not to exceed annually £35,000, and also paying the actual charges of maintaining these vessels, (such further sum not exceeding £91,000), which would be under the sole control of the naval commander-in-chief of the fleet on the Australian station. The agreement was for a term of ten years.

The boundaries of the Australian Naval station have been modified by the Pelew Islands, St. Andrew's and the adjacent islands being included within the China station. Since July 1, 1885, the north boundary of the Australian station has been defined as follows:—From 95° E. Long. by the parallel of 10° S. Lat. to 130° E. Long.; thence north to 2° N. Lat., and along that parallel to 136° E. Long.; thence north to 12° N. Lat., and along that parallel to 160° W. Long.; and on the south by the Antarctic Circle, including the numerous groups of islands situated within those limits. The station is under the command of a Rear-Admiral. In the station is included the Colony of Fiji. Sydney is the rendezvous and headquarters of the Australian squadron and it has been decided that it shall remain so. Spectacle Island, Port Jackson, is the naval store depôt.

Her Majesty's ships on the Australian station consist of the flagship of the Admiral (Admiral Hugo L. Pearson), and a fleet of about nine vessels, while the Australian Squadron for the protection of floating trade in Australasian waters, numbers two first-class gunboats and five cruisers.

The land forces of the colonies at end of 1898 were, regular troops, about 1,250; militia, 12 to 15 thousand; volunteers, 10,000. New Zealand had 8,500 in permanent force and volunteers. Besides these troops there are in many places rifle clubs and rifle corps (*see* military) in each colony. With a few necessary exceptions, all males in South Australia, between 18 and 45, and in New Zealand, between 17 and 55, are liable to service in case of emergency.

In March, at a conference of Australian premiers in Sydney a resolution was passed to establish a Federal cordite factory.

Revenue, Imports, and Exports.—The total revenue of the Colonies for the year 1899–1900 amounted to £34,384,932, of which £12,939,637 was raised by taxation, that is to say, by fiscal duties, stamps, and property taxes. The expenditure for the same period amounted to £33,234,641. The amount of taxation per head of the population was £2 17s. 9d.; of total revenue, £7 13s. 7d.; of total expenditure, £7 8s. 6d. The total amount of Public Debt in 1900 was £243,255,796; the average indebtedness per head of population being £53 19s. 10d. Tasmania has the smallest debt, £8,413,644 an average per head of £46 3s. 1d., and New South Wales the largest, £65,332,993, an average of £48. South Australia, including the Northern Territory, now has the largest indebtedness per head, being £70 16s. 5d.; Queensland being next with £70 7s. 9d., and West Australia following with £60 4s. 11d. Of the whole public debt of the Colonies, about £140,374,568 has been contracted for railways and tramways.

The total Exports from the Colonies for the year 1899 were recorded at £89,004,602; the total Imports at £73,310,033. The value per head of the mean population was, Exports, £19 19s. 11d. Imports, £16 4s. 11d. The value of the exports of home production was £70,209,675.

Tabulated statistics of the Australasian Colonies will be found on pages 120–125.

THE AUSTRALIAN COMMONWEALTH.

In the year 1889 through Sir Henry Parkes a conference of premiers was convened, which met in Sydney, and was attended by two representatives each from New South Wales, Victoria, South Australia, Queensland, Tasmania, and New Zealand, and one from West Australia, at which conference a resolution was passed that it would be in the interest of the Colonies to become united to the Crown, and that the premiers should take steps to induce their respective parliaments to appoint delegates to consider and decide upon a scheme of Federation.

In 1891 a convention presided over by Sir Henry Parkes met in Sydney and framed a Federal Bill, which has formed the basis of "The Act to Constitute the Commonwealth of Australia," which Act was last year passed by the British Houses of Parliament, and differs only slightly from the Bill submitted to the Colonies by referendum, clause 74 being the one over which discussion was made (*see* p. 135 of 1900 edition, and p. 135 of present issue of "Australian Handbook").

In October the Royal proclamation was made that "The Queen has been pleased by Letters Patent passed under the Great Seal of the United Kingdom, bearing date respectively the 29th October, 1900, to constitute the office of Governor-General and Commander-in-Chief of the Commonwealth of Australia, and by further Letters Patent bearing the same date, respectively, to constitute the office of Governor in each of the six States of the said Commonwealth, viz.: The State of New South Wales and its Dependencies, the State of Victoria and its Dependencies, the State of South Australia and its Dependencies, the State of Queensland and its Dependencies, the State of Tasmania and its Dependencies, and the State of Western Australia and its Dependencies.

Thus federation has become an accomplished fact, and from January 1st the once-called Colonies will be known as States.

The first Federal Parliament will be opened by H.R.H. the Duke of York as a representative of H.M. Queen Victoria, and will hold its first sitting in Melbourne, after which the Federal capital will be in New South Wales. Other British colonies will send delegates to take part in the opening ceremony.

The Federal Parliament will, by the powers vested in it by the Act, control the trade and commerce, naval and military, defence, naturalization, immigration, postal, telegraphic, and telephonic services, copyrights, currency and coinage, marriage, insolvency laws and lighthouses of the six states. After two years the Parliament must form a uniform tariff. The Federal authority will have power to borrow money, levy taxes, &c., whilst the taking over of the railways will be optional.

There are to be two Chambers, the House of Representatives (with 75 members), and the Senate. In the House of Representatives New South Wales will send 26 members, Victoria, 23, Queensland, 9, South Australia, 7, West Australia, 5, Tasmania, 5. The parliaments will be triennial. Members of both Houses will be entitled to a salary of £400 per annum.

The executive power of the Commonwealth is vested in the Queen.

The following are the officers of Commonwealth:—

Governor-General and Commander-in-Chief.—The Right Hon. the Earl of Hopetoun, P.C., K.T., G.C.M.G., G.C.V.O.

Governor of the State of New South Wales and its Dependencies.—The Right Hon. Earl Beauchamp, K.C.M.G.

Governor of the State of Queensland and its Dependencies.—The Right Hon. Lord Lamington, G.C.M.G.

Governor of the State of South Australia and its Dependencies.—The Right Hon. Lord Tennyson, K.C.M.G.

Her Majesty has been further pleased to appoint:—

Lieutenant-Governor of the State of South Australia and its Dependencies.—The Right Hon. Sir Samuel James Way, Bart, Chief Justice of South Australia.

Lieutenant-Governor of the State of Queensland and its Dependencies.—The Hon. Sir Samuel Walker Griffith, G.C.M.G., Chief Justice of Queensland.

Lieutenant-Governor of the State of New South Wales and its Dependencies.—Sir Frederick Matthew Darley, K.C.M.G., Chief Justice of New South Wales.

Lieutenant-Governor of the State of Victoria and its Dependencies. — Sir John Madden, K.C.M.G., Chief Justice of Victoria.

The following are members of the Cabinet:—

Prime Minister of the Commonwealth and Minister of State for Exterior Affairs.—Mr. E. Barton.

Attorney-General and Minister of State for Justice.—Mr. Deakin.

Minister of State for Home Affairs.—Sir W. J. Lyne.

Treasurer.—Sir G. Turner.

Minister of State for Trade and Customs.—Mr. Kingston.

Minister of State for Defence.—Mr. Dickson.

Postmaster-General.—Sir John Forrest.

Without Office.—Mr. N. E. Lewis.

COMPARATIVE STATISTICS OF THE AUSTRALASIAN COLONIES FOR THE YEAR 1898.

STATE FUNDED DEBT, 1899, IMPORTS AND EXPORTS, 1898.

* Exclusive of £11,250 overdue debentures unpresented.

† It is believed that the real origin of a considerable portion of these imports is not the United Kingdom but the Continent of Europe, and in like manner the destination of many of the exports to the United Kingdom is probably the same.

Note.—It is thought that both imports and exports are over valued in the Colonies. The following is the information for 1899 as far as available :—Imports, Victoria, £17,952,894 ; New South Wales, £25,594,315 ; South Australia, £6,884,357 ; Western Australia, £4,473,532 ; Tasmania, £1,769,324 , New Zealand, £8,739,633. Exports, Victoria, £18,567,780 , New South Wales, £28,445,466 ; South Australia, £8,388,396 ; Western Australia, £6,985,642 ; Tasmania, £2,577,475 ; New Zealand, £11,938,335.

* Maoris, who numbered 39,854 at the Census of 1896, are not included in the population of New Zealand.

† The figures for Western Australia represent the average for the last quarter of the year, and those for New Zealand the average weekly enrolment.

‡ The figures of revenue and expenditure for Tasmania are for the Calendar year, for New Zealand for the year ended 31st March, 1898, but those for the other Colonies for the year ended 30th June, 1898. A payment of £150,000 in New South Wales in reduction of the accumulated deficit has been excluded. According to Budget papers received the approximate actual revenues for 1898-9 were as follow:—Victoria, £7,391,885; New South Wales, £9,580,000 (less refunds, &c.); Queensland, £4,174,086; South Australia, £2,665,477; Western Australia, £2,478,811; and New Zealand, £5,186,428.

§ Exclusive of Temporary Loans in aid of, or in anticipation of, revenue amounting to £500,000 in Victoria; £2,327,584 in New South Wales; £244,400 in South Australia; £658,517 in Tasmania; and £730,000 in New Zealand. As a set-off against the public debt of New Zealand, there exists an accrued sinking fund amounting to £881,903.

* Including railway telegraphs in all the colonies except New Zealand; but telephone lines and wire are excluded except in the case of New South Wales. The figures for South Australia, Tasmania and New Zealand also include 37, 428 and 255 miles of submarine cable respectively.

† The figures in this column should refer to the whole area sold by auction, selected under deferred payment system, and granted without purchase during the year.

‡ The area under cultivation is exclusive of grass-sown lands in New Zealand; and land in fallow was not returned for New South Wales. For New Zealand the produce of hay, in the absence of information, has been computed at 2 tons per acre.

§ In New South Wales, 193,286 acres of maize, producing 6,064,842 bushels; and in Queensland, 102,835 acres of the same crop, producing 2,252,481 bushels, are included under this head.

‖ The numbers of live stock for Victoria relate to estimates for the year 1894.

AUSTRALASIAN STATISTICS.

The following tables show the growth of the Australasian Colonies since the year 1861, and, having been prepared with great labour and research, should be very interesting and instructive to all well wishers of the Colonies.

POPULATION, BIRTHS, DEATHS, and MARRIAGES.

Name of Colony.	Population. Census Years.				Estimated.
	1861	1871	1881	1891	1899
New South Wales	350,860	503,981	751,468	1,132,234	1,356,650

AN ACT

TO

CONSTITUTE THE COMMONWEALTH OF AUSTRALIA.

WHEREAS the people of New South Wales, Victoria, South Australia, (*), Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established: And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and Possessions of the Queen: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

Short title.

I. This Act may be cited as "The Commonwealth of Australia Constitution Act."

Act to extend to the Queen's Successors.

II. The provisions of this Act referring to the Queen shall extend to Her Majesty's Heirs and successors in the Sovereignty of the United Kingdom.

Proclamation of Commonwealth.

III. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of "The Commonwealth of Australia." But the Queen may, at any time after the Proclamation, appoint a Governor-General for the Commonwealth.

Commencement of Act.

IV. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect on and after the day so appointed. But the Parliaments of the several Colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.

Operation of the Constitution and laws.

V. This Act, and all laws made by The Parliament of the Commonwealth under the Constitution, shall be binding on the Courts, Judges, and people of every State, and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.

Definitions.

VI. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.

"The States" shall mean such of the Colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the Northern Territory of South Australia, as for the time being are parts of the Commonwealth, and such Colonies or Territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called a "State."

"Original States" shall mean such States as are parts of the Commonwealth at its establishment.

Repeal of Federal Council Act. 48 & 49 Vict c. 60.

7. "The Federal Council of Australasia Act," 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia, and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by The Parliament of the Commonwealth or as to any Colony not being a State by the Parliament thereof.

* Western Australia has since joined the Commonwealth.

VIII. After the passing of this Act the "Colonial Boundaries Act, 1895," shall not apply to any Colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act. Application of Colonial Boundaries Act. 58 & 59 Vict. c. 34.

IX. The Constitution of the Commonwealth shall be as follows:— Constitution.

THE CONSTITUTION.

This Constitution is divided as follows:—

CHAPTER I.—THE PARLIAMENT:
PART I.—General:
PART II.—The Senate:
PART III.—The House of Representatives:
PART IV.—Both Houses of The Parliament:
PART V.—Powers of The Parliament:
CHAPTER II.—THE EXECUTIVE GOVERNMENT:
CHAPTER III.—THE JUDICATURE:
CHAPTER IV.—FINANCE AND TRADE:
CHAPTER V.—THE STATES:
CHAPTER VI.—NEW STATES:
CHAPTER VII.—MISCELLANEOUS:
CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.
THE SCHEDULE.

CHAPTER I.

THE PARLIAMENT.

Part I.—General.

1. The Legislative power of the Commonwealth shall be vested n a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called "The Parliament," or "The Parliament of the Commonwealth." Legislative Power.

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him. Governor-General.

3.—There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until The Parliament otherwise provides, shall be Ten thousand pounds. Salary of Governor-General.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth: but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth. Provisions relating to Governor-General.

5. The Governor-General may appoint such times for holding the sessions of The Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue The Parliament, and may in like manner dissolve the House of Representatives. Sessions of Parliament. Prorogation and dissolution.

After any general election The Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs. Summoning Parliament

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth. First Session

6. There shall be a session of The Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of The Parliament in one session, and its first sitting in the next session. Yearly Session of Parliament.

Part II.—The Senate.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until The Parliament otherwise provides, as one electorate. The Senate

But until The Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an original State, may make laws dividing the State into divisions and determining the number of Senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until The Parliament otherwise provides, there shall be six senators for each Original State. The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained, and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

Qualification of electors.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by The Parliament, as the qualification for electors of members of the House of Representatives: but in the choosing of senators each elector shall vote only once.

Method of election of senators.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

Times and places.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

Application of State laws.

10. Until The Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

Failure to choose senators.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

Issue of writs.

12. The Governor of any State may cause writs to be issued for elections of Senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

Rotation of senators.

13. As soon as may be after the Senate first meets and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable: and the places of the senators of the first class shall become vacant at the expiration of the third year, and the places of those of the second class at the expiration of the sixth year, from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made in the year at the expiration of which the places are to become vacant.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of January following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of January preceding the day of his election.

Further provision for rotation.

14. Whenever the number of senators for a State is increased or diminished, The Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

Casual vacancies

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

Qualifications of senator.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

Election of President.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant, the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence. Absence of President.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place which thereupon shall become vacant. Resignation of senator.

20. The place of a senator shall become vacant if for two consecutive months of any session of The Parliament he, without the permission of the Senate, fails to attend the Senate. Vacancy by absence.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth, the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened. Vacancy to be notified.

22. Until The Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers. Quorum.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote: and when the votes are equal the question shall pass in the negative. Voting in Senate.

Part III.—The House of Representatives.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators. Constitution of House of Representatives.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until The Parliament otherwise provides, be determined, whenever necessary, in the following manner:—

I. A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators.

II. The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted. Provision as to races disqualified from voting.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows: New South Wales, 23; Victoria, 20; Queensland, 8; South Australia, 6; Tasmania, 5. Provided that if Western Australia is an Original State, the numbers shall be as follows: New South Wales, 26; Victoria, 23; Queensland, 9; South Australia, 7; Western Australia, 5; Tasmania, 5. Representatives in first Parliament.

27. Subject to this Constitution, The Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives. Alteration of number of members.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General. Duration of House of Representatives

29. Until The Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States. Electoral divisions.

In the absence of other provision, each State shall be one electorate.

30. Until The Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of the Parliament of the State; but in the choosing of members each elector shall vote only once. Qualification of electors.

31. Until The Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives. Application of State laws.

Writs for general election.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives, or from the proclamation of a dissolution thereof.

Writs for vacancies.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker, or if he is absent from the Commonwealth, the Governor-General in Council may issue the writ.

Qualifications of members.

34. Until The Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows:—

I. He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen:

II. He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.

Election of Speaker.

35. The House of Representative shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

Absence of Speaker.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

Resignation of member.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

Vacancy by absence.

38. The place of a member shall become vacant if for two consecutive months of any session of The Parliament he, without the permission of the House, fails to attend the House.

Quorum.

39. Until The Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

Voting in House of Representatives.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

Part IV.—Both Houses of The Parliament.

Right of electors of States.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State, shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of The Parliament of the Commonwealth.

Oath or affirmation of allegiance.

Schedule.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorised by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

Member of one House ineligible for other.

43. A member of either House of The Parliament shall be incapable of being chosen or of sitting as a member of the other House.

Disqualification

44. Any person who—

I. Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power: or

II. Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Common wealth or of a State by imprisonment for one year or longer: or

III. Is an undischarged bankrupt or insolvent: or

IV. Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth: or

v. Has any direct or indirect pecuniary interest in any agreement with the public service of the Commonwealth, otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons:

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

Vacancy on happening of disqualification.

45. If a senator or member of the House of Representatives—

i. Becomes subject to any of the disabilities mentioned in the last preceding section: or

ii. Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors: or

iii. Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in The Parliament to any person or State:

his place shall thereupon become vacant.

Penalty for sitting when disqualified.

46. Until The Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of One hundred pounds to any person who sues for it in any court of competent jurisdiction.

Disputed elections.

47. Until The Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of The Parliament, and any question of a disputed election to either House, shall be determined by the House in which the question arises.

Allowance to members.

48. Until The Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of Four hundred pounds a year, to be reckoned from the day on which he takes his seat.

Privileges, &c. of Houses.

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the Members and the committees of each House, shall be such as are declared by The Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establish ment of the Commonwealth.

Rules and orders.

50. Each House of The Parliament may make rules and orders with respect to—

i. The mode in which its powers, privileges, and immunities may be exercised and upheld:

ii. The order and conduct of its business and proceedings either separately or jointly with the other House.

Part V.—Powers of The Parliament.

Legislative powers of The Parliament.

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth, with respect to:—

i. Trade and commerce with other countries and among the States:

ii. Taxation; but so as not to discriminate between States or parts of States:

iii. Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth:

iv. Borrowing money on the public credit of the Commonwealth:

v. Postal, telegraphic, telephonic, and other like services:

vi. The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth:

vii. Light-houses, light-ships, beacons and buoys:

viii. Astronomical and meteorological observations:

ix. Quarantine:

x. Fisheries in Australian waters beyond territorial limits:

xi. Census and Statistics:

xii. Currency, coinage, and legal tender:

xiii. Banking, other than State banking; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money:

xiv. Insurance other than State Insurance; also State Insurance extending beyond the limits of the State concerned:

xv. Weights and measures:

xvi. Bills of exchange and promissory notes:

xvii. Bankruptcy and insolvency:

xviii. Copyrights, patents of inventions and designs, and trade marks:

xix. Naturalisation and aliens:

xx. Foreign corporations and trading or financial corporations formed within the limits of the Commonwealth:

xxi. Marriage:

xxii. Divorce and matrimonial causes; and in relation thereto, parental rights, and the custody and guardianship of infants:

xxiii. Invalid and old-age pensions:

xxiv. The service and execution throughout the Commonwealth of the civil and criminal process, and the judgments of the courts of the States:

xxv. The recognition throughout the Commonwealth of the laws, the public acts and records, and the judicial proceedings of the States:

xxvi. The people of any race other than the aboriginal race in any State, for whom it is deemed necessary to make special laws:

xxvii. Immigration and emigration:

xxviii. The influx of criminals:

xxix. External affairs:

xxx. The relations of the Commonwealth with the islands of the Pacific:

xxxi. The acquisition of property on just terms from any State or person for any purpose in respect of which The Parliament has power to make laws:

xxxii. The control of railways with respect to transport for the naval and military purposes of the Commonwealth:

xxxiii. The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State:

xxxiv. Railway construction and extension in any State with the consent of that State:

xxxv. Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State:

xxxvi. Matters in respect of which this Constitution makes provision until The Parliament otherwise provides:

xxxvii. Matters referred to The Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law:

xxxviii. The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia:

xxxix. Matters incidental to the execution of any power vested by this Constitution in The Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

Exclusive powers of The Parliament.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to:—

i. The seat of government of the Commonwealth, and all places acquired by the Commonwealth for public purposes:

ii. Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth:

iii. Other matters declared by this Constitution to be within the exclusive power of The Parliament.

Powers of the Houses in respect of legislation.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed law so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may if it thinks fit make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

Appropriation Bills.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

Tax Bill.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

Recommendation of money votes.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

Disagreement between the Houses.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of The Parliament, and shall be presented to the Governor-General for the Queen's assent.

Royal assent to Bills.

58. When a proposed law passed by both Houses of The Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

Recommendations by Governor-General.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

Disallowance by the Queen.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General, by speech or message to each of the Houses of The Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

Signification of Queen's pleasure on Bills reserved

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of The Parliament, or by Proclamation, that it has received the Queen's assent.

CHAPTER II.

The Executive Government.

Executive power.

61. The executive power of the Commonwealth is vested in the Queen, and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

Federal Executive Council.

62 There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

Provisions referring to Governor-General.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

Ministers of State.

64. The Governor-General may appoint officers to administer such Departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

Ministers to sit in Parliament.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

Number of Ministers.

65. Until The Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as The Parliament prescribes, or in the absence of provision as the Governor-General directs.

Salaries of Ministers.

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which, until The Parliament otherwise provides, shall not exceed twelve thousand pounds a year.

Appointment of civil servants.

67. Until The Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

Command of naval and military forces.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

Transfer of certain departments.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth, the following departments of the public service in each State shall become transferred to the Commonwealth :—

Posts, telegraphs, and telephones :

Naval and military defence :

Light-houses, light-ships, beacons, and buoys:

Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

Certain powers of Governors to vest in Governor-General.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a colony, or in the Governor of a colony with the advice of his Executive Council, or in any authority of a colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

CHAPTER III.

The Judicature.

Judicial power and Courts.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as The Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other justices, not less than two, as The Parliament prescribes.

Judges' appointment, tenure, and remuneration.

72. The Justices of the High Court and of the other courts created by The Parliament :

I. Shall be appointed by the Governor-General in Council :

II. Shall not be removed except by the Governor-General in Council, on an address from both Houses of The Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity :

III. Shall receive such remuneration as The Parliament may fix; but the remuneration shall not be diminished during their continuance in office.

Appellate jurisdiction of High Court.

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as The Parliament prescribes, to hear and determine appeals from all judgments decrees, orders, and sentences:

I. Of any Justice or Justices exercising the original jurisdiction of the High Court:

II. Of any other federal court, or court exercising federal jurisdiction: or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council:

III. Of the Inter-State Commission, but as to questions of law only:

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by The Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until The Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

Appeals to Queen in Council.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits inter se of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits inter se of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise, by virtue of Her Royal Prerogative, to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

Original jurisdiction of High Court

75. In all matters—

I. Arising under any treaty:

II. Affecting consuls, or other representatives of other countries:

III. In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party:

IV. Between States, or between residents of different States, or between a State and a resident of another State:

V. In which a writ of mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

Additional original jurisdiction

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

I. Arising under this Constitution, or involving its interpretation:

II. Arising under any laws made by The Parliament:

III. Of admiralty and maritime jurisdiction:

IV. Relating to the same subject-matter claimed under the laws of different States.

Power to define jurisdiction.

77. With respect to any of the matters mentioned in the last two sections, The Parliament may make laws—

I. Defining the jurisdiction of any federal court other than the High Court:

II. Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:

III. Investing any court of a State with federal jurisdiction.

Proceedings against Commonwealth or State.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

Number of judges.

79. The federal jurisdiction of any court may be exercised by such number of judges as The Parliament prescribes.

Trial by jury.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State, the trial shall be held at such place or places as The Parliament prescribes.

CHAPTER IV.

Finance and Trade.

Consolidated Revenue Fund.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one consolidated Revenue fund to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

Expenditure charged thereon.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

Money to be appropriated by law.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of The Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for The Parliament.

Transfer of officers.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth, and were retained in the service of the Commonwealth.

Transfer of property of State.

85. When any department of the public service of a State is transferred to the Commonwealth—

I. All property of the State, of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary.

II. The Commonwealth may acquire any property of the State of any kind, used, but not exclusively used, in connection with the department: the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes, is ascertained under the law of the State in force at the establishment of the Commonwealth.

III. The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by The Parliament.

IV. The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until The Parliament otherwise provides of the net revenue of the Commonwealth from duties of customs and of excise, not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

Uniform duties of customs.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

Payment to States before uniform duties.

89. Until the imposition of uniform duties of customs—

I. The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.

II. The Commonwealth shall debit to each State—

(*a*) the expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth.

(*b*) the proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.

III. The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

Exclusive power over customs, excise, and bounties.

90. On the imposition of uniform duties of customs the power of The Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect; but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, One thousand eight hundred and ninety-eight, and not otherwise.

Exceptions as to bounties.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of The Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

Trade within the Commonwealth to be free.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

Payment to States for five years after uniform Tariffs.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until The Parliament otherwise provides :—

I. The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State :

II. Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

Distribution of surplus.

94. After five years from the imposition of uniform duties of customs, The Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

Customs duties of Western Australia.

95. Notwithstanding anything in this Constitution, The Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth ; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such atter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher

than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

Financial assistance to States.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until The Parliament otherwise provides, The Parliament may grant financial assistance to any State on such terms and conditions as The Parliament thinks fit.

Audit.

97. Until the Parliament otherwise provides, the laws in force in any colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the colony, or the Government or an officer of the colony, is mentioned.

Trade and commerce includes navigation and State railways.

98. The power of The Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

Commonwealth not to give preference.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

Nor abridge right to use water.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

Inter-State Commission.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as The Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

Parliament may forbid preferences by States.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State: due regard being had to the financial responsibilities incurred by any State in connection with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

Commissioners appointment, tenure, and remuneration.

103. The members of the Inter-State Commission—

I. Shall be appointed by the Governor-General in Council:

II. Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of The Parliament in the same Session praying for such removal on the ground of proved misbehaviour or incapacity:

III. Shall receive such remuneration as The Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

Saving of certain rates.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

Taking over public debts of States.

105. The Parliament may take over from the States their public debts as existing at the establishment of the Commonwealth, or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the States shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

CHAPTER V.

The States.

Saving of Constitutions

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in The Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be. Saving of Power of State Parliaments.

108. Every law in force in a colony which has become or becomes a State, and relating to any matter within the powers of The Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State; and, until provision is made in that behalf by The Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the colony had until the colony became a State. Saving of State laws.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid. Inconsistency of laws.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the Government of the State. Provisions referring to Governor.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth. States may surrender territory.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by The Parliament of the Commonwealth. States may levy charges for inspection laws.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage shall be subject to the laws of the State as if such liquids had been produced in the State. Intoxicating liquids.

114. A State shall not, without the consent of The Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth; nor shall the Commonwealth impose any tax on property of any kind belonging to a State. States may not raise forces. Taxation of property of Commonwealth or State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts. States not to coin money.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth. Commonwealth not to legislate in respect of religion.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State. Rights of residents in States.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public acts and records, and the judicial proceedings, of every State. Recognition of laws, &c., of States.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence. Protection of States from invasion and violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and The Parliament of the Commonwealth may make laws to give effect to this provision. Custody of offenders against laws of the Commonwealth.

CHAPTER VI.

New States.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of The Parliament, as it thinks fit. New States may be admitted or established.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Government of territories.

Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of The Parliament to the extent and on the terms which it thinks fit.

Alteration of limits of States.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

Formation of new States.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

CHAPTER VII.

Miscellaneous.

Seat of Government.

125. The seat of Government of the Commonwealth shall be determined by The Parliament, and shall be within Territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meets at the seat of Government.

Power to Her Majesty to authorize Governor-General to appoint deputies.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

Aborigines not to be counted in reckoning population.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

CHAPTER VIII.

Alteration of the Constitution.

Mode of altering the Constitution.

128. This Constitution shall not be altered, except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of The Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if, after an interval of three months, the first-mentioned House, in the same or the next Session, again passes the proposed law by an absolute majority, with or or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it, or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such a manner as The Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of The Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

THE SCHEDULE.

OATH.

I, A.B., do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, her heirs and successors according to law. So HELP ME GOD!

AFFIRMATION.

I, A.B., do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

THE STATE (LATE THE COLONY) OF NEW SOUTH WALES.

THE STATE (LATE THE COLONY) OF NEW SOUTH WALES.

New South Wales was the name given by Captain James Cook, in 1770, to that portion of Australia discovered by him, from its real or fancied resemblance to the configuration of South Wales. The expedition, of which he was chief, left England in August, 1768, in the ship *Endeavour*, a small vessel of 370 tons, having for its primary object the observation of the transit of Venus. Accompanying Captain Cook were Mr. Green, astronomer; Dr. Solander, botanist; and Mr., afterwards Sir, Joseph Banks, naturalist.

After landing the astronomical party at Tahiti, Captain Cook shaped his vessel's head towards the South on a voyage of discovery. In September, 1769, New Zealand was sighted; and in April of the following year a point of land at the south-eastern extremity of the continent was discovered, which received the name of Point Hicks, from Lieutenant Hicks, who first saw it. From this point the course steered by the *Endeavour* was north-east; soon afterwards Cape Howe was discovered and named, and also several other prominent points on the coast. Two or three days later (about April 28th) Botany Bay was discovered, a landing effected, and possession taken in the name of the King. Several attempts were made to hold friendly intercourse with the natives, or Indians, as they are called by Captain Cook, but without avail. The *Endeavour* sailed from Botany Bay on May 6th, and at noon of that day Captain Cook records, "We were abreast the entrance of a bay or harbour, in which there appeared to be good anchorage, and which I called Port Jackson." The voyage along the coast was continued, and various points and inlets were named—Moreton Bay being named and passed on May 16th. On leaving the Eastern coast of New Holland, Captain Cook writes, "I once more hoisted English colours, and though I had already taken possession of several parts, I now took possession of the whole Eastern coast in right of his Majesty King George the Third, by the name of New South Wales, with all the bays, harbours, rivers, and islands situated upon it; we then fired three volleys of small arms, which were answered by the same number from the ship. Having performed this ceremony upon the island we called it Possession Island."

The closing of the American colonies as a place for transportation for felons caused the British Government to look abroad for another locality to serve as a penal settlement; and a suitable location on the African coast having been sought in vain, and the favourable report brought by Captain Cook of Botany Bay, decided the Government on selecting this spot as the expatriated convicts' future abode.

Towards the end of 1786 the Commissioners of the Navy advertised for a certain number of vessels to be taken up for conveying male and female felons to Botany Bay, resulting in the engagement of nine vessels.

The first fleet of ships with convicts, consisting of H.M.S. *Sirius* (frigate) of twenty guns, which had been built for the East India Company's service, and *Supply* brig (armed tender) acting as convoys; three storeships—the *Golden Grove*, *Fishburn*, and *Borrowdale*—and six transports, named respectively the *Scarborough*, *Lady Penrhyn*, *Friendship*, *Charlotte*, *Prince of Wales*, and *Alexander*, left England on May 13th, 1787, and after touching at Teneriffe, Rio de Janeiro, and the Cape of Good Hope, anchored in Botany Bay on the 20th of January of the following year, a landing being made at the spot now known as Point Sutherland (so named by Captain Cook from one of his crew, Forby Sutherland, being buried there). The expedition was under the command of Captain Arthur Phillip, a post-captain in the service. (A second captain was appointed, in the person of John Hunter, to command the *Sirius* while Captain Phillip was engaged in his government. Lieut. Henry Lidgbird Ball commanded the *Supply*.) It comprised 757 convicts, among whom were 192 women and 18 children, and also a detachment of marines, consisting of Major Ross, commandant, four captains, twelve lieutenants, twelve sergeants, twelve corporals, eight drummers, an adjutant and quartermaster, and 160 privates with forty of their wives. The live stock taken out in the ships comprised one bull, four cows, one calf, one stallion, three mares and three colts, some sheep, goats and pigs, and there were also taken plants or seeds of coffee, cocoa, cotton, banana, orange, lemon, guava, tamarind, prickly pear, rose-apple, ipecacuanha, and jalap; also fig-tree, sugar-cane, bamboo, Spanish reed, and several varieties of the vine, apple, pear, quince, strawberry, oak, and myrtle. The country in the immediate neighbourhood of the landing place was found to be utterly unsuitable for settlement, and in a short time the whole party was transferred to the more promising shores of Port Jackson (at Sydney Cove, now more commonly known as Circular Quay). The spot chosen for the settlement was "at the head of the cove, near a run of fresh water, which stole silently through a very thick wood." In the evening of the day (January 26th) the whole of the party then present were assembled at the point where they had first landed in the morning, on which a flagstaff had been erected and a Union Jack displayed, when the marines fired several volleys, between which the healths of his Majesty and the Royal Family, with success to the new colony, were most cordially drunk. The disembarkation of the troops and convicts took place on the next and following days. "The confusion that ensued will not be wondered at when it is considered that every one stepped from the boat literally into a wood." A portable canvas house, brought over for the Governor, was erected on the east side of the cove (which was named Sydney), the detachment of marines was encamped at the head of the cove near the stream and on the west side was placed the main body of the convicts. When all were landed the numbers amounted to 1,030 persons, thirty-two having died on the passage. Among the earliest of the buildings was an observatory on the western point of the cove, which was constructed by and placed under the direction of Lieutenant Dawes. In the month of April the curiosity of the new settlers was excited and gratified by the sight of an emu, which was shot, and two or three months later much excitement was caused by one of the convicts alleging that he had discovered a gold-mine, which he afterwards confessed to being an imposture, receiving one hundred lashes for his deception, and being ultimately hanged for theft.

The natives at first caused considerable trouble, and murders were of frequent occurrence, in many cases instigated by the outrages of the convicts. In April, 1789, much alarm was caused in the Settlement by the finding of numerous dead bodies of natives, whose deaths had resulted from small-pox. In September the first craft built in the colony was launched. She was called by the convicts the *Rose Hill* Packet (as she plied to and from Rose Hill or Parramatta), but from her size and clumsy construction she was better known by the title of *The Lump*.

Captain Phillip of course became the first Governor of the embryo settlement. The early difficulties of these motley settlers were occasioned by the scarcity of provisions; on several occasions the colony was almost at starvation point, and several of the convicts were hanged for stealing provisions; but in time sufficient progress was made in tilling the land to make the colonists in some measure independent of outside help. In November, 1789, the first harvest was gathered in at Rose Hill, being 200 bushels of wheat, thirty-five bushels of barley, and a small quantity of oats and Indian corn. From the Governor's farm, at Farm Cove, Sydney, about the same time were produced twenty-five bushels of barley. The early days of the settlement are stained with the records of crimes, and the historian of the time writes:—"May the annalist, whose business it may be to record in future the transactions of this colony, find a pleasanter field to travel in, where his steps will not be every moment beset with murderous robbers and incendiaries." Divine Service was first held on the shore of Sydney Cove under a tree, the Rev. Richard Johnson, the Chaplain, officiating. On December 10, 1792, Captain Phillip ceased to be Governor, and the affairs of the colony were managed (from December 11, 1792, to December 12, 1794) by Lieutenant-Governor Grose, of the New South Wales corps, to whom succeeded Captain Paterson, who ruled from December 13, 1794, to September 1, 1795. On September 7, 1795, Governor Hunter became the head of the settlement; during his rule (to September 29, 1800) and that of his successor, Captain King (to August 12, 1806), the colony greatly advanced in every way, and Sydney began to assume some of the features of a city. On June 30, 1801, there were in the settlement 5,547 persons of all descriptions, of whom 776 were children.

During the government of Captain King, a subsidiary penal settlement was formed at Newcastle, and Van Diemen's Land was colonized by the formation of settlements at Hobart Town and Launceston. About two years and a half after the arrival of the first convict ships the next transports began to arrive in the following order: on June 3, 1790, the *Lady Juliana* with 222 female convicts; on June 25, the *Surprise*, with 218 convicts and thirty officers and men of the New South Wales Corps (the storeship *Justinian* had arrived five days previously, after a short passage of only five months); on June 28, the *Neptune* and *Scarborough* arrived; from these two ships the prisoners were landed in a most unhealthy state, many dying in the boats while being transferred to the shore. It is stated that many died in irons on board the former ship, and that their deaths were concealed by their comrades for the purpose of sharing in their allowance of provisions. The captain of the vessel appears to have been a man of a cruel disposition, who was subsequently called to account in England for his treatment of his human cargo. The total number of deaths during the voyages of these four ships was 281. In June 30, 1790, the number of persons in the settlement under medical treatment was 349, on July 13 it had increased to 488. The next vessel to arrive was the *Mary Ann* transport on June 9, 1791, with 141 female convicts; on August 1, the *Matilda* arrived with 205 male convicts, "after an extraordinary passage of four months and five days." Thenceforward the arrivals of transports were frequent—to June, 1800, thirty-seven vessels in all arriving from England with about 5,000 convicts, of whom a little over one-fifth were females. On September 21, 1791, H.M.S. *Gorgon* reached Sydney Cove, and brought the public seal to be affixed to all documents. As showing the dreadful mortality in the new settlement, it may be mentioned that from January 1 to December 31, 1792, there died 482 persons, of whom 426 were convicts. In September, 1793, Captain Paterson attempted to penetrate to the Western or Blue Mountains, but without success. In 1806 (August 13) Captain Bligh, formerly Lieutenant Bligh of the *Bounty*, succeeded to the office of Governor, but after a stormy rule of a few months only, was (on January 26, 1808) deposed by a powerful section of the colonists and shipped back to England. During Governor Bligh's suspension (January 26, 1808, to December 28, 1809) the government was successively administered by Lieut.-Col. G. Johnstone, Lieut.-Col. Foveaux, and Col. Paterson. Major-General Macquarie took office on January 1, 1810, and during his twelve years' *régime* the progress

of the colony was of a steady and permanent character. To him is due the erection of numerous buildings, the formation of the roads in the settled districts, and also the construction of the road over the Blue Mountains to Bathurst, which had been settled soon after Wentworth, Lawson, and Blaxland had succeeded in making their way over this formidable barrier.

In July, 1793, the Rev. Mr. Johnson began the erection of a church under his own inspection, "at the back of the huts on the east side of the cove." The edifice was constructed of strong posts, wattle and plaster, and thatched, and its cost was computed at £40. It was opened on August 25th, 1793, and was burned down on October 1st, 1799. In March, 1794, an assistant chaplain arrived by the *William* to divide religious duties with Mr. Johnson. In 1797 the first school building was erected. The first brick church built in Sydney (St. Philip's) was consecrated on Christmas Day, 1810. On March 5th, 1803, the first newspaper was printed at Sydney, under the title of the *Sydney Gazette and New South Wales Advertiser*. It was of four pages, foolscap size, and was published, edited, and owned by Mr. George Howe, a West Indian creole, who had been a compositor in the office of the London *Times*. For twenty years it was a mere channel for giving publicity to Government documents; and it was not until 1823 that political discussion was permitted in its columns. It was first issued on Saturdays, afterwards on Sundays, and appeared regularly till the year 1843. Long prior to this, in November, 1795, a small printing-press was used for the purpose of printing the orders of the Governor. The Drama appears to have had its first beginning in January, 1796, when some of the convicts obtained permission to "prepare a playhouse," which was opened on the 16th with the play of "The Revenge." The first meeting for Roman Catholic worship was held on May 15th, 1808. The first Independent Minister, Mr. Cover, arrived in 1798. The first settled pastor, the Rev. Mr. Tarrett, arrived in 1834. The first Wesleyan Minister, Mr. Samuel Leigh, arrived in the Colony on August 15th, 1815. The pioneer of Presbyterianism, the late Dr. Lang, arrived in the year 1823.

In March, 1804, a mutiny took place, the convicts rising in force at Castle Hill, under the leadership of a man named Cunningham. They were met near Toongabbie by a detachment of the New South Wales corps, under Major Johnstone, and broke at the first fire; many were slain and their leader was captured and hanged.

Sir T. Brisbane succeeded Major-General Macquarie in the Governorship of New South Wales (December 1, 1821), and held the reins of office till December 1, 1825, when, after a short interregnum, during which Col. Stewart acted as Governor, he was succeeded by Lieutenant-General Darling (on December 19), who was Governor for nearly six years (to October 21, 1831). At the expiration of his term of service Sir R. Bourke became the viceregal representative. During his time (December 3, 1881, to December 5, 1837) the colony continued to advance, the imports grew to £1,114,805, and the exports to £682,193 annually. At the same period the estimated population was 76,793 persons, of whom 25,254 males and 2,577 females were convicts. On April 18, 1831, the *Sydney Herald* commenced its career as a four-page weekly newspaper, attaining to a bi-weekly issue in 1836, and to a daily in 1841. Sir George Gipps held office from February 24, 1838, to July 11, 1846, being succeeded by Sir Charles Fitzroy. During the Governorship of Sir George Gipps, a despatch was received from the Imperial Government, enclosing the Constitution Act, 5 & 6 Vict. cap. 76, by virtue of which a Legislative Council was constituted, partly elective, partly non-elective; electoral districts were constituted, and a tolerably liberal measure of self-government was conceded to the colony. A few months after the arrival of Sir Charles Fitzroy a despatch was received from Mr. Gladstone, then Secretary of State for the Colonies, notifying to the Legislative Council the wish that the renewal of the system of transportation should be favourably considered. This despatch threw the colonists into a state of the greatest excitement; and on the 11th June, 1849 (the ship *Hashemy* having arrived at Port Jackson on the 8th, with 212 male convicts on board), a great public meeting was held on the Circular Quay to indignantly protest against their landing, and after a severe struggle with the Governor and the Home authorities, the regulation allowing transport ships to land their convict cargoes in New South Wales was rescinded.

The inauguration and endowment of the University of Sydney, with its affiliated colleges and grammar school; the turning the first sod of the Great Southern Railway; the laying the first stone of the Fitzroy Dry Dock (Cockatoo Island); and the establishment of the Sydney branch of the Royal Mint, all took place during the administration of Sir Charles Fitzroy (August 3, 1846, to January 17, 1855); but the greatest event of his reign was the passing of the Constitution Act of New South Wales, by which the great political principles of responsible government were conceded to the Colonists.

On the 1st of July, 1851, that part of the colony called Australia Felix, or Port Phillip, lying between Cape Howe on the east, and the South Australian border on the west, and bounded by the River Murray on the north and north-east, and by a line drawn from Cape Howe to the head of that river, was separated, and became a colony of itself under the name of VICTORIA. In 1851 the discovery of gold in N. S. Wales was announced, the first gold-digger being Mr. Hargreaves, and the *locale* of the discovery Summerhill Creek, a small stream about twenty miles from Bathurst.

Sir William Denison succeeded Sir Charles Fitzroy in January, 1855, and held office till January 22, 1861. Sir John Young, afterwards Lord Lisgar, relieved Sir W. Denison, and was the viceregal representative from May 22, 1861, to Christmas, 1867. He was succeeded the following year—on January 8—by the Earl of Belmore, who however, did not stay out his full term of office, being recalled at his own request, and quitting the colony in February, 1872. Sir Hercules G. R. Robinson, K.C.M.G. (the late Lord Rosmead) was sworn into office on June 3, 1872. He began his Governorship under favourable auspices; his fondness for field-sports, and the manly character of his speeches, making him much liked by a large proportion of the community, and his departure, in the early part of 1879, to assume the Governorship of New Zealand, was cause of general regret.

On August 3, 1879, Lord A. W. F. S. Loftus became Governor in succession to Sir Hercules Robinson. The International Exhibition was a notable and fortunate commencement of his official career, concentrating, as it did, the attention of the whole civilized world, and attracting vast numbers of visitors from all parts, not a few of whom were probably amazed at the rapid strides the Colony had made towards the position of a leading nation. Other events during his term were:—The establishment of railway communication between the cities of Sydney and Melbourne, the holding of the Intercolonial Convention, which may be considered as the first practical step towards the Federation of the Colonies, and the despatch of a large body of colonial troops to assist in the operations in the Soudan.

Lord Loftus's term of office expired in November, 1885. He was succeeded on December 12th, by Lord Carrington, who made himself a great favourite with all sections of the community, and retained his popularity during the whole term of Governorship.

During Lord Carrington's stay in New South Wales he largely identified himself with the leading interests of the Colony, and displayed in various ways the natural kindness of disposition which made him a favourite with all classes. He was a warm supporter of a Federated Australia, which he believed would prove a great and powerful nation, and, while keeping to the strictest letter of constitutional law, always supported the national rights and aspirations of the Australian Colonies. On the expiration of his term of office in November, 1890, Lord Carrington was succeeded by the Earl of Jersey, whose appointment was received with much favour by the Colonists.

The principal event during Earl Jersey's term of office was the holding of the Australian Federation Conference in Sydney. At a public banquet in commemoration of the same, held in the Centennial Hall, His Excellency spoke warmly in favour of Australian federation, and subsequently displayed great interest in the progress and welfare of New South Wales and the sister colonies. Earl Jersey made himself very popular with all classes, taking a warm interest in every movement affecting the well-being and advancement of the community; but private business requiring his attention at home he resigned office in 1893, and was succeeded by Sir Robert William Duff, who held the position till 15th March, 1895, when the hand of death removed him after a painful illness, contracted during a visit to Tasmania. His Excellency's remains were accorded a public funeral on Sunday, March 17, 1895, which was attended by all classes and sections of the community. Although his tenure of office was comparatively short, yet he displayed many qualities which endeared him and his family in the hearts of the people, and numerous were the expressions of deep regret for his loss as his remains were lowered into their last resting-place in the family vault of Sir George Innes at the Waverley Cemetery. Sir Robert Duff was succeeded by Viscount Hampden, who was appointed on June 17, 1895, his administration of the affairs of State being eminently satisfactory. He left the Colony on March 5th 1899, and was succeeded at a later period by Lord Beauchamp. Sir F. M. Darley, K.C.M.G., Lieutenant-Governor, acting until his Lordship's arrival. During the year 1900 the Government despatched to South Africa three contingents of troops: The voluntary contributions of private citizens almost entirely provided for another. In addition, a Contingent of Imperial Bushmen was formed and sent at the request of the Imperial Government.

Geographical Features.—New South Wales originally embraced all the territory from Cape York, in the parallel of 10° 37′ south latitude, to South Cape in latitude 43° 29′ south, including the islands in the Pacific within this latitude, and inland to the westward as far as the 135th meridian of east longitude; these being the boundaries mentioned in Governor Phillip's commission. The erection into separate colonies of South Australia in 1836, Victoria in 1851, and Queensland in 1859, greatly reduced its dimensions. It now contains an area of 309,175 square miles, or 199,000,320 acres, being nearly three times the size of Great Britain and Ireland, or about the size of France and Great Britain united. It is larger than Sweden, Norway and Switzerland combined, and larger than any single state in Europe, except Russia. It is enclosed within the parallels of 28° 10′ and 37° 28′ south latitude, and meridians of 153° 37′ and 141° east longitude, thus extending over about nine degrees of latitude, and twelve and a half of longitude. Its position in south latitude corresponds respectively with that of Cape Colony in Africa and the lower portion of La Plata and Chili in South America. In the corresponding zone of north latitude are the South of Spain, Italy and Greece. Its greatest length is 900 miles, but averaging only 500. The greatest breadth is about 850 miles, but the average does not exceed 500 miles. Its boundaries are, on the north, the colony of Queensland, from which it is separated by Macpherson's Range, the Dividing Range, and the Dumaresq River; on the east, the Pacific Ocean; on the south, the Colony of Victoria; on the west, South Australia. The 141st meridian is the dividing line from South Australia; the 29th parallel, with an irregular line to Point Danger, divides it from Queensland; and an imaginary line drawn from Cape Howe to the nearest source of the Murray, and by the westerly

course of that river, separates it from Victoria. The boundaries of New South Wales constitute it an irregularly shaped four-sided figure, of which the southern frontier deviates most widely from a straight line.

The surface of the colony is diversified with alternate hills, valleys, and plains. A range of lofty hills runs parallel to the sea-coast, at about an average distance of thirty miles from it, and partially divides the colony, the country on the eastern side of this range being an undulating plain, intersected by numerous streams. On the western side of the range the country extends to the interior for some breadth in table-lands, still farther west it develops into vast plains, deteriorating as regards its adaptation to agricultural purposes, owing mainly to the absence of water, but the discovery that subterraneous streams abound at some depth from the surface is likely to materially alter the character of this inland country. The coast line has a total length of about 800 miles; from the sea it presents a bold and rocky appearance that bodes little good to the mariner; though in some places there are long stretches of sandy beach. Most of the headlands, capes, bays, and inlets are still known by the names given to them by Captain Cook. Along the coast are several salt-water lagoons, the entrances to which are sometimes closed to navigation after severe storms.

The surface of New South Wales may be divided into three parts: the Coast district, the Tablelands, and the Plains of the interior. The Coast district is a comparatively narrow strip of undulating land lying along the sea-coast, often not more than 35 miles wide, and sometimes less, while in other parts it widens out to an expanse of 120 miles, 60 or 70 miles being its general width. It extends back to the Dividing Range or Blue Mountains, which range divides the watershed of the colony, the fall towards the sea being generally rather abrupt. Speaking generally, this district has fine fertile soil, and is settled on throughout the whole of its area, from the north to the south. It is well watered by many fine rivers, most of which periodically overflow their banks from the rainfall in the mountains; and although these floods undoubtedly do much mischief to farmers, they cover the flat and bottom lands with a fine, rich alluvial deposit that will produce any kind of crop in abundance, and can be cropped for years without fallowing or manure. The Tablelands are a high plateau or elevated district, furrowed here and there with precipitous valleys, frequently presenting, on the seaward side, nearly perpendicular escarpments. These high lands traverse the entire length of the country, and extend westward to about the 141st meridian. The shape of the plateau is irregular. On it, at a distance of sixty or seventy miles from the coast, are found the loftiest mountains in the colony. Westward of the 141st meridian there is a gradual fall to the great plains of the interior. These plains are lightly timbered, well-watered, and clothed in favourable seasons with luxuriant verdure; they form the chief pasture lands of New South Wales.

Mountains.—The mountains extend over a large area, but their average elevation is probably not more than 3,500 feet. The principal ranges of mountains are the Interior Ranges, the Great Dividing Chain and its spurs, and the Coast Ranges. The former lie near the western boundary of the colony, and form the Western Watershed of the Darling River; the chief of them are the Grey Range, and the Stanley or Barrier Range. The loftiest elevation in the former is Mount Arrowsmith, 2,000 feet high; and in Stanley Range, Mount Lyell, about the same height. The Great Dividing Chain extends throughout the whole length of the eastern and south-eastern coast of Australia and forms the main watershed of the country. It consists of seven main branches, viz.: (1) the New England Range (highest point, "Ben Lomond," 5,000 feet); (2) the Liverpool Range (highest point, "Oxley's Peak," 4,500 feet); (3) the Blue Mountain Range (highest point, "Mount Beemarang," 4,100 feet); (4) the Cullarin Range (highest point, "Mundoonen," 3,000 feet); (5) the Gourock Range (highest point, "Jindulian," 4,300 feet); (6) the Manero Range (highest point, "Head of Kybean River," 4,010 feet); and (7) the Muniong Range (highest point, "Mount Kosciusko," 7,308 feet). This last is about 700 feet below the line of perpetual snow. All this series is connected with the Cordillera dividing the Eastern and Western Watersheds. The Coast Ranges lie on the east side of the Great Dividing Chain—and parallel to it for a very considerable distance. They generally form the edge of the elevated table land, upon which lies the Great Dividing Chain. They comprise the Northern coast range, the South coast range, and the Illawarra range. The loftiest peaks are Mount Seaview, 6,000 feet, Mount Coolungabbera, 3,712 feet, and Mount Budawang, 3,800 feet high.

The most remarkable of the isolated mountains and groups are Mount Doubleduke, Whoman, Elanie, Yarrahappini, Kiblora, The Three Brothers, Mount Talawah, Dromedary, Mumbulla, and lastly, Imlay, or "Baloon"—2,900 feet high.

Plains.—As before mentioned, the western interior of the colony, almost to the boundary line of South Australia, consists of immense level tracts of country. The principal of these are the Liverpool Plains, lying between the Liverpool and the Nundawar Range. These plains, the native name of which was Cobbon Comleroy, contain about 16,901 square miles of land. This tract was named by Mr. Oxley, the discoverer (August 26th, 1818) after Lord Liverpool, and is supposed to have been at one time the bed of an immense inland lake, with hills and ridges rising like islands, chiefly sandstone and basalt. It is for the most part sparsely watered, and for this reason unsuitable for the purposes of tillage. Another extensive plain or series of plains is known as the Monaro (Manero) Plains, or Brisbane Downs, consisting of a large tract of fine undulating pastoral country lying between the Murrumbidgee river on the west and the coast range on the east. These plains were discovered by Captain Currie and Brigadier-General Ovens in 1823. The Monaro Plains are not, properly speaking, plains, but rather a series of gently-swelling undulations, possessing rich and fertile soil, and remarkably well watered. They form a plateau of 2,000 feet above the level of the sea, and are over 70 miles in length. The geological formation is generally made up of various granite rocks, disturbing quartz-bearing slates, of which the lower portions are partly overflowed by trappean eruptions. There are also extensive plains on the Hunter River, known as South Park, and Jerry and Patrick's plains, all in a high state of cultivation, but subject occasionally to floods; and other plains near Bathurst (the Macquarie), and in the north-western part of the colony the latter mostly taken up as cattle stations.

Lakes.—The largest lake is Lake George—about 25 miles SW. of Goulburn, 25 miles in length by 8 in breadth; this is by far the most important inland lake of New South Wales; it is situated on the top of the table-land of the Dividing Range, 2,129 feet above the level of the sea, and is surrounded on its two sides by gigantic towering mountains, rising in grassy slopes from the water's edge; at the two ends of the lake the country is grassy and more level; there is no outlet for the water, which is consequently saline, from the accumulation of salt held in solution, and although unfit for human use, is freely drunk by cattle. For a long time previous to 1852 the lake was dry, but in that year, the year of the great Gundagai flood, it filled up, and has been wholly or partially full ever since; its surface teems with aquatic birds, and its waters abound with fish. Other lakes are Lake Bathurst, about 10 miles distant E. from Lake George, with an area of 8 square miles: Tarrago Lake (about 7 miles N. of Lake George); Burra Burra Lake; Lake Macquarie, about 12 miles S. of Newcastle, more correctly an inlet of the sea, being connected with it by a passage called Reid's Mistake, 20 miles long by 3 miles wide; and Lake Illawarra, about 50 miles S. of Sydney, also formed by the sea.

Rivers.—All the rivers of the Colony, with three exceptions, have their sources in the Great Dividing Chain, and flow thence into the sea by the Eastern or the Western Watershed. The great rivers of the Western Watershed are the Darling, the Lachlan, the Murrumbidgee, and the Murray, with their affluents. All these rivers unite their streams with the Murray, which flows into Lake Alexandrina in South Australia, and thence into the ocean. The estimated length of the Darling and its affluents is 1,160 miles, and the area drained is 198,000 square miles. This river is known by other names at various parts of its course; it falls into the Murray at Wentworth. The estimated length of the Lachlan is 700 miles, and it drains an area of 27,000 square miles. This river sweeps round to the west and south-west, and finally empties itself into the Murrumbidgee, flowing in the latter portion of its course through vast plains. The Murrumbidgee, rising in the Muniong range, after a course of 1,350 miles, of which about 500 are navigable, falls into the Murray, about 20 miles from Balranald. It receives the water from an area of 25,000 square miles. The Murray, which also rises in the Muniong range, not far from the source of the Murrumbidgee, flows westerly through the entire length of New South Wales, and receives almost all its western waters, draining an area of about 270,000 square miles, attaining a length of 1,300 miles before it debouches into Lake Alexandrina. The average width of the stream in the summer season is over 240 feet, and it has an average depth of about 16 feet. It is navigable, and is, in fact, navigated by small steamers as far up as Albury, a town of New South Wales, but close to the boundaries of Victoria. Both the Murray and the Murrumbidgee are connected by branches in the lower part of their course. The inland rivers flowing to the west are, at certain seasons of the year, traversed by small steamers from Lake Alexandrina, to Wagga-Wagga on the Murrumbidgee, and to Bourke on the River Darling. Tributary to these rivers are the Namoi, 600 miles in length; the Bogan, 450 miles; the Gwydir 445 miles; the Barwon, 510 miles; the Castlereagh, 365 miles; and the M'Intyre, 350 miles long. The Tumut, 80 miles in length, is a tributary of the Murrumbidgee; and the Warrego, about 100 miles in length, and Macquarie, 750 miles long, are tributaries of the Darling. The rivers on the Eastern Watershed all fall into the Pacific Ocean. The largest in the order of their length are the Hawkesbury, 330 miles, draining an area of 8,700 square miles (the Hawkesbury receives several smaller streams, and at different points bears other names, as the Wollondilly, Warragamba, and Nepean); the Hunter, 300 miles, draining a superficies of about 8,000 square miles; the Shoalhaven, 260 miles; the Clarence, 240 miles, navigable for about 70 miles from its mouth; the Macleay, 190 miles; the Richmond, 120 miles; and the Manning, 100 miles. Less than 100 miles in length are the Hastings, Karuah, Clyde, Moruya, Tuross, Bega, and the Towamba. Several of these streams are partially navigable for steamers of light draught, but have bar entrances that are more or less difficult or dangerous; all vary greatly in their volume of water in the summer and winter seasons, the Hawkesbury and the Hunter particularly fluctuating greatly, and frequently in the winter causing very disastrous floods.

Capes.—The coast is fringed by about twenty-two important Capes or Headlands. Among the principal are Point Danger, Cape Byron, the most easterly point on the continent, Smoky Cape, Cape Hawke, near the entrance to Wallis' Lake, Sugarloaf Point, Point Stephens, Cape Banks, Cape Solander, Point Perpendicular, Cape St. George, between Jervis Bay and Sussex Haven, Green Cape, and Cape Howe.

Bays.—There are about eighteen Bays and Inlets. The largest and most important of these are:—Twofold Bay in the south (formerly a whaling station) with a commodious harbour; Jervis Bay, about 150 miles to the north of Twofold Bay, having an entrance 2 miles wide, with a length of 7 miles and a breadth

of 4 miles; Botany Bay, area of about 20 square miles, but very shallow; Port Jackson, on which Sydney is situated; Middle Harbour, a northerly elongation of Port Jackson, of capacious area, but little depth of water; Broken Bay, 20 miles to the north of Sydney Heads, principally used as a harbour of refuge; Port Hunter, on whose shores is the city of Newcastle; and Port Stephens (the estuary of the Karuah river), a harbour little inferior to Port Jackson, but mainly utilized as a harbour of refuge.

Municipalities. — New South Wales contains 184 Boroughs and Municipal Districts, varying greatly in regard to size and population, with an incorporated area of 1,768,500 acres. The suburban municipalities are, of course, the most compact and populous. Balmain contains an area of 888 acres, and has a population of about 28,750. The Glebe has an area of 461 acres, with a population of 17,550. Newtown and Redfern, other suburban municipalities, have a population respectively of 20,500 and 24,000. Some of the country municipalities embrace areas of more than 100 miles; Central Illawarra, for instance, has 118 square miles; and Cudgegong, 192 square miles. The rates are levied on nine-tenths of the annual value of improved property, and upon 5 per cent. of the capital value of the fee-simple of all unimproved lands, except in Sydney, where the maximum percentage is 6 per cent. In addition to the general rates, special rates may be levied for sewage, water, gas, free infant schools, and free libraries. But the rates, general and special, are limited to 2s. in the £ of the assessment, with 6d. more for street watering, and in only one instance, that of the City of Sydney, in 1899 did the ordinary rate exceed one shilling in the pound, though many of the Boroughs had a special rate ranging from 1d. to 1s.

The total annual value of ratable property in all Municipalities throughout the Colony in 1900 was £7,412,100, and the capital value £121,213,800; the fair average rental of all ratable property amounted to £7,412,100. A Municipal Association was established in 1883 for the purpose of watching and protecting the interests, rights, and privileges of Municipal Corporations, and promote the efficient carrying-out of Municipal Government throughout the Colony. One hundred and forty-one Municipalities subscribe; the Municipality of Sydney is not represented in the Association.

Land Board Districts —Previous to January 1, 1885, when the Crown Lands Act of 1884 came into operation, the administration of the Land Laws was directed wholly from Sydney, where all the officers (with the exception of Local Crown Land Agents, and Surveyor) were located. Under the Act of 1884, decentralization was introduced by the establishment of Local Land Boards and District Surveyors' offices. The Colony, for this purpose, is divided into 13 Land Board districts, as follows:—Armidale, Bourke, Dubbo, Forbes Goulburn, Grafton, Hay, Maitland Moree, Orange, Tamworth, Wagga Wagga, and Sydney. Each of these districts comprises a group of what are termed land districts, these latter representing defined areas around each of the more important towns in which Crown Land Agents are permanently stationed to receive applications for Crown Lands, afford information to intending applicants, receive deposits, instalments, &c., and generally for public convenience. The business of each Land Board district is conducted by a Board, presided over by an official member as chairman; there being a staff of clerks, together with a District Surveyor and a number of draftsmen located in the district.

Climate.—The climate of New South Wales is considered to be extremely salubrious; from the large area of the colony, extending over eleven degrees of latitude, nearly every variety is to be found, from the hottest to the coldest, short of the Arctic. That of Sydney has been compared to the climate of Naples, the difference being only five degrees of greater summer heat and winter cold at Naples than at Port Jackson. Although tropical plants grow in Sydney gardens, a five hours' journey from Sydney by rail is sufficient to reach a climate where British fruit, flowers, and grapes are cultivated with success. "There are three great natural divisions made so by the conformation of the land and the climate; the comparatively narrow coast district from 30 to 150 miles wide, abundantly watered by rivers and streams coming down from the mountains and having, too, an abundant rainfall. The second division includes the mountains and elevated plains and extends the whole length of the colony; the third division covers by far the greatest area, consisting of the Great Western plains extending away to the Darling River and thence to the South Australian border." Dr. Lang says, "For eight months during the year, viz., from the 1st of March to the 1st of November, the Australian climate is peculiarly delightful. The sky is seldom clouded, and day after day for whole weeks together the sun looks down in unveiled beauty from the heavens." Summer extends from the 1st of December to the end of February, and its mean heat is about eighty degrees; but this great heat is moderated along the coast by the sea breeze, which blows regularly from nine in the morning until five, six, or seven in the evening, when it is succeeded by the land breeze from the mountains. The spring months are September, October, and November; at this time the nights are cold, but the days warm and pleasant. The three autumn months are March, April, and May. During the winter months of June, July, and August the mornings and evenings are cold; hoar frosts are frequent, becoming more severe on advancing into the interior. At Sydney the thermometer is rarely below forty degrees. Snow does not lie in the valleys, but in winter the loftiest of the hills and mountains are covered, some of the latter nearly reaching the line of perpetual snow. The healthy character of the climate is shown by the returns of the Registrar, the percentage of deaths comparing favourably with those of any country, the mean number of deaths during the past ten years per 1,000 of the population being 14·67. Regular observations of the weather have been taken, but for a comparatively few years, insufficient to indicate all that is required to be known of the climate of a large tract of country. It has been proved, however, that the climate of New South Wales approximates to that of Southern Europe, but so modified by the physical features of different parts, that all varieties may be found, from the cold of Kiandra, where frost, snow and hail prevail for a considerable portion of the year, to the heat of the inland plains, where the thermometer sometimes reaches 130° in the shade, and is for the greater part of the summer over 100°, and where rain enough to wet the ground is sometimes not seen for eighteen months. The temperature of the coast districts is influenced and equalized, it is believed, by one of the great Ocean currents which takes its rise to the north of Australia, and has a steady set south at a distance of four or five miles from the coast, with a velocity of one or two miles an hour. This Antipodean Gulf Stream of warm water is only occasionally intercepted for a day or two at a time, when there is a strong southerly wind blowing.

During the year 1899 the thermometer in the shade at Sydney showed the mean monthly temperature to range from 52·0 to 71·9; the highest was 102·1, on December 1st, the lowest 38·8 on August 9th; the mean temperature for the year being 63·7. The total rainfall was 55·899 inches; rain fell on 172 days; the greatest fall in one day, 3·005 inches, took place on November 5th. The average rainfall for the preceding forty years was 49·660 inches. The highest reading of the barometer was 30·721 on July 26th; the lowest 29·213 on January 19th; the mean height for the year was 30·007. The prevailing wind was N.E. during the summer months, and from W. to S.W. during the winter.

Standard Time.—By the "Standard Time Act of 1894," which came into operation on 1st February, 1895, the mean time of the 150th meridian of longitude east of Greenwich, England, was declared to be Standard Time throughout New South Wales; but on account of the conflicting interest in the Barrier District this Act was amended by Act 60 Vic. No. 4, assented to on 23rd July, 1896. The Standard Time Act of 1894 does not now apply within the Municipal District of Broken Hill, nor the Electorate of Sturt, in respect of certain sections of the Licensing Acts, Billiard and Bagatelle Licensing Act, Parliamentary Electorates and Elections Act. The mean time of the 135th meridian of longitude is in respect of the above enactments declared to be the standard time for the said Municipal and Electoral Districts.

Geological Formation.—The following information has been corrected to date by Mr. E. F. Pittman, A.R.S.M., the Government geologist. The stratified rock formations of New South Wales have been classified as follows, in descending order:—

- Cainozoic.
  - Post Tertiary
    - Recent.
    - Pleistocene.
  - Tertiary
    - Pliocene.
    - Miocene.
    - Eocene.
- Mesozoic
  - Cretaceous

  - Lower Silurian.

The chief geological features of the Colony may be briefly described as follows:—A belt of Palæozoic rocks (about 200 miles wide) in which occur numerous intrusions of granite and other igneous rocks, extends along the coast line in a N.N.E. direction. Another belt of Palæozoic rocks crosses the centre of the Colony in a W.N.W. direction, making with the first-named belt a T-shaped area, in which are situated the metalliferous deposits, such as gold, silver, tin, copper, lead, antimony and bismuth. About midway between the Northern and Southern boundaries of the Colony the coastal belt of Palæozoic rocks already alluded to is overlaid by a very large area of Carboniferous and Permo-Carboniferous rocks, and it is in these latter that the Colony's enormous wealth of coal is stored. Overlying these rocks again, are the Hawkesbury sandstones, of which the Blue Mountains (wherein the most picturesque scenery in the Colony is to be found) are composed. This sandstone is largely quarried for building purposes in the neighbourhood of Sydney. The Cretaceous rocks cover a wide expanse in the Northern and Western parts of the Colony. They form a deep basin-shaped deposit, in which, and in the underlying Triassic rocks, are stored the supplies of artesian water, which are daily being more and more utilized for stock by graziers in the arid plains of the West. The Upper Cretaceous rocks contain deposits of precious opal. The remainder of the Colony consists chiefly of plains of Pleistocene origin. Water can also be obtained under these plains by boring, but it does not rise above the surface, as in the case of the Cretaceous and Triassic deposits already referred

to. The crystalline rocks of the Broken Hill district, consisting of gneisses, quartzites, and garnetiferous sandstones, are supposed to belong to the Azoic period; but while their precise age is at present doubtful, they may be regarded as being as old as, if not older than, any other rock formations in New South Wales. They are much flexured and contorted, and show numerous intrusions of granite and dioritic dykes, in the vicinity of which occur the now celebrated silver and lead-bearing lodes, which have been the means of attracting a large population to the Barrier district. The Lower Silurian rocks, which form such a notable feature in the geology of Victoria, and in which the permanent reefs of the Bendigo goldfield occur, have as yet only been proved, by fossil evidence, to exist in New South Wales in three districts, namely, at Myall Reefs, near Tomingley, between Peak Hill, Narrowmine, and Mandurama, and also over a wide area near the Victorian border, extending from the Pilot Mountain to the east of Quinburra, and northward to the junction of the Snowy and Delegete rivers. The Upper Silurian rocks form a wide belt along the eastern portion of the Colony, while another irregular-shaped area extends in a W.N.W. direction from near Condobolin on the Lachlan towards the Darling River. The rocks of this age consist chiefly of altered slates and mudstones, sandstones and limestones, and are generally easy of recognition on account of their indurated character. They have been, as a rule, very much upheaved. They are the chief depositories of the metalliferous lodes. The Silurian rocks are characterized by the occurrence of numerous trilobites, molluscs and corals. The upper beds of the Silurian rocks in some localities contain fossils of both Silurian and Devonian types, and were therefore termed by the late Rev. W. B. Clarke "passage beds," and by the late C. S. Wilkinson, Government geologist, "Siluro-Devonian" beds. A somewhat similar series of passage beds appears to exist between the Devonian and lower Carboniferous rocks, and therefore until a detailed survey has been made it will not be possible to clearly define the boundaries of the lower and middle formations of the Palæozoic group. The Devonian rocks consist of sandstones, conglomerates, limestones, and shales, and can be seen in section near Rydal, on the Great Western Railway, where they were measured by the late Mr. Wilkinson, and found to have a thickness of at least 10,000 feet. The lower beds are also visible on the summit of Mount Lambie. The most characteristic fossils of the Devonian rocks are Spirifer disjunctus, and Rhynchonella pleurodon. The Carboniferous rocks were estimated by the late Mr. Wilkinson to have a total thickness of at least 10,000 feet. They cover a considerable area, principally in the centre of the Silurian belt already described, and notably between the Hunter and Manning Rivers. Lepidodendron, Calamites, Rhacopteris, and other plant remains are plentiful, but no workable coal seams occur below the Permo-Carboniferous rocks. The marine beds of the Carboniferous formation contain such molluscs as Productus and Spirifer, besides corals, crinoids, etc., in great abundance. It is in the Permo-Carboniferous rocks that the Colony's great wealth of coal is stored. These rocks have been minutely investigated by Professor David, B.A., F.G.S. They are characterized by the predominance of the fossil plant Glossopteris. They may be well seen in section along the Northern Railway line from Newcastle to Rix Creek, and they extend from Bateman's Bay on the South to Port Stephens on the North, and Westwards to the Talbragar River, thence trending Northwards to the Queensland border. Professor David estimates the aggregate thickness of coal in the Greta, Tomago and Newcastle measures to be 150 feet. Over a considerable portion of this area, viz., between Lake Macquarie on the North and Coal Cliff on the South, and from the coast Westwards to Lithgow the Permo-Carboniferous rocks are overlaid by the Hawkesbury sandstones, which attain their greatest thickness under Sydney, but here the continuity of the coal seams, which outcrop in the Newcastle and Illawarra coal fields, has been proved by deep bores put down on the Holt Sutherland estate, at Moorbank near Liverpool, and more recently at Cremorne, Sydney harbour, where a fine seam of coal was penetrated at a depth of 2,800 feet. There was evidently a vast interval of time between the close of the Permo-Carboniferous era and the deposition of the overlying series of shales and sandstones, as shown by a decided break in the flora. There is an entire disappearance of Glossopteris, and the characteristic plant remains of the Triassic formations are those of Tæniopteris, and Thinnfeldia. The Narrabeen shales, which are the lowest of these rocks, form the prominent cliffs along the coast from Long Reef, North of Manly, to Broken Bay. They consist of chocolate, red, blue and grey shales, and they dip inland towards the southwest, being overlaid by the Hawkesbury sandstones. The latter may be seen forming the high precipices at the sides of the magnificent gorges which lend such character to the scenery of the Blue Mountains. The greatest observed thickness of the Hawkesbury sandstone is about 1,000 feet. The stone is very valuable for building purposes, and is extensively quarried in the neighbourhood of Sydney. The Wianamatta shales are, like the Hawkesbury sandstones, of fresh-water origin. They form cappings on the hills in the neighbourhood of Sydney, and are extensively used for brickmaking. The Clarence River coal basin is probably also of Triassic age. It contains a number of coal seams, but none of them have as yet proved to be workable. The Lower Cretaceous rocks underlie a large extent of undulating country, principally to the North and West of the Upper Darling. They consist of calcareous greensand and various coloured clays, containing marine fossils, ammonites, belemnites, avicula, etc. These rocks have not as yet been thoroughly explored, but great importance attaches to them by reason of the fact that they contain plentiful supplies of artesian water, which is being rapidly drawn upon by the pastoralists, and the stock-carrying capabilities of the Western and North-Western plains are being thereby largely increased. The chief sources of the Artesian water, however, have been proved to be the Triassic rocks (contemporaneous with the Hawkesbury sandstones), which underlie the Cretaceous beds of the Western plains. At White Cliffs in the Wilcannia district extensive deposits of precious opal occur in Upper Cretaceous rocks. They consist of alternate beds of sandstone, kaolin, quartzite, conglomerate, and porcellanite. Outliers of these rocks about 100 feet in height are found in many localities overlying the Lower Cretaceous beds. Conglomerates, sandstones, clays and ironstones of Eocene age, are found at high elevations in the Great Dividing Range, and contain leaf impressions and fresh-water shells (Unio). Marine beds of similar age occur on the banks of the Murray River, near its junction with the Darling, and probably extend northwards under the plains of Riverina. They have not as yet been minutely examined. Pliocene deposits are found in many parts of the Colony in the shape of old drifts or river beds, which in a large number of cases have been covered by streams of lava or basalt. The basalt being more capable of resisting denudation than the Palæozoic rocks (slates, etc.) through which these old rivers ran, has served to protect the pliocene alluvial deposits, which are consequently found in many instances occupying elevated positions. Most of the deep leads from which large quantities of alluvial gold and tinstone have been won are of Eocene and Pliocene age. Many fossil fruits and trees, ferns, and fresh-water shells (Unio) are found in these leads. The Pleistocene period is represented by gravel terraces on the sides of valleys, and by the wide spreading plains of the Western district and Riverina. During this period animals of very large size existed in the country, as evinced by the fossil bones of the Diprotodon, Nototherium, Thylacoleo, Thylacinus, etc. The bones of Diprotodon have been found in alluvial flats in several localities, such as Bingara, Forbes, and Cuddie Springs. Accumulations of the bones of the other Pleistocene marsupials are found in limestone caverns in various parts of the Colony. A great variety of igneous and intrusive rocks are found in New South Wales, including granites, porphyries, diorites, basalts, serpentines, etc., and many of them constitute highly valuable and ornamental building stones.

Soil.—Owing partly to climatic circumstances, and in part to the absence of water, there is much land utterly useless for agricultural purposes, though much of this is adapted for pastoral (grazing) use, and is so employed, but great attention has recently been paid to boring for artesian wells with a considerable amount of success, splendid supplies of water having been obtained in many of the arid districts. Of land rich in humus or decayed vegetable matter, there is no great breadth away from the river banks. The most fertile land in the colony, perhaps in the world, is to be found on the margins of the rivers, particularly the bottom lands of the Clarence, Richmond, Macleay, Manning, Hunter, Hawkesbury, and Shoalhaven. This fertility is to some extent counterbalanced by the liability to inundation, when the year's harvest may in a few hours be swept away. The Northern district is suitable for the cultivation of sugar, maize, the vine, and semi-tropical fruits. The area of land watered by the Richmond Macleay, Manning, and Hastings rivers is largely utilized for maize; the sugar-cane has also been extensively cultivated on the last-named three rivers, but not found to succeed. The Great Southern line of Railway to Goulburn, 134 miles from Sydney, passes through country much of which has long been under cultivation, and in which most of the pursuits of agriculture and horticulture are successfully carried on. At Mittagong, 77 miles from Sydney, rich and extensive deposits of coal and iron exist in close proximity to the railway, and some of the soil of the district is singularly fertile. Indeed, with some exceptions, it may be said that good arable land occurs nearly all the way to Marulan, 114 miles, where excellent marble is found. Goulburn, and much of the country through which the line runs possesses a mild and salubrious climate, in which English fruits, vegetables and cereals thrive luxuriantly. The Great Northern Railway, in the first portion of its course, passes over coal-fields of great extent and value, the product of which it conveys to Newcastle, after passing which it intersects a good agricultural and grazing country, with a soil producing fine crops and luxuriant pasturage. The Great Western line passes by orangeries, vineyards, and homesteads; but with the exception of a mile or two westward of Penrith, the land is too rugged and mountainous for agricultural purposes until the Bathurst plains are reached. The country to the southward of Sydney on the coast, known as the Illawarra district, is rich in coal of excellent quality, and land for many miles beyond the coal-bearing region is employed for dairy farming purposes, and supplies the metropolis with much of its produce of milk, butter, and the other accompaniments of the breakfast-table. Large areas are laid down with English grasses, which here flourish in all their native luxuriance.

Vegetable Productions.—Among the indigenous trees, shrubs, and plants of New South Wales are the Acacias, upwards of one hundred varieties of which are known to flourish. They bear a pretty yellow blossom, and are more generally known under the generic name of wattle. Some of the wood is valuable, and the myall has been utilized in the manufacture of pipes and other small articles. The Eucalyptus, or Gum-tree, is peculiar to Australia, and abounds in all parts; there are many varieties; it is a most valuable wood for many purposes, and the red-gum turpentine and ironbark are as imperishable, and perhaps superior to, the jarrah wood of West Australia. The ironbark is noted for its hardness, and in its very dry state is scarcely workable; it is used for shipbuilding purposes, and its life is estimated as exceeding fifty

years; the blue and red gums are also of value for constructing purposes. The most valuable of the soft-wood timbers is the cedar, which is found in the northern parts of the colony, its home being principally the mountains and gullies at the heads of the eastern rivers. For all indoor uses, cabin fittings, and decorative purposes the wood is in general requisition. The Casuarina tribe, more popularly known under the name of the She-Oak, are very numerous, as are also the Banksia family, which pass usually under the name of honeysuckle. Fig-trees are plentiful, and of great variety; but the wood is of little use. The cabbage-tree palm is found in the Coast districts; its leaves are much used in the manufacture of hats. Ferns of large size and endless diversity grow in profusion in the mountain gullies. On the plains the salt bush is largely found. It is a valuable grazing food for both sheep and cattle. The mallee scrub covers some portions of the plains; it is a dense, almost impenetrable thicket There are few edible fruits; but all the fruits of the temperate zone and many semi-tropical, such as the orange, shaddock, banana, loquat, and pine-apple, are now grown with abundant results. Wild flowers of great variety and beauty adorn the landscape in the spring; of these the waratah, or native tulip, the Christmas-bush, and varieties of rock lily are some of the most striking. The trees are mostly evergreen. The leaves are destitute, for the most part, of salts, and when they fall, their decomposition into mould is prevented by the heat and dryness of the climate, except in moist and shaded localities, but when burned or allowed to decompose they aid in increasing the fertility of the soil, especially in the coastal districts.

Aborigines.—According to the latest returns (1899) from the Secretary of the Aborigines Protectorate, the number of natives recorded is 1,343 pure-bred males, 917 females and 943 pure-bred children, a total of 3,203; 851 half-caste males, 751 females and 2,087 half-caste children, a total of 3,689, or a grand total of 6,892 souls. These figures, however, bear no comparison with the numbers when the colony was first settled. They exhibit an increase of one on those for the previous year. The total sum expended by the Government during the year was £17,662. One hundred and eighteen reserves have been set apart in different parts of the country. In numerous instances the land is successfully cultivated by the Aborigines, and their efforts have been encouraged by the Board as far as practicable by the supply of implements, seed, and other assistance. Several of the reserves have been enclosed with good substantial fences, the Aborigines providing and erecting the posts, the cost of wire being defrayed from the Board's Funds. A number of schools also exist for the education of Aboriginal children, the total number receiving instruction being 612.

Animals, Birds, Fish, &c.—Nearly all the larger animals found in New South Wales are of the marsupial order, that is, having a natural pouch in which they carry their young. The kangaroo (*Macropus*) takes precedence in size. It is found in various parts, and occasionally in such numbers as to seriously incommode the squatters and farmers, consuming the pasture that would otherwise support many head of stock. Wallabys and paddymelons are a smaller species, and still smaller varieties are found in the rat family. The bandicoot (*Peramales*), a small animal with a head and snout resembling the pig; the wombat (*Phascolomys*), a grass-eating, burrowing marsupial; the opossum (*Phalangista*); the koala, or native bear (*Phascolarctus cinereus*), a small harmless creature, in shape like a bear; the native cat (*Dasyurus maculatus*), a pretty but destructive animal; and the platypus *Ornithorhynchus paradoxicus*), and native hedgehog (*Echidna*), about exhaust the number of the larger mammalia. Bats are very numerous from the flying fox of large size to the flying mouse; like all this tribe, they are nocturnal in their habits, and are very destructive to fruit trees. Snakes are far too plentiful to be pleasant; five different families exist in New South Wales. The death adder and the yellow snake are the most dangerous, and their bite is frequently fatal. The lizard tribes are well represented, the largest of these being the iguana. A peculiar long-necked tortoise (*Chelodina longicollis*) is found in the swamps of some of the rivers. Birds are remarkable for their variety, and, so far as the parrot tribe is concerned (of which there are over sixty species), for the beauty of their plumage. The eagle tribe is widely distributed; there are also several species of owls (*Strigidæ*). The great kingfisher, or laughing jackass, can be met with in most parts, its strange hoot and peculiar so-called laugh making the bush echo in the early morning and at sundown. The magpie is also common, and its cry, heard as the day breaks, is very musical. Cockatoos, parrots, and paroquets are very plentiful in the Coast district. Quails, native pheasants, and brush turkey are found. The wild turkey and the emu (*Dromaius*), the latter the largest biped found on the continent, are now confined to the plains. The lyre bird (*Menura splendida*), and the bower birds (*Ptilonorhynchus holosericus* and *Sericulus melinus*) have their home in New South Wales. Among water birds are the native companion, and several other species of crane and heron; the black swan being the most graceful and the largest of all. Leeches abound in most of the creeks and lagoons. Insects are prolific almost beyond belief. The insect fauna is enormously rich in the orders of Coleoptera or beetles; Hymenoptera, flies, wasps, etc.; and Hemioptera or bugs; and to a less extent, but still rich in Lepidoptera, or butterflies and moths. The mosquito is the most numerous and certainly the most annoying of all, but the locusts are the most noisy, and about sunset their shrill whistling fills the air. Ants are of various kinds, the species termed the bull ant being of large size and dangerous to interfere with. Native bees are plentiful. Spiders of all sizes, from the tarantula (or tri-antelope, as it is more vulgarly called) downwards, flourish in all parts. Fish swarm in the rivers that intersect, and seas that fringe, the colony; among them are the bream, mullet, whiting, schnapper, jewfish, flathead, garfish, Murray cod, and perch; crustaceans, too, abound, while the Sydney oysters are luxuries that are prized throughout the colonies. The oyster beds, besides those in the neighbourhood of Port Jackson, are to be found in every inlet along the whole coast-line. Numerous animals have been at times imported from Great Britain and elsewhere, and have been found to thrive in their new home; among these are deer, hares, rabbits (these have become a national curse almost, entailing an enormous expenditure of money and labour to check or prevent their ravages), and several of the familiar songsters of the English hedgerows and fields.

Population.—The population of New South Wales, according to the census taken in April, 1891, was—males, 612,562; females, 519,672; total, 1,132,234. As regards births and nationality, 725,015 persons were native born, 85,154 in other Australian Colonies, 8,280 were Aborigines, 266,101 hailed from Great Britain and Ireland, 4,639 from other British possessions; 39,787 were foreigners, 1,960 at sea, and 1,301 unspecified. The conjugal condition of the people is thus recorded:—748,664 unmarried; 166,634 husbands; 165,648 wives; 25,799 widows; 16,905 widowers. The number of persons able to read and write was 823,475; those unable to read 244,566, and unable to write 43,001.

The religious returns were:—Church of England, 502,980; Presbyterian, 109,390; Wesleyan Methodist, 87,516; other Methodists, 22,596; Congregationalists, 24,112; Baptist, 13,112; Lutherian, 7,950; Unitarian, 1,329; Salvation Army, 10,310; other Protestants, 12,046; Roman Catholics, 286,911; Jews, 5,484; Greeks, 252; Buddhist, Confucian, Mahomedan, &c., 10 950; other persuasions, 14,982; unspecified and ill-defined, 14,028.

During the year 1899 there were 36,508 births—18,669 males, 17,839 females; 15,898 deaths—9,133 males, 6,765 females; of the deaths 195 were suicides, or 1·45 per 10,000 of the total population. The number of marriages registered during the year 1899 was 9,275. Estimated population on 30 June, 1900, was 1,361,120—729,420 males and 631,700 females.

Religion.—The various sects of religion, in which are included Church of England, Presbyterians, Wesleyan Methodists, Primitive Methodists, United Methodists, Lay Methodists, Methodist Episcopal, Congregationalists, Independent Free, Welsh Independent, Baptists, Particular Baptists, Strict Baptists, Independent Baptists, Seventh Day Adventists, Roman Catholics, Unitarians, Lutherans, Jews, Salvation Army, Reorganised Church of Jesus Christ of Latter Day Saints, Sydney Society of the New Church, Brotherhood Gospel Mission Church, Catholic Apostolic, Free Church of England, Bible Christian Church, Society of Friends, and Church of Christ, had in 1897, 4,852 places of worship, with accommodation for 426,637 persons, including dwellings and other buildings occasionally used for purposes of devotion. The estimated average attendance at all the services on Sunday was 402,098. The total number of ministers of all denominations licensed to celebrate marriages was 1,286 (including 9 in connection with the Salvation Army).

The religion of the people, as shown by the census of 1891, gives the total number of Church of England at 502,980; Roman Catholics, 286,911; Presbyterians, 109,390; Wesleyans and other Methodists, 110,112; Congregational, 24,112; Baptists, 13,112; Unitarians, 1,329; Hebrews, 5,484; Lutherans, 7,950; Salvation Army, 10,315; other persuasions and unspecified, 52,259;—total, 1,123,954, exclusive of 8,280 aborigines not classified.

The detailed returns for 1897 (no later statistics collected) give the following particulars of the ministers, places of worship, and the attendance:—

The Church of England has in all 326 ministers, 720 churches, and 775 other buildings used for public worship, with total seating accommodation for 126,762 persons; the average attendance at Sunday services is 106,043. The Roman Catholic places of worship number 1,203, of which 494 are churches, with seating accommodation for 76,806; there are 275 ministers; the average attendance at churches was 133,337. The Presbyterians of New South Wales have 345 buildings used for public worship, in addition to 324 churches—in all 669—with accommodation for 49,068, 149 ministers, and an average attendance at church services of 32,235. The Wesleyan Methodists have 782 churches, &c., seating 74,892 people, 127 ministers, and 64,019 regular attendants. Other Methodists have 93 churches, and 16 other buildings, 37 ministers, sitting accommodation for 17,226, and an average attendance of 10,680. The Congregationalists occupy 64 churches, and 21 buildings, seating 18,251 persons, the ministers number 49, and the Sunday attendance averages 10,667. The Baptists have 38 churches, and 36 buildings, with a total seating accommodation for 10,470 people, 31 ministers, and an average attendance at Sunday services of 5,291 By 1897 returns the Particular Baptists have 4 places of worship, seating 700 persons, 5 ministers, and an average attendance of 240. The Lutherans have 26 buildings (including 16 churches), giving accommodation for 2,250, 5 ministers, and an average congregation of 1,085. The Jews have 2 synagogues, seating 974 persons, an average attendance of 385, and 4 registered ministers. The Church of Christ has 12 ministers, 11 buildings (including 6 churches), capable of seating 2,260 persons, of which 1,369 generally attend. The Unitarians have 1 minister, 1 church, sittings for 450, and an average attendance of 450. The Salvation Army has 211 places of worship with 36,006 sittings; and an average attendance of 30,185 persons; of its officers 9 are licensed to celebrate marriages.

The average attendance at Sunday services include only those of 14 years of age and upwards.

Sunday Schools.—In 1897 (no later statistics collected) there were 2,155 schools, 4,788 male and 8,751 female teachers, in all 13,539; with scholars on the roll of 73,982 boys, and 97,730 girls, with an average attendance of 128,380 scholars. The detailed returns of the various denominations were as follows:—Church of England, 621 schools, 1,282 male and 3,067 female teachers; total average attendance of 40,687 scholars. Roman Catholic, 555 schools, 249 male and 1,177 female teachers; total average attendance of 26,177 scholars. Presbyterians 276 schools; 625 male and 1,109 female teachers, total average attendance of 13,278 scholars. Wesleyan Methodists, 363 schools; 1,383 male and 1,717 female teachers; total average attendance of 20,421 scholars. Primitive Methodists, 69 schools; 358 male and 420 female teachers, total average attendance of 5,720 scholars. United Methodist Free Church, 12 schools, 50 male and 87 female teachers, total average attendance of 1,200 scholars. Congregational, 69 schools, 330 male and 441 female teachers, total average attendance of 6,381 scholars. Baptists, 44 schools; 181 males and 220 female teachers, total average attendance of 3,157 scholars. Lutheran, 4 schools; 5 male and 4 female teachers, total average attendance of 124 scholars. Church of Christ, 6 schools; 27 male and 34 female teachers, total average attendance of 627 scholars. The Jews have 2 schools; 7 male and 9 female teachers, total average attendance of 200 scholars. Salvation Army has 96 schools; 136 male and 293 femalete achers, total average attendance of 8,568 scholars. All other denominations have 68 schools, 154 male and 193 female teachers, total average attendance of 2,864 scholars.

Education.—Until 1880 the Public schools were under the control of the Council of Education, but by the passing of the Public Instruction Act the Council was abolished, and its work handed over to a department of Public Instruction, under a responsible Minister. On May 1st, 1880, this Act came into force. Among its more important provisions are the following:—

The several classes of schools maintained under the Act are:—

(I.) Public schools in which the main object is to afford the best primary education to all children without sectarian or class distinction.

(II.) Superior public schools in towns and populous districts in which additional lessons in the higher branches of education are given under such regulations for the purpose approved by the Governor.

(III.) Evening public schools in which the object is to instruct persons who may not have received the advantages of primary education.

(IV.) High schools for boys in which the course of instruction is of such a character as to complete the Public School curriculum, or to prepare students for the University.

(V.) High school for girls.

The *weekly fees* are not to exceed threepence for each child, up to four children in one family, one shilling being the maximum for any family; these fees to be payable to the teacher. In any case of the inability of the parents or friends to pay the fees, they may be remitted. *Free railway passes* are issued to children to travel to and from school at a distance. Free school tickets are issued to enable any child to travel to the nearest primary school, private or otherwise, provided that such school is the one nearest to the residence of the parents or guardians of such child. In the case of private primary schools it will be necessary for the School Inspector of the district to certify that they are registered in the office of the Minister for Education. These tickets are issued also to the nearest superior public school, or public high school, on the certificate of the School Inspector of the district, that the child has passed the entrance examination for a high school, or is sufficiently advanced to be enrolled in the fifth class of a superior public school. The tickets are issued free, and no liability attaches to Commissioners in regard to any journeys made upon them. They are available between the stations named thereon for the purpose of attending school for one journey each way on school days only, and the holders are subject to the Commissioners' by-laws and regulations for passengers. The tickets must be given up on date of expiry.

Religious Instruction.—In every public school an hour a day is set apart for religious instruction at the hands of a clergyman or other religious teacher, if the parents of the children do not object. The instruction given is that authorised by the Church to which the clergyman or other religious teacher may belong.

The colony is divided into school districts, and Public School Boards of not more than seven persons are appointed to supervise the schools. Attendance of all children between five and fourteen years of age for seventy days in each half-year is compulsory, under a penalty to the parents of 5s. for the first offence, and 20s. or seven days' imprisonment for each succeeding offence; any of the following reasons only being a valid excuse for non-compliance with the above rule:—Efficient education elsewhere, sickness, the absence of a State school within two miles, the child being educated to the standard required. In thinly populated districts Provisional schools are established where secular instruction only is imparted; and in cases where the children are too scattered to allow of a permanent school being formed, itinerant teachers are appointed. Training schools for the education of teachers have been established. High schools for boys have been established, in which instruction is given in ancient and modern languages, in mathematics, in literature, in physical science, and such other subjects as the Minister of Education may direct. High schools for girls have also been established, in which instruction is given in modern languages, history, music, the elements of mathematics, and other subjects, as directed by the Minister.

State aid to Denominational schools ceased at the end of 1882, and in order to meet the requirement of the Public Instruction Act, consequent upon the closing of several Denominational schools, the education Department have erected commodious buildings in all large centres of population throughout the suburban and country districts.

Penny Savings Banks.—In 1887 Savings Banks in connection with public schools were established; in 1900 there were 633 banks in operation; the depositors for the year 1899 numbered 38,400, and the deposit totalled £2,925.

Public School Cadet Corps.—In connection with the State Schools, and inclusive of those attached to Roman Catholic Schools within the Metropolis, there where, at the beginning of 1900, 103 Cadet Corps, with an enrolment of 3,452 cadets. The amount expended for cadet purposes during 1899 was £3,416, as against £3,706 in 1898.

On January 1, 1900, the number of State schools was 2,693, taught by 2,609 male and 2,275 female teachers, in all 4,884, with 123,111 boys, and 110,122 girls under instruction. The year's expenditure for the purpose of education was, under Department of Public Instruction, £737,080, less receipts from school fees, £78,358, leaving a net cost to the State of £658,722. Total net cost to the State per scholar £4 8s. 2d.

Private schools numbered 1,053, with 3,407 teachers and 60,159 scholars on roll.

For the purpose of inspection, the Colony has been divided into ten school districts, supervised by 34 inspectors. On January 1, 1900, there were:—A chief inspector, a deputy chief, nine district inspectors, and twenty-five inspectors; and at the same date 299 School Boards had been appointed.

The returns of schools connected with charitable institutions in 1899 were:—1 Deaf and Dumb and Blind Institution with 14 teachers and 117 scholars; 4 Ragged schools with 331 scholars; 1 children's asylum with 149 inmates; 4 industrial and reformatory establishments, inclusive of the Nautical School-ship the *Sobraon*, with 829 scholars.

Under the Department of Public Instruction there were 2,693 public schools in existence, containing 2,909 departments. The amount expended on school sites, furniture, buildings, repairs, rates, and rents in 1899 was £98,926. Of over 251,000 children in the Colony between the ages of 6 and 14 years, 200,317 attended State schools, 60,159 attended private schools, received home instruction, or were untaught. The University had 49 masters and 519 students; St. Paul's College, 5 masters and 16 students; St. John's College, 4 masters and 15 students; St. Andrew's College, 5 masters and 26 students; Women's College, 2 teachers and 18 scholars; Sydney Grammar School, 21 masters and 590 pupils. The private and Denominational schools numbered 1,053, teachers 3,407, male 607, female 2,800, scholars 60,159, of whom 26,492 were boys and 33,667 girls.

National Art Gallery.—On April 24, 1871, an Academy of Art was founded in Sydney. It was opened on May 1, 1875. By formal resolutions of its members at their ninth annual meeting, held on November 11, 1880, the "New South Wales Academy of Art" was dissolved, and its property handed over to the Trustees of the "Art Gallery of New South Wales," as a donation from the members of the Society to the National Institution.

The Art Gallery was first opened on June 2, 1876, and was reopened as a "National Gallery" on September 22, 1880. The new Gallery is situated on an elevated position in the domain overlooking the Harbour. It is accessible to the public daily, Sundays included. This Institution is conducted by thirteen Trustees. Mr. Eccleston Du Faur, F.R.G.S., President, Mr. George E. Layton, Secretary and Superintendent. The Gallery contains many fine examples of British and Continental Art, in oil paintings, water-colour drawings, etchings, statuary, bronzes, ceramics, &c., &c., as represented, among others, by Lord Leighton, Sir J. E. Millais, Edwin Long, Peter Graham, Luke Fildes, F. Sallé, Seymour Lucas, E. V. Luminais, A. de Neuville, Birket Foster, David Cox, Copley Fielding, E. Detaille, &c., &c. The National Collection has been enriched by a large number of "Presentation Works" of great value, and the value of the whole collection is estimated at £120,000. The amount of aid received from the Government funds for the purchase of works of art, maintenance, &c., up to January, 1900, was £18,353, and during 1899 purchases were made as follows:—£1,414 for oil-paintings, £112 for water-colours, £185 for black and white, £194 statuary, &c. The year's expenditure amounted to £3,988. Total number of visitors recorded during 1899 was 243,998. There are 296 persons studying in the Gallery.

The Public Library of New South Wales was established as a State library on October 1st, 1869, the Government having bought the old Australian Subscription Library founded in 1827. It was incorporated in December, 1899, and received a statutory endowment of £2,000 per annum for the purchase of books and binding. It had on January 1, 1900, 144,244 volumes in various departments of literature. During 1899 the institution was open on 352 days for the Reference Library, 307 days for the lending branch, and 351 for Newspaper branch. Visits were made as follows:—By 183,760 to the Reference Library, to the lending branch 106,159, and to the newspaper room 264,359, a total of 554,278. The average daily attendance was 1,811 on weekdays and 365 on Sundays, on which day the lending branch and newspaper room are now closed. In the lending branch 26,231 volumes are available. There is also a commodious newspaper room, supplied with nearly 400 papers and magazines. Boxes of books are also lent to country libraries; during 1899, 223 boxes, containing 14,155 books, were borrowed by 130 country libraries and groups of students. The Institution is entirely supported by State funds, the

expenditure for 1899 being £3,485, which also includes the expense of carrying on the administrative work connected with the Board for International Exchange, the Office of Copyright Registry, and the editing of the Historical Records of New South Wales.

On October 17, 1898, Mr. D. S. Mitchell, M.A., intimated his determination to bequeath his magnificent Australian collection of 31,000 books, pictures, maps, engravings, and manuscripts, &c. to the library. This library contains many works and MSS. of unique value. Mr. Mitchell has also signified his intention of handsomely endowing it to provide for the maintenance of this collection and its growth. He has already handed over 10,000 volumes of general literature, and 50 very choice Australian pictures by Sir Oswald Brierly, Conrad Martens, Skinner, Prout, Z. J. Bowman, G. T. Gill, and John Gully, all of which are kept in a separate wing of the Institution, called the Mitchell Library.

In the country districts are over 350 Mechanics' Institutes, Public Libraries, or Schools of Art. The Sydney Mechanics' School of Art is a fine substantial building situated in Pitt Street. It consists of an extensive circulating library of over 60,000 works, a Reference Library of over 4,000 volumes, a smoking-room, reading-room well supplied with the latest English, foreign, and colonial newspapers and periodicals, also chess and draught-room. There is a separate room for the exclusive use of ladies, supplied with every convenience. The subscription to the Institution is nominal, being only 5s. per quarter. The reading-room is opened every day, Sunday included, to 10 P.M.

THE UNIVERSITY OF SYDNEY.

(Incorporated by Act 14 Victoria, No. 31.)

The University of Sydney is empowered to give instruction and to grant Degrees and Certificates in the nature of Degrees in all branches of knowledge except Theology and Divinity. By Royal Charter its degrees entitle the holders to the same rank, style and precedence as are enjoyed by graduates of Universities within the United Kingdom. Women are admitted to all University privileges equally with men. The Government is vested in a Senate, consisting of sixteen elective Fellows, and not fewer than three nor more than six ex-officio members, being Professors of the University. There are four Faculties in the University, viz.:—(1) The Faculty of Arts, with the Degrees of Bachelor and Master of Arts; (2) the Faculty of Law, with the Degrees of Bachelor and Doctor of Laws; (3) the Faculty of Medicine, with the Degrees of Bachelor and Doctor of Medicine and Master of Surgery; and (4) the Faculty of Science, with the Degrees of Bachelor and Doctor of Science; this Faculty also includes the Department of Engineering, in which the Degrees of Bachelor and Master of Engineering are given in the several branches of Civil and Mechanical and Electrical Engineering, and Mining and Metallurgy. A full curriculum of study is provided in all the Faculties. Graduates of the University in Arts and Law enjoy certain privileges in seeking admission to the two branches of the legal profession in New South Wales. Graduates in Medicine may be registered upon the Colonial List of the British Medical Register, and the Sydney medical classes are recognised by the Universities of Cambridge, Dublin, London, Edinburgh, &c., and the Royal Colleges of Physicians and Surgeons. The Universities of Oxford and Cambridge also extend certain privileges to Sydney graduates.

During 1899 there were on the University staff 14 professors and 35 lecturers and demonstrators.

In connection with the University there are several scholarships, bursaries and exhibitions, established by private munificence, generally of the value of £50 per annum, and also Travelling Scholarships of larger amounts, enabling the holder to prosecute his studies elsewhere than in the Colony. In 1899 the total number of students attending University lectures in the several faculties was 519, of whom 70 were women. The public examinations are similar to the middle-class examinations of Oxford and Cambridge; they are held annually, and are intended to test the qualifications of boys and girls attending schools or being instructed privately. At the Senior Examination in 1899 123 candidates presented themselves, and 96 gained certificates, and at the Junior Examination of 1900, 982 candidates attended.

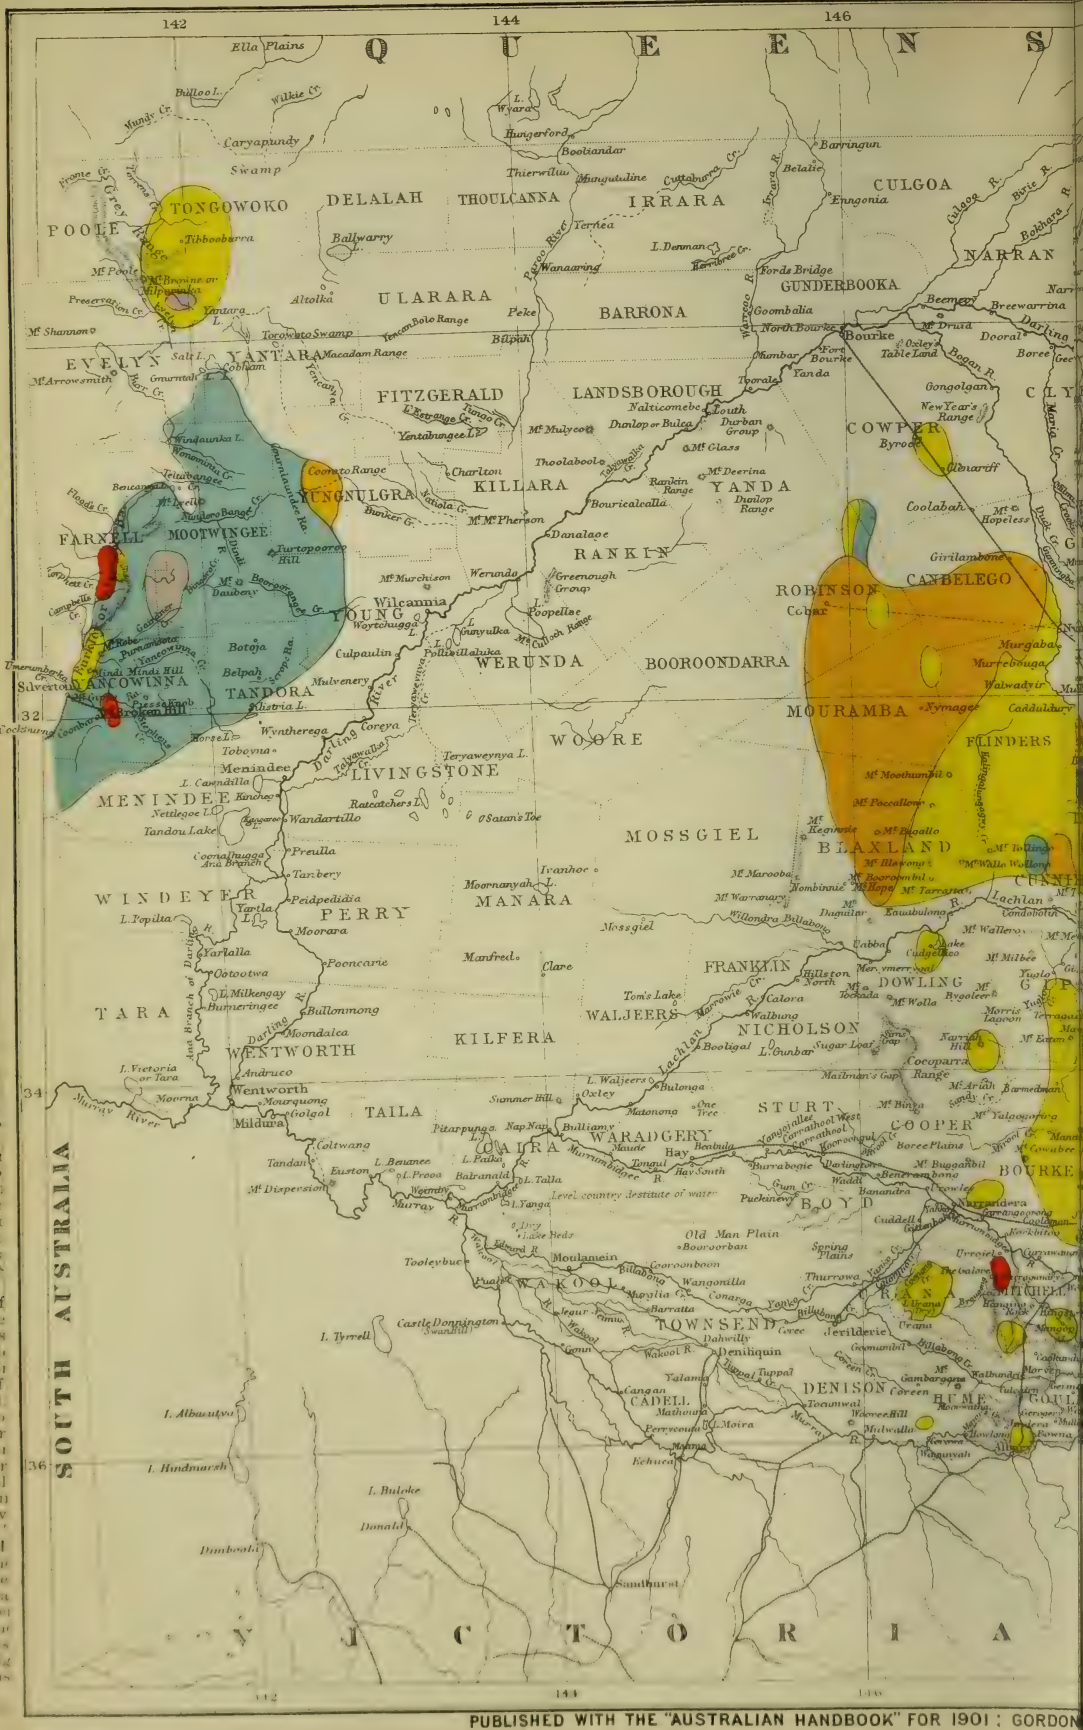
The affiliated Colleges are places of residence for students of the University, and are intended to provide "systematic religious instruction and domestic supervision, with efficient assistance in preparing for the University lectures and examinations." They are four in number, viz.:— St. Paul's (Church of England), which is under the government of a council, consisting of a warden in holy orders, and eighteen fellows, of whom six are clergymen; St. John's (Roman Catholic), under the control of a council, consisting of a Rector (who must be a priest) and eighteen fellows, six of them being priests; and St. Andrew's (Presbyterian), controlled by a corporation of a Principal, who is a Presbyterian minister, and twelve councillors, eight of whom are laymen; and a College for Women (unsectarian), governed by a council consisting of a Principal (who must be a woman), and 15 councillors.

TECHNICAL EDUCATION.—A state system of technical education is in operation throughout the Colony directly under the administration of the Technical Education Branch of the Department of Public Instruction. A Technical College was erected at Ultimo, and opened in 1892. This forms the Central Institution of technical education for the Colony, and in it the metropolitan classes are held. Every provision is made for giving complete courses of elementary and higher technical instruction in a large number of subjects. The instruction is given in a systematic manner by means of technical lectures, practical laboratory work, drawing and workshop courses. There are professional departments, such as electrical engineering, formed by grouping allied subjects, and trades classes. Diplomas of competency are awarded in each department to students who have attended the classes and passed the prescribed examinations. The diplomas are of two kinds, the "Honours" and the "Ordinary." The honours diploma qualifies the holder for the associateship of the Sydney Technical College, and on associates who have carried out some original research or have materially contributed to the development of some important industry, the fellowship of the College is conferred. Certificates are issued to successful students in the trades classes. The diplomas and certificates are recognized qualifications for appointments in certain branches of the public service.

At present there are 110 separate classes in Sydney and suburbs, with an enrolment of 5,896. There are country branches at Albury, Armidale, Bathurst, Broken Hill (Epping), Goulburn, Granville, Lambton, Lithgow, Maitland E., Maitland W., Minmi, Morpeth, and Hinton, Newcastle, Raymond Terrace, Seaham and Clarence Town, Singleton, Teralba, Wallsend, Wallsend West. The country classes number 118 with 2,706 pupils. The subjects include agriculture, wool-classing, wool-sorting, electrical, mechanical engineering, practical sanitation, engineering, geology, mineralogy, and mining, physics, architecture, geometry, perspective, freehand, design, modelling, house painting and art decoration, chemistry, lithography, mathematics, cookery, domestic economy, and scientific dress-cutting, pharmacy, veterinary science, farriery, china painting, physiology, shorthand, bookkeeping, penmanship, and manual training in connection with the public schools. In the mechanical workshops instruction is given in fitting and turning, smithing and boiler-making, pattern-making, practical iron founding, cabinet-making, plumbing, and carpentry.

The session consists of three terms, commencing in the early part of February, and terminating in the latter part of November. The fees for most of the classes are 8s. per term for senior and 4s. per term for junior students.

Technical Instruction is also given in the State schools; and there are 22 classes with 1,654 pupils.



The total expenditure on technical education during 1899 was £19,218, the cost to the State being at the rate of £2 10s. 3d. for each student enrolled.

The AUSTRALIAN MUSEUM was founded in 1836, and was originally connected with the Botanical Gardens. It is essentially a museum of natural history. It had, during 1899, 121,619 visitors (the attendance on Sundays was 31,298, and week days 90,321); the receipts from Government during the year were £6,492; total expenditure was £6,706. The collections are constantly being increased, by means of purchases, exchanges, and donations; also by collecting and dredging expeditions. There is a valuable library in connection with the Museum.

A TECHNOLOGICAL, INDUSTRIAL AND SANITARY MUSEUM was formed on August 6th, 1878, temporarily in the Agricultural Hall outer Domain, but transferred to the new building, Harris Street, Ultimo, and affords accommodation for the display of an enormous number of exhibits (over 85,000); the cost of the building was £20,000.

Special endeavours are made to collect the raw products and samples illustrative of the industries and manufactures of the Australian Colonies, and the Museum already contains a considerable number of native vegetable and mineral products, and a comprehensive series of over 11,000 specimens of wool, while the collection of colonial timbers is unique. Native flowers are exhibited in vases in a fresh state, and labelled with their local and scientific names. Every exhibit bears a label embodying a short, concise description of the more important particulars concerning it. Branch Museums have been established at Goulbourn, Bathurst, Newcastle, West Maitland, and Albury. The attendance of visitors during 1899 was as follows:—Sydney, 68,655 (Sundays, 45,848); Newcastle, 42,294; Goulburn, 24,526; West Maitland, 23,802; Bathurst, 33,302; Albury, 9,145.

Agriculture.—The climate of the Colony for the most part is highly favourable to the development of the productive properties of the soil. Everything that is grown in Britain can be grown in New South Wales. Wheat, maize, sugar cane, barley, oats, and potatoes are the articles most largely cultivated. Fruit of all kinds common in England, as well as oranges, lemons, bananas, figs, pineapples, and many other semi-tropical products can be grown in abundance. In the early days of the Colony, wheat was grown extensively in the valleys of the Hunter and the Hawkesbury, and near Campbelltown and Camden; but it is now superseded largely by other crops. Orange, in the west, Young in the south-west, and Tumut still further south, are centres of extensive tracts of cereal culture. These districts are from 2,000 to 4,000 feet above sea-level, and rust, which often proves fatal on the coast, is uncommon in the south. Maize, or Indian corn, is grown nearly all over the Colony, but chiefly in the North, and some is manufactured into maizena, or corn-flour, for which there is a great demand. Attention has been directed on the NE. coast to sugar-growing, and the results have come up to expectation in the Richmond, Clarence and Tweed river districts. The cultivation of the vine is largely carried on, the wines of Albury, on the Murray and Hunter river, being famous throughout Australia. The grape flourishes in many parts of the Colony and all along the coast district, and is to be found in nearly every garden in the land. Tobacco is grown in the Hunter River district, and in small areas in various favoured districts, both North and South. Barley, oats, rye, and other cereal crops are grown on the

tablelands, largely for fodder. Arrowroot, olives, and capers have been cultivated, but not to any great extent. The orange groves around Sydney and Parramatta are very prolific, the fruit being of excellent quality, but the orange tree is almost as common in New South Wales as the apple in England, many millions of the fruit being gathered annually. Within the last few years several efforts have been made to improve the agricultural system, a Department of Agriculture was established, and this has largely influenced the agricultural work of the colony. Under its auspices conferences of fruit growers and agriculturists periodically take place, and experimental farms have been established in various districts. The services of experts have also been secured to superintend and advise in regard to the tobacco growing industry. Classes for the study of agriculture and kindred subjects have been established at the Hawkesbury Agricultural College, which has a total area of 3,430 acres, of which 1,060 acres are cultivated; 710 acres being under cereals and hay.

The Department of Agriculture has been amalgamated under the Minister for Mines, so that not only has a considerable saving of the expenses of administration been effected, but by means of this union a large amount of duplication and clashing of interests has been averted. Under the new *régime* the work of the Hawkesbury Agricultural College has progressed rapidly; branch experimental farms have been established in several country districts for experimenting with new plants, suited to each defined climatic divisions of the colony. The provisions of the Vine Diseases Act have been carried into effect satisfactorily. The satisfactory results of the export of dairy produce have caused a large increase in the number and extent of co-operative factories, which are being established in all suitable portions of the colony. The chilled meat industry has received considerable impetus from the visits to European centres of Government officials and gentlemen connected with our large export houses, and steps have been taken to test the possibility of sending live sheep and cattle. Steps are also being taken to establish the growth of the sugar beet on a commercial basis, with reasonable prospects of success. There are large tracts of land in the colony which are peculiarly adapted to the cultivation of this crop, which has the advantage of being highly valuable as feed for stock, quite apart from its importance as a source of sugar. With the aid of the Water Conservation and Irrigation Branch it has been shown that vegetables can be grown to perfection in the dry districts of the Far West, and small areas have been let at the various artesian bores for cultivation of suitable products.

Experimental Farms.—The Wagga Experiment Farm (of 3,300 acres) has, notwithstanding severe droughts for four years, proved of great value to the district. The orchard, owing to excellent cultivation, has flourished remarkably well, and has proved admirably adapted for olives, dried fruit, particularly sultana raisins, almonds, peaches, &c. There were 1,068 acres under cultivation, 388 acres being cereals, 580 forage plants, &c.; 82 acres were cleared for vines and fruit trees, including 3 for olive trees. There are also Experimental Farms at Bathurst, 810 acres; Moree Irrigation Farm, 50 acres; Wollongbar, 263 acres; and Coolabah, 15,000 acres.

The area under crop and the yield are reported in 1900 as under:—

Wheat 1,426,166 acres, yield 13,604,166 bushels; maize 214,697 acres, yield 5,976,022 bushels; barley 7,154 acres, yield 132,476 bushels; oats 29,125 acres, yield 627,904 bushels; rye 3,199 acres, yield 44,598 bushels; millet 1,686 acres, yield 22,975 bushels; potatoes 34,968 acres, yield 81,337 tons; tobacco 546 acres, yield 6,641 cwt.; sugar-cane, productive, 9,435 acres, unproductive 13,082 acres, yield of cane 170,509 tons; lucerne and sown grasses 32,362 acres, yielding 73,353 tons; grape vines 8,278 acres, produce 739,668 gallons of wine; 9,624 gallons of brandy; table grapes, 3,652 tons; orangeries 14,533 acres, yield 6,439,680 doz.; gardens and orchards, 39,464 acres; all other crops 9,069 acres; total acres under crop 2,440,968.

Farming machinery in 1900 was valued at £2,001,209; dairying at £203,841; and pastoral at £722,429.

In 1900 there were 48,997 productive beehives, yielding 2,795,141 lbs. of honey and 55,988 lbs. of beeswax.

Alienated Lands Occupied.—At March 31st, 1900, the area of New South Wales was estimated at 198,848,000 acres; exclusive of water, 195,882,150 acres; the area occupied in holdings over one acre in extent amounted to 45,086,209 acres, of which 2,364,454 were cultivated. The average area of holdings was 662 acres.

Live Stock.—The number of horses in the Colony on December 31st, 1899, was 482,200; cattle numbered 1,967,081; sheep, 36,213,514; pigs, 239,973.

Wool.—The total quantity and value of wool produced and exported, or used for home consumption, in 1899 amounted to 231,451,779 lbs., value, £10,092,747. Sheep lost by drought, ordinary mortality and missing, amounted to 5,808,029.

Frozen and Preserved Meat.—During 1899 frozen meat was exported weighing 459,919 cwt., and valued at £332,637; preserved meat exported, 11,453,332 lbs., value, £185,804.

Dairy Produce.—Considerable attention has been paid of late years to dairy farming, leading to the establishment of companies in almost every part of the country, the principal places of operation being Camden, Goulburn, Young, Grafton, Kiama, Mudgee, Richmond river, Wollongong, Eden, Shoalhaven and Macleay. Total quantity of butter made during 1899, 33,033,881 lbs.; cheese, 2,385,987 lbs.; bacon and ham cured, 6,831,943 lbs.; number of factories, 562; number of cream separators 684. Total number of dairy cows, 399,327. Estimated value of plant and machinery, £255,702. Butter exported in 1899, 7,801,063 lbs. value £340,372.

Fisheries.—The supply of fish to the metropolitan markets exceeded that of the preceding year by 12,307 baskets, the total of 1899 being 87,525 baskets; a steady increase is shown in the yearly output of oysters, 20,000 bags being consigned to market in 1899; the total foreshore under lease on January, 1900, was 264,756 yards. With respect to trout acclimatisation the Commissioners of Fisheries say that after fourteen years experience in importing brown trout, Loch Leven trout, American Brook char and the rainbow trout, they have arrived at the conclusion that the latter is most suitable for importation into the colony.

Mining.—The mineral resources of the Colony are large, particularly as regards gold, tin, copper, iron, silver, and coal. Gold is found in numerous parts; the fields where the most active operations are being carried on at the present time being, in the Bathurst District—Bathurst, Trunkey, Tuena, Carcoar, Blayney, Rockley, Orange, Mitchell, Lucknow, Cowra, and Mount McDonald; Tambaroora and Turon District—Hill End, Sofala, Ironbark; Mudgee District—Hargreaves, Peak Hill, Windeyer, Wellington, and Mudgee; Lachlan District—Forbes, Parkes, Wyalong, Murrumburrah, Cargo, Alectown, Grenfell, Young, Barmedman, Canowindra and Temora; Southern District—Araluen, Braidwood, Little River, Majors Creek, Pambula, Nerriga, Moruya, Shoalhaven, Wagonga, Cobargo, Bombala, and Nerrigundah; Tumut and Adelong District — Adelong, Gundagai, Tumut, Tumberumba, Cooma, Captain's Flat, Reedy Flat, and Kiandra; Peel and Uralla District — Armidale, Bingera, Nundle, Glen Innes, Stewart's Brook, Niangala, Hillgrove, Scone, Uralla, Walcha, Kookabookra, and Swamp Oak; Hunter and Macleay District; Copeland, Dungog, Macksville, and Kempsey; New England and Clarence District—Tenterfield Dalmorton, Grafton, Ballina, Fairfield, and Solferino; Albert District—Milparinka, and Tibooburra; Cobar District—Cobar and Mount Hope. In all there are 25 proclaimed gold fields in the south, 41 in the west, and 16 in the north, the estimated approximate auriferous area in the Colony being 13,700 square miles. A School of Mines was established at the Sydney University in 1892, and provision is made for giving in this Colony as complete and effective a training in mining as can be obtained even in Great Britain. The Mining on Private Lands Act came into operation on the 18th of June, 1894, and although its provisions have been fairly well taken advantage of, no important discovery has been made on private lands thrown open. The total yield of gold since the commencement of systematic gold mining to December 31, 1899, has been 12,862,922 ounces, valued at £47,546,012.

GOLD was first practically discovered at the Lewis Pond Creek not far from Guyong, on February 12, 1851, by Edward Hargreaves. It has been stated that in 1814 gold was found by the convicts while making the road over the Blue Mountains, but that the discovery was kept secret.

In 1899 the total yield was returned at 496,196 ounces valued at £1,751,815; in 1898, 340,493 ounces, of the value of £1,244,330. The value of the gold varied from £1 12s. 6d. to £4 4s. per ounce.

In 1899 gold of the colony received for coinage at the Mint was 243,553 ozs., in 1898, 208,916·04 ozs., a net increase of 34,637 ozs.

Approximate value of machinery at the gold mines in 1899-1900, £861,828.

The number of miners were:—19,348, of whom 811 were Chinese; 11,318 were engaged during 1899 in quartz mining, and 8,030 in alluvial. The auriferous ground worked was 8,787 square miles, and 1,256 quartz reefs were proved to be auriferous.

The average yield per oz. of gold from washdirt was 8 grains; from quartz it was 12 dwts. 2 grains.

SILVER.—Indications of silver ore have been found in almost all parts of the country, the most prosperous mines being at Broken Hill, Sunny Corner, the New England districts, and Captain's Flat in the south. The value of silver and silver lead and ore exported during 1899 was £2,070,657, showing an increase on 1898. As the difficulty of treating low-grade sulphide ores is considered to be practically settled, a steadily increasing output is anticipated.

LEAD has been found in various parts; the quantity raised during the year being about 4,819 tons, of the value of £99,789; this includes lead-carbonate and lead-chloride.

COPPER is widely distributed. The cupriferous formations are estimated to cover about 6,713 square miles, equal to 4,296,320 acres. The principal mines are in the Cobar, Mudgee, Nymagee, Bourke, Bathurst, and Albert districts. The ore contains from 9 to 20 per cent. of metal. In 1899 the exports amounted to 4,640 tons ingots, and 1,337 tons ore and regulus, valued at £399,814, being an increase on the previous year.

TIN.—In the north there are six distinct fields; the principal centres of mining operations being at Glen Innes, Tingha, Inverell, Deepwater, Emmaville, Wilson's Downfall, and the border country. The area of stanniferous country is estimated at 8,500 square miles, or 5,440,000 acres. The returns for the year ending December 31, 1899, show exports 821 tons, value being £98,138, being an increase in value of £37,573, due to an abnormal jump in value. The total value of tin exported since the opening of the deposits in 1872 is £10,728,306. Tin is found in greatest abundance in the beds of rivers and creeks, and is known as stream tin; it is also found in veins and lodes.

DIAMONDS in considerable numbers have been found in various parts of the Colony, notably at Bingera, Tingha, and Inverell. The principal mine is the Monte Christo at Bingara, situated 4 miles from the township, and a large area of land in the vicinity has been taken up by syndicates; want of water prevented development. The Boggy Camp Diamond and Tin Field produced during 1899 gems of 25,874 carats, valued at £10,350.

OPALS.—The White Cliffs Opal Field, in the Wilcannia division, made satisfactory progress during the past year. Opals have

been found in layers between a hard silicious sandstone, as much as £5 per oz. being offered locally for good specimens. There are about 700 men on the field, and all the claims are being fully worked. The opal country covers an area of 12 miles long by 2 wide, the average depth being 10 to 12 feet. The value of the output for the year is estimated at about £135,000.

IRON is very generally distributed at Wallerawang and vicinity; in the neighbourhood of Jervis Bay and at Carcoar it is also found; but the principal operations carried on are at the Fitzroy mines, near Berrima; the Eskbank Iron Works, and the Mittagong Iron Works. The efforts to establish iron-making in the Colony have so far been unsuccessful, though the question is still under the consideration of capitalists. During 1899 the Eskbank Works produced 6,500 tons of iron, valued at £55,550. It has been stated that "the most promising iron region in the Colony is that traversed by the railway line from the foot of the Zigzag to Wallerawang. This district is rich in deposits of coal, iron, copper, and other minerals." Extensive deposits of iron-stone have been found on the Bulli Ranges in the Wollongong district.

ANTIMONY has been found in various localities, as have also manganese and smaller quantities of the rarer metals, but the bulk of the output comes from Kempsey and Hillgrove. Discoveries have also been made on the Clarence, Bellinger, and Nambucca rivers, but without leading to any satisfactory result. During 1899 the quantity obtained was 326 tons, valued at £2,694.

BISMUTH is distributed over the colony, the principal localities being the Kingsgate mine in the Glen Innes division, and the Jingera Mine in the Pambula division.

The COAL measures of New South Wales are extensive and valuable. They extend from the 29th to the 36th parallel of south latitude, and ramify to the water's edge along many miles of the seaboard. The New South Wales coal is well adapted for steam purposes, and experiments have shown it to be but little inferior to the best Welsh coal, while its gas-producing properties are superior. It is a most important mineral, and likely to continue so, the seams being of great extent and practically inexhaustible. The mines are situated at Hartley, Berrima, Singleton, Gunndah, Wallerawang, Rylstone, Lithgow, Katoomba, Mittagong, Moss Vale, Maitland, Newcastle, Wollongong, Bulli, and the contiguous districts, those at Newcastle being by far the most prolific of all. A valuable discovery was made in 1893 at Cremorne, Sydney Harbour, at a depth of 2,929 feet, the seam being 10 feet 3 inches thick, 9 feet 2 inches of which is workable. The Sydney Harbour Collieries Co. secured a site for their operations on the Balmain side of the harbour, with facilities for coaling ships of any size. Steady progress was made during 1899-1900 with the work of shaft sinking; the "Birthday" shaft at Balmain having been sunk to over 1,550 feet; the coal lies some 3,000 feet below the surface. During 1899 4,597,028 tons were obtained, valued at £1,325,799, being an increase in value, but a decrease in quantity on the previous year. The total output is the largest, with the exception of 1898, since the opening of the coal fields in 1829

The number of collieries under inspection in 1899 was 89 coal and 4 shale; number of men employed, 10,523. It is computed that the coal area of the Colony approximates to 23,950 square miles. During the year 96,530 tons of coke were manufactured, valued at £77,129.

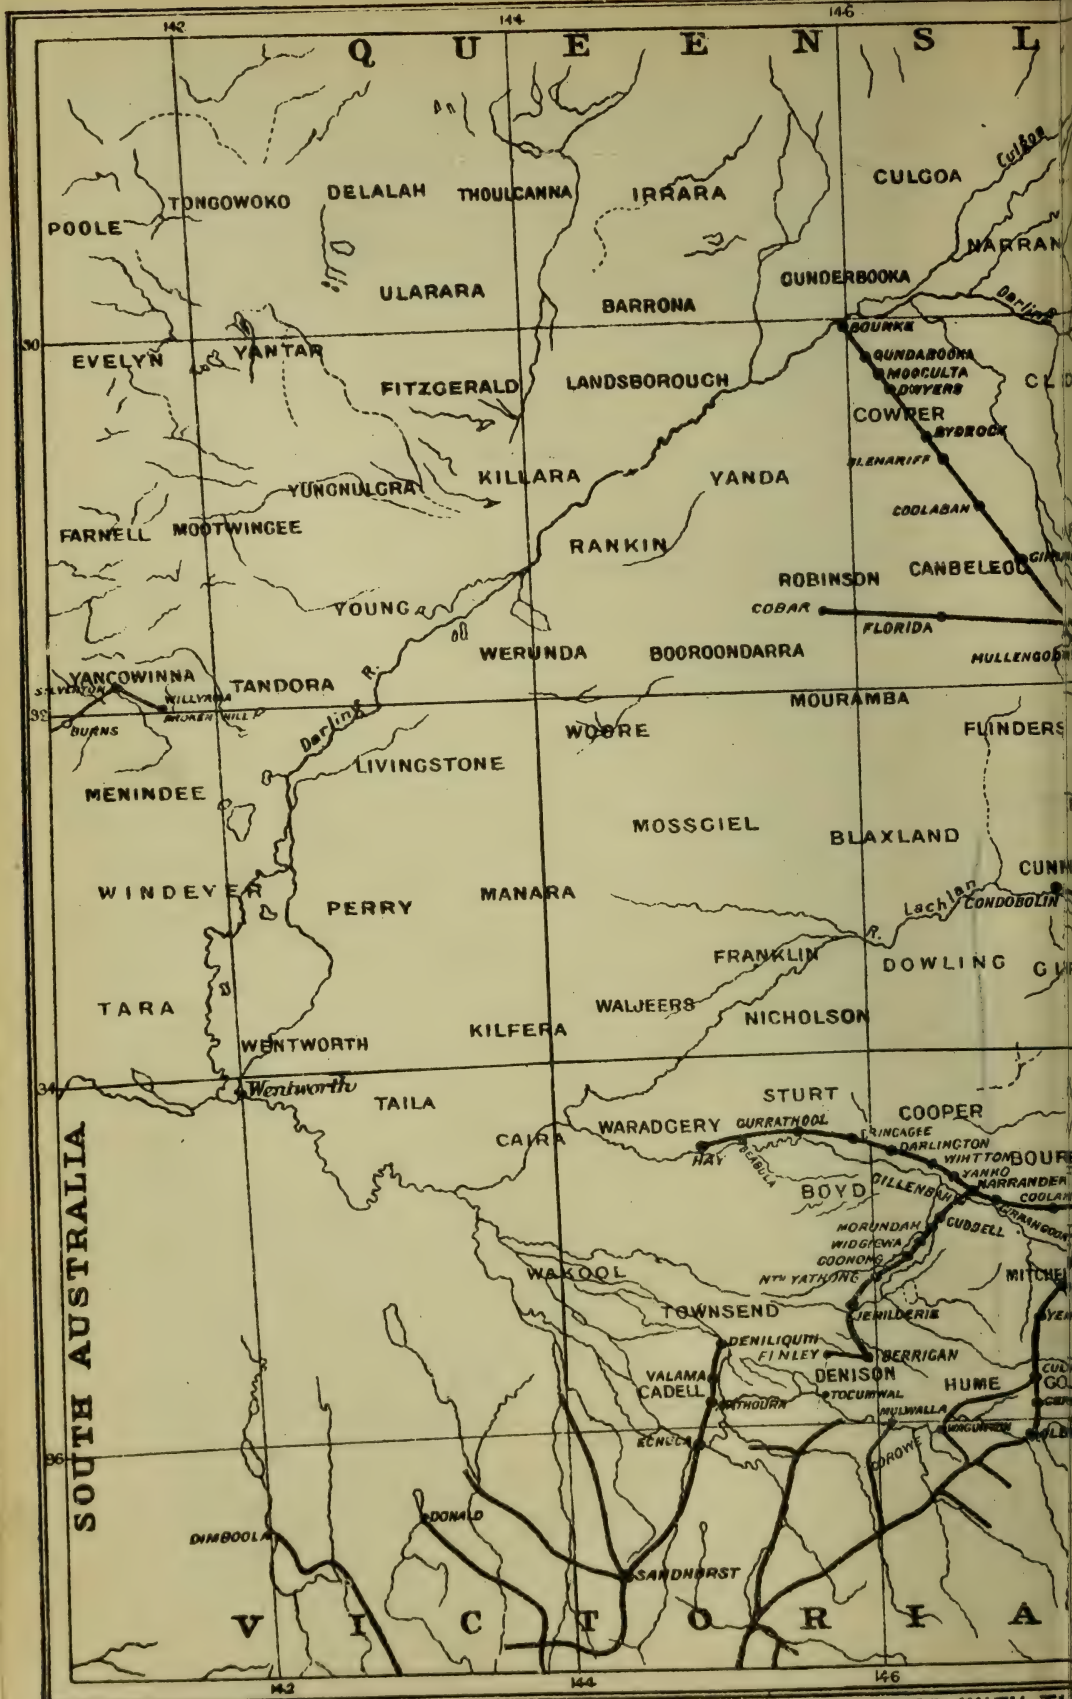
At Hartley Vale, near Bathurst, Joadja Creek, near Berrima, Katoomba, and in the Illawarra district, vast deposits of kerosene shale have been discovered. During 1899 the output was 36,719 tons, valued at £40,823, being an increase on previous year.

ASBESTOS has been found at Gundagai, at King's Plains, in the Bathurst district, and at Sewell's Creek in very small quantities, but no operations are now in progress.

ALUM.—In the range at the back of the village of Bulladelah is an enormous deposit of alum-stone. The deposit is about 35 miles from Port Stephens. About 921 tons of stone were raised in 1899, valued at £2,763.

Freestone suitable for building purposes is plentiful in the Coast district, and also abounds largely in Sydney; marble has been found in Marulan. Granite also is abundant in some parts of the Colony, particularly in the table-lands, where deposits of porcelain clay are also found. Meerschaum and plumbago have also been discovered. Limestone is very generally distributed, and large quantities of limestone flux are obtained in the Barrier district, the quantity raised during 1899 being 1,000 tons, valued at £750. Slate is abundant.

SUMMARY.—The quantities and value of principal minerals raised or exported to December 31, 1899, are recorded at:—Gold won, 12,862,922 ozs., value £47,546,013; silver, silver lead and ore exported, total value £27,882,997; coal raised, 85,969,136 tons, value £35,647,004; coke made, 418,558 tons, value £371,106; shale raised, 995,832 tons, value £1,908,482; tin exported, value £10,728,306; copper exported, value £7,665,621; iron made, 79,056 tons, value £606,643; antimony exported, 11,010 tons, value £190,621; bismuth exported, 303 tons, value £50,880; limestone flux raised, 710,447 tons, value £551,460; lead exported, value £135,439 (includes pig, chloride, and carbonate); opals raised, value £376,599 The aggregate value of metals and minerals the produce of New South Wales to the end of 1899 amounted to £134,064,712, the value for the year being £6,157,557, bring no less than £1,290,559 in excess of previous year.



Postal, Telegraph, and Money-Order. On 13th June, 1893, a Bill passed through Parliament enabling the Department, among other reforms, to regulate the registration and character of newspapers; to secure a more equitable system of payment to masters of non-contract vessels for conveying mails; to establish a parcel post within the Colony and with the various Australasian Colonies; to introduce the system of postal notes; to increase the maximum amount of a money-order from £10 to £20; to prohibit the carrying on of lotteries through the post; and to do away with the fee hitherto charged for redirecting letters while in course of post.

Electric Telegraph.—On January 1, 1900, the total extent of wire constructed was 38,718 miles, with 945 stations. During 1899 there were transmitted 3,112,063 messages, with a revenue of £168,758. The total cost of telegraphic communication up to December 31, 1899, was £1,051,987. Wires extend to every important place in the Colony, also to all the neighbouring colonies, and considerable telegraph extension is always going on. With Victoria and Brisbane there are quadruple lines; South Australia duplicate, and a duplicate direct cable connects with the colony of New Zealand. Cable communication with New Caledonia was established on 19th October, 1893, N. S. Wales entering into a guarantee to the extent of £2,000 per annum for a period of 30 years. For the year 1899 N.S.W. contributed £2,000 under the guarantee. The total number of cable messages sent from N.S.W. amounted to 31,720; those received to 23,086.

The cost of messages not exceeding ten words, exclusive of name and address of sender and receiver, is 1s. from any station to any part of the Colony; additional words being charged 1d. per word. Telegrams from or to the Sydney office and suburban branches within a distance of 13 miles are 6d. for ten words, and 1d. every additional word; this rate also applies to telegrams exchanged between some of the larger towns (such as Maitland Grafton, Narrabri, Armidale, Broken Hill, Cooma, Newcastle, Wagga, Yass, Wollongong, &c.) and certain contiguous places. The rates between the border stations of New South Wales and Victoria and Queensland are 1s. for ten words, and 1d. each additional word, and with South Australia 1s. and 2d. each additional word. To Victoria and Queensland stations the rate is one shilling for every ten words, and twopence for each additional word; to New Caledonia, 10d. for each word (including address and signature); to South Australia two shillings for ten words and twopence for extra words. (The stations on the overland line, to Port Darwin, on which the charges vary from 4s. to 8s. according to distance.) To Tasmania, per cable, ten words cost 2s. 6d., each additional word being 3d. To New Zealand the charge from Sydney is 3s. for ten words, and 5d. for each additional word, the maximum length of a single word is fifteen letters, any additional letter being counted and charged for as extra words at the rate of fifteen letters to a word, the address and signature to be included. To West Australia, ten words 3s., each additional word 3d. A telegram to London can be forwarded at a cost of 4s. 11d. per word from Sydney and 1s. 10d. for press messages. Press messages between all stations in New South Wales, 10 words, 6d.; every additional word up to 34, ½d.; exceeding 34 and not exceeding 100 words, 1s. 6d.; and every additional 50 words or portion thereof, 6d. The difference of time between London and Sydney is 10h.; Sydney being in advance of London. The charges on telegrams (except cable business and press) must be prepaid by postage stamps.

Telephone.—On 1st May, 1896, a general reduction of fees and other charges in connection with the telephone system was made. The telephone continues to make rapid progress throughout the city and suburbs, and is proving a great benefit and convenience to business men, 3,322 places being connected with the Central Exchange, 3,372 with the Suburban, and 862 with the County; there were 10,119 telephones in use. The annual charge for business establishments is £9 not exceeding a mile, and for private residences £5, and for each half mile up to 5 miles, £1 a year is charged. A telephone bureau is established at the General Post Office, and also at several of the principal suburbs and inland centres. Length of lines opened during 1899, 2,437 miles; cost of construction (including tunnels) being £55,555; revenue for the year 1899, £60,429.

Postal and Money-Order Rates.—Rates within the Colony of New South Wales:—Letters, city or suburban, for every ½ oz. or under, 1d.; letters, country, for every ½ oz. or under, 2d.; letter card, 1½d.; post cards, city, suburban, or country—single, 1d.; reply (double cards, each half impressed with a penny stamp), 2d.; packets, for every 2 oz. or under (up to 1 lb.), 1d. Packets containing only printed matter or circulars or other matter not printed in ordinary type, that is, produced either wholly or in part by other mechanical processes, such as chromography, &c.,—at least 100 copies of such circulars, absolutely in identical terms, must be submitted to the Post-office and posted at the same time, and each envelope marked "100 posted," (this endorsement to be verified by an impression of the date stamp of the post-office at which they are posted). *No writing except the address on the exterior of the packet is permitted;* not exceeding 2 oz., ½d.; exceeding 2 oz. but not exceeding 4 oz., 1d.; and every additional 4 oz. or fraction of 4 oz. (up to 4 lb.), 1d.; books, not exceeding 2 oz. ½d.; exceeding 2 oz, but not exceeding 4 oz., 1d., and for every additional 4 oz., or fraction of 4 oz. (up to 5 lb.), 1d. Commercial papers, for every 2 ozs. or under (up to 4 lb.), 1d. No book or packet to exceed two feet in length or one foot in breadth or depth, or to be of inconvenient form; newspapers, printed and published in the colony and posted within seven days of publication (except those posted in Sydney for delivery within the boundaries of the city, which are subject to a charge of 1d. each when not exceeding 10 oz. or an additional ½d. if over 10 oz.; and newspapers returned from an agent or newsvendor to the Editor, Proprietor, &c. which should bear postage at the rate of 1d. per lb. or fraction thereof) not exceeding 10 oz., free; for every additional 10 oz. or fraction thereof, ½d. each; if printed in the colony and posted after seven days from the date of publication, or if printed out of the colony for every 10 oz. or fraction thereof, ½d. each; bulk parcels containing newspapers over

seven days old, or printed out of the Colony, posted by Registered Newspaper Proprietors, or by newsvendors, for transmission within the Colony, are charged 1d. per lb. or fraction thereof; newspaper supplements printed in one part of the Colony, and transmitted in bulk to any other part, will be charged at the rate of one penny per lb. or fraction thereof; registration fee, 3d.; acknowledgments of receipt of a registered article, 2½d. The above rates apply also to Lord Howe and Norfolk Islands.

Postage Rates—New South Wales to Victoria, South Australia, Western Australia, Tasmania. New Zealand, Queensland, British New Guinea, and Fiji:—Letters, for every ½ oz. or under, 2d.; letter cards, 1½d.; post cards, single, 1d. each; reply (double cards, each half impressed with 1d. stamp), 2d.; Packets. for every 2 oz. or under (up to 16 oz.), 1d.; commercial and printed papers, for every 2 oz. or under (up to 4 lbs.), 1d.; books, for every 4 oz. or under (up to 5 lbs.), 1d.; newspapers, for every 10 oz. or fraction thereof, ½d. each, except to Queensland, and British New Guinea, which are charged ½d. per 2 oz. or fraction of 2 oz.; bulk parcels containing newspapers of the same issue, posted by registered newspaper publishers, or by newsvendors, are charged 1d. per lb. or fraction thereof; bulk parcels must contain at least four newspapers, but may not be sent to Queensland or British New Guinea. Registration fee, 3d.; acknowledgment of receipt of registered article, 2½d.

Postage rates from New South Wales to other parts of the world:—Letters, for every ½ oz. or under, 2½d.; post cards, single, 1½d. each; reply (double cards, each half impressed with 1½d. stamp), 3d.; newspapers, 1d. each for any weight up to 4 oz. and ½d. for every additional 2 oz. or fraction of 2 oz.; printed matter of every kind except newspapers (up to 5 lb.), 1d. for every 2 oz., or fraction of 2 oz.; commercial papers, (up to 5 lbs.), 3d. for any weight up to 2 oz.; 3½d. between 2 and 4 ozs.; 4d. between 4 and 6 ozs.; 4½d. between 6 and 8 ozs.; 5d. between 8 and 10 ozs.; and 1d. for every additional 2 ozs. up to 5 lb. Patterns or samples—For the United Kingdom, up to 1 lb., not exceeding 2 feet in length and 1 foot in breadth; for other places up to 12 oz., not exceeding 12 inches in length, 8 inches in width, or 4 inches in depth; for every 2 oz. or fraction of 2 oz. 1d.; registration fee, 3d.; and acknowledgment of receipt for a registered article, 2½d.

Inland Parcel Post in New South Wales.—Rates, 2 lbs. or under, 8d., and each additional lb., 3d.; weight, 3 lbs. when only horse mail, and up to 11 lbs. by train, steamer, or coach; dimensions, 3 feet 6 inches in length, or 6 feet in girth and length combined.

Intercolonial Parcel Post.—New South Wales to Western Australia, South Australia, Victoria, Tasmania, Queensland and New Zealand. Rate, 8d. for 1lb. and 6d. each additional lb.; dimensions, 3 feet 6 inches in length, or 6 feet length and girth combined. Weights 3 lbs. when only horse mail, 11 lbs. rail, coach or steamer.

Postal Notes may be obtained at the Chief Money Order Office, and Stamp Sales Office, General Post Office, and at all Money Order Offices in the Colony, and at certain other post-offices, and are payable only at Money Order Offices. The hours for business are as follows;—Chief Office, Monday to Friday, 9·30 A.M. to 3·30 P.M.; Saturday, 9·30 A.M. to noon. Branch, Suburban, and Country Offices—daily, (except Sunday) 9 A.M. to 5 P.M. The following are the denominations of the notes, and the poundage or price charged for them:—

Postal Note, 1s.; Poundage, 1d.; 1s. 6d., 1d.; 2s., 1d.; 2s. 6d., 1d.; 3s., 1d.; 4s., 1d.; 5s., 2d.; 7s. 6d., 2d.; 10s., 3d.; 15s., 3d.; 20s., 4d. During 1889 the number of postal notes issued and paid was 1,498,017, of the total value of £449,656; amount of poundage collected, £10,966.

Should it be desired to transmit broken sums not exceeding in value 5d. (but not fractions of a penny), unobliterated New South Wales postage stamps may be affixed to the face of a note, and the amount of the note and the stamps will be paid. Should the spaces in a postal note for name of payee and paying office be not filled up, the note will be payable to the bearer at any Money Order Office in the Colony. There is no objection to the insertion of the word "bearer" in the space appointed for name of payee. If the sender wishes the note paid to any specified person, at any specified office, the name of the person and office (which must be a Money Order Office) should be written in the proper places. After these particulars are once filled in, they must not be altered. If a postal note be payable to any specified person, that person must sign the receipt, and if a person other than the payee presents the note, the person who presents it must also receipt the note. Postal notes may be crossed (like cheques), when they will only be paid through a bank. Postal notes containing alterations or erasures, or cut, defaced, or mutilated, will not be paid in ordinary course. Special application on the subject must be made to the Postmaster-General. Postal notes are payable for six months after date of issue. Fresh poundage (the same as that originally charged) must be paid in stamps for every additional six months or portion thereof that have elapsed after issue and before presentation for payment. After once paying a postal note, all liability on the part of the Department ceases. Every person to whom a postal note is issued should keep a record of the number, date, and name of office of issue, to facilitate inquiry if the note should be lost. Further particulars can be obtained at any post office in the Colony.

Exchange of Postal Notes between New South Wales, Victoria, South Australia, Queensland, and Tasmania.—Postal Notes are payable at all Money Order Offices in South Australia, Queensland, Victoria, and Tasmania; and postal notes issued in those colonies are payable in New South Wales. Upon payment of any such postal note the payee will be charged a commission, to be affixed in stamps, equal to that charged in the Paying Colony for the issue of a postal note of the same value, but such stamps must not be obliterated.

In 1899 there were in operation 648 money-order offices. During the year there were issued 421,085 orders, to the amount of £1,436,927, being an increase of 13,924 orders, and £65,200 in value; the number of orders paid was 418,855, of the value of £1,466,602. The gross commission collected from the public was £15,874, being an increase of £764 on the amount received in 1898

On January 1, 1900, there were 1,626 post-offices, and 526 receiving offices, and 5,251 officers, exclusive of 960 mail contractors. During 1899, 74,686,138 letters, 46,806,560 newspapers, 13,986,590 packets and book parcels, 632,470 letter cards, 654,474 parcels, and 1,408,140 post-cards passed through the post-office. The number of miles travelled by mail conveyances was 11,638,500, being an increase of 635,000 on the mileage of the previous year. The total postal revenue was £960,803; expenditure, £877,121. The postal service to the United Kingdom is performed weekly by the Orient and P. and O. Steam Navigation Companies (alternately); the San Francisco service by the Union ss. Company (four weekly), and the Vancouver and Honolulu service by Canadian-Australian line of steamers (four weekly).

Contributions.—New South Wales contributed £25,955 to the cost of the Federal Ocean Mail Service; £4,000 was paid to New Zealand for the Sydney-San Francisco service; and £7,465 for the Sydney-Vancouver service.

Railways.—The Railway Commissioners in their annual report for the year ending June 30, 1900, forecast that: "Owing to the serious drought of the last few years and the consequent enormous loss of sheep, no material increase in the carriage of wool and live stock is anticipated during the current year. As, however, the country has recently had the benefit of splendid rains, the present outlook with regard to grain and agricultural products of all kinds, together with the development of mining, is more encouraging than it has been for some years. It may reasonably be expected that the revenue estimated will be realised, but it will be earned under conditions similar to those of the past year; and, in view of the necessity for replacing a large mileage of iron rails on the Main Northern line by steel, renewing a number of old engines, and carrying out extensive repairs on engines purchased about ten years ago, it is more than probable that the percentage of expenditure to earnings will not be reduced."

The first combined movement on the subject of introducing railways into New South Wales took place as far back as January, 1846. On the 29th of that month, a public meeting was held at Sydney to consider the expediency of establishing railroads in this Colony. A provisional committee was appointed to collect information on the subject, and on the 26th August they submitted a report, recommending that a survey of the proposed line from Sydney to Goulburn be made; the cost of construction was estimated at £6,000 per mile, and a net profit of 8 per cent. per annum on the required capital anticipated.

The cost of the necessary survey was raised partly by private subscription and partly by Government aid. Mr. Woore's tender for the survey of the line to Goulburn was accepted, and on the 27th January, 1848, the committee reported that the survey had been completed; Mr. Woore's report and drawings were laid before the meeting and approved.

On the 15th June of the same year the Legislative Council passed a series of resolutions in favour of the construction of railways, and the expediency for the Government to offer some inducements to encourage private enterprise. In November the Sydney Tramroad and Railway Company was formed, and no time was lost in making preliminary arrangements for the commencement of the work.

On the 3rd July, 1850, the first turf of the first Australian Railway was turned by the Hon. Mrs. Keith Stewart, in the presence of His Excellency the Governor, Sir C. A. Fitzroy, and a large concourse of inhabitants.

The first contract for the first portion of the line, from Haslem's Creek towards Sydney, was accepted on the 12th March, 1851; the work proceeded satisfactorily until the gold discoveries in the Bathurst district so seriously interfered with it, that the Contractor had to be released from his undertaking.

While the Sydney Railway Company was struggling with the difficulties of the times, and seeking Government aid to enable them to continue the work, a movement for the construction of a line from Newcastle to Maitland took place in the Northern city. A provisional committee to carry out the preliminaries was appointed at a meeting held at Newcastle on the 20th April, 1853. An Act, incorporating the "Hunter River Railway Company" was assented to on the 10th October of the same year, and operations were commenced at once, but after an existence of a little over a year this Company, like its prototype, the Sydney Railway Company, succumbed, and the properties of the two companies were transferred to the Government under the Act 18, Vic., No. 40, which placed the Railways under the management of three Commissioners: from the date of these transfers in 1855 the railways remained Government property, and have been carried out under the superintendence of Government Officers.

The first railway opened was the section from Sydney to Parramatta, on the 26th September, 1855, but for various reasons, the progress of construction during the next 20 years was very slow, only 437 miles being open for traffic in 1875; by this time, however, the principal mountain ranges had been crossed, and work could now be proceeded with at a greater rate and at less cost per mile. The mileage in operation on the 30th June, 1900, was 2,811¼. During the year ended 30th June, 1900, extension from Tamworth to Manilla, 29¼ miles; Moree to Gravesend, 35 miles; and Broken Hill to Tarrawingee, 40 miles. The following

lines are under construction—Koorawatta to Grenfell, 32 miles, the Rock to Green's Gunyah, 24 miles ; Byrock to Brewarrina, 58 miles ; Moree to Inverell (2nd section), 60¾ miles ; Goulburn to Crookwell, 35 miles ; Dubbo to Coonamble, 93½ miles. All these lines are of the pioneer class, and are constructed with a view of affording railway communication over level country into districts from which the traffic would not warrant the expenditure necessary to provide thoroughly equipped railway lines. The cost of the constructed "Pioneer" lines has averaged £2,019 per mile, being a reduction on the cost of the "Light railway" between Nyngan and Cobar, the cheapest line previously constructed in this Colony of £1,691 per mile. The lines are capable of carrying the ordinary rolling stock, hauled by a light class of engine, at a speed of from 15 to 20 miles per hour.

The "pioneer" lines now opened for traffic have proved satisfactory both as regards working and traffic.

The Government Railways of the Colony are divided into three principal systems, viz. : the Southern, the Western, and Northern, all connected with each other, Sydney being their starting point.

The Southern system embraces the Main Southern Line from Sydney to Albury, 386 miles distant ; here the junction between the Victorian and New South Wales Railways was effected on the 14th June, 1883. The following are the principal stations on the Main Line :—Granville, Liverpool, Campbelltown, Picton, Moss Vale, Goulburn, Gunning, Yass, Murrumburrah, Cootamundra, Junee, Wagga-wagga, Culcairn and Albury. Altogether there are 109 stations and platforms on this line.

The following are the branches :—The South Coast or Illawarra Line, which diverges from Main line at Macdonald town 1½ miles from Sydney, and runs due south, closely following the coast, as far as Nowra, 92 miles. A short line, 5 miles, branches off the South Coast line at Sydenham and runs to Belmore.

The principal stations on this section are :—St. Peters, Sydenham, Arncliffe, Rockdale, Kogarah, Hurstville, Como (as a pleasure resort), Sutherland, Helensburg, Clifton, Bulli, Wollongong, Dapto, Kiama, Berry and Nowra ; altogether there are 37 stations and platforms. The station at Wollongong being some distance from the harbour, the Government purchased the Mount Keira Line, about 1 mile in length, which connects the main line with the deepwater.

At Strathfield, 7 miles from Sydney, the North Coast line branches off, and Granville, 6 miles further on, is the Junction of the Southern and Western systems ; from Campbelltown, a short line of 7¾ miles. runs to Camden. The Cooma branch, 130 miles long, leaves the Main Line at Joppa Junction, 135 miles from Sydney. The principal stations are :—Tarago, Bungendore, Queanbeyan, Michelago and Cooma, the total number of stations and platforms being 17. The future extension of this line will connect with the Gippsland line in Victoria, and afford an alternate route to Melbourne.

Demondville Junction, 231 miles from Sydney, is the junction station of the line connecting the Southern with the Western system. The Murrumburrah—Blayney line, as it is called—is 110 miles in length, and greatly facilitates the stock traffic from the Western stations to Melbourne. There are 15 stations and platforms on this line, the principal of which are :—Young, Cowra, and Carcoar.

Cootamundra, 253 miles from Sydney, is the junction for two branch lines, viz. :—one running south to Gundagai, 34 miles distant, and the other north-westerly to Temora, 39 miles from the junction.

The South Western leaves the Main Line at Junee junction, 287 miles from Sydney, and terminates at Hay, 167 miles from Junee junction. There are 19 stations and platforms on this line, the principal being :—Old Junee, Narrandera, Carrathool, and Hay. At Narrandera, 347 miles from Sydney, a line 101 miles in length branches off to Finley. The South Western Line was constructed with a view of diverting the wool trade from Victoria to Sydney.

From Culcairn a line 47 miles in length runs to Corowa, on the Victorian border, opposite Wahgunyah, which is connected by rail with the Victorian North Eastern system.

The Western system proper commences at Granville, and terminates at Bourke, 503 miles from Sydney. This line crosses the Blue Mountains, the ascent to which commences at Emu Plains, 87 feet above sea-level ; at Lucasville, 3 miles distant, the rails reach an elevation of 462 feet ; between these stations is situated the first zig-zag, now discarded, a deviation in the line having rendered its use unnecessary ; the line reaches its highest point at Clarence Siding, 88 miles from Sydney, and 3,658 feet above sea-level. Four miles further on the Great Zig-Zag is reached, the line here descends 687 feet in less than five miles. The number of stations and platforms on this line is 91, the principal being :—Parramatta, Seven Hills, Blacktown, Penrith, Katoomba, Mount Victoria, Lithgow, Wallerawang, Bathurst, Blayney, Orange, Wellington, Dubbo, Nyngan and Bourke.

At Blacktown, 22 miles from Sydney, a line, 16 miles in length, branches off to Windsor and Richmond.

From Wallerawang, 105 miles from Sydney, a line runs northerly to Mudgee, 85 miles distant.

Blayney, the junction station of the line, connecting the Western and Southern systems, has already been referred to.

The Forbes line, 94 miles in length, leaves the Main line at Orange, 192 miles from Sydney, and runs due west, passing through Molong and Parkes to the terminus, Forbes. At Parkes a line branches off to Condobolin, 62¾ miles distant. This may be regarded as a section of the future Intercolonial line to Adelaide.

At Nevertire, 341 miles from Sydney, a line 12½ miles long branches off to Warren ; the continuation of this line will ultimately connect the Western with the Northern Railway system.

The Cobar line, 82 miles long ; it starts from Nyngan, 377 miles from Sydney, runs due west, and its continuance to Broken Hill, *viâ* Wilcannia, has been seriously considered.

The Northern line branches off the Main Southern at Strathfield, 7 miles from Sydney, the section from here to Hamilton (2 miles from Newcastle) is better known as the North Coast Line ; it crosses the Hawkesbury River by means of a bridge, 2,900 feet in length, supported by six piers, each resting on a caisson filled with concrete ; their depths vary from 101 feet to 162 feet, the last being the deepest foundation of any bridge in the world ; about four miles further on the Warrawolong range is pierced by a tunnel, one mile in length—the longest in Australia. The line connects with the Northern system proper at Hamilton, 100 miles from Sydney. The Northern Railway, in its course to the Queensland border, crosses the Liverpool Range, the Liverpool Plains, and New England Range, and reaches its highest elevation at Ben Lommond, 4,471 feet above sea-level, this being the highest rail-level in Australia. At Jennings, 491 miles from Sydney, the line connects with the Queensland Railway running to Brisbane. There are altogether 110 stations and platforms on the Northern line, the principal being :—Hornsby, Hawkesbury (as a pleasure resort), Gosford, Wyong, Newcastle, Maitland, Singleton, Muswellbrook, Murrurundi, Quirindi, Werris Creek, Tamworth, Armidale, Glen Innes, and Tenterfield.

The following are the branch lines :—Hornsby to Milson's Point, North Sydney, 13 miles long ; Waratah to Wallsend, 5 miles, Maitland to Morpeth, 4 miles ; Tamworth to Manilla, 29 miles. At Werris Creek, 254 miles from Sydney, the North Western line branches off to Moree, 159 miles distant, and thence easterly to Gravesend, 35 miles ; the principal stations are : Breeza, Gunnedah, Boggabri, Narrabri and Moree. In addition to the above there is an isolated line, Lismore to Murwillumbah in the north-eastern portion of the colony. Its length is 63¾ miles, and its capital cost was £921,137. Owing to the sparse population the gross earning only amounted to £11,401 for the year ending 31st Dec. 1899 ; the working expenses reached £8,383, the loss, after providing for working expenses and interest on capital, being £29,273.

The Government purchased the line (3 ft. 6 in. gauge) from Broken Hill to Tarrawingee, and leased it to the Silverton Tramway Company for five years, the Company to receive the receipts, pay the cost of working and maintenance, and 3 per cent. per annum on the capital outlay.

With a view of developing the resources of the Colony, specially low rates for the conveyance of agricultural produce have been introduced. These rates are the lowest charged in Australia for the carriage of this class of traffic. N.S. Wales, owing to its great extent of territory, and the consequent long distances the produce has to be carried, requires a low tariff, and for many classes of traffic the Commissioners have adopted a cheap mileage scale on the long distances, which practically limits the disadvantage consequent on the longer distance the goods have to be carried to reach their markets and the seaboard ; for instance, the rate per ton in 6 ton lots for flour, grain, potatoes, &c., for 500 miles is 14s. per ton, and for every additional 25 miles or part thereof 2d. per ton ; for hay, straw, chaff, &c,, the rates per ton in 6 ton truck loads are : for 300 miles, 9s. 9d. ; for 400 miles, 11s. 2d. ; and 500 miles, 12s. 6d. The passenger traffic has also received special attention. Holiday, excursion and tourists tickets are issued daily to stations lying within the tourist districts of the respective systems. Tickets at 2d. and 1d. per mile return (first and second-class respectively) are issued on Fridays and Saturdays by special trains running to the mountains, &c. During the summer months special trains convey passengers at even lower fares from the seaports inland, and *vice versâ*.

The management of the railways and tramways is, by the "Government Railways Act of 1888," vested in three Commissioners, viz. : Mr. Charles Oliver, Chief Commissioner, and Messrs. W. M. Fehon and David Kirkcaldie, Commissioners. Great and necessary improvements throughout the service have been effected since the Act of 1888 came into force. The steep grades on the whole of the lines are being cut down wherever the outlay produces a profitable return. With a view of working the traffic more economically heavier classes of engines were introduced, and the results have justified the action taken ; the passenger and goods stocks have also received special attention, and now rank as the best in the Colonies.

The best test of successful railway working is that applied to earnings, and of the train mileage and percentage of working expenses to revenue. The financial year, ending the 30th June, 1900, compared with that of 1888 shows the following results :—

	1900.		1888.
Miles open	2,811¼	...	2,144
Gross revenue	£3,163,572	...	£2,295,124
Working expenses	1,769,520	...	1,530,551
Net earnings	1,394,052	...	764,573
Percentage of Working Expenses to Revenue	55·93	...	66·69
Train miles	8,894,352	...	6,689,313
Gross earnings per train mile ...	85½d.	...	82½d.
Expenses ,, ,, ...	47¾d.	...	55d.
Net profit ,, ,, ...	27½d.	...	27½d.

The total capital cost of the lines open for traffic on the 30th June, 1900, was £38,477,269 ; the interest on this sum, at the average interest payable on the debt of the Colony, amounts to £1,400,187. The net results, £1,394,052, of the year's transactions leave a deficit on the year's working of £6,135.

In regard to the year's transactions it may be stated that the gross revenue shows an increase, over the previous year, of £18,299.

The average number of miles open during the year ended

30th June, 1900, was 2,777 : the earnings per average mile open being £1,153, and the working expenses £645 ; the total train mileage was 8,894,352. The number of passenger journeys reached 26,486,873, and there were carried 5,342,916 tons of goods and 188,595 tons of live stock. The total earnings from coaching traffic were £1,195,496, per train mile 66·97d. ; from goods traffic, £1,936,217, per train mile 100·79d. The expenditure was distributed as follows :—Maintenance of ways and works, and stations, £406,044 ; locomotive working, £648,767 ; carriages and waggons, repairs and renewals, £159,630 ; traffic expenses, £478,818 ; compensation, passengers, £1,643, £4,250 ; fire insurance fund, £1,250 ; general expenses, £66,597. The rolling stock, on the 30th June, 1900, consisted of :—489 engines, 1,025 coaching vehicles, 9,880 goods vehicles, and 1,049 departmental wagons, etc.

Private Railways.—Private enterprise has provided a line 45 miles long from Deniliquin, in the Riverina district, to Moama, on the Victorian border and opposite to Echuca, which is connected by rail with Melbourne. A private line, 35 miles in length, also connects Broken Hill with the South Australian Railway system. There is also a 3-mile private line to Rosehill and a 60-chain one to Warwick Farm; the rolling stock of the two belongs to the New South Wales Government. In addition to these there are a number of lines owned by the various collieries in the Newcastle and Illawarra districts.

Tramways.—On the 30th June, 1900, 71¼ miles of tramway were open for traffic. The revenue for the year shows an increase of £61,168 and the expenditure of £53,105, net earnings £8,063.

The length of the City and Suburban Steam lines is 34 miles and 39 chains, and the working gave a net result of £2 16s. 4d. on the capital invested ; the electric lines are 8 miles and 62 chains long, and the net result on capital invested was £9 19s. 10d ; the Ocean Street Cable tramway, 2 miles 32 chains in length, gave a return of £4 15s. 8d. On other sections the net returns varied from £2 4s. 3d. to £4 15s. 8d. on the capital invested. The Ashfield-Enfield section, however, showed a loss on working of £1,145.

But the best idea of the success of the tramway working will be obtained by comparing the results of the years ended on 30th June, 1888 and 1900.

	1900		1888.
Total spent in construction and equipment	£1,924,720	...	£877,244
Total mileage open for traffic ...	71¼	...	38½
Gross revenue	409,724	...	236,519
Working expenditure	341,127	...	219,196
Net earnings	68,597	...	17,323
Percentage of Working Expenses to Revenue	83·26	...	92·67
Gross earnings per tram mile ...	22½d.	...	40¾d.
Expenses ,, ,, ...	18¾d.	...	37½d.
Net earnings ,, ,, ...	3¾d.	...	3d.
Percentage of profit to capital invested	£3 16s. 5d.	...	1898
Tram mileage	4,355,027	...	1,388,786
Number of motors	114	...	96

The majority of the trams in the City of Sydney and the whole of the Newcastle tramways are worked by steam power, which has rendered good service in the past, but it is proposed to convert the steam service into the electric system by which a more frequent and expeditious service will be given to and from the suburbs. An electric tramway along George Street has been opened, and penny sections have been introduced. At present tramcars run frequently throughout the day to Bondi, Botany, Coogee, Forest Lodge, Glebe Point, Leichhardt, Five Dock, Abbotsford, Marrickville, Dulwich Hill, Moore Park, Newton, and Enmore, Redfern Railway Station, Randwick, Surrey Hills, Paddington, Waterloo, Waverley Cemetery, Enfield, Ashfield, Balmain, and St. Peter's. The North Sydney Cable Trams, 2 miles 32 chains in length, have been converted into Electric Tramways, and the North Sydney Electric Tramways now have a length of 10 miles 18 chains. A cable-tram is running from the city to Ocean St. Woolahra, a distance of 2 miles 32 chains ; but an extension of this line to Rose Bay is worked by electricity. The conversion of the Sydney steam lines into electric is now in progress ; the Dulwich Hill and St. Peter's line and George and Harris Street lines have already been converted to electric.

Roads.—According to the latest statistics there are 7,453 miles of municipal roads and streets in New South Wales. Of these 2,392 are metalled, &c., 1,329 formed, 568 cleared and drained, 1,201 cleared only, and 1,963 bush roads. The total roads in New South Wales number 50,000 miles.

Shipping.—The steam fleet of the Colony is principally owned by the following companies :—The Australasian United Steam Navigation Company, trading to Melbourne, Brisbane, and the northern ports of Queensland, Fiji, and Noumea ; Adelaide Steamship Company, Burns, Philip & Co., Sydney Terries, Ltd., Union Steamship Company, Tasmanian Steamship Company, Balmain Ferry Company, Manly Steamship Company, Shellharbour Steamship Company, Watson's Bay Ferry Company, North Coast Steam Navigation Company, Manning River Steamship Company, Illawarra Steam Navigation Company, Hawkesbury Steamship Company, Newcastle & Hunter River Company, Parramatta River Company, Bulli Coal Company, steamships owned by Messrs. Howard Smith & Sons, Huddart, Parker, & Co., and G. W. Nichol & Co.

During 1899 the inward entries were 3,219 vessels of 3,468,591 tons, and crews of 106,267. The outward entries comprised 3,199 ships of 3,526,960 tons, and crews of 106,857. Forty-six vessels of 1,638 tons were built, and there were registered 74 vessels of 9,273 tons, manned by 386 men. The tonnage entered and cleared at Sydney during 1899 amounted to 4,566,524 ; at Newcastle, 1,994,777.

During 1899 there were 9 wrecks, of 3,693 tons, value £36,380. No lives lost.

Fisheries.—On January 1, 1900, there were issued 958 fisherman's licenses for 445 boats. The revenue of the Department amounted to £4,006, and the expenditure to £2,983. On January 1, 1900, the length of foreshore (including 4 acres deep-sea lease) on lease for oyster fishing was 264,756 yards, and the number of bags of oysters taken was 20,182.

Lighthouses.—The whole of the coast line of New South Wales from Cape Howe to Point Danger is well lighted. These lights, in their order from South to North, are : Green Cape (37° 15′ 30″ S. lat. and 150° 4′ E. long.), a first order dioptric light, flashing every minute, visible 12 miles, 40 feet above sea-level (near here the *City of Sydney* on 7th November, 1862, and still later, on May 30, 1886, the *Lyeemoon*, were wrecked, the last-named being attended with the loss of seventy-one lives) ; Eden, Twofold Bay, a fixed red light visible at 7 miles distance, height 140 ft. : on Point Look Out, a red harbour light ; on Montague Island, fixed and flashing white light, flashing once a minute, visible 20 miles, height 262 ft. ; Ulladulla, a fixed white light, visible 12 miles, height 140 ft. ; Shoalhaven, position light fixed red, visible 8 miles, height 35 ft. ; Jervis Bay, a bright triple group flashing first-order light visible 20 miles, height of focal plane 304 ft. Kiama, fixed green light, visible 8 to 12 miles, height 50 ft., also harbour light fixed green from end of breakwater ; Wollongong, a fixed white light, visible 10 miles, height 56 ft. ; South Head (Macquarie Lighthouse) electric light is now shown from the new lighthouse. The light is of the first order, 16-sided, dioptric, holophotal revolving white light, showing a flash of eight seconds in every minute, and having a range of 25 miles seaward, height 346 ft. Inner South Head (Hornby Lighthouse), a fixed white light, visible 15 miles, height 90 ft. ; at Barranjoey the inner Southern Headland of Broken Bay, a permanent fixed red light, visible fifteen miles (2nd order dioptric), height 371 ft. ; Nobby's, Newcastle, a fixed white light visible from a ship's deck at 18 miles, height 115 ft. ; Port Stephens, a revolving light flashing alternately red and white, visible 17 miles, height 126 ft. ; at Nelson Head, a fixed white light to seaward, visible 8 to 10 miles, height 350 ft. ; at Sugar-loaf Point, Seal Rocks, a revolving white light, flashing every half minute, visible 22 miles, height 258 ft. ; green light of fourth order also shown from the same tower ; Crowdy Head, a fixed white light, red over the Mermaid Reef, visible 10 to 12 miles, height 130 ft. ; at Tacking Point, a fixed white light, visible 11 miles, height 120 ft. ; on South Solitary Island, a revolving white light, with intervals of thirty seconds, visible 19 miles, height 188 ft. ; Smoky Cape, a bright triple Group flashing first order light, visible 27 to 35 miles, height 450 ft. ; Clarence River, a bright fixed white light, visible 12 miles, height 150 ft. ; Richmond River, two fixed white lights, visible 12 miles, height 90 ft. ; at Cape Fingal, Tweed River, a bright fixed white light, visible 6 to 8 miles, height 180 ft. ; total cost of lighthouses, £231,573. Maintenance of lights and lighthouses in 1899 cost £11,717.

Life-Boats and Life-saving Appliances.—There are only two Life-boats proper on the coast of New South Wales, one being at Sydney and the other at Newcastle. The steam tugs subsidised by the Marine Board at the ports and rivers are, however, available for the purpose of giving assistance to vessels in distress ; and there is a Government pilot steamer at Sydney and one at Newcastle, in addition to which all the whaleboats at the various pilot-stations are fitted with cork linings, &c., and have rendered excellent service in saving life. Life-saving appliances are also kept at Richmond River, Clarence River, Macleay River, Trial Bay, Port Macquarie, Manning River, Newcastle, Sydney, Wollongong, Kiama, Shoalhaven, and Twofold Bay. A National Shipwreck Relief Society has been in existence since 1877.

Exports and Imports.—The Imports for the year 1899 were £25,594,315 ; 1898, £24,453,560 ; Exports, 1899, £28,445,466 ; 1898, £27,648,117 ; the excess of exports over imports being, 1899, £2,851,151 ; 1898, £3,194,557. The imports from the United Kingdom, 1899, were valued at £8,211,351, the exports to Great Britain at £8,992,480. There is an increase in the imports of £140,755, and in exports of £797,349. The *imports* comprise nearly every article in ordinary use; some of the leading lines being—apparel and slops, £994,791 ; boots and shoes, £348,295 ; blankets, £56,816 ; books and periodicals, £129,364 ; bicycles, &c., £98,128 ; butter, £136,805 ; printing and news paper, £178,962 ; brassware, £28,486 ; bags and sacks, £183,266 ; candles, £67,469 ; cement, £124,449 ; cocoa and chocolate, £79,129 ; coffee, £30,030 ; copra, £161,407 ; hardware, &c., £349,535 ; hats and caps, £191,697 ; drapery, (including furs), £1,821,915 ; hops, £55,465 ; leather, £106,329 ; drugs, £184,768 ; chaff and hay, £383,669 ; cordage, £58,688 ; (coin) gold, £702,160 ; silver, £70,837 ; gold bullion, £2,453,027 ; saddlers' ware, £47,241 ; saddlery, £24,004 ; salt, £56,696 ; plate, and plated ware, £116,007 ; earthenware and china, £95,662 ; fish, £167,412 ; flour, £335,515 ; fruits (fresh), £226,114 ; floor and oilcloth, £83,506 ; furniture, £159,295 ; gloves £89,855 ; glass and glass ware, £97,740 ; wheat, £151,268 ; grindery, £45,237 ; manufactured wrought-iron (and wire rope), £264,895 ; galvanized sheet and bars, £344,287 ; jewellery, £167,724 ; machinery, £655,975 ; matches, £55,572 ; malt, £120,147 ; milk (condensed and preserved), £80,594 ; musical instruments, £129,291 ; kerosene oil, £176,651; silks, £135,354 ; skins, £673,207 ; opium, £32,282 ; beer and ale, £272,535 ; brandy, £93,390 ; Geneva Schnapps and gin, £62,909 ; rum, £21,400 ; whisky, £238,258 ; wines, £67,235 ; stationery, £156,395 ; sugar, £747,463 ; tea, £430,894 ; tallow, £242,996 ; timber, (rough), £321,232 ; tin, including ingots, plates, and ore, £194,545 ; fancy

goods, £139,403; tobacco, manufactured, £98,371; cigarettes, £51,778; watches and clocks, £64,767; wool, £1,589,044; woolpacks, £89,511. The principal *exports*, the produce of the Colony, were:—wool, 205,394,780 lbs., valued at £10,020,495; tallow, £276,706; leather, £421,439; timber, dressed and undressed, £76,532; coal, valued at £1,005,794; meats, frozen, £332,637, preserved, £185,804; skins, &c., £477,461; tin, including ore, ingots and ware, £150,919; butter, £340,372; fruits, £97,406; wheat, £43,166; flour, £49,776; kerosene shale, £19,355; silver ore, £1,568,699; ingots, £76,913; silver lead, £404,728; gold, including bars and quartz, £920,173; coin, £384,097; manures, £55,995; and sugar, £1,573.

Customs Revenue collected during 1899 was £1,726,194 net; 1898, £1,618,315.

Expenditure.—The expenditure during the year ended 30th June, 1900, chargeable to the revenue of the year was £9,843,751, and a transfer in adjustment of advance vote of 1898-9, £80,926; also extra expenditure in connection with military contingents to South Africa, £157,985 and bubonic plague, £84,451.

Revenue.—The revenue and receipts for the year ended 30th June, 1900, amounted to £9,973,736, and were obtained from the following sources, viz.: taxation, £2,617,314 land sales, £1,213,661; interest on lands conditionally purchased, £65,205; pastoral occupation of Crown lands, £678,730; miscellaneous land receipts, £84,112; mineral occupation, £66,724; for services rendered by the State, which include railways, telegraphs, post office, &c., £5,031,709; miscellaneous receipts, £84,112. In addition to which there was also received for repayment of advances, £108,061, and in adjustment of advance vote 1898-9, £80,926.

Public Debt.—The public debt of the Colony at the close of the financial year, ended 30th June, 1900, was £65,332,992 10s. 8d., and the annual interest being £2,369,391 13s. 5d. The debt consisted of the following classes of stock, viz.: Debentures, overdue or unpresented, which have ceased to bear interest, £1,550; bearing interest at 4 per cent., £8,299,600; at 4½ per cent., £3,700; at 5 per cent., £1,708,000; at 5½ per cent., £4,500; at 6 per cent., £92,000; total debentures, £10,109,350. Stock inscribed in London at 3 per cent, £5,500,000; at 3½ per cent., £29,326,200; at 4 per cent., £9,686,300; New South Wales funded stock, 4 per cent., £2,549,350, and at 3 per cent., £3,459,649 1s. 6d; New South Wales 4 per cents., £530,189 9s. 2d.; New South Wales 1924 stock at 3 per cent., £198,065; New South Wales 1925 stock at 3 per cent., £222,255; New South Wales inscribed stock 3 per cent. (advance to settlers), £220,050; also Treasury bills under Act 53 Victoria No. 9, at 3 per cent., £733,384; at 4 per cent., £269,500; also under Act 55 Victoria No. 7, at 4 per cent., £4,000 matured, not bearing interest; and Treasury bills, under Act 59 Victoria No. 22, at 3 per cent., £1,024,700. Act 63 Victoria No. 46, at 4 per cent., £1,000,000; Act 63, Victoria No. 43, at 3½ per cent, £500,000. The whole capital expended on lines open to traffic to 30th June, 1900, was, for railways, £38,477,269; returning interest on the capital invested at £3 12s. 7d. per cent., and for tramways, £1,924,720, returning interest for the capital invested at £3 16s. 5d. per cent. The remainder of the loans have been for public works of various kinds, principally of a reproductive character.

The Wealth of the Colony.*—A return, prepared at the end of 1898 by the Government statistician, shows the value of the various forms of wealth in the colony. Private wealth: land, £147,818,000; buildings and improvements, £117,709,000; live stock, £30,668,000; personal property (including household furniture), £15,193,000; machinery and implements of trade, £9,804,000; coin and bullion, £8,477,000: merchandise, £16,537,000; shipping owned in the Colony, £1,384,000; mines and mining plant, £9,900,000; other property, £20,926,000; Total, £378,116,000. Public wealth: value of railways and tramways, £50,000,000; water supply, und sewerage, £7,950,000; electric telegraphs, £900,000; harbour works, including wharves and dredging plant, £5,580,000; roads and bridges, £14,000,000; public buildings, £8,500,000; amount due on lands purchased from the State, £11,169,700; public lands under lease, £67,000,000; water conservation, £1,030,000; total public estate, £166,049,700; municipal estate, £3,655,800. Total wealth of the colony, £547,821,500, at the time these figures were obtained. The private wealth equalled £281 per inhabitant, and the public wealth £126, or together £407 per inhabitant..

Friendly Societies and Trades Unions.—At the beginning of January, 1898 (later statistics not being available), there were 18 orders and some miscellaneous societies which furnished returns to the Government. These contributions amounted to £212,773; other receipts, £39,554; total, £252,327. The expenditure included sick pay, £56,561; medical attendance, and medicine, £63,980; other expenditure, £97,912; total, £218,453. Funds at the beginning of the year, £562,589; fund at the end of the year, £596,463. Total financial members at end of year 63,071; number of members sick during the year 11,054.

Savings Banks.—On January 1st, 1900, there were 537 Government Savings Banks. Depositors numbered 179,526, the balance to their credit being £5,485,035. The Savings Bank money is principally invested in the New South Wales 4 per Cents. Compared with January, 1899 there is an increase of 15,974 depositors, and an increase of £458,966 in the credit balance at the close of the year. Average amount at credit of each depositor at end of 1899, £30 11s. 0½d.

The Savings Bank of New South Wales had 81,300 depositors, the amount to their credit being £4,839,056 16s. 8d., an increase on previous year of 2,487 depositors and £129,524 12s. 5d. deposits. This money is invested in mortgages, Government Securities, and at deposit with the Sydney banks. Sums of one shilling and upwards may be deposited. Interest at the rate of 3 per cent. was allowed in the Savings Bank of New South Wales on accounts closed in 1899, and 3½ per cent. on accounts open on 31st December. Deposits exceeding £200 do not bear interest, with the exception of the funds of friendly societies, &c., who are allowed interest at the rate given to ordinary depositors up to £1,000, the excess thereon at a rate equal to 1 per cent. below the aforesaid sum. Number of depositors on 30th June, 1900, 82,837.

Banks.—According to the sworn returns, the total average assets of the 13 Banking Institutions (with over 400 branches) doing business in New South Wales on June 30, 1900, were £42,552,695; the liabilities amounted to £34,269,857. The note circulation was £1,333,341; the coin held amounting to £6,864,640; the bullion, £263,901. The half-yearly dividend varied from 4 per cent. (City Bank of Sydney) to 9 per cent. (Bank of N. S. W.), but some of the institutions did not declare a dividend. During 1899 the rate of interest allowed on fixed deposits was 1½ per cent. for six months, and 3 per cent. for 12 months. The discount on local bills was 5 to 5½ per cent. at 3 months and 5 to 6½ per cent. over 3 months, per annum. The rates of exchange on London bills were:—Buying, 98⅜ to 99⅞ per cent.; selling, 100¼ to 100¾ per cent. Total average amount of deposits in banks of issue, £32,656,232. Paid-up capital amounted to £17,732,205.

Life Assurance Institutions.—Total assets of nine Australasian institutions in January, 1900, £26,036,986, including loans on mortgages and policies, £18,272,621, securities freehold property, £764,365; total liabilities comprise assurance endowment and annuity funds, £25,129,945; paid-up capital, reserve fund, &c., £907,041; total accumulated funds, £25,129,945; amount of interest received, £1,109,421; average rate of interest realised on mean funds, 4·59 per cent. The addition to the funds for the year 1899 amounted to £1,475,236

Fire Insurance.—The net amount at risk in the Metropolitan area at the beginning of 1900 amounted to £63,689,331; this amount is held by 41 offices. There are 43 districts administered by the Metropolitan Fire Brigade Board, which was established in 1884. Towards the annual outlay the Government, the Municipalities, and the Fire Insurance Companies each contribute one-third. The Municipalities contribute *pro rata* to the assessed annual value of ratable property in their respective districts, and the Fire Insurance Companies proportionately to the net risks held on properties situate within the Metropolitan District. Sydney Harbour is outside the jurisdiction of the Board

Registered Companies.—During 1899, 87 new companies were registered under the Companies' Act, 54 wound up, and the fees received amounted to £1,318; 47 no-liability mining companies were registered.

Real Property.—During the year 1899 there were 428 applications, under the Real Property Act, representing 520 private properties, of the value of £776,863. The area amounted to 1,321 acres Town and Suburban, and 58,323 acres Country; the total fees were £2,736. The number of mortgages contracted was 3,923, the amount secured by mortgage £4,282,651, and discharge number 3,923, value £3,087,547. The number of Crown Grants registered was 3,679, of the value of £396,315; the grand total for the year of fees paid, land titles branch was £3,562. The total area of Crown and private lands under the Act to the end of the year 1899 was 19,855,736 acres, of the value of £42,929,352.

Mills and Manufactories.—The total number of works and manufactories of all kinds during 1899 was 2,912, employing an average of 55,646 hands; 183 factories were for working on raw materials, the production of the pastoral interest; 567 were for the manufacture of food and drink; 437 for clothing and textile fabrics; 531 were connected with the building interests; 286 were machine and engineering manufactories, brass, lead, and iron works; 26 for ship building and sail making; 99 for furniture, bedding, &c.; 278 paper, printing and engraving establishments; 199 for vehicles, harness and saddlery; 80 for light, fuel and heat, and 226 other works of a miscellaneous character. The total number of workpeople employed was 55,646—47,063 males and 8,583 females, and 33,080 h.p. actually used. There were 4 woollen factories, the out-turn being 428,158 yards of cloth and tweed (222 hands employed); 41 soap and candle factories, making 142,526 cwt. of soap, and 2,675,006 lbs. of candles; and 9 tobacco and 18 cigar and cigarette factories, which turned out 2,123,196 lbs. of tobacco, 29,285 lbs. cigars, 288,509 lbs., of cigarettes; 13 steam sugar mills, the sugar manufactured being 307,048 cwt. and 1,064,850 gallons of molasses, and 1 sugar refining establishment, turning out 1,032,400 cwt. of refined sugar; 11 boiling down establishments produced 389,838 cwt. of tallow, a large quantity of which is made from the refuse of butchers' shops in the metropolitan district; 57 breweries, manufacturing 12,218,560 gallons of ale, beer, &c.; 79 boot factories, turning out 3,207,796 pairs; 148 brick yards, manufacturing 120,375,000 bricks; 35 gasworks, manufacturing 1,883,002 thousand cubic feet; 259 saw-mills, 80 flour mills, of 4,065 h.p., manufacturing 156,409 tons of flour. In addition to the works mentioned above there are a number of smaller establishments which employ less than 4 hands, and in which no steam or other power is used. Total value of machinery and implements, £5,640,384.

On December 22, 1899, the Early Closing Act was assented to, and it came into force on January 1, 1900. It is claimed to be the most comprehensive measure of its kind in operation in any part of the world.

The Royal Mint—The Sydney branch was opened to the public on May 14th, 1855, for the receipt and coinage of gold. The following figures show the operations for 1899, the totals since the opening of the Mint being in parentheses. Gold received

* Later returns not available.

for coinage, 948,743 ozs. (25,102,433 ozs.), of the value of £3,384,282 (£93,256,496). The gold coin issued amounted to—sovereigns £3,259,000 (£87,090,500); half-sovereigns, £65,000 (£2,737,500); total. £3,324,000 (£89,828,000). Gold bullion issued £48,446 (£3,248,896). Revenue, £15,610 (£658,969). Actual expenditure from Consolidated Revenue, £14,955. Mint Charges.—Gold deposited at the Sydney Mint for melting, assaying, and coining is subject to a charge per ounce, and the charges are deducted from the gross value of the deposit. The charges are:—On gold raised in New South Wales: In deposits of less than 500 ounces standard, 6d. per ounce, 6s. being charged for a deposit under 12 ounces; in deposits of 500 ounces and over, but less than 5,000 ounces standard, 4d. per ounce; in deposits of 5,000 ounces standard, and over, 2d. per ounce. On gold certified to be the produce of any other colony or country: 5d. per ounce, 5s. being charged for a deposit under 12 ounces; in deposits of 500 ounces and over, but less than 5,000 ounces standard, 3d. per ounce; in deposits of 5,000 ounces standard, and over, 1d. per ounce.

Patents, &c.—Every person claiming to be the author or designer, or his agent or assignee, of an invention, and desiring to obtain Letters Patent, must pay to the Colonial Treasurer the sum of £5, and then lodge a petition to the Governor (accompanied by a specification) with the Minister of Justice at the Patents office. Provisional protection for twelve months may be obtained by payment of £2. Trade Marks.—To register a trade mark, specimens must be delivered to the Registrar, and the person desirous of registering must pay the sum of £3 3s., and state in writing the nature of the article to which it is proposed to apply such trade mark.

Charitable Institutions.—On January 1st, 1900, there were in New South Wales about 110 hospitals from which returns were received, the principal of these being the Sydney Hospital; the Prince Alfred Hospital; the St. Vincent's Hospital; the Little Bay Hospital; the Children's Hospital; the Thomas Walker Convalescent Hospital, and the Hospital at Newcastle. The Prince Alfred Hospital, Sydney, is designed upon the principle of detached pavilions, with open corridor communications; 11 benevolent asylums, 6 of these being Government institutions (exclusive of the Cottage Homes for Children); 17 orphan, industrial, and ragged schools; 3 institutions for the deaf, dumb, and blind, and 10 hospitals for the insane, consisting of 6 Government institutions, and 3 licensed houses, viz.:—1 at Cook's River, 1 at Picton and 1 at Ryde. The returns for the general hospitals during 1899 were as follows: Into 110 hospitals there were 29,770 admissions; while 27,881 patients were discharged during the year, and the deaths numbered 2,241, the number remaining on January 1st, 1900, being 1,889, as compared with 1,877 on January 1st, 1899. The receipts were, from the State, £85,967; from private contributions, &c., £60,694; other sources, £13,649, being a total of £160,310; the disbursements during the year were £158,046. Towards the expenses of all charitable institutions and societies, exclusive of hospitals, the private contributions were £30,196, other sources, £33,018, and the Government made grants amounting to £132,241, making a total of £195,455; the disbursements amounted to £193,597. Into the Hospitals for the Insane during 1899 the admissions were 796, the discharges being 408, and the deaths 249. On January 1st, 1900, there were 2,535 male and 1,663 female patients in the Hospitals for the Insane and Licensed Houses. The number under care during the year was 3,029 males and 2,004 females, of which 4,217 were in the Government asylums. The proportion of insane to the general population is one insane patient to 321 persons. There were 13 lepers in the Lazaret at Little Bay. In addition to the foregoing there are charitable societies and institutions subsidized by the Government, but mainly supported by private subscriptions.

Government Labour Bureau.—For the year ended June 30, 1900, the expenditure on relief works amounted to £2,647.

Prisons.—The principal event of 1899 was the further extension of the "restricted association" system which was first inaugurated on October 13, 1897. The Comptroller-General hopes "that the new departure will improve the moral atmosphere of the gaols, and will conduce to the reformation of many of the prisoners entering them." There was a steady decrease of the gaol population. On January 1, 1900, there were 1,989 prisoners of all kinds; on January 1, 1899, the number was 2,081. There were on January 1, 1900, 58 gaols, consisting of 23 established gaols and 35 lock-up gaols; at the same date there was one person in gaol out of every 682 of the population.

Military and Naval Forces.—The colony now possesses a complete military force, organized throughout in every branch and every department upon the latest modern lines. The requisite proportions of Cavalry, Mounted Rifles, Artillery, and Infantry have been laid down, together with the requisite number of Engineers, Medical Staff, Army Service Corps, and Ordnance Store Corps.

The peace establishment of each military unit was approved in 1894, and the increase of this establishment to the war requirements has now been similarly accepted. A complete framework has thus been approved by Government upon which the details of mobilization in time of war have now been built, and the whole available military force of the colony can, at short notice, be mobilized for war upon the principles and at the places laid down in the Defence Scheme.

On July 1, 1900, the totals of the various departments of the Military Forces of the Colony were as follows:—*Permanent Troops.*—Head-Quarters' Staff, 23. Military Secretary's Department: Finance, 8; Pay, 5; Ordnance, 21. Mounted Brigade: Lancers, 435; Mounted Rifles, 365; First Australian Volunteer Horse, 572. Artillery: Artillery Staff, 10; Brigade Division, Field, 272; First Garrison Division, 553; Second Garrison Division, 417. Engineers: Engineers Staff, 20; Field, 121; S. M. M., 101; Electricians, 92. Infantry: 1st Regiment, 640; 2nd Regiment, 639; 3rd Regiment, 590; 4th Regiment, 636; Volunteer Staff, 2; 5th Regiment (Scottish Rifles), 640, 6th Regiment (Australian Rifles), 656; 7th Regiment (St. George's Rifles), 657; National Guard, 184; 8th Regiment (Irish Rifles and Kogorah Company), 633. Army Service Corps, 147. Army Medical Corps (Permt. P.P. Est.), 129. Volunteer Establishment, 29. Chaplains, 14; Veterinary Department, 4. Total, 8,615. Rifle Club Reservists, 1,371. Total, 9,986.

A Cadet force has been established in connection with the public schools, it being intended that every schoolboy shall be trained to the use of arms. The force is at present about 4,500 strong, and each cadet wears a distinctive uniform with accoutrements.

The Naval Forces consist of the Naval Brigade and the Naval Artillery Volunteers, working as one battalion on shore. The Naval Brigade comprises six companies, one company being stationed at Newcastle; total, including officers, 332. The Naval Artillery comprise four companies, with 242 men. Torpedo boats 5; grand total, 583.

Garden Island, in Sydney Harbour, has been placed at the service of the Commander-in-chief of the Australian station as a naval yard, warlike and ordnance stores are maintained at Spectacle Island, Sydney Harbour.

The boundaries of the Australian Naval station have been modified by the Pelew Islands, St. Andrew's and the adjacent islands being included within the China station. From July 1, 1885, the north boundary of the Australian station has been defined as follows:—From 95° E. long. by the parallel of 10° S. lat. to 130° E. long.; thence north to 2° N. lat., and along that parallel to 136° E. long.; thence north to 12° N. lat., and along that parallel to 160° W. long.; and on the south by the Antarctic Circle, including the numerous groups of islands situated within those limits. The station is under the command of a Rear Admiral. In the station is included the colony of Fiji. Sydney is the rendezvous and headquarters of the Australian squadron, and it has been definitely decided that it shall remain so.

The Imperial fleet usually consists of a first-class cruiser, five third-class cruisers (two being held in reserve), two torpedo gunboats, besides carrying the flag of the Admiral, two or three gunboats, and surveying vessels.

In 1887 an agreement was drawn up between the Imperial and Colonial Governments for increasing the present naval defences by establishing a force of seagoing vessels.

Local expenditure on Federal Defence for year ended June 30, 1900, £44,209. Expenditure in defence from date of responsible Government in 1857 to June 30, 1900, £6,830,134; Exclusive Soudan Contingent, £121,630, and to the 30th June, 1900, cost of military contingents to South Africa £158,748. The total expenditure for the year ending June 30, 1900, exclusive of South African war, £280,058.

The Royal Naval House in Sydney has been erected exclusively for the accommodation of the seamen and marines of Her Majesty's ships. It was built in 1889, at a total cost of £25,000, contributed by citizens and the Government of New South Wales. There are 280 beds in the institution, also a refreshment room, and, for the amusement of the men, reading, smoking, and billiard rooms, and a gymnasium are provided.

Police Force.—In January, 1900, the total strength of the New South Wales police force was 2,016, of all grades. Of these there were 11 superintendents, 11 inspectors 36 sub-inspectors, 34 senior-sergeants, 59 sergeants, 134 senior-constables, and 452 constables in the mounted force. In the foot constabulary there were 24 senior-sergeants, 57 sergeants, 160 senior-constables, and 1,023 constables. Total—mounted, 737; foot, 1,279—2,016. A detective force, numbering 15, is also attached to the body. Pay.—Probationary Constables (under instruction acquiring a knowledge of Police duties, usually a brief period), 6s. per diem.; Ordinary Constables, 7s.; Constables, 1st class, 7s. 6d.; Senior Constables, 8s.; Sergeants, 2nd class, 9s, 3d.; 1st class, 10s 6d.; Detectives, 3rd class, 9s.; 2nd class, 10s.; 1st class, 11s., 12s., and 13s. Allowances.—The police are provided with uniform clothing, or a money allowance in lieu, if employed in plain clothes. When practicable the Police are provided with quarters, and if none are available, one shilling per diem is allowed in lieu. Superannuation.—All members of the Police Force subscribe 3 per cent of their salaries to a Superannuation Fund, from which pensions and gratuities are payable to members of the Force who are over sixty years of age, or who may be certified by the Police Medical Board to be unfit for further service. Widows of members of the Police Force are also entitled to gratuities from the Police Reward Fund. There are 570 police stations in the colony and the proportion of inhabitants to each police officer in the colony was 673.

Federation.—On June 20th, 1899, the Australasian Federal Constitution was submitted to the electors of the colony, the result being for the bill 107,420, against 82,741; informal, 1,166. A majority in favour of the bill of 24,679.

Administration of Justice.—For the carrying out the laws and the settlement of disputes there are a Supreme Court, Criminal Court, District Courts, Courts of Quarter Sessions, and Courts of Petty Sessions. The Supreme Court is under the jurisdiction of seven Judges, one being the Chief Justice. The Divorce Court is presided over by one of the Puisne Judges, and the Admiralty Court by the Chief Justice. Insolvency cases are adjudicated on in the Bankruptcy Court, which is also under the jurisdiction of a judge. The District Courts are presided over by seven District Court Judges, who are also Chairmen of the Courts of Quarter Sessions. In all the important towns are stipendiary or police magistrates before whom local matters are heard.

Governmental and Political.—The Constitution of New South Wales (Act 18 & 19 Vict. cap. 54) vests the government in a Governor representing the Crown, and a Parliament of two Houses, the first called the Legislative Council, and the second the Legislative Assembly. The Governor is appointed by the British Authorities, his term of office being five years As the viceregal representative, he has the power of assenting to Acts of Parliament, or withholding his assent therefrom pending reference to the Imperial authorities. He has also the power of appointing the members of the Upper Chamber, of proroguing and summoning Parliament, and of dissolving the House of Assembly. It is likewise his duty to sign proclamations and to perform various offices minutely set forth in his Commission The Legislative Council consists of an unlimited number of members, the tenure of office being for life, subject to certain conditions; and the Assembly of 125 members, elected from 125 constituencies. To be eligible for membership to the Lower House a candidate must be of age, a natural-born subject of the Queen, or, if an alien, then he must have been naturalized for one year, and resident for one year before election; the same conditions and one month's residence in his electorate are required for the voting qualification, which practically amounts to universal suffrage. There is no property qualification for electors, and the votes are taken by ballot. The Executive is in the hands of a Governor nominated by the Crown, and a Council, consisting of the Colonial Secretary, Colonial Treasurer, Minister for Lands, Minister for Mines and Agriculture, Minister for Education, Minister for Justice, Postmaster-General, Minister for Public Works, and Attorney-General. The Parliaments are triennial. The Imperial laws have effect in the Colony, unless superseded by local Acts. All enactments passed by the Houses of Legislature require the sanction of the Governor before becoming legal, and in some cases they are reserved for the consent of the Queen. By an Act passed in September, 1889, members of the Legislative Assembly are paid £300 per annum for "reimbursing their expenses," in addition to which they are allowed a free pass on all railway and tram lines throughout the Colony. An Amended Act passed in June, 1893, introduced the principle of single electorates, abolished plural voting, remodelled the franchise on the principle of one man one vote, abolished the £40 deposit for Candidates, provided for the issue of Electors' rights, all elections to be held in one day, and the abolition of public nominations.

The Dibbs Ministry came into office on October 23rd, 1891, and retired on August 4th, 1894, being succeeded by the Reid-Brunker Administration. The special features of interest in connection with the reign of the Reid Government were the establishment of Free Trade, the introduction of a Land and Income Tax, the placing of the Civil Service under the control of an independent Board of Commissioners, and bringing the question of Australian Federation within the range of practical politics. During 1898 the Federation Bill was put before the people, but was lost, owing to the required 80,000 votes not being obtained in its favour; the Bill was strenuously opposed by Mr. Reid. A general election shortly followed, at which the Federation Bill was made the principal "plank in the political platform," and Mr. Reid was returned to power. In 1899 the Federation Bill was carried. On the re-assembling of Parliament the Reid ministry was defeated on a motion of Mr. Lyne, who was called upon to form a new Ministry, which he did. On September 15, 1899, Mr. Lyne's term of office will remain notable as covering the period when the Federation of Australia received the sanction of the British Government.

NEW SOUTH WALES GOVERNMENT.

PARLIAMENT, &c.

GOVERNOR-IN-CHIEF.

Lieut.-Governor, His Excellency Sir Frederick Matthew Darley, K.C.M.G.

Private Secretary, Capt. Wilfred Smith.
Aides-de-Camp, Capt. Wilfred Smith, Capt. R. Clark.
Clerk to Private Secretary, E. E. Lewis.

LEGISLATIVE COUNCIL.

President, Hon. Sir John Lackey, K.C.M.G.
Chairman of Committee, Hon. W. J. Trickett.
Clerk of Parliaments, John J. Calvert.

Clerk Assistant, A. P. Clapin.
Usher Black Rod, Stewart M. Mowle.
First Clerk, W. L. Edwards.

Second Clerk, E. A. Garland.
Third Clerk, F. L. Clapin.
Fourth Clerk, W. L. Cooper.

MEMBERS OF THE LEGISLATIVE COUNCIL. Members take the Title of Honorable.

Backhouse, Benjamin.
Black, Reginald James.
Blanksby, James.
Bowker, Richard Ryther Steer, M.D., M.R.C.P. Lond.
Brown, Alexander
Buzacott, Nicolas James.
Campbell, William Robert.
Charles, Samuel.
Cox, George Henry.
Creed, John Mildred, M.R.C.S.
Cullen, William Portus, LL.D.
Dalton, Thomas.
Dangar, Henry Carey.
Day, George.
Earp, George Frederick.
Estell, John.
Flowers, Frederick.
Fowler, Robert.
Garran, Andrew, LL.D.
Gould, A. J.
Green, G. H.
Greville, Edward.
Hawken, Nicholas.
Hepher, John.
Heydon, Louis Francis.
Hill, William Charles.
Holborrow, William Hillier, C.M.G.
Hughes, John.
Humphery, Frederick Thomas.
Hyam, Solomon Herbert.
Jones, Richard.
Kater Henry Edward.
Kerr, Andrew Taylor.
Kethel, Alexander.
King, Philip Gidley.
Lackey, Sir John, K.C.M.G. (President.)
Langwell, Hugh.
Lee, George.
Long, William Alexander.
Lucas, John.
Macintosh, John.
Meagher, John.
Meeks, Alfred William.
Mackay, James Alexander Kenneth.
Mackellar, Charles Kinnaird, M.B., C.M.
MacLaurin, Henry Norman, M.D., LL.D.
McCaughey, Samuel.
Millen, Edward Davis.
Mort, Henry.
Moses, Henry.
Nash, John Brady, M.D.
Norton, James, LL.D.
Pigott, William Hillson.
Pilcher, Charles E., Q.C.
Pulsford, Edward.
Renwick, Sir Arthur, Kt., M.D., F.R.C.S.
Roberts, Charles James, C.M.G.
Roberts, Richard Hutchinson.

Gloucester—Richard Atkinson Price.
Goulburn—James Ashton.
Grenfell—William Arthur Holman.
Grafton—The Hon. John See.
Granville—John Nobbs.
Gunnedah—Thomas Henry Hall Goodwin.
Gundagai—John Frederick Barnes.
Hartley—Joseph Cook.
Hastings and Mackleay—Francis Clarke.
Hawkesbury (The)—William Morgan.
Hay—Francis Arthur Byrne.
Hume (The)—The Hon. William John Lyne, K.C.M.G.
Illawarra—Archibald Campbell.
Inverell—George Alexander Cruikshank.
Kahibah—Alfred Edden.
Kiama—Alexander Campbell.
Lachlan (The)—James George Carroll.
Leichhardt—John Stuart Hawthorne.
Lismore—Thomas Thomson Ewing.
Macquarie—William Fergus Hurley.
Macquarie (West)—The Hon. William Patrick Crick.
Maitland (East)—Hon. James Nixon Brunker.
Maitland (West)—John Gillies.
Manaro—Gustave Thomas Carlisle Miller.
Manning (The)—Hon. James Henry Young.
Marrickville—Francis Edward McLean.
Molong—Andrew Ross, M.D.
Moree—The Hon. Thomas Henry Hassall.
Moruya—William Millard.
Mudgee—Edwin Richards.
Murray (The)—James Hayes.
Murrumbidgee (The)—Thomas Fitzpatrick.
Narrabri—Hugh Ross.
Nepean (The)—Samuel Edward Lees (Temporary Chairman of Committees).
Newcastle (East)—William Thomas Dick.
Newcastle (West)—James Thomson.
Newtown (Camperdown Division)—Francis Cotton.
Newtown (Erskine Division)—Edward William Molesworth.
Newtown (St. Peter's Division)—William Rigg.
Northumberland—John Norton.
Orange—Henry William Newman.
Paddington—John Cash Nield.
Parramatta—William John Ferris.
Petersham—John Jacob Cohen.
Queanbeyan—The Hon. Edward William O'Sullivan.
Quirindi—Robert Henry Levien.
Raleigh—John McLaughlin.
Randwick—David Storey.
Redfern—James Sinclair Taylor McGowen.
Richmond (The)—Robert Pyers.
Robertson—Robert George Dundas Fitzgerald.
Ryde—Edward Terry.
Rylstone—John Charles Lucas Fitzpatrick.
Sherbrooke—Broughton Barnabas O'Conor.
Shoalhaven (The)—David Davis.
Singleton—Charles Hilton Dight.
St. George—Joseph Hector Carruthers.
St. Leonards—Edward Mann Clarke.
Sturt—William John Ferguson.
Sydney (Belmore Division)—James Graham.
Sydney (Bligh Division)—Patrick Edward Quinn.
Sydney (Cook Division)—Samuel Thomas Whiddon.
Sydney (Denison Division—Sir Matthew Harris, Kt.
Sydney (Fitzroy Division)—Henry Chapman.
Sydney (Flinders Division)—Arthur David Nelson.
Sydney (Gipps Division)—Wilfred Joseph Spruson.
Sydney (King Division)—The Right Hon. George Houstoun Reid, P.C.
Sydney (Lang Division)—William Morris Hughes.

,, Beer	per liquid gal.	0	3
arcotics—Tobacco	...per lb.	1	3
,, Cigars and cigarettes	...per lb.	2	6

LAND AND INCOME TAX.

Land tax is levied on the unimproved value, and rated at 1d. in the £, with an exemption of £240, and in the event of the unimproved value being in excess of this sum a deduction is made equal to the exemption, but in the case of an owner holding several blocks of land, only one amount of £240 is deducted from the aggregate unimproved value.

Also when a block of land is mortgaged, the mortgagor is allowed to deduct from the amount of his tax a sum which is equal to the income tax which is chargeable to the mortgagee on the interest derived from the mortgage of the whole property, including improvements. Should the tax remain unpaid for the period of two years after it becomes due, the Commissioners may, after giving another year's notice, let the land for a period not exceeding three years, or, with the permission of a Judge of the Supreme Court, sell so much of it as may be necessary for the payment of the tax with fines, costs, etc., added.

An income tax of 6d. in the £ is levied upon the income from each individual as may be in excess of £200, except in so far as it is derived from ownership or cultivation of land on which land-tax is payable. The exemptions include the dividends and profits of the N.S.W. and P.O. Savings Bank, income accruing to foreign investors from Government stock, and the revenues of local authorities, of Life Assurance Societies, and other companies not carrying on business for profit or gain (not being income derived from mortgagees): of friendly societies and trades unions and of all public ecclesiastical, charitable, and educational institutions. In the case of every company, its income is taken as the income earned in N.S.W. and from investments within the Colony.

New Masonic Hall, Castlereagh Street, Leigh House, Castlereagh Street; Young Men's Christian Association Rooms, Pitt and Bathurst Streets; Centenary Hall, York Street; and a number of other smaller places used for entertainments of various kinds, meetings, &c.

Town Hall. A fine view of the City and suburbs can be obtained from the tower. By order from Mayor or Alderman.

University and its Museum. The former by special order from Chancellor or member to the Senate; the Museum is open every Saturday from 2 till 5 P.M.

TOWNS IN NEW SOUTH WALES.*

ABERDEEN (32° 14′ S. lat., 150° 57′ E. long.), a municipal township in the electoral district of Robertson, on the E. bank of the Hunter river, 185 miles N. of Sydney, the main line of road between Muswellbrook and Scone passing through it. Scone is 8 miles distant. It has a postal, savings bank, telegraph, and money-order office, and a railway station. The district is incorporated, the amount of general rates levied being £147. It is in the county of Durham, and police district of Scone, and stands 610 feet above sea level. The route from Sydney is by Great Northern Railway; fares 29s. 3d. and 19s. 3d. Hotels: the Australian Inn and Segenhoe. There are five large stores in the township, a steam flour mill, also Episcopal, Roman Catholic and Presbyterian churches, a School of Arts, Oddfellows lodge and a public school, with average attendance of 101. The district is a pastoral one, with plenty of good agricultural land. The Australian Meat Chilling and Freezing Company, of London, have erected vast works here. Formation: micaceous conglomerates, comprising granite and felsparic trap, with quartz ridges. Population, 520.

ADAMINABY (36° 5′ S. lat., 148° 18′ E. long.), aforetime called SEYMOUR, is a pastoral and agricultural township 295 miles SW. of Sydney, on the main road to Kiandra, from which it is distant about 20 miles. It is in the county of Wallace, police district of Cooma, and electoral district of Monaro. It lies 3,000 feet above the sea-level, and is a stopping-place on the road to the Yarrangobilly caves. Conveyance to Sydney—mail coach to Cooma, the nearest railway station, 30 miles distant. It has a post, money-order, savings bank office, and telegraph station, three hotels, a public school (average attendance 84), Anglican, Roman Catholic and Presbyterian places of worship, six stores, and a court-house. Population of district, 1,500.

ADAMSTOWN (32° 50′ S. lat., 151° 41′ E. long.), an important town adjoining Hamilton, about 4 miles from Newcastle and 101 miles N. of Sydney, on the Homebush Newcastle railway line; fares, 12s. 6d. and 8s. Coaches run to Charlestown and Dudley. Principal hotels: Royal Crown, Royal Standard, and Adamstown. It is in the county of Northumberland, police district of Waratah, and electoral district of Kahibah; it has a post, telegraph, money-order office, and savings bank, a public school, with average attendance of 478 scholars, a mechanics' institute, with 3,500 vols., Masonic, M.U.I.O.O.F. and G.U.O.O.F. lodges, Anglican, R.C. and Prim. Meth. churches, a large hall suitable for entertainments, and capable of accommodating about 800 people. Fire brigade with 2 reels and 1 hose-cart and 2,000 ft. hose. The water supply is derived from underground tanks and Hunter District Water Supply; pressure, 35 lbs. to sq. inch. The town is incorporated, and has 13 miles of roads, with ratable property of the annual value of £9,500. Brick-making and coal-mining industries. Mining and agricultural district. Population, 2,200; of district about 4,500.

ADELONG (35° 16′ S. lat., 148° 4′ E. long.), a township on the creek of the same name, a tributary of the Murrumbidgee, 273 miles (311 miles postal) from Sydney SW., in the electoral district of Gundagai; rail to Gundagai, thence coach, 23 miles, are the means of conveyance (coach fare, 12s. 6d.). It is a postal, telegraph, Government savings bank, and money-order station, in the county of Wynyard, and police district of Tumut. There are five hotels in the town: the Commercial and Royal being the most important; (the Royal is the coach booking office), and seven stores. Bank: N.S. Wales. The other noticeable buildings are. Court house, post and telegraph office, public school (average attendance 160); Catholic school, literary institute, and four churches—Episcopal (St. Paul), Wesleyan, Presbyterian (St. Andrew), and Roman Catholic (St. James), and Salvation Army. Societies—Masons, Oddfellows, Sons of Temperance, Good Templars, and a reading room, with 1,100 vols. The district is a mining one, among the oldest in the Colony, the quartz reefs being numerous and rich; and the creek beds and banks have been found to contain very valuable alluvial deposits. The Great Victoria Claim is down upwards of 1,000 feet, at which level payable gold is obtained; the Government award of £1,000 for the first discovery of payable gold at a greater perpendicular depth than 800 feet has been secured by this mine; several other claims are 600 feet and upwards in depth. Gibraltar Company has fine plant at work. Dredging is successfully carried on. Gold returns for 1899 were 13,179 ozs. Formation: granite. Population upwards of 1,170; with vicinity it is 2,450. Local newspapers: the *Adelong Argus* and *Adelong Express*.

ALBION PARK (34° 32′ S. lat., 150° 50′ E. long.), a post town, with telegraph, money-order and savings-bank facilities, and railway station, on the Macquarie rivulet, within 2 miles of Lake Illawarra, in the police district of Kiama, county of Camden, and electoral district of Illawarra, centrally situated between Kiama and Wollongong, about 14 miles distant from each, five miles from Shellharbour, and 61 miles SSW. of Sydney; fare 11s. and 7s. 2d. Hotels: the Albion Park and Commercial. It has three churches, Episcopal, Presbyterian, and Roman Catholic; branch of English, Scottish, and Australian Bank, a post-office, Municipal Council, Agricultural and Horticultural Association, four public schools, four stores, a convent, school of arts, and a free public library with 400 vols. Coal and shale exist, but the district is chiefly dairy-farming. There is good pasturage, and the land is well fitted for tillage. Formation: carboniferous; surface chiefly trap. A new road through the Macquarie Pass (*viâ* Albion Park) connecting the coastal districts with the Robertson and Moss Vale tableland has been opened for traffic; distance to Robertson, 14 miles. The "Whispering Gallery," Macquarie Pass, and Mina Murra Falls in district. Population, of district, about 2,000. Local newspaper: *South Coast Herald*.

ALBURY (36° 6′ S. lat., 147° 0′ E. long.), sometimes known as the Federal City, an important and flourishing town on the confines of N.S. Wales and Victoria, county of Goulburn, police and electoral district of Albury, situated 531 feet above the sea-level on the right bank of the Murray river, which is spanned here by two viaducts, one the substantial wooden structure carrying the roadway, and the other a handsome iron lattice bridge for the double railway, which was first used on October 14, 1884. The railway from Melbourne to Wodonga, on the opposite side of the Murray, was opened in November, 1873, and the railway communication with Sydney was completed on February 3rd, 1881; fares, 60s. and 44s. The 3 mile break between Albury and Wodonga was filled in on 14th June, 1883, when the completion of the through railway communication between Sydney and Melbourne was celebrated by a grand demonstration, at which the Governors of both Colonies, and upwards of 1,000 representative gentlemen were present. The N.S. Wales and Victorian trains run through to Albury, there being shunting yards, &c., at this station. The Albury station ground is 68 chains in length and nine in width. The principal hotels are Globe, Club, George, Rose, and Albury. Albury was proclaimed a municipality on June 4th, 1859. There are 70½ miles of roads and streets in the district, with ratable property (general rate 1s.) of the annual value of £43,140. Its founding dates from November 17, 1824, when Hume and Hovell the explorers encamped on its site under a tree, which is still standing, and is now fenced in. Among the leading buildings in the township are the hospital, the convent, to which a chapel has been added, the Mechanics' Institute, with large hall attached, capable of holding 900 people, and library of 2,000 volumes, the Oddfellows' hall, a fine brick structure. Places of worship—Church of England (St. Matthew's), Presbyterian, Wesleyan, Independent, and Roman Catholic (St. Patrick's), a large and massive structure, and Temperance hall; banks—Commercial, Australian Joint-Stock, a fine building; Australasia, and N.S. Wales, and the post and telegraph offices. Fire Brigade has two reels and 1,800 ft. hose. The schools comprise a grammar, public, and denominational; the public school has an average attendance of 500. The district surrounding Albury is principally agricultural and pastoral, with some quartz-mining. The latter is carried on at the Black Range, Bungowannah, Hawk's View, and Nailcan. Gold returns for 1899 were 150 ozs. Grapes and tobacco are largely grown, and the Albury wines have made themselves famous. Produce of the district—wine, wheat, barley, oats, and brandy. Stock returns, area 879,500 acres, 7,391 horses, 13,866 cattle, and 601,201 sheep. Dairy produce—butter, cheese, bacon and ham. Has telegraph, money-order, and Government savings bank facilities. Albury lies 351 (386 postal) miles to the SW. of Sydney, and 190 miles to the NE. of Melbourne. Coaches run to Bowna, Germanton, Little Billabong, Jingellic, Ournie, and other places. During the season the Murray is navigable to here by steamers, Albury being about 200 miles from its source, and about 1,800 from its debouchure in Lake Alexandrina. The first steamer brought up the Murray to here was the *Albury*, Captain George Johnston, in the year 1855. The town is now lit with gas, and has a permanent water supply from Murray river; capacity of tanks 1,000,000 gals. Formation: schistose, with granite and whinstone near the tops of the ranges. Population of district, about 5,500. The newspapers are the *Border Post*, *Albury Banner*, and *Evening News*.

ALECTOWN (32° 45′ S, lat., 148° 5′ E. long.), a post-town with money-order office, savings bank, and telegraph station, in the county of Kennedy, electorate of Condobolin, 270 miles NNW. of Sydney. Coach to Parkes, thence train to Sydney. It has one hotel and a public school. The district is a very good agricultural and pastoral one, and is thriving fast, there being over 1,000 acres under crop. A good metalled road runs to Parkes. Gold was discovered here in 1889 by Alec Whitelaw, Alec Patten and Alec Cameron, hence its name. There is not much mining now. Population about 500.

ALEXANDRIA (*see* WATERLOO).

ALSTONVILLE (28° 45′ S. lat., 153° 30′ E. long.), a post-office, money-order, savings bank, telephone and telegraphic station, in the county of Rous, electorate of Ballina, and police district of Richmond river, 367 miles N. of Sydney, coach to Ballina, thence by the river steamers, running daily, to places on the Richmond river, and thrice a week to Sydney, or coach to Lismore and Tenterfield, thence rail to Sydney. Principal institutions: a public school, with average attendance of 100, Wesleyan, Anglican, Roman Catholic and Presbyterian churches, two hotels, a temperance hall, and a show ground. Marshall's Falls, a mile from the township, are very picturesque, and are surrounded with dense scrub. The district has a population of

* It may be necessary to mention that, in many instances, places designated officially as "post towns" are really, and will be more correctly described as "postal centres." The distances from Sydney vary according to the route, and in some cases are approximate only.

about 500 persons, engaged mostly in dairying and sugar-growing. The formation is basalt.

ANNANDALE (33° 50′ S. lat., 151° 12′ E. long.), a suburb of Sydney in the electorate of Annandale, police district of Sydney, and county of Cumberland, with money-order, savings bank, and telegraphic facilities; mode of conveyance, by 'bus, tram, or steamer. Buildings: one public and five private schools, Presbyterian, Primitive Methodist, and Anglican churches, and post-office. The suburb is lighted by gas, was incorporated in 1894, and has ratable property of the annual value of £51,580. Geological formation: clay, shale, and sandstone. Population, which is composed chiefly of the middle class, about 8,100.

ANVIL CREEK (*see* GRETA).

APPIN (34° 10′ S. lat., 150° 50′ E. long.), a small post town, county of Cumberland, and police district of Campbelltown, electoral district of Camden, 43 miles S. of Sydney, and 10 miles S. of Campbelltown, the nearest railway station, to which a coach runs daily. Hotel: Imperial. The district is purely agricultural. It has a money-order office and telephone station, and contains three stores, three churches—Church of England and Roman Catholic (built of stone), and Congregational (of wood), an assembly room, and a public school, with average attendance of 35. Formation: iron and slate. Population, 66.

ARAKOON (TRIAL BAY), a post-office, money-order, and telegraph and telephone station, with savings bank, 209 miles N. of Sydney, county of Macquarie, electoral district of Raleigh. Communication is by the Macleay river steamer direct, or coach *viâ* Port Macquarie or Taree, thence steamers. It has Mechanics' Institute, one store, a public school, average attendance 50, and a police-station; also a prison in which good-conduct prisoners (about 100) are employed in connection with the Harbour of Refuge for shipping. Formation: white granite. Population, about 100.

ARALUEN (35° 41′ S. lat., 149° 48′ E. long.), a mining, agricultural and pastoral township, county St. Vincent, electoral and police district of Braidwood, 196 miles S. of Sydney; rail to Tarago, 39 miles, thence coach, being the means of communication. The principal hotels are the Araluen Arms, and the Perseverance. Braidwood is 17 miles distant N. The diggings are almost all alluvial; three modern dredgers are at work; the country surrounding Araluen is exceedingly mountainous and picturesque, but ill-adapted for agricultural purposes. The country is granite in the upper portion, comprising the table-land where the river runs; about 15 miles down it is clay-slate, with quartz veins known to be auriferous, gold returns for 1899 being 1,351 ozs. Churches: Church of England, Roman Catholic, and a Union church. Two public schools, with average attendance of 68, and one Denominational, R.C. There is also an Oddfellows' hall and a court-house. It has postal, telegraph, Government savings bank, and money-order offices, and several stores. A through coach runs daily from Tarago to Moruya. Geological formation: principally granite. Population, 230.

ARMIDALE (32° 32′ S. lat., 151° 38′ E. long.), in the electoral district of Armidale, situated on the Dumaresq creek, on the main Northern Railway, 313 miles (359 postal) N. of Sydney, whence it is reached by the railway to Tenterfield and Brisbane, which passes through Armidale. Fare from Sydney 63s. 3d. and 42s. It is 260 miles from Newcastle (fares, 51s. and 34s. 3d.), and lies 3,313 feet above sea level. Coaches run daily to Hillgrove. The hotels are the Imperial, Tattersall's, New England, St. Kilda, Central, and several others. It was proclaimed a municipality on November 13th, 1863. There are 52 miles of roads and streets in the district; annual value of ratable property is £26,500. The township is lighted by gas, and has a permanent water supply, storage dam holding 110,000,000 gals., service 400,000 gallons, pressure 90 lb. to sq. inch. It is in the county and police district of Sandon, and electorate of New England, and has a money-order, savings bank, and telegraph office. The leading buildings are the Post Office, Lands Office and Town Hall, the Hospital, the Gaol, Police quarters, and the Court-house, several substantial stores and hotels, and a brewery. Fire Brigade has 1 manual fire engine, 1 reel, 1 ladder waggon, and 1,400 ft. hose. The Commercial, Joint-Stock, City, and N.S. Wales Banks have branches here, and the principal insurance companies have agencies. The School of Art has several thousand volumes. The district surrounding Armidale is principally pastoral and agricultural, with some alluvial gold diggings within a few miles of the town. The scenery in the vicinity is rugged and picturesque, from the prevalence of mountains, among which are to be found several waterfalls of considerable height. Armidale is the see of a Roman Catholic bishop, and forms part also of the Anglican diocese of Grafton and Armidale. The cathedral church (St. Peter's) is one of the most beautiful of its size in the colony. The Roman Catholics have also a fine cathedral. Presbyterians and Wesleyans have also places of worship, and there are eight schools, including the New England Proprietary and Grammar Schools. There are two public schools, with an average attendance of 515. Formation: trap and clay slate near the town, further away, granite and ironstone. Antimony in large quantities has been found at Gara and Hillgrove falls. Several reefs at Hillgrove, distant about 20 miles, have been worked for gold, with very good results, more especially the Baker Creek mine. Stock returns, area 3,522,575 acres, 13,093 horses; 83,844 cattle; 1,533,772 sheep. Population, about 4,000, that of the district being 7,000. Newspapers: the *Armidale Express*, *Armidale Chronicle*.

ARNCLIFFE (34° 0′ S. lat., 151° 14′ E. long.), a municipal district, with post-office, money-order office, telegraph station, savings bank and railway station, about 5 miles from Sydney, adjoins municipal district of St. Peter's, commencing from south side of Cook's River Dam, and extending to Sans Souci, having the waters of Botany Bay on the south-east. It is in the county of Cumberland, and electoral district of St. George (the latter represented by one member in Parliament). Omnibuses run from Wynyard Square to Arncliffe every 20 minutes; fare 6d. Hotels: Jacob's Temperance Family Hotel, Barden's Highbury Barn, Ridgway's Sandringham Hotel. There is a public school, and Presbyterian, Wesleyan and Anglican churches. Much of the land is used for market-gardening and horticultural purposes, but large quantities have been taken up for building purposes, and the population is increasing largely, owing to the fact that the Illawarra railway now intersects the Arncliffe ward, where a commodious railway station has been erected. It boasts of one of the finest beaches in the world, "Lady Robinson's Beach," formerly called Seven-mile Beach; Scarborough park, containing 100 acres, a boulevard, 193 feet wide, skirts the park on the south-east, and an esplanade, 100 feet above high water mark from the beach. Lighted with gas. Watering-places of public resort are—Sandringham and Sans Souci. Saywell's tramway connects the Beach with Rockdale station on the main road. Population about 2,000. Newspaper: *The Citizen*.

ASHFIELD (33° 52′ S. lat., 151° 8′ E. long.), as a suburban municipality and electoral district includes Summerhill and Croydon, with a railway station on the Great Southern line, Government savings bank, money-order telephone exchange and telegraph office, about 5 miles S. of Sydney, lying 86 feet above sea-level. It is in the county of Cumberland, and police districts of Newtown and The Glebe. Trains run frequently; single fares, 6d. and 5d., also omnibuses. A Government tram connects Ashfield with Enfield. Hotels: Terminus, Ashfield, Plough, Royal, Commercial and the Summerhill. There are eleven places of worship, three Church of England, one Roman Catholic, two Wesleyan, two Congregational, Baptist, two Presbyterian, and two Salvation Army barracks, two public schools, Hurlstone College for training female teachers, under Department of Education, Presbyterian Ladies' College, Bethlehem Convent School, several private schools, a branch of the Bank of New South Wales, Council chambers, police-station. Municipal affairs are under the control of a mayor and eight aldermen. It was proclaimed December 28, 1871. It has 44½ miles of roads and streets; ratable property of the annual value of £118,770. Under the supervision of the Borough Council is a free library containing 2,200 volumes. The township is lighted with gas, and is supplied by water from Prospect. A complete sewage system has been established in the borough. The various friendly societies and temperance organizations are well represented; a flourishing Masonic Lodge also exists. The Infants' Home, a large villa of brick, stands in grounds of 4 acres in extent, with weather-board cottages in small paddock-like enclosures. Local newspaper, *Ashfield Advertiser*. Population of borough, 14,000.

ASHFORD (29° 20′ S. lat., 151° 10′ E. long.), postal township, with money-order office, on the Frazer creek, near its junction with the River Severn, 508 miles N. of Sydney, and 35½ miles N. of Inverell. It is in the county of Arrawata, electorate and police district of Inverell. There are through means of communication to Queensland. From Sydney the route is by rail to Glen Innes, from there coach *viâ* Inverell. One hotel, wineshop, several stores, Union church, public school with average attendance of 45. The country is taken up by farms and stations, but is well suited for wine-growing. Climate very healthy. Formation: trap. Population about 100.

ATTUNGA (30° 52′ S. lat., 150° 50′ E. long.), a small post town, with money-order office and telephone station, in the electoral and police district of Tamworth and county of Inglis, 291 miles N. of Sydney, which is reached by rail *viâ* Tamworth. There is an hotel, a public school, and Roman Catholic and Union churches. The district is chiefly pastoral, small areas only being under cultivation. Geological formation: light sandy soil. Population, 250.

AUBURN (33° 47′ S. lat., 151° 2′ E. long.), a post town, Government savings bank money-order, telegraph, and railway station, county Cumberland, police district of Parramatta, on the Sydney and Parramatta line, 11½ miles S. of Sydney; fares, 1s. 1d. and 9d., now being extensively settled on. Hotels: Bradford's, Curtis's, and Miles's. The Australian Iron Works, Meat Preserving Company's Works, Ritchie's Agricultural Implement Factory, one store, and other factories are here. The district, which is in the electorate of Granville, was incorporated in 1892, and has 13¾ miles of formed streets, with ratable property of the annual value of £13,320. Churches: Anglican, Roman Catholic, Wesleyan, and Baptist. Oddfellow and Druids lodges. Two public schools, with average attendance of 529, and a branch of the City Bank. Geological formation, ironstone clay. Population, town and district, 2,500.

AUSTINMERE, a post town and railway station 39 miles S. of Sydney, in the county of Cumberland, police district of Bulli, and Electorate of Woronora; fare, 6s. and 3s. 10d. There are several stores, public school, with average attendance of 25, and a population of about 200, principally devoted to coal-mining pursuits

AVISFORD (32° 45′ S. lat., 149° 28′ E. long.), a postal town, with money-order office and telegraph station, on the Meroo river, in the county of Wellington, police district of Hargreaves, and electorate of Mudgee, 186 miles NW. of Sydney. Communication by coach to Mudgee, 40 miles. It has a public school, average attendance 17. Formation: granite, slate and sandstone. Population, including Chinese, about 110, scattered over the district, which is a mining one.

AWABA (33° 9′ S. lat., 151° 40′ E. long.), a post-town with railway station and telephone station, in the county of Northumberland, 85 miles north from Sydney, with which it is in communication twice daily: fare, 12s. 6d. and 8s. There is a public school and United Protestant church. Population about 60, chiefly engaged in mining and supplying Newcastle pits with timber for mining purposes.

BALLINA (28° 50′ S. lat., 153° 30′ E. long.) is a seaport town, situated on the north side of the entrance of the Richmond river, 330 (364 postal) miles N. of Sydney, and 30 miles N. of Clarence river, in the police district of Richmond river, electorate of Ballina, county of Rous. There is direct communication with Sydney by steamers (fares: saloon, £1 10s., steerage, 12s. 6d.; return, £2 5s., and 25s.), which run up to Coraki and Lismore three times a week; river steamers from the former taking on the goods for Casino and the Upper Richmond, and a ferry across the North creek. Several river steamers are employed, which run daily up to Lismore, a distance of seventy miles. Mail communication with Sydney by steamer direct, and *viâ* Clarence river, also by daily coach *viâ* Tenterfield. Coaches run to Lismore and Casino; fare, 7s. 6d.; daily to Tintenbar, Bangalow railway station. There are six hotels: The Australia, Commercial, Occidental, Tattersall's, Exchange, and Ballina. The river was opened upwards of 45 years ago, by sawyers adventuring into the dense brushes in search of cedar; and, until a few years ago, little was exported except cedar, tallow, and hides, which were shipped to Sydney by sailing vessels, of which there were then about twenty employed. Since that period a large trade has sprung up with Sydney and Victoria for the supply of cedar, pine, beech, and ironbark piles; and it is estimated that the cedar brushes of the Richmond have produced some of the finest supplies of the timbers enumerated, as well as a larger quantity than has been shipped from all the other rivers of the colony. The sugar-growing industry is now generally carried on; also an increasing dairying industry, with several butter factories and creameries. There is a telegraph station, telephone exchange, post-office, with money-order office and savings bank attached; branches of the Joint-Stock and Commercial Banks, Church of England, Presbyterian, Roman Catholic and Wesleyan places of worship; a court-house, with lock-up, hall for entertainments, a public school, with an average attendance of 300, also a convent school, school of arts, with 500 vols., and numerous good stores Large quantities of dairy produce, maize, and sugar are now sent from the river, and the latter industry is largely on the increase—there being the large mill belonging to the Colonial Sugar Company at Broadwater, which has recently been enlarged, besides others higher up the river, all of which have been erected by private enterprise. The district is incorporated, and has 14 miles of roads and ratable property of the annual value of £8,186. Gold has been found in payable quantities on the beaches north and south of the Richmond river, but mining has fallen off considerably The Lismore-Tweed Railway passes within 10 miles, and surveys have been completed for a branch line *viâ* Tevin Valley to connect with Ballina. The water supply is derived from the rainfall, which averages 100 inches per annum. Population of town, 1,300. Local newspapers: *Richmond River Times* and *Ballina Beacon*. Geological formation, basalt.

BALMAIN (33° 51′ S. lat., 151° 13′ E. long.), a populous suburb of Sydney, comprising the electorates of Balmain North, and Balmain South, on the western shores of Darling harbour, which is here from one to two miles broad, and is the home of the aquatic world and working classes. Steam ferries ply throughout the day; fare, 1d. There is also land communication with Sydney, though by a rather circuitous route, over Pyrmont Bridge, by 'bus and tram *viâ* Forest lodge, fare 3d. Some of the most extensive workshops of the colony are located here—Mort's Dry Dock and Floating Dock, and Rowntree's, Drake's, and Ward's Floating Docks, the former being the largest private floating dock in the Southern Hemisphere; Elliott's chemical works, Booth's saw-mills and joinery works, meat preserving and glass works, an iron foundry, soap works, numerous ship and boat-building yards and a large cooperage. There are upwards of 20 hotels, branches each of the N.S. Wales, English and Australian Banks, public library, a free library with 900 volumes, a working-men's institute, cottage hospital, benevolent society, five large public schools, with average attendance of 713 scholars, four Roman Catholic schools, thirteen religious edifices, large public buildings, comprising court-house, a large town hall, Masonic hall and a public hall, three post and telegraph offices, money-order and savings bank offices and telephone exchange. There are also two convents, with chapels and schools. The Callan Park Asylum is here. The area of the municipality of Balmain is under two square miles. It was proclaimed February 21, 1860; it is divided into four wards, has 40¼ miles of roads, ratable property of the annual value of £194,100, and is lighted by gas and supplied with water from Prospect. The district is divided into two electorates, North and South, returning one member each to the Legislative Assembly. A coal-mining company is engaged sinking a shaft for the purpose of working the Bulli coal seam at a depth of about 3,000 feet. Messrs. Lever Bros., of the Sunlight Soap Company, have established a large cocoanut-oil factory at Balmain—quite a new industry in Australia—where the copra is reduced and the oil shipped to England for use at Port Sunlight in the manufacture of the celebrated Sunlight soap. Population, 28,750. Newspaper: *Balmain Observer*.

BALMORAL (34° 18′ S. lat., 150° 33′ E. long), a post town, with telegraph and railway station, and money-order facilities, in the county of Camden, electorate of Bowral, and police district of Picton; distance from Sydney, 65 miles; fares, 11s. 9d. and 7s. 11d. It contains a public school, Union church, and an accommodation house. Fruit-growing is the chief industry. Geological formation: iron-stone. Population 90.

BALRANALD (34° 38′ S. lat., 142° 33′ E. long.) lies on the north bank of the Murrumbidgee (co. of Caira, electoral district of Wentworth, police district of Balranald), 574 miles to the SW. of Sydney, and 290 miles from Melbourne. The route to Balranald is *viâ* Hay, from which there is a tri-weekly coach, fare, 60s.; or it can be arrived at by way of Melbourne and Deniliquin. Coaches from Swan Hill, Victoria, run four times a week and tri-weekly between Euston, Mildura and Wentworth. It is about 100 miles distant from Hay and 60 miles from Swan Hill. It can also be reached by Chaffey Brothers' boats from Swan Hill to Windomal, 18 miles distant. Hotels: Royal, Balranald, Commercial, Shamrock, and Carriers Arms. The district is mainly a pastoral one, but some portions are being brought under cultivation. The water supply is derived from the Murrumbidgee river. The municipality has ratable property of the annual value of £5,330. In 1899 the stock returns were 2,015 horses, 3,756 cattle, and 486,249 sheep; area 3,636,801 acres. It has a postal, telegraph, savings bank, and money-order office, and is a principal coaching centre. Bank: Australian Joint-Stock, Limited. It has Episcopal, Presbyterian, and Roman Catholic churches, public school (average attendance 70), a convent and private school, a court-house (where court of petty sessions is held once a week), district court twice a year, police barracks, gaol, a hospital, school of arts, and library, with 300 volumes, and numerous stores. Balranald is the shipping centre for a large quantity of the back country wool sent to Melbourne. The population of the township is about 660, with neighbourhood it is 1,500; land is available for selection within from 5 to 35 miles of the town, and a large number of acres were under crop during 1900. Newspaper: *The Riverina Recorder*. Geological formation: limestone.

BANDON GROVE (32° 25′ S. lat., 151° 42′ E. long.), a post town in the county of Gloucester, electoral district of Durham, and police district of Dungog, 164 miles N. of Sydney. It lies on the E. side of the river, at the junction of the Chichester and the Williams, and contains one Dissenting place of worship, one store and a public school, with average attendance 30, but no public buildings. The traveller reaches Sydney by horse to Dungog, or *viâ* Clarence Town, thence per coach to Maitland, coach fare, 7s. 6d. The surrounding land is rough, rugged, and scrubby, of sandstone and granite formation, but suitable for agricultural and pastoral pursuits. Population of town and neighbourhood about 250.

BANGALOW (28° 36′ S. lat., 153° 29′ E. long.), a post-town with railway station, postal note, and telephone facilities, situated in the county of Rous, police district of Ballina, and electorate of the Tweed, 350 miles NNE. of Sydney. Communication is either by coach to Ballina, thence per steamer; rail to Byron Bay and steamer; or by rail to Lismore, thence coach to Tenterfield, and by rail to capital. There is one hotel, a public school, with an enrolment of ninety, and Anglican and Roman Catholic churches. The staple industries are dairying and sugar-cane growing. Population about 300. Geological formation: alluvial, chocolate soil.

BANKSTOWN (33° 55′ S. lat., 150° 59′ E. long.), named after Sir Joseph Banks, the naturalist, who accompanied Captain Cook, is a postal, money-order and telegraph station with savings bank, in the county of Cumberland, electoral district of Canterbury, and police district of Liverpool, 12 miles distant S. from the Sydney post-office. Its founding dates as far back as 1795. The George's river is 3 miles from here, and the Rookwood railway station 3 miles, from which omnibuses run three times a day. In the township are three churches—Roman Catholic, Church of England, and Wesleyan, one store, a public school (with average attendance of 65), and two hotels. The district was incorporated in 1895, and has ratable property of the annual value of £4,480. Population of the district within a mile radius, 450.

BARADINE (30° 59′ S. lat. 140° 6′ E. long.), a postal, telegraph (telephone to Goonanawa) and money-order station, 240 miles (390 by rail) N. of Sydney, and 30 miles NW. from Coonabarabran; communication is by coach and rail from Gunnedah. Coaches run to Coonabarabran (connecting with Gunnedah and Mudgee), Gilgandra (connecting with Dubbo), Coonable and Villiga. Hotels: Telegraph, and Briggs. It is on the creek of the same name, in the electoral and police district of Gunnedah. Surrounding country used for grazing; good agricultural land on the bank of the Creek. Has two hotels, public school, with average attendance of 43, and three stores, also a police-station and court-house. Formation: new sandstone ranges. Population 100, of district 300.

BARMEDMAN (34° 4′ S. lat., 147° 21′ E. long.), a postal, money-order, and telegraph township, and savings bank, 313 miles SW. of Sydney, and 22 miles NW. of Temora, co. Brand, electorate and police district Grenfell; mail coach runs six times a week to Temora, the nearest railway station, 22 miles distant. Hotels are the Queensland, Royal and Barmedman. The only industry is quartz-mining, the output of gold for 1899 being 1,172 ounces, valued at £4,541. There is a public school here, with average attendance 61, also a court-house and police barracks, two stores, lands office, Anglican, Roman Catholic and Presbyterian churches, and a cordial manufactory. Water from Government dams. Population about 250.

BARRABA (30° 22′ S. lat., 150° 36′ E. long.), a postal township, in the county of Darling, electoral district of Bingara and police district of Tamworth, has telegraph, savings bank, and money-order office, 339 miles N. of Sydney on the Manilla river. Tamworth, the nearest place of importance, is 56 miles distant SE.; Manilla railway station, 27 miles, to which there is daily

coach communication; coach fare, 10s. Hotels: Court House, Commercial, Victorian and Tattersall's. Bank: Commercial. Public school (average attendance 105), and several smaller in district; court of Petty Sessions, first Thursday in the month, four churches, Episcopalian, Roman Catholic, Wesleyan and Presbyterian, mechanics' institute with 1,000 volumes. Cottage hospital. There are some alluvial and quartz diggings in the district, and there are the Cornish copper mines, 16 miles distant; antimony mine at Cobberah, 12 miles distant, putting out about 6 tons a week; the district is mainly occupied by farms and stations. Formation: principally blue slate intermixed with quartz. Population about 800, town and district, 1,485. Newspaper: *Barraba and Manilla News.*

BARRINGTON (31° 50′ S. lat., 151° 45′ E. long.), a postal centre with telephone, in the county of Gloucester, electoral district of Gloucester and police district of Copeland North 181 miles N. of Sydney, on the Barrington river. Communication is by coach, fare, 18s. 9d. to Raymond Terrace, thence per steamer, or *viâ* Hexham, distant 69 miles. It has one school (average attendance 23). Presbyterian church, also used by Anglicans, and a hall. Mountainous and rocky district, with some patches of alluvial soil, held principally by farmers on lease. The Copeland goldfields lie about six miles north. Population about 220, with 36 aboriginals.

BARRINGUN (29° 4′ S. lat., 145° 56′ E. long.), a border township, post, telegraph, telephone, money-order station, and Government savings bank, in the county of Culgoa, electoral district of Bourke, 586 miles NW. of Sydney. Mode of conveyance, per coach to Bourke, 86 miles thence per rail, train Bourke to Sydney 503 miles. Barringun is situated on Barringun creek, a tributary of the Warrego, two miles E. of the Warrego, on the 29th parallel of latitude—the boundary between New South Wales and Queensland. The buildings on the New South Wales side are composed of bonded warehouse, post and telegraph offices, several large stores, three hotels—Royal Mail, Tattersall's, and Carriers' Arms—brewery, cordial factory, police barracks, courthouse and lock-up, and a public school, average attendance of 36. Water from Government bore. Wooroorooka township on the Queensland side consists of one large hotel, customs house and post-office, and police barracks, with about 50 people. Barringun is the principal stock route from Queensland to Southern markets. A coach runs twice a week to Cunnamulla in Queensland, thence to Charleville, thus forming the overland road from Sydney to Brisbane. Population about 100.

BATEMAN'S BAY (35° 40′ S. lat., 150° 13′ E. long.), a seaport, post, telegraph, savings bank and money-order town, in the county of St. Vincent, electorate of Moruya, situate on the Clyde river, near its entrance into the bay, 200 miles S. of Sydney, and 20 miles N. of Moruya. Steamer communication with the metropolis twice a week. Tarago is the nearest railway station, 70 miles distant, from which there is a tri-weekly coach *viâ* Braidwood to Nelligen, and six times a week from Nowra, Ulladulla to Bateman's Bay, Moruya, and Bega. Hotels: Union and Mariners. The extensive saw-mills of Mr. F. Guy and several others afford constant trade to three or four vessels. Churches: English, Presbyterian and Roman Catholic. There is a public school here, with average attendance of 43, and three stores. The bay forms a fine harbour of refuge, two large islands protecting it from the S. and E. Formation: pudding stone and gravel. The district is noted for its fine quality of timber, oysters, wattle bark, and fish. Gold is found in payable quantities. Population about 260.

BATHURST (33° 24′ S. lat. 149° 37′ E. long.), so named by Governor Macquarie on May 7th, 1815, in honour of Lord Bathurst, then Secretary of State for the Colonies, is the principal city in the western district of N.S.Wales, electorate of Bathurst, with postal, telegraph, telephone exchange, and a direct telephone line with Sydney, money-order, and Government savings bank facilities. It is situated on the south bank of the Macquarie river, on high ground, 2,153 feet above the sea-level, surrounded by hills, and is distant from Sydney 145 miles, nearly due west. It is in direct communication by rail with Sydney, two mail and passenger trains daily; fares, 28s. 9d. and 19s. 3d. Tourist train runs from Sydney every week; fares 18s. 2d. and 12s. return. There is also train communication with Bourke and Cobar *viâ* Dubbo, and Murrumburrah on the southern line by a branch starting from Blayney; coaches run to Hill End, Sofala, Wattle Flat, Wyagdon, Peel, Sally's Flat, and Sunny Corner. Hotels: Royal, Metropolitan, The Grand, Cosmopolitan, Club House, Park, Victoria, Empire, Edinborough Castle, Lamerton's Family, and many others. Bathurst may be considered the third town of the colony, and its importance is steadily increasing. It has numerous well laid-out streets, lined with trees, of ample width (1½ chains), crossing each other at right angles, with a beautiful park in the centre planted with trees. The principal thoroughfares are George, William, Kepple, Russell, Durham, Piper, Bentinck, and Howick Street. The public buildings are very numerous and metropolitan almost in their character; they comprise several places of worship—the Anglican Cathedral, a brick building with a peal of bells, the Wesleyan Church, Roman Catholic Cathedral and Convent (Sisters of Mercy), the Presbyterian Church, Congregational Church, Baptist Church, and others; two large and commodious Government buildings—one for a post-office and the other for a telegraph-office; court-house—a massive pile of buildings—gaol and Town Hall; a School of Arts, having a library of about 12,000 vols., and a good lecture-hall, a Masonic hall, Oddfellows' hall, technological museum, technical school, the Joint-Stock, N.S. Wales, City, Commercial Banks, and Bank of Australasia; the Hospital (the largest out of Sydney, "a splendidly placed and handsome structure,") a fire-brigade station, with 1 fire-engine, 1 reel, and 1 hose-cart with 1,820 feet hose, and very many well-built and handsomely fitted up stores and business premises. The city possesses a good cricket-ground, a fine reserve for horse-racing, and well laid-out Agricultural Society's ground, the improvements being valued at £18,000. A Government experimental farm has been established, and good results have been achieved under the management of Mr. A. A. Cunnicliffe. Bathurst was elevated into a municipality on November 13th, 1862. There are 43 miles of roads and streets in the city; annual value of ratable property is £54,370. The country surrounding Bathurst may be described as agricultural and pastoral, consisting of extensive fertile plains, very productive, and especially suited to the growth of cereal crops, but mining is also very largely carried on, though not in the immediate vicinity. About 115,815 acres of land in the district are under cultivation, the produce being wheat, maize, barley, oats, potatoes, rye, tobacco, and wine. Stock returns 1899 were, 12,415 horses, 28,577 cattle, 527,036 sheep; area 1,412,819 acres. In the neighbouring goldfields of Wattle Flat and Sofala, Hill End and Tambaroora, Chambers' and Cheshire's Creeks, Newbridge, Trunkey Creek, Tuena, the Abercrombie, Caloola, Turon, Dark Corner, Winburndale, and Rockley, as well as at the copper mines of Burraga, Cow Flat and Apsley, a large number of persons are resident. Silvermining is carried on at Sunny Corner. The manufactories in Bathurst are several tanneries, coach factories, Government railway workshops, breweries, and four flour mills. Soap, candles, glue, boots and shoes, and furniture are also manufactured extensively in the town. The city is lighted with gas, and provided with permanent water supply works which cost £62,000; three reservoirs have a total capacity of 1,010,000 gallons. There are Anglican and Roman Catholic Bishops of Bathurst. The public school has an average attendance of over 1,200. Colleges in connection with the Episcopalian and Roman Catholic denominations are all well supported. Population of city 9,450, and district about 25,000. Newspapers: *Bathurst Daily Free Press, Advocate, Bathurst Times,* and *Sentinel.* Under the new Electoral Act portions of East and West Macquarie have been attached to the electoral district of Bathurst.

BATLOW. *See* Reedy Flat.

BAULKHAM HILL (33° 42′ S. lat., 150° 59′ E. long.), post village with telegraph station, in the police district of Parramatta, electorate of Sherbrooke and county of Cumberland, 18 miles north-west of Sydney; communication thrice daily to Parramatta, thence by rail and steamer to Sydney. It contains Anglican, Wesleyan, and Primitive Methodist Churches, a public school, 1 hotel, several sports clubs, and 3 general stores. Fruit growing, case making, dairying, and bee-keeping industries. Geological formation, shale on sandstone. Population about 536.

BEECROFT (33° 48′ S. lat., 151° 41′ E. long.), a post-town, railway, and telegraph station on the Northern Railway, seventeen miles north-west from Sydney, in the county of Cumberland, electorate of Ryde and police district of Ryde. There is a public school, average attendance sixty; Anglican and Wesleyan churches, Progress Association, also a large number of gentlemen's residences. Orchards, bee and poultry farms. Formation: Sandstone. Railway fare, 1s. 8d. and 1s. 1d. Population about 180.

BEGA (36° 38′ S. lat., 149° 50′ E. long.) is situated on the banks of the Bega river, 12 miles westerly from the seaport of Tathra, with which there is telegraphic communication, and 316 miles SW. of Sydney, in the county of Auckland and electoral district of Bega. Coach to Tathra or Eden, thence by steamer, are the means of communication with Sydney; or by coach to Cooma (74 miles), thence by rail to Sydney; or to Tarago station, *viâ* Moruya and Braidwood (150 miles), and thence by railway; or Moruya *via* Nowra, thence by railway; but the Tathra route by steamer, twice a week, is the most popular. Hotels: Grand Central, Commercial, Bega, Family Hotel, Club, Royal, Bank, Imperial, Occidental, and Metropolitan. It has a postal, money-order, and Government savings bank office and telegraph station; has daily mail communication with Sydney. There are four places of worship—St. John's (Church of England), St. Patrick's (Roman Catholic), a Presbyterian church, and a Wesleyan chapel. Other public buildings are a commodious hospital, which cost over £3,000, a large Lyceum Hall, accommodating 600 people, Court house, commodious Police Barracks, superior Public School, with average attendance of 320, School of Arts, with a public hall and a library of 3,360 vols., a convent school with an attendance of 200. There are two private schools. The N. S. Wales, Commercial and Australian Joint-Stock Banks have branches here. The district is largely occupied by farms, the export to Sydney of dairy produce being considerable, and on the increase. The municipality has ratable property of the annual value of £14,536, and 21 miles of road. The Council has erected gas works, at a cost of £8,000. There are Municipal cattle sale yards. One tan yard, brick yards, 3 coach factories, 2 boot factories, a saw-mill, a brewery and cordial factory, represent the industries. In addition to these, several large cheese factories and a large butter factory are in operation. The New South Wales Creameries Company has a butter factory near Bega, and is turning out large quantities packed for export in 56lb. boxes. The mountain road from Bega *viâ* Bemboka, formerly called Colombo, to Nimitybelle and Cooma is the daily mail route. Most of the country is "free selected." Bega is reputed to be one of the prettiest and most healthy places in the colony. Formation: granite, with extensive outcrop of basalt. Gold in considerable quantities is procurable among the ranges north-east of Bega; also at Wolumla, 13 miles south; and at Yowaka, 27 miles south, but the metal is fine, and the cost of procuring it involves much labour. The cyanide process is

carried on. The town population numbers 2,300; inclusive of the district there are 5,200 persons. Oddfellows' lodges, Old Order and M.U. (including a ladies and a juvenile lodge) are flourishing; also Benevolent Society, (four brick tenements for aged people have been erected). Branch A.A.C. Guild, a Templars', a Masonic, and an Orange lodge. A labour settlement adjoins the town. The *Bega Gazette* and *Bega Standard* are the local papers. District courts and Quarter Sessions are held twice a year; and Petty Sessions every Tuesday.

BELFORD (32° 30′ S. lat., 151° 15′ E. long.), a post town (issuing postal notes and with telephone), on Jump-up Creek, in the county of Northumberland, electoral and police district of Singleton. It is situated 138 miles N. of Sydney, 39 from Newcastle, lies 160 feet above sea-level, and is a station on the Great Northern Railway; fare from Sydney 19s. 2d. and 11s. 10d. It has two wine shops, condensed milk factory, one public school, average attendance 30, a fine stone Anglican church and a Wesleyan chapel. The country around is sandy loam overlying yellow clay, below which is slaty rock mixed with pipeclay; its features are undulating and pleasing; on one side the Rothbery mountain shuts in the view, brush land bounding the other sides. The vine is largely cultivated by the German portion of the inhabitants. Population, about 250.

BELLINGEN (30° 30′ S. lat., 152° 58′ E. long), a postal township, with telegraph, savings bank, and money-order facilities, 374 miles (340 postal) north of Sydney, on the Bellingen river, in the Raleigh electorate. Communication to the metropolis is per steamer, about twice weekly; mail coaches run tri-weekly to Macksville, Kempsey, and Port Macquarie, and also to Grafton. There is a Roads Department, court-house, Episcopalian, Catholic, Wesleyan, and Presbyterian churches, branch of the Commercial Banking Company of Sydney, one hotel, four stores, and a School of Arts with 400 volumes. Bellingen is steadily rising in importance, being more central to the North and South Arms, Dorrigo, and other settlements. When the North Coast Railway is constructed the New England Table-lands will doubtless be tapped by a branch line from the Bellinger, which would thus become an important place, with a fine deep seaport at Coff's Harbour (24 miles distant). Raleigh is also a small township on the Bellinger river, six miles from Fernmount; Bowraville (Nambucca river) is distant 19 miles from the Bellingen. Formation: rich alluvial land, permeated with quartz. Maize, timber, and fruit are the principal products. Population, 450; of district about 3,000. Newspaper, *Raleigh Sun*.

BELMONT (32° 52′ S. lat., 151° 39 E. long.), a post town and watering place, with Government savings bank, telegraph, telephone and money-order office, situated on the eastern shores of Lake Macquarie, 113 miles N. of Sydney, and about 12 miles from Newcastle. Conveyance direct from Newcastle, or rail to Cockle Creek, 15 miles distant, and steamer thence, daily. Hotel: the Belmont. It is in the county of Northumberland and electoral district of Kahibah. There are here I.O.G.T. lodge, Progress Association, three boarding-houses and a public school, with average attendance of 35. Good boating, fishing and shooting. Services are held regularly by Anglicans and Methodists. Population, about 200.

BEMBOKA (*See* LYTTLETON.)

BENDEMEER (30° 54′ S. lat., 159° 13′ E. long.), a township on the banks of the Muluerindie river (which is crossed by a handsome bridge), on the main Northern Road, distant from Sydney N. 306 miles, and from Armidale 45 miles, in the county of Inglis, electoral district of Uralla-Walcha and police district of Armidale, with telegraphic and money-order facilities. Communication is by coach to Moonbi, 17 miles distant (fare, 15s.), thence rail. Hotels: Glover's, Telegraph, and Royal Oak. The town contains a few stores, a public school, with average attendance of 40, Presbytérian and Roman Catholic churches, and court-house, the latter presided over by a magistrate from Armidale. The surrounding country is more or less auriferous There are numerous stations in the district; farming is not much followed. It is a telegraph, money-order, and postal station. The Giant's Den tin mine is 14 miles distant. Watson's station. About 200 persons represent the population.

BERMAGUI (36° 23′ S. lat., 150° 8′ E. long.). It is in the electoral and police district of Bega, and county of Dampier. A small shipping port situated on the south coast, 246 miles from Sydney, with postal, money-order and telephonic facilities. It contains a public school, Union Church, School of Arts, a steam saw-mill, a number of general stores, two hotels, and police station. Gold in small quantities has been found in some parts of the district, which is devoted chiefly to agricultural pursuits. Geological formation, sandstone and slate trap rocks. Population, 250.

BERRIGAN (35° 40′ S. 145° 50′ E.), a post town, money-order, savings bank and telegraph station and railway station (fares 69s. 5d. and 47s. 11d.), 435 miles S. of Sydney, and 23½ miles S. from Jerilderie, in the centre of a splendid agricultural district, county of Denison, electoral district of the Murray, and police district of Narandera. There are 7 stores, soap-works, cordial factory, 3 implement works, 4 hotels, a branch of the Commercial Bank and of the Union Bank, public school, with average attendance of 150, School of Arts, and a racing club. Episcopalian, Presbyterian, Bible Christian, and Roman Catholic places of worship, police barracks, courthouse, progress association, agricultural society, farmers' union, federation league, and several athletic and social institutions. Coaches run direct to Cobram daily; Corowa on Sunday and Wednesday; Mulwala, Tuesday and Saturday; Tocumwal, Monday, Wednesday, and Friday; Daysdale, Wednesday and Sunday. About 161,959 acres of land are under cultivation in the county. Population of district about 2,000. Geological formation, granite. Newspaper: *Berrigan Advocate*. Berrigan is connected with Finley by rail.

BERRIMA (34 S lat., 150° 22′ E. long.) is a township on the Wingecarribee river, on the main Southern Road, at an elevation of about 2,300 feet above sea-level, in the electorate of Bowral, and has a telegraph station, Government savings bank and money-order office. It is 92 miles distant from Sydney SW., with which the connection is by coach to Moss Vale railway station, distant six miles. Hotel: Surveyor-General. The buildings comprise two stone churches, Episcopal and Roman Catholic; a commodious court-house, a large gaol (conducted under what is known as the "silent system"), school of arts, public school with average attendance of 70, one store, and a School of Arts with about 1,000 volumes. A rich mineral district surrounds Berrima. Some promising seams of coal have been opened out, about four miles from the town. Enormous deposits of the best kind of iron ore exist in the district, and in the neighbourhood of Goulburn there are beds of copper which, with the iron ore, will probably before long be smelted with coal from the Berrima mine. Kerosene shale has also been found, and is now being worked at Joadja, about 12 miles NW. of Berrima, by the Kerosene Shale Company. The company have about 40 retorts at work, and a large plant connected with the G.S. Railway at Mittagong by a tramway (locomotive) 16 miles in length. The mineral is reputed to be one of the best of the kind in the world. Much land in the police district has been taken up for agricultural purposes, and the soil in some parts being very suitable. Stock returns, 1899, 3,326 horses; 22,660 cattle; 41,862 sheep. Area 237,542 acres. Population, about 500; of the police district, 10,000.

BERRY (late BROUGHTON CREEK) (34° 42′ S. lat., 150° 45 E. long.), a post, savings bank, money-order, telegraph office and railway station, and municipal centre, on a river of the same name, 84 miles S. of Sydney. It is in the south-east of the county of Camden, electorate and police district of Shoalhaven. Steamers ply to Sydney twice a week, rail three times daily. Banks: English and Scottish, and Commercial. One public school, average attendance 112, and a Convent school; four churches, Episcopal, Presbyterian, Wesleyan, and Roman Catholic, school of arts with 1,800 volumes, eight storesand two hotels, the Commercial and Great Southern, a creamery and central butter factory, and a cottage hospital. A Court of Petty Sessions is held every alternate Friday. Masonic, Oddfellows, and I.O.G.T. lodges. The country is very mountainous, the ranges averaging 1,000 to 1,200 feet in height. The valleys are very fertile, and large quantities of maize and other cereals, as well as potatoes and other root crops are raised, but the principal staples of produce are butter, pigs and cheese. Formation: clay, trap, and carbonaceous, with coal in abundance. Berry forms a municipal district, having 34 miles of roads, and ratable property of the annual value of £1,400. The whole of the town and country as far as the sea and to the north bank of the Shoalhaven river is a portion of the late Mr. David Berry's estate, and contains numerous farms. On the north and west of Berry are the rich and fertile districts of Kangaroo Valley, Barrangarry, Woodhill, Broughton Vale and Cambewarra, most of it being freeholds belonging to dairy farmers. Broughton Vale is incorporated with 49½ miles of streets and ratable property of the annual value of £3,700. Many new business places have recently been erected in the township. The population is about 900, with district nearly 2,520. Local newspaper: *Berry Register*.

BETHUNGRA (34° 36′ S. lat., 147° 55′ E. long.), a small postal town on the Ulandrie Creek, with telegraph, savings bank and money-order office, and railway station (fares 52s. and 35s.), in the county of Clarendon, electorate of Gundagai, and police district of Cootamundra, 268 miles S. of Sydney (1,051 feet above sea-level). Coaches run to Gundagai (30 miles) and Wagga (40 miles). Hotel: the Bethungra. Public school here, with average attendance of 43 scholars. Church of England and Roman Catholic places of worship, police barracks and two stores. Pastoral and agricultural district. Population, 250.

BIBBENLUKE (36° 45′ S lat., 149° 14′ E. long), a postal and telephone station, in the county of Wellesley, situated on the river whose name it bears, about 307 miles (310 postal) S. of Sydney, in the electorate of Eden-Bombala. Hotel: the Bibbenluke. The district is both of a pastoral and agricultural character. Large creamery. Public school here, average attendance, 56. Accommodation is given in hall for Church of England and Methodist services. Presbyterian church. Communication is *viâ* Merimbula, or Cooma (46 miles) and Goulburn; Cooma being the nearest station, 38 miles distant. Good fishing and shooting. Population of the neighbouring farms and stations is about 350.

BINALONG (34° 39′ S. lat, 148° 37′ E. long.), a postal township, with savings bank, money-order office, telegraph office, and railway station on the Southern line, 208 miles SW. of Sydney, on the banks of the Balgalal creek, about 23 miles from Yass NW., in the electorate of Boorowa; fares, 41s. 3d. and 27s. 6d. Coaches ply to and from Burrowa daily; fare, 5s. Hotels: Commercial and Royal. Church of England and Roman Catholic places of worship. It is in the county of Harden, police district of Yass, and "stands on an eminence, 1,568 feet above sea level, with wooded hills sweeping in graceful undulations around it; Cumbamurra Falls about six miles distant. There is a public school, with average attendance of 50, Roman Catholic school, court-house, police quarters, railway station. Petty Sessions court held fortnightly. There are also a progress committee and a farmers' association in the district. The country, which is pastoral and agricultural, is occupied by farms and stations.

Formation: principally granite. Population 220, that of the entire district is about 1,500.

BINGARA (29° 48′ S. lat., 150° 33′ E. long.), a township, 350 miles NW. from Sydney, situated on the Gwydir river, county Murchison, electorate of Bingara, and police district of Tamworth, possessing a court-house, where Petty Sessions are held daily. Quarter Sessions and District Court are also held three times a year. The route to Bingara from Sydney is by rail *via* Tamworth and Manilla, 279 miles, thence by coach, 69 miles. Fare from Manilla 22s. 6d. The hotels consist of the Commercial, Imperial, Royal, and River View. There is a telegraph, money-order, and post office, with savings bank, also a Crown Lands Office Coaches run to Warialda three times a week (10s.), to and from Manilla and Barraba daily, Inverell three times a week (12s. 6d.), and Gravesend. Several gold fields are in its vicinity, viz., Bobby Whitlow, 8 miles distant; Bora, 8 miles; Hayman's Paddock, 4 miles; Spring Creek, 6 miles; Gympie Flat, 4 miles; and Upper Bingara, 16 miles, from which latter field large quantities of gold have been found, the returns for 1899 being 942 ozs. The Commercial Bank has a branch here; there are nine stores, two flour mills, a hospital, saw-mill, gaol, School of Art, with 650 volumes, and geological museum, two large public halls and police barracks, Masonic, I.O.O.F., and Druids lodges, a public school, with an average attendance of 160 scholars, and a Roman Catholic convent. Churches: Episcopalian, Roman Catholic, Wesleyan, and Salvation Army. The district abounds with gold, copper, silver, asbestos, antimony, tin, coal, kerosene, shale, quicksilver, and diamonds. The municipality has 18½ miles of streets, and ratable property of the annual value of £5,200. Population of town, 900; number of electors on roll for the district 2,160. Local newspaper, *Bingara Telegraph*.

BLACKHEATH, a post town and railway station, with money-order office, telegraphic and savings bank facilities, 73 miles W. of Sydney, in the county of Cook, electorate and police district of Hartley; fares 13s. 7d. and 9s. 1d.; excursion 12s. 2d. and 6s. 1d.; 3,494 feet above sea-level, and is one of the most popular resorts of invalids and tourists; the great sights of the district being the famous Govett's Leap or Waterfall, said to be the deepest chasm with perpendicular cliffs in the world, the trees in the valley reaching fifty to seventy feet high, and water pouring over the cliff 520 feet in descent, the bottom of the falls (to which a good track has been made) being covered with luxuriant trees, ferns, and mosses; the other attractions are the Trinity Cascade, Mermaid's Cave, Evans' Look Out, Horse Shoe Falls, Pope's Glen, Blackheath Glen, Walls Cave, and several other smaller waterfalls. Coaches run to Katoomba, Mount Victoria, and Jenolan Caves. There is a public school, average attendance 85, private ladies' seminary, Oddfellows' Lodge, Literary Institute, an Episcopalian church and Baptist Mission hall, several stores, 2 hotels (Ivanhoe and Hydora), and a large number of private boarding establishments. Population about 800.

BLACKTOWN (33° 40′ S. lat., 150° 56′ E. long.), a post, money-order office, and telegraph township, in the county of Cumberland, electorate of Sherbrooke, and police district of Parramatta, 22 miles W. of Sydney. It is a station on the Great Western Railway (fares, 2s. 4d., 1s. 4d.), being the junction of the Western with Richmond line, and has one hotel, a public school, with average attendance of 59 scholars, two stores, and Church of England and Roman Catholic churches. Two saw-mills. The place takes its name from an aboriginal institution formerly here, founded by Governor Macquarie. The surrounding country is mostly laid out for vineyards and fruit and orange orchards. Formation: clay.

BLANDFORD (32° 48′ S. lat, 150° 54′ E long), a small postal township and telegraph station, in the county of Brisbane, police district of Murrurundi, and electoral district of Robertson, on the Page river, 188 miles (213 postal) N. of Sydney, about 4 miles from the Murrurundi railway station, and is itself a railway station; fares to Newcastle (115 miles), 22s. 9d., 15s. 3d.; or direct to Sydney, 34s. 9d. and 23s. Hotel: Plough. It lies 1,382 feet above sea-level. It contains a post office, public school (average attendance 30), one store, a brick Episcopal and Roman Catholic churches. The surrounding district is good grazing, agricultural, and vine-producing country, well watered, and encircled by lofty ranges. There is a kerosene mine within 8 miles of the township, and a silver and lead one within 12 miles. Population of the district 320.

BLAYNEY (33° 31′ S. lat., 149° 23′ E. long), a telegraph, savings bank, and money-order township, and railway station on the Western line; fares, 34s. and 22s. 6d., 172 miles W. of Sydney, and 27 miles SW. of Bathurst, situated on the Belubula river, in the county of Bathurst, electoral district of West Macquarie, and police district of Bathurst. It is the Junction station by which the Western and Southern districts are connected by railway, *viâ* Cowra and Young to Harden. It is elevated 2,841 feet above the sea-level. Hotels: Royal, Criterion, Exchange, Club, Tattersalls, Cosmopolitan, Commercial and Junction. Banks: Commercial and Joint-Stock, a school of arts with 1,000 volumes. Places of Worship: Anglican, Presbyterian, Wesleyan, and Roman Catholic. Public school has average attendance of 200 scholars. Masonic, I.O.G.T., and Oddfellows lodges; School of Arts, flour mill, butter factory, chicory mill. The soil is well adapted for agricultural purposes, wheat principally being grown, which gives employment to one large flour mill. Gold digging is practically a thing of the past, but copper mining is active. Population of town and vicinity, 1,500. The municipality has ratable property of the annual value of about £6,930, and 17 miles of roads. Newspapers: *The West Macquarie Argus* and *Blayney Advocate*.

BODALLA (36° 5′ S. lat., 149° 59′ E. long.), a postal, telegraph, Government savings bank, and money-order village, on the Tuross river, in the electorate of Moruya, on the Main Southern road, 224 miles S W. of Sydney, the route to which can be either by conveyance to Clyde River, Moruya, 16 miles, thence steamer; or by coach to Braidwood, thence per coach and rail. Tarago is the nearest railway station, 100 miles distant. Hotel: Bodalla Arms. Public school has an average attendance of 44 scholars. There is also a resident doctor and a private hospital. Agricultural and pastoral pursuits are principally followed. Comerang is the late Mr. Mort's residence, from which large quantities of bacon and cheese reach Sydney. The farm is about 20,000 acres in extent, and carries upwards of 2,000 head of dairy cattle. The mechanical arrangements for the manufacture of the cheese are of a superior order. A memorial church, in remembrance of Mr. Mort, has been erected on the estate, where service is conducted by the resident chaplain. Population about 400.

BOGGABRI (30° 40′ S. lat., 150° E. long.), a post, money-order, telegraph town, with telephone exchange, railway station and Government savings-bank, in the county of Pottinger, electoral and police district of Gunnedah, at the junction of Cox's creek and the Namoi river, 319 miles NW. of Sydney, to which the railway is the means of communication. It lies 822 feet above sea-level. Fares, 55s. 9d. and 37s. Hotels: Royal, Rose, Thistle and Shamrock and Railway, also a court-house, one public school, with enrolment of 180 scholars, School of Arts, I.O.G.T. lodge, Church of England, Roman Catholic, and a Union church, four stores, two saw-mills, and a branch of the Australian Joint-Stock Bank. Pastoral and agricultural district. Water supply principally cartage from reservoir. Population about 900.

BOMADERRY (Nowra railway station) (34° 40′ S. lat., 150° 40′ E. long.), on the South Coast line, in the county of Camden, electorate and police district of Shoalhaven, 93 rail miles S. of Sydney. It has post and telegraph offices, a public school, with average attendance of 60 scholars, bacon factory, creamery, butter factory, and saw-mills. It is a farming district of trap formation, and is described as "a very pretty place, out of the reach of floods, with plenty of good water." Population of township and district, 500.

BOMBALA (36° 54′ S. lat., 149° 15′ E. long.), a leading township, in the Monaro district on the Bombala river, 319 miles SSW. of Sydney, with post, telegraph, telephone, money-order, and Government savings bank facilities. It is in the county of Wellesley, police district of Bombala, and electoral district of Eden-Bombala. The country surrounding Bombala is occupied by farms and stations. Gold mining is carried on at Delegate, 20 miles distant, also at Craigie 18 miles. Lead, silver and copper are found at Quidong, about 16 miles distant. Some rich gold-bearing reefs have been recently discovered at Bendoc, 8 miles on the Victorian side of the Border, with good results. Mining interests are reviving. Steamer to Tathra, Eden or Merimbula are the means of travelling from Sydney, or by coach from Bombala to Cooma, distant 54 miles, thence by train. Hotels: Commercial, Australian, Imperial, and Globe. The district was incorporated in 1890 and has 6⅜ miles of roads and streets, with ratable property of the annual value of £6,020 The Anglican, Roman Catholic, Wesleyan, and Presbyterian bodies have each a church in the township. There is a public school, with average attendance of 200, two private schools, a convent, a School of Arts with a handsome hall, and library of 1,500 volumes; a court-house, the Court of Petty Sessions District Court and Quarter Sessions. Much land has been taken up by selectors, but the bulk of the country is used for grazing purposes. Stock returns, 1899: horses, 3,024; cattle, 20,696; sheep, 417,893; area, 695,720 acres. The Commercial, New South Wales, and Australian Joint-Stock Banks have branches here. There are several local societies, Agricultural, Dramatic Club, Masonic, Oddfellows, and Sons of Temperance. There are 14 stores in the township itself, and several in the outskirts. also two steam flour-mills, tannery, Co-operative Dairying Company (with four attached creameries) and a hospital. Population, town, 1,050; district, 4,000. The *Herald* and the *Times* are the newspapers.

BONDI, a rapidly advancing suburban village and watering-place, in the county of Cumberland, electorate of Waverley, overlooking the ocean, with postal, money-order and telegraph office, and Government savings bank, about five miles S. from Sydney, with which it is connected by tramway; it has two first-class hotels, public school, with average attendance 200, an aquarium, with beautiful picnic grounds, to which large numbers of people flock at holiday times; some fine private buildings have been erected in the vicinity.

BOOKHAM (34° 47′ S. lat., 148° 21′ E. long.), a postal and money-order township with telephone to Bowning, in the county of Harden, police district of Binalong, and electorate of Yass, located on the Bogolong creek, 206 miles S. of Sydney, on the Great Southern road. There is one hotel, two stores, a Presbyterian church, and a half-time public school, with average attendance of 20, but no large or public buildings. Means of communication with Sydney is by mail coach to Bowning railway station, twelve miles distant. The district is principally pastoral. Formation: granite, sandstone, slate, and ridges of quartz, with iron ore and limestone. Population about 200.

BOOLIGAL (33° 53′ S. lat., 144° 59′ E. long.), a postal town, with telegraph station, money-order office, and Government savings bank, 505 miles W. of Sydney, and about 50 miles N. of Hay, situated on the Lachlan river, in the electoral district of Lachlan. Watson's coach connects with the train at Hay, 50 miles distant. Public school here average attendance 60, two hotels, Anglican and Roman Catholic churches, and one

store. It is an important crossing place for stock. Wool washing industry. Population, about 220.

BOTANY (34° 0′ S. lat., 151° 14′ E. long.), a large shallow sheet of water some 20 miles in extent, five miles distant S. from Port Jackson Heads, and 5 miles S. of Sydney. It has an historic interest arising from being the place where Captain Cook anchored the *Endeavour*, on Saturday, April 28th, 1770, and afterwards took possession of New South Wales in the name of the British Crown. The site of his landing on the southern shore of the Bay is now marked by a monument. It was named by Captain Cook, who says, "The great quantity of plants which Mr. Banks and Dr. Solander collected in this place induced me to give it the name of Botany Bay." On the western side is a fine beach, known as Lady Robinson's Beach. In the village of Botany is a money-order, post, and savings bank office, a Mechanics' Institute with library of 1,200 vols., Anglican, Wesleyan and Presbyterian churches, two public schools with an average attendance of 162, a Roman Catholic school, and five hotels, one of which is of a superior class, with well laid out gardens, much frequented by picnic and other parties. The tramway now connects it with Sydney. There are two Municipalities in the district, Botany, and Botany North, with ratable property of the annual value of £33,280. The suburb is lighted by gas and connected with the Prospect Water Supply. Population of district, 2,850.

BOURKE (30° 3′ S. lat., 145° 55′ E. long.), is situated on the southern bank of the Darling river, 503 miles NW. by rail from Sydney. It is in the county of Cowper, electoral and police district of Bourke. Government buildings: court-house, Roads and Bridges, Land and Survey offices, post-office, police barracks and gaol, hospital, savings bank, telegraph office, and railway station (fares from Sydney, 83s. 6d. and 56s. 3d.). The principal hotels are the Royal, Tattersall's, Central Australian, Oxford, Telegraph, Post Office, and Gladstone. The Commercial, New South Wales, London, and Australian Joint-Stock Banks have branches here. The Mechanics' Institute has 4,000 volumes. Churches: Church of England, Wesleyan, Presbyterian, and Roman Catholic. Schools: two public, with average attendance 300, one private, and one Catholic (the latter has an average attendance of 246 scholars). Salvation Army barracks. Fire brigade has a manual and a chemical fire engine, one reel, 500 feet hose. When the river is navigable, steamers ply from Adelaide and from Bourke as far up the river as Walgett. Bourke is connected, commercially, with Sydney, Queensland, South Australia, and Victoria. A weir and lock have been constructed in the river a short distance below the town. A District Court is held three times a year, a Court of Quarter Sessions is also held. District Insolvent Court and Local Land Board. Masonic and Oddfellows lodges. The district is mainly occupied by sheep and cattle stations, the former largely predominating. The Bourke district embraces the eastern portion of the pastoral district of Albert, the western and southern portions of Warrego, and the northern portion of Wellington. Coaches run to Hungerford, fare, 60s.; Barringun, 50s.; Wanaaring, 70s.; Milparinka, 130s.; Brewarrina, 30s.: Wilcannia, 90s. Artesian water has been discovered and proved to exist over a very large area, one well, yielding four million gallons per day. An irrigation settlement exists at Pera, 10 miles from Bourke; two bores, yielding in the aggregate about 600,000 gallons per diem, yield a sufficient water supply. The water supply for the town is obtained from the River Darling; capacity of tower 20,000 gallons, mains 3 in. to 6 in. The boiling down and preserving works have been idle some time owing to drought. The southern extremity of the district has been discovered to be rich in metals. Copper ore, of a remarkably rich character, and in great abundance, proves the value of the district. Bourke has one of the largest pastoral and agricultural associations in the colony, and the sheep portion of the annual show cannot be surpassed. Gold has also been found in payable quantities.—NORTH BOURKE is a small township on the west side of the Darling, 3 miles distant, having several stores and four hotels. A bridge has been erected there, as that site was considered the most suitable, owing to the liability of the flat on the opposite side of the river to floods. Stock returns: 5,052 horses, 879 camels; 14,089 cattle, and 849,365 sheep, showing an enormous decrease through drought during the past twelve months; area, 7,779,990 acres. In the Bourke municipal district (proclaimed July 3, 1878), the annual value of ratable property being £29,370. Population of town 3,400; of district, about 7,000. Newspapers: *Western Herald* and *Banner*.

BOWENFELS (33° 23′ S. lat. 150° 9′ E. long.), a money-order, Government savings bank, and telegraph township, in the county of Cook, electoral district of Hartley and police district of Lithgow, 97 miles W. of Sydney, with which it is in direct railway communication; fares, 18s. 9d. and 12s. 5d. It lies 2,972 feet above the sea-level, at the junction of the Bathurst and Mudgee roads, and is situated on the Cox's river. There is a public school, with average attendance of 40. Presbyterian church, one hotel (Eather's Family), two boarding-houses, and a college. The district is both agricultural and pastoral; there are also large deposits of coal and kerosene shale in the vicinity. Not far from here are the works of the Lithgow Valley Iron Company, besides a foundry and rolling mills for turning out castings, railway, and bar iron. A Tweed Factory is here, employing a large number of hands. Population about 300.

BOWNA (35° 59′ S. lat., 147° 4′ E. long.), a post town, with savings bank, telegraph and money-order office, in the county of Goulburn, police and electoral district of Albury, 394 miles SW. of Sydney. It is on the Mullingandra creek, near its junction with Twelve Mile creek, and is distant two miles from the Murray river and 12 from Albury. A daily coach runs to Albury. Table-top (the nearest railway station) is three miles distant. Hotels: the White Horse and Ivy. The Upper Murray road joins the main southern road at this point. There are two places of worship, Presbyterian and Roman Catholic (Episcopal services are occasionally held in the Presbyterian church); 2 stores, 2 blacksmiths' shops; one public school (average attendance 43), one Roman Catholic, a mechanics' institute; also a steam flour mill and police station. Most of the land in the vicinity is occupied by free-selectors, and the farming prospects are good. Population of district about 200.

BOWNING (34° 46′ S. lat., 148° 45′ E. long.), a post town, with money-order office, telegraph, savings bank, and railway station, in the county of Harden, police and electoral district of Yass, lying 1,804 feet above sea-level, on the Great Southern Railway, 194 miles S. of Sydney, on a creek of the same name, distant from Yass about seven miles. Bowning is at the foot of Mt. Bowning. There are several selections taken up in the neighbourhood, which is suitable country for both stock and cropping. Railway fares, 38s. 3d. and 25s. 6d. Public school (average attendance 35), an Episcopalian church, one store, two hotels, and a police station. Geological formation: silurian, chiefly shale and limestone, rich in fossils. Population 150.

BOWRAL (34° 18′ S. lat., 150° 31′ E. long.), county Camden, police district of Berrima, electorate of Bowral, is a post town, with money-order office, savings bank and telegraph station, with branch of the Commercial Bank, 80 miles S. of Sydney by rail, lying 2,230 feet above sea level. It is a station on the Southern line, fares, 15s. 3d. and 10s., and has four hotels (Royal, Grand, Imperial, and Commercial), court of petty sessions, a public school with an ordinary attendance of 415, and several private schools, Masonic, Oddfellows, Protestant Alliance and I.O.G.T. societies, six places of worship, Church of England, Roman Catholic, Wesleyan, Primitive Methodist, Presbyterian, and Salvation Army, and a School of Arts, with a library of over 2,000 volumes. Fire brigade has a fire engine and 1,000 feet hose; town lighted by gas. Water from tanks and wells. The celebrated Gibraltar Tunnel is within the Municipality. It is 572 yards long, cut through hard shale and sandstone, lined throughout with brickwork and masonry in cement. Population about 2,000, but during summer months considerably greater, it being a favourite resort for metropolitan gentry, and a much favoured sanatorium. The district is incorporated, and has ratable property of the annual value of £12,500, and 19¾ miles of roads. Large quantities of stone are sent to Sydney from the celebrated Trachyte quarries. The Gib, 2,800 feet high, the finest cliff on the southern line, is within the municipality. Macquarie Pass, the Belmore, Fitzroy, and other falls, are within easy access of the town. Newspapers: *Bowral Free Press* and *Southern Mail*.

BOWRAVILLE (30° 40′ S. lat., 152° 58′ E. long.), a Government township, about 20 miles from Nambucca heads, and 362 miles N. of Sydney, in the electorate of Raleigh, contains Presbyterian and Roman Catholic churches, post, telegraphic, money-order, and Government savings bank facilities, public school, three stores, two hotels. Antimony is found in small quantities in the district Population, 200.

BRAIDWOOD (35° 30′ S. lat., 149° 47′ E. long.), the name of a town and district, being in the county of St. Vincent, electorate of Braidwood, and its chief town adjoining the counties of Argyle and Murray on the West and North-West, and the county of Camden on the North, extending to the sea on the East, and on the South being bounded by the county of Dampier. Communication with Sydney is by coach to Tarago, 28 miles distant, thence by the Great Southern Railway, coach, fare 5s., return 7s. 6d. Coaches also run to Araluen, Major's Creek, Nelligen and Moruya. There are eight hotels, the principal being the Commercial, Albion, Royal, and Court House. Other towns in the district are Araluen, Major's Creek, Monga, Mongarlow, Nerriga, Jembaicumbene. Braidwood is on the Jillimatong creek, and has money-order, telegraph, and savings bank facilities, is 181 miles to the SSW. of Sydney, and is situated 3,357 feet above the sea-level. It contains 7 stores, 2 tanneries, 2 coach factories, 4 boot factories, 1 flour mill, and other places of business. Fire brigade has a fire engine, hose cart and 580 feet hose. Water from tanks and wells. The public buildings comprise a court-house, gaol, police barracks, hospital, Benevolent Society, St. Andrew's church, St. Bede's, the Wesleyan and Presbyterian chapels, and Salvation Army barracks. The public school has an average attendance of 180; a convent school, average attendance 80. Banks: New South Wales, City, and Commercial; there is a literary institute with 6,000 vols; also G.U.O.O.F. and I.O.O.F. lodges. The district is rich in its native forest, and is within 29 miles of railway communication; the timber trade is very extensive, as the whole of the Southern towns of New South Wales will be the most readily supplied from it. Dairying is also largely carried on, there being a co-operative butter factory in Braidwood, and creameries throughout the district. As a mining centre the district is one of the oldest in the colony, the gold returns for 1899 being 54 ozs., valued at £200. The district was incorporated in 1891, with 11¾ miles of streets and ratable property of the annual value of £8,360. There are about 13,395 acres under cultivation in the county, the produce being wheat, maize, barley, oats, potatoes, and wine. Stock returns 1899: 3,716 horses, 27,012 cattle, 77,353 sheep; area, 446,162 acres; dairy produce: butter, cheese, bacon and hams. The population of the municipality is about 1500; of district 8,000. Newspapers: *Braidwood Dispatch* and *Braidwood Express*.

BRANXTON (32° 38′ S. lat., 151° 21′ E. long.), a postal, money-order, telegraph, and Government savings bank township, about half a mile from the railway station, in the county of Northumberland, electoral district of Singleton, and police district of Maitland, on the Anvil creek and main Northern road, 134 miles N. of Sydney, the communication with which is by rail. Fares to Newcastle (35 miles), 4s. 6d. and 2s. 9d.; or direct to Sydney, 17s. and 10s 9d. Hotels: Commercial and Federal. There are large deposits of coal of superior quality around the town. The district is principally occupied by farmers, graziers, and vignerons. There are Oddfellows' lodge, one public school, Roman Catholic church and convent, with Presbyterian, Episcopal, and Wesleyan churches, also a Catholic Apostolic Church. The Anglican church is a neat brick building, erected at a cost of £1,500. The Mechanics' Institute has a library of 1,000 vols., and a large hall. Good shooting in the district. Petty Sessions held at Branxton and Greta on alternate Thursdays. Population, 650; of the district, 1,400.

BREEZA (31° 15′ S. lat., 150° 29′ E. long.), a small township, with post, telegraph, money-order office, Government savings bank, and railway station, on the Mooki river, 269 miles N. of Sydney, and 32 miles WSW. from Tamworth. It is in the county of Pottinger, police district of Gunnedah, electorate of Quirindi, and stands 951 feet above sea-level. It is connected with Newcastle (170 miles SE.) by rail, being a station on the North-West Extension from Werris Creek; fares from Newcastle, 33s. 6d., 22s. 3d., or direct from Sydney, 45s. 6d. and 30s. There is hotel, public school, with an average attendance of 40 scholars. Anglican and Roman Catholic churches, and three stores. The district is principally occupied by runs, though numerous selectors have settled here. Population about 200.

BREWARRINA (30° 3′ S. lat., 146° 56′ E. long.), a postal, telegraph, savings bank and money-order township, on the southern bank of the river Barwon (Darling), county of Clyde, and police district of Brewarrina, electorate of The Barwon, 516 miles NW. from Sydney, and about 60 miles E. from Bourke. Communication with Sydney is by coach to Byrock, 60 miles, daily, thence rail; a railway from Byrock to Brewarrina has been constructed. Steamers run, when the river is high enough, to various parts. Hotels: Sportsman's Arms, Royal, Exchange, Telegraph and The Barwon. Banks: Commercial, New South Wales and Australian Joint-Stock Bank. Roman Catholic school church; and Episcopal church (Christ church), which will seat 200. There are three large stores, court-house, police barracks, School of Arts, with 700 vols., hospital, capable of accommodating ten indoor patients, public school with average attendance of 90, and convent school. Stock returns 1899: 2,935 horses, 4,698 cattle, 655,909 sheep; area, 3,517,004 acres. A handsome iron bridge crosses the Barwon here, by way of which a deal of Queensland traffic comes. Population of township, 600; of district, 3,100. Local newspaper: *Brewarrina Times*, published weekly.

BREWONGLE (late Macquarie Plains) (33° 27′ S. lat., 149° 45′ E. long.), a post town, telegraph, money-order and railway (with telephone) station, on the western side of the Blue Mountains, at an elevation of 2,473 feet above sea level, 135 miles W. of Sydney, electorate of Macquarie, and within a short distance of Bathurst, in which police district it is. Fares, 26s. 9d. and 18s. It contains public school, the latter with an average attendance of 20, and Anglican and Roman Catholic churches. The district is alluvial, and admirably adapted for wheat and maize cropping. Population, 150.

BRISBANE WATER (33° 30′ S. lat., 151° 23′ E. long.), an arm of the sea, on the north side of Broken Bay, in the electorate of Northumberland, the principal town being Gosford, which is situated at the north end of the large lake-like sheet of water. Direct railway communication is now established with Sydney. The country is very broken. Population 2,650.

BROADWATER, a township in the county and electorate of Richmond, and police district of Lismore, situated 342 miles N. of Sydney, with postal, money-order office, telegraphic station and savings bank facilities. Mode of conveyance steamer direct, three times a week, or coach *viâ* Woodburn and Harwood Island, thence steamer, or rail to Tenterfield, coach to Lismore, and steamer to Broadwater. There are four hotels, public school, average attendance 130, a Union and Roman Catholic church, several stores, and a population of about 1,300, the Colonial Sugar Company's Mills, employing about 700 hands. Geological formation, sandstone.

BROKE (32° 45′ S. lat., 151° 12′ E. long.), a post town, in the county of Northumberland, electorate of Singleton, and police district of Jerry's plains, situated on the Wollombi Brook, with money-order and telegraph office, 157 miles N. of Sydney, having one store, public school with average attendance of 31 scholars, two places of worship. Nearest railway stations, Singleton or Whittingham, 35 and 12 miles distant respectively. Population 150.

BROKEN HILL (30° 58′ 13″ S. lat., 141° 20′ 32″ E. long.), about 925 miles W. of Sydney, county of Yancowinna, parish of Picton, in the electorates of Alma, Broken Hill, and Sturt, and police district of Broken Hill, with postal, telegraph, money-order and Government savings bank facilities. The district is the principal silver mining centre of Australia, one (the Proprietary) being the most prolific silver mine in the world. The mine is worked day and night in three "shifts," with its concentrating, amalgamating, leaching, and refining plants always going; it employs over 3,000 hands (smelting and refining works at Point Pirie). The lode has been proved through the three forty-acre blocks, the width varying from 10 feet to 100 feet, with an almost unlimited supply of ore. The manager receives a salary of £4,000 per annum. The Barrier mines provide employment for over 7,000 men, and the monthly extraction of ore amounts to about 103,000 tons, producing approximately 200,000 tons of lead per annum—equal to about 27 per cent. of the whole production of lead in the world. The Proprietary mine alone has to date produced over 2,800 tons of fine silver. The capital at stake in the mining industry of the Barrier has been computed at £5,000,000, and the dividends earned to date total over £11,000,000 (over £9,000,000 has been paid by the Proprietary alone). Wages paid per month amount to £50,000, stores and supplies cost £48,000, and carriage by railway only £40,000 per month. Stores and supplies are drawn practically from every part of the world. Coke comes from Germany and New South Wales, sulphur from Sicily, and other chemicals from England; iron from Scotland, timber from America, and salt from Snowtown. The profitable treatment of the sulphide ores had presented one of the most complicated questions ever submitted to metallurgical experts, and the solution of the problem had been practically completed at Broken Hill. The principal mines at work on the Broken Hill lode are: the Proprietary, Block 14, Block 10, British, South, Broken Hill Junction, North, Junction North, and Consols. The value of the minerals exported during the half-year ended June 30th, 1899, was:—Silver lead carbonates, £14,958; silver lead sulphide, £20,317; copper ore, £845; zinc concentrates, £12,022; lead chlorides, £10,213: total exports of the Barrier for the half-year being £805,530. Silver ores (crude), £128,819; silver (concentrates), £551,803; silver (slimes), £15,387. Numerous small claims outside the town continue to yield fair results to prospectors and tributors. There is no longer any difficulty about water, a plentiful supply for all purposes being obtainable from the Stephen's Creek reservoir, with 1,300,000 gallons; pressure in mains, 45 lb. to square inch. Gold is found associated with the silver; and there are fairly good copper lodes in the district. The principal hotels are: Freemasons, Grand, Palace, Australian Club, Denver City, Royal Exchange, Royal, Tattersall's, Duke of Cornwall, Oriental, Theatre Royal, and Commercial. There are a large number of stores, a court-house, hospital, gaol, post and telegraph office, town hall (cost £16,000), technical college, five public schools, denominational and private schools. The religious orders represented are Episcopalian (2), Roman Catholic (6), Wesleyan (4), Congregational (5), Baptist (3), Presbyterian (1), Bible Christian (4), Primitive Methodist (3), and Salvation Army. The town is lighted by gas and electricity. The district is incorporated, with 125 miles of roads and streets, and ratable property of the annual value of £206,290. Broken Hill is reached by rail from Sydney, *viâ* Melbourne and Adelaide (fares 174s. 9d. and 115s. 6d.), or by rail to Cobar, thence coach, *viâ* Wilcannia. Population of district about 24,000. There is a fire brigade, with 2 manual and 1 fire-engine, 2 reels, 1 hose-cart, and 2,000 feet hose, with a branch brigade at Alma; branches of the Banks of Australasia, Union, London of Australia, New South Wales and National, a Mechanics' Institute and free public library, a Technological Museum, Masonic hall, theatre and music-hall, and several small halls. Friendly societies are well represented, the Foresters, Grand United Oddfellows, Manchester Unity Oddfellows, Druids, Rechabites, American Order Oddfellows, and other societies having lodges. There are three racing clubs with two courses, also a pony and trotting club, besides a public recreation ground known as the Oval, managed by trustees. Broken Hill is also the centre of one of the largest pastoral districts in Australia, and contains an important agricultural and pastoral association. Newspapers: *Barrier Miner*, daily; *Truth*, weekly.

BROOKLYN (33° 30′ S. lat., 151° 15′ E. long.), a post town, with money-order, savings bank, and telegraph and telephonic facilities, in the electorate of Willoughby and county of Cumberland, on the Great Northern Railway, 36 miles from Sydney, situated on the banks of the Hawkesbury river. The climate is mild, and the township is well sheltered. The scenery is very picturesque, beautiful views being obtainable from the hills; there is good shooting in winter and fishing in summer. Has public school, police-station, and two hotels, Anglican church, and detachment Australian Rifles. The fishing industry is carried on here to a large extent. Geological formation: sandstone, also coal at a great depth; water from wells and tanks. Population, 400 to 500.

BRUNSWICK (153° 30′ S. lat., 28° 30′ E. long.), an agricultural and pastoral township, situated on the river of the same name, 402 miles N. of Sydney, with postal, money-order, telegraphic and savings bank facilities, in the county of Rous, electorate of the Tweed, and police district of Tweed; communication is by steamer direct, or coach to the Billinudgee railway station, rail to Lismore, coach to Tenterfield, thence rail to Sydney; coach also runs to Murwillumbah. Population, about 20. Geological formation: granite, sandstone and basalt.

BRUSHGROVE (29° 32′ S. lat., and 153° 9′ E. long.), a post town, with telegraph station, savings bank, and money-order office, in the county of Clarence, electoral district of the Clarence, situated on the River Clarence, at the upper apex of Woodford Island, about 360 miles (338 postal) N. of Sydney, the route to which is by Grafton steamer, or rail to Glen Innes, coach to Grafton, thence steamer. There is one hotel, School of Arts, G.U.O.O.F., Wesleyan and Presbyterian churches, police-station, and two stores. On the south side of the South Arm is Cowper, which *see*. Population about 250.

BUCKLEY'S CROSSING PLACE (36° 28′ S. lat., 148° 53′ E. long.), a postal and money-order township, with telephone exchange, 296 miles S. of Sydney, situated on the Snowy river, on the road from Cooma to Gippsland, in the electorate of Manaro, co. Wallace. The route from Sydney is rail to

Cooma Railway Station, thence 32 miles by coach three times a week. It has a court-house, police barracks, two hotels, two stores, Anglican and R.C. churches, and a public school. Numerous lakes within easy distance, with plenty of wild-fowl. The Snowy river is stocked with English trout. There are 30,000 acres of good agricultural land in the district, principally utilized for wheat-growing and grazing. Population, with vicinity, about 300.

BULLAH-DELAH (32° 30′ S. lat., 152° E. long.), a postal village, with money-order, telegraph office and savings bank, in the county and electorate of Gloucester, situated on the Myall river, near the head of navigation, 155 miles N. of Sydney. Communication is by steamer or coach daily from Hexham Railway Station, 50 miles distant. Coach also runs to Booral, Raymond Terrace, Coolongolook, Bungwahl. There is a public school, with an average attendance of 60, Anglican and R.C. churches, seven stores, two public-houses, saw-mills, court-house, police-station, and School of Arts Hall and Oddfellows' lodge. The district is mainly supported by the timber trade, the formation being volcano. During 1899 the Australian Alum Company raised 921 tons of alumite, valued at £2,763. Alum Mountain and Myall Lakes (beautiful sheets of water teeming with fish and wild-fowl) are in the district. Population of district, 2,000.

BULLI (34° 9′ S. lat., 150° 29′ E. long.), a police and postal township, with two telegraph stations, money-order office, railway station, and Government savings bank, picturesquely situated between the Illawarra mountains and the coast, about 7 miles N. of Wollongong, and 59 miles (40 direct) S. of Sydney, the coast road from which city passes through the village. There are several hotels. It is in the county of Camden, police district of Wollongong, and electorate of Woronora. It is the headquarters of the Bulli Mining Company, whose mine is on the side of the mountain, about 400 feet above sea level, worked by an adit or tunnel, and at present the tunnel is about two miles long, the coal being taken by railway locomotives to the jetty, about 1½ mile distant. This jetty is 625 feet in length, is lit with electricity, and is built out into the open sea, where ships of considerable draught of water are easily and quickly loaded. A fleet of steam colliers takes the coal to Sydney, Melbourne, and Brisbane. There are also several other collieries in the district, employing altogether about 262 hands; the total output for 1899 being 96,126 tons, valued at £28,838. Places of worship are Wesleyan, R.C., Presbyterian, Church of England, and Primitive Methodist; public park and coke works: a school of arts, with a library of 300 volumes; Oddfellows' hall, two public schools average attendance 400, and a convent. Bank: English and Scottish; Foresters' Society, Sons of Temperance, Protestant Alliance, Oddfellows, Druids, and Good Templars. The communication is by rail direct, fare 6s. 2d. and 4s. 4d., and 7s. 11d. and 5s. 2d. return, or by the Wollongong steamer, thence by coach. The land is principally held by free selectors. Formation: sandstone and carboniferous. There is a platform of wood (Weber's look-out) on the top of the mountain (1,500 feet high), from which one of the grandest panoramic views in Australia can be obtained. Bulli Pass and Loddon Falls in the district. Geological formation: carboniferous sandstone. Thirroul, 1 mile north of Bulli, is a rising village, with post office, railway platform, one hotel, public school, and several small stores. It forms the connecting link between Bulli and North Bulli. Population 2,500. Local newspaper: *Bulli Times* (weekly).

BUNDANOON (34° 25′ S. lat., 150° 26′ E. long.), a railway station on the southern line, situated 2,202 feet above sea-level, in the county of Camden, electoral district of Bowral and police district of Berrima, 95 miles SW. from Sydney; fares, 18s. 6d. and 12s. 2d. It is a post town, with telegraph, money-order, and savings bank office, three stores, three places of worship, and a public school, average attendance 75. Formation: sandstone; two quarries are at work, also a coal mine turning out about 70 tons weekly. Splendid timber is obtainable in the forests that clothe the gullies. The scenery is wild and romantic, pronounced to be equal to the Blue Mountain scenery, within twenty minutes' walk from the station. There are ten excellent houses of accommodation, and a large hotel. Population, 400.

BUNDARRA (30° 9′ S. lat., 151° 8′ E. long.), a postal township, with Government savings bank, money-order and telegraph office on the Gwydir or Bundarra river, 393 miles N. of Sydney, in the county of Hardinge, electorate of Bingara, and police district of Armidale. The nearest places of importance are Inverell, about 30 miles N., and Armidale, 60 miles SE. The metropolis is reached by coach to Uralla, distant 50 miles; thence railway. The hotels are: Commercial, Telegraph, and Royal. Bundarra is situated in a valley of considerable extent and of great fertility. Bank: Joint-Stock. Churches: Episcopal and Roman Catholic. School of Arts. Public school, average attendance 70; court-house and lock-up. Formation: basalt and trap, basin, surrounded by granite. Within a short distance of Bundarra are the flourishing tin mines of Tingha. Population about 350 within a two miles' radius.

BUNGENDORE (35° 17′ S. lat., 149° 30′ E. long.), a small but thriving township, with telegraph, savings bank, money-order office and railway station, in the county of Murray, electorate of Queanbeyan, on the Turalla creek, 177 miles SE. of Sydney, about 17 miles from Queenbeyan, and 43 miles from Goulburn; fares from Sydney, 35s. and 23s. 6d. Hotels: Royal, Lake George, Carrington and Commercial. There are Church of England, Roman Catholic and Presbyterian places of worship in the town, a public school, average attendance 60, and a convent school, branch of N.S. Wales Bank, a court house, police barracks, lock-up, temperance hall, and a large flour mill and a creamery. The district is taken up by farms and stations, the soil being well suited both for tillage and grazing. Within three or four miles from the township lies Lake George, the largest and most picturesque inland lake in Australia. A court of petty sessions is held second Monday in each month. Coaches run daily between Bungendore and Captain's Flat (fare, 10s.), a rising copper mining township of 600 inhabitants, 27 miles distant. The principal hotels at Captain's Flat are Silver Age and Captain's Flat. Population about 700. Geological formation, granite and schist.

BURRAWANG (34° 22′ S. lat., 150° 33′ E. long.), a post town, with money-order office, savings bank and telegraph station, 96 miles S. of Sydney, in the police district of Berrima, and electorate of Kiama; mode of conveyance, coach every night at 9, to Moss Vale, 10 miles distant, thence rail to Sydney; it is situated on the Wingecarribee river. Hotels: Burrawang Club House, and Commercial. There is a branch of the English and Scottish Bank, police station, good boarding house, also a public school, with average attendance of 60, Oddfellows' hall, and Protestant hall. Places of worship: Episcopalian, Presbyterian, and Roman Catholic. The produce of the district is principally dairy farming. Fitzroy and Belmore Falls in the district. Population of district about 1,000.

BURROWA, or Boorrowa (34° 30′ S. lat., 148° 45′ E. long.), is a township in the county of King, on the main road from Yass (about 38 miles from Yass) to Young, and the right bank of the Burrowa river. The communication with Sydney, from which it is about 222 miles distant SW., is by coach to Binalong, 18 miles, thence by rail. The town is well laid out, with wide streets running at right angles. Hotels are the Harp of Erin, Courthouse, Royal Standard, Royal, Commercial, and Queen's Arms. The N.S. Wales and Commercial and Union Banks. have branches here. Places of worship: Episcopal, Presbyterian, Wesleyan and Roman Catholic. There is also a public school, average attendance 47, a R.C. convent school and a ladies' school. A number of farms are in the immediate vicinity of the town, and the breadth of land under cultivation is yearly increasing, the soil being well adapted for agricultural operations. One steam flour mill is supported. The principal produce of the district is wheat, maize, barley, oats, rye, potatoes, wine, butter, cheese, and bacon and hams. The district is also a pastoral one. Burrowa is a place of Petty Sessions, District Court, and Quarter Sessions, has a post, money-order, savings bank, telegraph station, mechanics' institute, with about 400 volumes, and Pastoral and Agricultural Association. Formation: limestone and slate. Population of town and vicinity number 5,000 persons; in the town are 730 residents. The municipality has ratable property of the annual value of £7,550. The local newspapers are the *Burrowa News* and the *Burrowa Times*.

BURWOOD (33° 52′ S. lat., 151° 7′ E. long.), a suburban electorate and railway station on the Great Southern line, 7 miles W. of Sydney; fares, 8d. and 6d. Hotels: Sharland's, Mitchell's, Bryant's, Ireland's, and Bath Arms. Many of the merchants and superior tradesmen of the city have their residences here. Burwood was proclaimed a municipality March 27, 1874. It has 31 miles of roads, ratable property of the annual value of £75,550, a money-order, telegraph, and savings bank office; public school, with an average attendance of 800; a branch of the A.J.S. Bank, and bank of N.S. Wales, school of arts with 5,000 vols., Masonic, Oddfellows', and other social institutions. Churches: Presbyterian, Wesleyan, Church of England, Congregational, Baptist, Salvation Army, and Roman Catholic. Court of Petty Sessions held thrice weekly. The suburb is lighted by gas, and connected with the Prospect Water Supply. The population is 7,000. Local newspaper: *The Australian Courier*.

BYROCK (30° 15 S. lat., 146° 15′ E. long.), a railway station, county of Cowper, electorate of Cobar, and police district of Bourke, on the western line from Sydney to Bourke, 455 miles W. of the metropolis, and about 50 miles from Bourke; fares from Sydney 78s. 6d. and 53s. 0d. (It is the junction to Brewarrina—a new line.) Hotels: Royal and Carriers' Arms It has a post, telegraph, money-order office, savings bank, police barracks, court-house; also two large stores and a public school, with average attendance 50. R.C. church. Water from large Government tank. Geological formation, granite and quartz ridges. Pastoral district. Population about 300.

BYRON BAY (between 28° and 29° S. lat., and 153° and 154° E. long), a post town with money-order, savings bank and telegraphic facilities, and railway station, in the police district of Lismore, electorate of the Tweed, county of Rous, 345 miles N. of Sydney, communication by steamer twice a week. It contains branches of the Australian Joint-Stock and E.S. and A.C. Banks, public school, with an average attendance of 48, police-station, a school of arts, two hotels, and three general stores. Principal industries, beach-mining, cane-growing, and dairying. A large creamery is located here, over a ton of butter being made daily, the bulk of which is exported. Geological formation: basaltic. Population, township 250, inclusive of surrounding district, 1,100.

CAMBEWARRA (34° 40′ S. lat., 150° 33′ E. long.), a post town, with money-order, telephone office and savings bank, in the county of Camden, police and electoral district of Shoalhaven, on the road from Shoalhaven to Moss Vale, 114 miles S. of Sydney, situated on the Good Dog Creek. It has two hotels—the Royal and Cambewarra; 2 public schools, average attendance 100; a Union church, and a school of arts, with 100 vols., three stores and one tannery. Nowra is the nearest railway station, and is reached by coach. Formation—freestone, with various strata of limestone, coal, &c. Agricultural and dairying. Population, 400.

CAMDEN (34° 1′ S.lat., 150° 44′ E. long.) (county and electorate of Camden), one of the oldest places in the colony, is located in

the centre of a district advantageously suited for vine and general fruit culture, and the orchards have reached as high a standard of excellence as any in Australia. It lies on the left bank of the River Nepean (or Cowpasture), the main southern road passing through the village, and has a post, telegraph and money-order office, and Government savings bank, with telephone to The Oaks and Narellan. Camden is distant from Sydney 41 miles SW., communication being by tramway to Campbelltown, 8 miles distant, thence by railway; fares, 5s. 8d. and 3s. 6d. Hotels: Camden, Crown, Commercial, and Plough and Harrow. The pleasing character of the country, coupled with its great agricultural advantages, early led to its settlement. Much land is devoted to the growth of fruit. The principal vineyards are those at the Camden Park Estate, Limited, where the foundation of Australia's wool trade was laid. The Church of England, Roman Catholic, Primitive Methodist, and Wesleyan bodies have places of worship, and there is a public school, average attendance 180, Roman Catholic convent school, and Carrington convalescent hospital, erected on ground presented by the late Mr. W. H. Paling, and endowed by him to the extent of £10,000; a boys' home, court-house, lock-up, school of arts (with 2,000 vols.), Temperance hall, Order of Foresters' lodge, Masonic lodge, agricultural and horticultural society, Sons of Temperance lodge, Band of Hope lodges; branches of N.S. Wales and Commercial Banks, seven stores, a farm and produce market, three flourishing creameries, butter factory and refrigerating works at Menangle. Of late years farmers have turned their attention mostly to dairying, great quantities of milk and butter being sent daily to Sydney. Produce of the district, wheat, maize, barley, oats, rye, potatoes, wine, oranges, brandy, butter, bacon, cheese. The water supply is under the Water and Sewerage Board, Sydney, receiving supply from metropolitan mains. There is a Sanatorium Hotel at The Oaks, whence journeys are made to the famed Burragorang Valley and adjacent caves. Formation: alluvial and Wainamatta shale. The population of the township, 1,600. The municipality has ratable property of the annual value of £11,230. Newspaper: the *Camden News*.

CAMDEN HAVEN. *See* LAURIETON.

CAMPBELLTOWN (34° 5′ S. lat., 150° 50′ E. long.) is another of the early settlements of the colony, situate 210 feet above sea-level, in the county of Cumberland, in electoral district of Camden. It is connected with Sydney, 34 miles SW. by the Great Southern line of railway; fares, 4s. 2d. and 2s. 6d. Coach leaves for Appin every evening (except Sundays) at 7 P.M., fare, 2s. 2d., and tram for Narellan and Camden. Hotels: Royal, Forbes, Railway Hotel, Jolly Miller and Club. It has a post and money-order office, Government savings bank, and telegraph station. George's river runs about 2 miles distant. The township comprises a court-house, gaol, watch-house, and other Government buildings, New South Wales and Commercial Banks, a town hall, large public school, average attendance 120, a business college, two convents and several private schools, places of worship—Church of England (St. Peter's), Presbyterian, Congregational, Roman Catholic, and Wesleyan. Water is derived from the S.W.S. Canal, 3 miles distant. The country surrounding Campbelltown is principally of an agricultural character. Large quantities of hay are grown, and dairy farming is now largely carried on. Campbelltown is noted for the salubrity of its climate, and the consequent longevity of its inhabitants. The town and district was formed into a municipality in February, 1882. There are 53 miles of streets, and ratable property to the annual value of £12,310. The population is estimated at 2,000. Local newspaper: *Campbelltown Herald*, published Wednesday.

CAMPERDOWN (33° 54′ S. lat., 151° 7′ E. long.), a western suburb of Sydney, and a municipality, with post, telegraph, money-order office, and savings bank, in the county of Cumberland, electorate of Camperdown, and police district of Newtown, 3 miles W. of the city, on the Parramatta road. Omnibuses run to and fro every six minutes; fare, 2d.; also tramway communication. There are several important works and factories within the boundaries, which give employment to a number of hands, including Fowler's pottery, several soap manufactories, Simpson's foundry, saw mills, and other works, &c. The Sydney University and the colleges of St. Paul, St. Andrew, St. John and Moore College are also in the municipality. Public school, with average attendance 600; also a Roman Catholic Denominational school, average attendance about 200, and the Prince Alfred Hospital, accommodating about 200 indoor patients. There are five churches—Episcopalian, Congregational, Wesleyan, Presbyterian and Roman Catholic; about fifteen hotels. The suburb is lighted by gas, connected with the Prospect Water Supply, and was proclaimed a municipality Nov. 13, 1862. It has 14 miles of roads, and ratable property of the annual value of £40,550. Population, 7,200.

CANDELO (36° 45′ S. lat., 149° 40′ E. long.), a post town, with money-order and telegraph office and savings bank, 343 miles S. of Sydney, and 15 miles SW. of Bega, is situated on a creek of the same name on the Monaro road, in the electoral district of Bega. It has three hotels (Candelo, Queen's, and Royal), a public school (average attendance 70), two places of worship (Roman Catholic and Church of England), both occupying commanding sites overlooking the township. There is also an Episcopal church at Kameruka, two miles distant. There is a School of Arts (with about 1,500 vols.), Protestant Hall, and branch of Commercial Bank, an Agricultural and Pastoral Society, Jockey Club, Coursing Club, and several other flourishing societies in the town. Communication with Sydney, *viâ* Tathra, by steamer twice a week, and six times a week *viâ* Cooma, the nearest railway station, distant 76 miles. The town is situated in the heart of the wealthy county of Auckland, and in the centre of perhaps the most important dairying district in N.S. Wales. The cheese and butter from this district have now become famous for flavour and texture. Shipping ports for goods, Merimbula or Eden; passengers chiefly come *viâ* Tathra. I.S.N. Company's steamers travel twice each week to these ports. The population of the town is about 500, but in the district it is rapidly increasing. Local newspaper: *Candelo and Eden Union*.

CANNONBAR (31° 20′ S. lat., 147° 17′ E. long.), a postal, telegraph, savings bank, and money-order station, situated on Duck creek, 330 miles (393 postal) NW. of Sydney. It is in the county of Gregory, electorate of Cobar, and police district of Dubbo. A coach runs to Nyngan, the nearest railway station, twice a week. There is one hotel (Commercial), court-house, police barracks, and post and telegraph office. The district is almost entirely pastoral, sheep being more extensively reared than cattle or horses. Stock returns, 1899: 3,932 horses, 15,518 cattle, 748,744; sheep area 2,666,937 acres. It is at times subject to both floods and droughts. Population, about 150.

CANOWINDRA (33° 36′ S. lat., 148° 44′ E. long.), a township on the N. bank of the Belabula river, in the police district of Cowra, and electorate of Cowra, distant from Cowra 20 miles, from Forbes 45, from Orange 41, and from Sydney 217 miles W. Inns: Clyburn's, Victoria, Dawes, and Collis. Has post-office, savings bank money-order office, telegraph station, and a branch of the Commercial Bank. A fine wooden bridge spans the Belabula. Rich agricultural, pastoral, and mining country; a very large extent alienated. Churches: Episcopal and Roman Catholic. Public school (average attendance 100), court-house, school of art, and 3 stores; steam flour mill, and one saw mill in the vicinity. Court of Petty Sessions second Wednesday in each month. Mails to Orange, Cowra and Mandurama three times a week, and Woodstock daily. Woodstock is the nearest railway station, 19 miles distant. Formation: silurian, intersected with granite dykes (gold and copper). Population of town, 400; of district, 600.

CANTERBURY (33° 53′ S. lat., 151° 8′ E. long.), a postal and municipal district, with railway station (fares 7d. and 5d.), money-order office, and telegraph station, and savings bank, in the county of Cumberland, electorate of Canterbury, and police district of Newtown, situated on Cook's River, 6 miles S. of Sydney. Principal hotels are the Wheat Sheaf, Rising Sun, and St. George; three public schools, several private seminaries, also two Episcopalian, two Presbyterian, and three Wesleyan places of worship, a race-course, engineering works, a tannery, several brick yards and other factories, a permanent water supply and a free public library with 800 volumes. The district is incorporated, and has 63¼ miles of streets, with ratable property of the annual value of £21,980, and is lighted by gas and electricity. Population, 3,500.

CAPERTEE (33° 9′ S. lat., 150 2′ E. long.) is a railway station on the line to Mudgee, being 22 miles from the Main Western Line junction at Wallerawang, and 127 miles W. of Sydney, in the electorate of Rylstone, co. Roxburgh; fares, 25s. 3d. and 16s. 9d. Coaches run to Round Swamp, Ilford and Cudgegong, thence to Mudgee, leaving Capertree at 6.30 A.M., Tuesday, Thursday, Saturday; also daily mail and conveyance to Genowlan shale mines, 7 miles distant It lies 2,739 feet above sea-level, and has a post, money-order office and telegraph station, one hotel, police-station, and public school. Formation: sandstone, overlying valuable kerosene shale and coal measures. There are beautiful views of Capertree Valley. Population, about 100.

CAPTAINS FLAT (35° 30 S. lat. 149° 10′ E. long.), a post town, money-order office, telegraph station and Government savings bank, on the Molonglo river, county Murray, police and electoral district of Queanbeyan, 201 miles S. of Sydney, to which communication is by coach to Bungendore, 24 miles, thence rail; coaches also run to Hoskins Town and Molonglo, fare 10s. There is a public school, average attendance 200, court-house, School of Arts, Roman Catholic, Anglican, and Wesleyan churches, 4 hotels: Miners' Arms, Captains Flat, and Silver Age, 4 stores; mining returns for 1899 showed 46,821 tons of copper and 106,000 ozs. of silver · 3,084 ozs. gold. Some extensive mining plant has been erected here, at a cost of about £40,000. During 1899 there was continued activity in the district. The Lake George Proprietary was floated in 1897. Population about 1,000.

CARCOAR (33° 86′ S. lat., 149° 15′ E. long.) is a postal, telegraph, savings bank and money-order township, and railway station on the Blayney-Harden line (fare to Sydney, 34s. 3d. and 22s. 6d), prettily situated in a valley, on the banks of the Belabula river, 150 miles (183 postal) to the W. of Sydney, and about 33 miles from Bathurst, in the county of Bathurst, and electorate of Cowra. Principal hotels are the Victoria, Royal, and Stoke. The river intersects the town, and is spanned by a bridge of commodious width. The district is mainly agricultural, producing wheat, maize, barley, oats, potatoes, rye, tobacco, and wine. Stock returns, 1899: 11,130 horses, 12,182 cattle, 661,102 sheep. Area, 1,057,820 acres. Dairy produce: butter, cheese, bacon and hams. There are alluvial gold-workings at the Forest, and rich reefs at Flyer's Creek, Galley Swamp, Burnt Yards, Mount McDonald, Brown's Creek, and on the "Church and School Estate." 2,438 ozs. of gold obtained in 1899, valued at £9,384. Copper and cobalt are also found in abundance in the district, which is remarkable for the variety of its minerals. Carcoar is the centre of a Municipal district, proclaimed November 11th, 1878, having 17 miles of roads and property of the annual value of £3,200. The more prominent buildings of the town comprise a Roman

Catholic chapel and large convent, a neat rural-looking Church of England, a Presbyterian church, Roman Catholic Presbytery, fine hospital, court-house, post and telegraph office, police quarters, branches of the Commercial and City Banks, school of art with library of 1,000 volumes, steam roller flour mill and Pierce's buildings. Communication is by railway. Public school here (average attendance 80). The population of town, 600, and district numbers about 3,500. Newspaper: *Carcoar Chronicle.*

CARGO (33° 21′ S. lat., 148° 56′ E. long), a township, with telegraph station, savings bank and money-order office, in the county of Ashburnham, electoral district of Molong, pleasantly and healthfully located on the upper sources of Bowman's creek, 215 miles W. of Sydney, and occupying a central position for both agricultural, mining, and pastoral operations, wheat of good quality being the principal product. The communication is by coach to Orange or Cowra, distant 23 or 36 miles respectively, thence by railway. It contains Episcopal and Roman Catholic places of worship, one public school, with average attendance of 50 scholars, convent of St. Joseph, three hotels, five stores, and a steam flour mill. Formation: granite, diorite, and limestone, of which there are vast hills in the immediate vicinity, basalt, and sandstone. Population about 600, residing within a radius of one mile. The water supply is obtained from the Government reservoir.

CARRATHOOL (lat. 34½°, long. 145½°), a post town, money-order, Government savings bank, telephone and telegraph office, and railway station, in the county of Sturt, electorate and police district of Hay, 419 miles SW. of Sydney; railway fares 70s. and 45s. Coaches run to Hillston, 35s., and Gunbar, 15s. There is a public school, average attendance 55, two hotels, Presbyterian church, police barracks, two stores. There is a splendid water supply. Population of town, 200; of district, 3,200 Geological formation, chocolate soil.

CARRINGTON (32° 5′ S. lat., 151° 43′ E. long.), is a suburb or portion of the city of Newcastle, in the electorate of Wickham, lying about a mile W., with postal, telegraph, money-order and Government savings bank facilities. There is an extensive foundry and engineering establishment here, and some of the largest castings undertaken in the colony have been successfully accomplished. There are ten small stores, several inns, Episcopalian, Roman Catholic, Wesleyan and Primitive Methodist places of worship, and a Seamen's Bethel Union. The fire brigade has 2 reels and 1,300 feet hose. A high bridge connects the island with Newcastle; ferry steamers also ply. The public school has an average attendance of 400, also a convent school and police station and lock-up. On the harbour side of the island is the Ballast Dyke, where extensive wharves have been formed; the total wharf frontage is about a mile and a half, on which is erected 14 hydraulic and 3 steam cranes. Ships of the largest tonnage can be berthed here. A branch line connects the wharves along the dyke with the Northern Railway; two steam ferries ply to and from Newcastle. The Wickham and Bullock Island and Hetton coal mines employ about 760 hands, the output for 1899 being 381,918 tons, valued at £129,577. The district is incorporated, with 12 miles of streets, and ratable property of the annual value of £13,475. Water supply from Hunter District Water Supply; pressure, 45 lb. to 65 lb. to square in. Population about 2,500.

CARROLL (31° 0′ S. lat., 153° 27′ E. long.), in the electorate of Gunnedah, is a telegraphic, money-order, and savings bank township, 315 miles N. of Sydney, situated on the Namoi River, the communication being *viâ* Tamworth or Gunnedah, 34 and 12 miles distant respectively. It has two hotels, a public school with an average attendance of 30, one store, and an Anglican church. Population about 200.

CASINO (28° 52′ S. lat., 153° 1′ E. long.), a municipal town in the district of Richmond river, in the county of Rous, electoral district of The Richmond, situated on the head of the Richmond river proper, 90 miles from the port of Ballina (40 by road), and a little above navigation, river steamers carrying goods to within about a mile of the town. It is 385 miles N. of Sydney. There are six hotels, the principal being: Commercial, Tattersall's, Royal, Lion, and Great Britain. Casino contains a hospital, an English church and a parsonage, a Roman Catholic church and presbytery, a Presbyterian and Wesleyan church, two public schools (average attendance 207), Roman Catholic convent and high school, court-house, gaol, post-office, telegraph, and money-order office, savings bank, school of arts, with library of 2,500 vols., and a large hall; also branches of the Commercial Bank and Bank of New South Wales, and a Town Hall. A line of coaches runs twice a week to Lawrence, 54 miles distant on the Clarence, from which there is communication with Sydney by steamship, daily coach from Tenterfield *viâ* Casino and Lismore to Ballina; a bi-weekly mail service to Unningar, on the Queensland border, and a daily communication by steamer to Coraki, where the ocean boats are met, and thence to Sydney; also thrice a week to Coraki. District Court is held three times a year; courts of petty sessions fortnightly, and courts of requests every month. The Agricultural, Horticultural and Pastoral Society holds an annual exhibition. The gaol for the Richmond river district is here, with a gaoler and two warders. A high-level timber bridge is over the river, constructed upon the McCallum truss principle; the spans are longer than any other timber bridge built upon that principle in the colony, being 140 feet each. Casino is in the immediate neighbourhood of the large squatting stations celebrated for the excellence of the cattle raised on them, and in the lower district sugar cane is grown with success. The dairying industry is rapidly developing, the N.S.W. Creamery Butter Company having erected a large central butter factory at Casino, and a number of creamery or separating stations in various localities, from whence the cream is delivered to the factory; and large quantities of Richmond River butter are now exported to England and other countries. There is an enormous extent of country available for dairying, and the natural grasses are pronounced the richest for milk production along the coast. Large drafts of fat cattle are sent from the stations to Sydney and elsewhere. Horse breeding is also extensively followed. Many tropical fruits grow well here, also tobacco, cotton, &c. Large quantities of maize are grown and sent to Sydney. Different varieties of excellent hardwood grow in the neighbourhood, and much cedar, pine, and other valuable timber being cut on the creeks at the head of the river. In the neighbourhood of the creeks on the Upper Richmond there are large deposits of coal and antimony of excellent quality, and the Fairfield goldfield, on which 47 out of the 67 elements in mineralogy are known to exist, is about 50 miles distant. Stock returns, 1899: 10,741 horses, 158,088 cattle, 4,301 sheep. Area, 1,984,902 acres. Formation: sandstone, with trap ranges and numerous rich alluvial flats. Casino is the centre of a municipal district, having 22½ miles of roads, with ratable property of the annual value of £8,110. Population, 2,000; with vicinity about 4,500. The *Richmond River Express* newspaper and general printing office (established 1870).

CASSILIS (32° S. lat., 150° E. long.), a post, money-order, telegraph, telephone, and Government savings bank station, in the county of Bligh (electoral district of Rylstone, and North-Eastern police district), 240 miles N. of Sydney, on the right bank of the Munmurra creek. There are in the town about 200 residents; total population of district, 1,384. Coach to Muswellbrook, 75 miles, or to Mudgee 50 miles, thence by rail to the metropolis. Hotels: Royal and Cassilis; an Episcopal church and R.C. chapel, a court-house, lands office, public hall, public school, average attendance 52, police barracks, lock-up, and five stores. The district is a pastoral one, consisting of high and broken country. Formation: decomposed basalt. Estimated population about 200.

CASTLE HILL (lat. 33° 40′ S., long. 15° 4′ E.), a post town with telegraphic facilities, in the county of Cumberland, electorate of Sherbrooke, 20 miles W. of Sydney. Conveyance, coach to Parramatta, 6 miles distant, thence rail; coaches also run to Dural and Galston. There is a public school, average attendance 70, Episcopalian church, 1 store, and a population of about 500, engaged principally in fruit-growing.

CASTLEREAGH (33° 42′ S. lat., 150° 43′ E. long.), a post town, on the right bank of the Nepean river, in the county of Cumberland, electorate of the Nepean, 40 miles W. by N. of Sydney. A good road leads from the township to the Penrith railway station, distance 7 miles S. In Castlereagh are Wesleyan and Episcopal places of worship, and two public schools, with average attendance of 75 scholars. The surrounding land is mostly composed of alluvial deposit, and meets well the requirements of the farmer and grazier. The district was incorporated in 1895, and has ratable property of the annual value of £3,210. Population of municipality, about 1,000.

CATHCART (36° 52′ S. lat., 149° 27′ E. long.), a post and telegraph township, with telephone station, savings bank, and office for the issue of postal notes, in the county of Wellesley, police district of Bombala, and electoral district of Eden-Bombala, 301 miles S. of Sydney, located on Badgery's Swamp. Coaches to Eden, or Merimbula, about 40 miles E., steamer or coach to Cooma, thence by train, are the means of reaching the metropolis. Cooma is the nearest railway station, distant 54 miles. It contains two hotels—the Victoria and Federal—Roman Catholic and Union churches, one school, average attendance, 42; and a School of Arts, with 400 vols. Formation: basaltic trap. The land is adapted for pastoral and agricultural pursuits. With vicinity, the estimated population is 300.

CESSNOCK (32° 16′ S. lat., 151° 15′ E. long.), a post town, with money-order office and telephone station, situated on Black Creek, a tributary of the Hunter river, in the county of Northumberland, police district of Wollombi, and electorate of West Maitland, distant 136 miles N. of Sydney. The nearest railway station is Allandale, 10 miles away. Coaches run to West Maitland six times a week. There is one public school, with an enrolment of about 40, a convent school, Anglican and Roman Catholic churches, police station, court house, one hotel, a saw-mill, and several general stores. Grape vines are extensively grown here, and wine-making forms an important industry. Maize is also largely cultivated. A large portion of the land is used for grazing purposes. The soil on the flats is of a sandy loam, but some of the hills are of limestone formation. Population, about 300.

CHARLESTOWN, OR **SOUTH WARATAH** (32° 56′ S. lat., 157° 45′ E. long), a mining township, about seven miles from Newcastle, and 101 miles N. of Sydney (electoral district of Kahibah), on the road to Belmont, on the shore of Lake Macquarie. Hotels: the Commercial and Post Office. It is in the locality of the South Waratah Company's coal pit, and is connected with Port Waratah by a private railway, the output of 1899 being 121,052 tons, valued at £36,315. Charlestown has a literary institute (500 vols.), a post-office, with savings bank, telephone and money-order office, six stores, Free Gardeners' lodge and Good Templars, and other buildings, and a public school with average attendance of 205. Services are held regularly by Primitive Methodists. Population 750.

CHATSWORTH ISLAND (29° 23′ S. lat., 153° 25′ E. long.) is one of the several islands at the mouth of the Clarence river, 318 miles N. of Sydney, and 37 miles from Grafton, in the Clarence electorate, with post, telegraph, money order office, and Government savings bank. Communication with Sydney is by the Grafton steamers, twice a week, and there is also daily

communication with Grafton by river steamers, and coach to The Richmond daily. Hotels: Royal and Britannia; one public school, with average attendance of 200 scholars, also a Temperance hall, Anglican and Roman Catholic churches. The soil is fertile, and grows large crops of sugar and maize. There are a number of sugar mills here, employing in the busy season several hundred hands; also a large creamery. The district is also devoted to dairying and mixed farming. Population 800.

CHATSWOOD (35° 48′ S. lat., 151° 15′ E. long.), a post-town with railway station; rail from Milson's Point, fare 6d. and 5d.; from Redfern Park, 2s. 6d. and 1s. 7d.; savings bank, money-order, and telegraphic facilities; in the county of Cumberland, five miles north-west of Sydney. There are three hotels, superior public school, with an average attendance of 500; a pottery and brick works. Congregational, Presbyterian, and Wesleyan churches, G.U.L.O.O.F., M.U.I.O.O.F., Protestant Alliance, and I.O.G.T. Societies; branch Commercial Banking Company. The town is lighted with gas, and has a permanent water supply. The district is agricultural. Population about 2,500. Geological formation: loam, with shale sub-soil, very suitable for fruit-growing.

CLARENCE RIVER HEADS, or YAMBA (29° 25′ S. lat., 153° 23′ E. long.), a post town, with telegraph office, in the county and electorate of Clarence, 300 miles N. of Sydney. It is a customs and also a pilot station. There are two inns, and lock-up and police quarters, and two stores. The Clarence steamers are the means of reaching the metropolis. District pastoral, of sandstone formation. Population, 400.

CLARENCE TOWN (32° 36′ S. lat., 151° 45′ E. long.), a postal township, with telegraph station, Government savings bank and money-order office, in the county and electorate of Durham, on the western bank of the Williams river, at the head of navigation, 140 miles NNE. of Sydney. The means of reaching Sydney is by steamer, three times a week, or by coach daily to West Maitland, 21 miles distant, thence rail. Hotels: Commercial, Crown, and Ship Inn. Two stores. The district in which it is situated is entirely agricultural, the alluvial flats on the banks of the river being specially fertile, and yielding heavy crops of maize and other cereals. Tobacco, too, is cultivated. Places of worship: Church of England and Presbyterian, Wesleyan, Roman Catholic and Baptist chapels. Public buildings: court-house, lock-up, public school, with average attendance of 110 scholars; G.U.O.O.F. and I.O.G.T. lodges, and school of arts, with 1,200 vols. Population 527 persons.

CLARENDON. *See* EURONGILLY.

CLIFTON (34° 11′ S. lat., 151° 0′ E. long.), a mining village, with post and money-order office, telegraph station, savings bank, and railway station, situated about 300ft. above sea-level on the steep cliffs overhanging the ocean at the Coal Cliff, in the county of Cumberland, police district of Wollongong, and electorate of Woronora, distant about 35 miles S., in a direct line, from Sydney, railway fare, 4s. 6d. and 2s. 9d. Messrs. Stuart and Co. own about 7,000 acres of coal land in this locality. The mine is worked by two adits driven in on the seam of coal which is seen "like a broad black band" along the base of the cliffs, about 25ft. above high-water mark, and which a little north of the mine dips into the sea. The seam of coal is 6ft. thick and of excellent quality, for household, smelting, and steam purposes, similar to that worked at Bulli and Wollongong. A timber jetty 500ft. long is erected from the mouth of the mine out into the open sea to a depth of about 20ft. of water at end of jetty. This is one of the boldest and most remarkable undertakings for working a mine to be found in any part of the world. The coal is brought out of the mine, screened on the jetty, and put into steam colliers, it being unsafe for sailing vessels to come so near the bold rocky coast. Two steam colliers are now constantly employed running with coal to Sydney. The South Clifton Coal Mine, half a mile from the township, gives employment to 118 hands, the output for 1899 being 73,997 tons, valued at £16,183. Three hotels—the Scarborough and two others, branch of the English and Scottish Bank, Episcopalian and Roman Catholic churches, a public school, average attendance 100, and school of arts (with 200 vols.); and there is a daily mail to Sydney. The Coal Cliff rises abruptly from the ocean to a perpendicular height of 1,350ft. Excellent fire-clay and a seam of clay band iron ore, 40ft. thick, yielding by assay 24 per cent. of metallic iron, are found in the coal measures north and south of this locality. Population of town and district, 600.

COBAR (32° 25′ S. lat., 145° 50′ E. long.), a municipal post town, telegraph, savings bank, money-order office and railway station, 459 (545 postal) miles W. of Sydney, 360 miles NW. of Orange, and about 98 miles S. from Bourke, in the county of Robinson, and police and electoral district of Cobar. Coach runs to Bourke, Louth, Bulla Bulla, Wilcannia, Euabalong, Mount Hope, Nymagee, Restdown, and Gilgunnia. Hotels: Great Western, Grand, Commercial, Club House, Tattersall's, Court House, Metropolitan, and six others. Bank: Commercial of Sydney. Public school, with average attendance of about 340, convent school, and several private schools, a school of arts with a library of 1,300 volumes. Churches: Episcopalian, Presbyterian of New South Wales, Roman Catholic, and Wesleyan. About 60 miles distant is the Nymagee Copper Mine. The Great Cobar mine is the most important copper mine in the colony; when in full work it employs about 750 men. The deepest shaft is down 660 ft. The mine is now being worked on tribute. Four blast furnaces reduce the ore and turn out about 80 tons of copper per week. The copper contains large percentages of gold and silver, which at times have alone paid the working expenses of the mine. The town is incorporated, but last year a portion applied for separation, with the result that a new municipality named Gladstone has sprung up along the line of reefs. Cobar Council has ratable property to the extent of about £20,000. Up to the present the water supply has been obtained from the Government reservoir, but owing to the rapid growth of the town that supply is inadequate, and a new reservoir is now being constructed. It will hold 250 million gallons of water, be ¾ mile long, have a catchment area of 17 square miles, and cost £2,000. The town is also reticulated. A telephone exchange with 40 connections is now in existence. The district is essentially a mining one, although wool-growing is followed. Gold has been found at Drysdale, the Drysdale Mine having paid 8s. 6d. per £ share during the last eight months. Gold is also found for seven miles from the town. Cobar Gold Mines (a London corporation) has a 100-stamp mill and a cyanide plant at work, treating ore valued at 20s. per ton for total cost of under 10s. Cobar Chesney has a 100-ton concentrating plant at work. This is a Melbourne-owned mine chiefly, and is now entering the producing list. Cobar Occidental is a mine with 40 stamps and cyanide plant, being locally owned and one of the best properties on the field. The lode, which is worked on the open-cut system, is over 80 feet wide. Other mines successfully worked are: Young Australian, Mount Pleasant, Great Western, Great Peak, together with smaller claims on which mills have not yet been erected. The Mount Drysdale Mine, in the early days, paid £28,000 in dividends. At a distance of 25 miles is the Mount Boppy field, on which an English company called the Anglo-Australian Exploration, Ltd., commenced operations this year. A 40-stamp mill and large cyanide plant will be erected. The company is sinking a huge tank. Already about 400 people have assembled, and a small township has sprung up. The Pastures and Stock Act is administered by a local board. A well-managed hospital, capable of accommodating about 20 patients, stands about a mile from the town. Two wards, at a cost of £700, were recently added. The Government buildings are, without exception, of a very primitive class. The streets are lighted with kerosene. The stock returns for 1899 show: 2,115 horses; 4,333 head of cattle; 418,109 sheep; area, 6,441,277 acres. The district abounds in minerals of all kinds, only requiring the introduction of capital to develop them. A successful Pastoral and Agricultural Association is established in Cobar. Capital value of ratable property, £216,000. The social institutions are: a Mechanics' Institute, Free Public Library, Masonic, Oddfellows', and Orange lodges, Good Templars and Rechabites. The extension of the railway from Nyngan to Cobar was opened for traffic in July, 1892. A further extension to Wilcannia and Broken Hill is proposed, being a distance of about 340 miles. Population, municipal district, 3,270. Newspapers: *Cobar and Louth Herald* and *Cobar Leader*.

COBARGO (36° 18′ S. lat., 149° 59′ E. long.), a post town, telegraph station with savings bank, and money-order office, in the county of Dampier, police and electoral district of Bega, situated at the junction of the Wandella and Murrabine creeks, 265 miles S. of Sydney, on the road from Moruya to Bega. There are three places of worship, Episcopal, Roman Catholic, and Union churches, Oddfellows Lodge, Sons of Temperance, Good Templars' hall, school of arts, two hotels—the Cobargo and Post Office, a public school, with average attendance of 90 scholars; a police barracks, five stores, and other places of business. Mimosa bark once formed the chief article of export, and it still furnishes large quantities annually. Dairying, however, is the principal industry, and Cobargo boasts of the possession of the most complete cheese factory in the Colony, if not Australia. The harbour is at Bermagui, about 13 miles distant, with which there is steam communication. The steamer to and from Eden calls for passengers and goods; the metropolis is also reached by coach *viâ* Moruya, Braidwood, and Tarago, thence per train or *viâ* Bega and Cooma service. Doomesday Mountain and Wallaga Lakes in district. Newspaper: *Cobargo Chronicle*. Formation, granite. Population of town, 250; with vicinity, about 800.

COBBORA (32° 4′ S. lat., 149° 28′ E. long.), a post town and telegraph station, with money-order office and savings bank, county Lincoln, police district of Mudgee, electorate of Wellington; situated on the Talbragar river, about 200 road miles NW. of Sydney, to which the mode of conveyance is by coach to Mudgee Railway Station (twice a week), distant 46 miles, fare, 20s., or *viâ* Dubbo. Coaches also run to Wellington, Coonabarabran, and Gilgandra. Hotel: Commercial. There is one store, a Church of England place of worship, public school (average attendance 15), Progress Committee, and police-station; population about 150, engaged in pastoral, mining and agricultural pursuits. Water from wells, tanks, and river. The aboriginal name Cobborah signified "Head Camp." Gold returns for Cobbora division for 1899 were 865 ozs., valued at £3,244.

COCKLE CREEK, a post town and railway station with savings bank, money-order, and telegraphic facilities, situated on an inlet of Lake Macquarie, in the county of Northumberland and electorate of Wallsend (fare to Newcastle, 1s. and 8d.; to Sydney direct, 12s. 6d. and 8s.), ninety-two miles north from Sydney, and ten miles south from Newcastle. It contains two hotels, two public and a private school, and a permanent water supply. There are several collieries Here also have been established extensive silver smelting works owned by the Sulphide Corporation, which afford employment to a large number of workmen. The district is also adapted for fruit growing. The population, which is about 300, is rapidly increasing.

CODRINGTON (28° 59′ S. lat., 153° 13′ E. long.), in the electorate of Richmond, on the Richmond river, in the counties of Rous and Richmond, and police district of Casino, about 4 miles above Coraki, 355 miles (postal) N. of Sydney, has a

post-office, two public schools, average attendance 27, a timber mill, also two sugar mills. The route is *viâ* Lawrence by the Clarence river steamers, also *viâ* Tenterfield and Casino tri-weekly. Population, 140.

COFFS HARBOUR (30° 25′ S. lat., 153° 10′ E. long.), a small post town, situated on the North coast, in the electorate of Raleigh, police district of Macleay River, county of Fitzroy, with money-order, savings bank, and telegraphic facilities, 270 miles N. of Sydney; mode of communication by steamer, direct or *viâ* Grafton. There is one hotel, a public school, and one or two general stores. The district is chiefly agricultural. Population, about 500.

COLLECTOR (34° 55′ S. lat., 149° 32′ E. long.), a postal and money-order township with telephone, in the county of Argyle, and police district of Goulburn, 157 miles SSW. of Sydney. Collector is about 7 miles distant from Lake George, and 10½ miles from Breadalbane railway station, in the electorate of Queanbeyan. The larger buildings in Collector consist of three places of worship—Episcopal, Roman Catholic, and Wesleyan, a public school, with an average attendance of 45 scholars, school of arts, two hotels, a court-house and a police-station. Goulburn is 22 miles distant NE. The district is an agricultural, pastoral, and dairying one. A Court of Petty Sessions and a Small Debts Court are held on the first Friday in each month. Population, 200.

COMO (34° 0′ S. lat., 151° 10′ E. long. a small post town, with commodious railway station, receiving-office, and telegraphic station, in the electoral district of Woronora, county of Cumberland, and Metropolitan police district, 12 miles from Sydney, on the Illawarra line. It is one of the most popular holiday resorts around the metropolis, being situated on the banks of St. George's river, where splendid fishing and shooting are to be obtained. The railway journey from Sydney occupies thirty minutes, fares, 1s. 10d. and 1s. 2d. return. The Como hotel is a fine building, replete with every modern convenience. There are extensive boatsheds, containing upwards of 100 pleasure boats; also a public school. Geological formation: sandstone. Population, about 75.

CONCORD (33° 52′ S. lat., 151° 5′ E. long.), a municipality and a suburb of Sydney, in county of Cumberland, electoral district of Burwood, and police district of Newtown, lying about 9 miles W. on the Parramatta river, having postal, telegraph, money-order, railway and savings bank facilities, two Episcopalian, Congregational and Roman Catholic churches. The majority of the houses are occupied by professional men and others engaged in the city, also by the employees of the Australian Gas Light Company. Two public schools here, also a Roman Catholic, two private schools, three hotels, and a permanent water supply. The district is lighted by gas, and was proclaimed a municipality on August 11, 1883, has 27 miles of roads, and ratable property of the annual value of £21,300; population, 2,500.

CONDOBOLIN (33° 10′ S. lat., 147° 18′ E. long.), in the centre of a large rich pastoral and agricultural district; a post town, railway station, telegraph, savings bank, and money-order station, in the county of Cunningham, police and electoral districts of Condobolin, 328 miles W. of Sydney, situate on the Lachlan river. There is a tri-weekly coach mail to Forbes, 60 miles distant, and a tri-weekly train service from Sydney. Hotels: Commercial, Court House, Condobolin, Royal, Family, Australian, Tattersall's, Albion, and Bridge. There are 2 mills. Churches: Presbyterian, Church of England, and Roman Catholic. The public buildings are the lands office, court-house, police-station, post and telegraph office, school of arts, with 900 vols., large hospital, a public school, with an average attendance of 80 scholars, and a convent. Branches of Freemasons, Oddfellows, Good Templars, Foresters, cricket, tennis and football clubs, also fire brigade with one reel and 400 ft. of hose. Banks: Joint-Stock and Commercial. Jockey Club, Lachlan Amateur Race Club, also a Pastoral and Agricultural Society. Formation: slate, with indications of gold. The district is incorporated, and has 42½ miles of formed streets, lanes and roads, with ratable property of the annual value of £8,780. Water supply from Goobang Creek reservoir, pumped to town reservoir; capacity 33,300 gallons; average pressure, 50 lb. to square inch. Population, about 1,200. Stock returns (1899): 4,436 horses, 5,060 cattle, 661,427 sheep; area, 4,669,699 acres. Local newspapers: *Condobolin Argus* and the *Lachlander*.

COOGEE (33° 56′ S. lat., 151° 16′ E. long.) is a suburban village, in county Cumberland, electorate of Randwick, 5 miles S. from Sydney, situated in a sandy bight known as Coogee Bay. It is connected by tramway, and has two first-class hotels—the Baden Baden and the Coogee Bay—with fine grounds, an aquarium, and many villa residences adjacent to or overlooking the ocean, and a public school, with average attendance of 119. Anglican church. It is a favourite place for picnic parties, and great numbers patronize the locality on holidays.

COOKARDINIA (35° 20′ S. lat., 147° 17′ E. long.), a post town, with telephone exchange, in the county of Goulburn, police district of Germanton, and electoral district of the Hume, 372 miles S. of Sydney. Henty is the nearest railway station, 15 miles distant. It is on the Jerra-Jerra Creek, has one hotel, one store, a public school, average attendance 24, Union church, and a Female Suffrage League. The district, of granite formation, is suitable for farms and stations. Population of district, about 450.

COOLAH (31° 48′ S. lat., 149° 44′ E. long.), a post town, savings bank, money-order and telegraph station, 60 miles S. from Coonabarabran and 240 miles WNW. of Sydney on the Coolaburragundy creek, county of Napier, electoral district of Gunnedah, and police district of Mudgee. The communication with the metropolis is by coach to Mudgee or Gunnedah railway station. Hotels: The Royal, Tattersall's and Commercial. The surrounding land is rangy, and where suitable is utilized for farming. Public school, average attendance 55. Churches: Episcopalian, Presbyterian, and Roman Catholic. Around Coolah are some splendid squatting properties. Formation: coal measures. Population, 270.

COOLAMAN, a township, with postal, telegraph, money-order offices and savings bank, 310 miles from Sydney, in the Murrumbidgee electorate. It is a station on the South Western Railway, fares, 58s. 3d. and 39s. 6d., and has conveniences for trucking stock. Royal and Coolaman hotels. Three churches: Episcopal (St. John's), Wesleyan, and Roman Catholic (St. Canice); two banking agencies, Union and New South Wales, and a public school, average attendance 70, and convent school, M.U.I.O.O.F. lodge and school of arts. It is the centre of a pastoral and agricultural district. Formation: granite. Population, about 500.

COOLANGATTA (34° 51′ S. lat., 150° 45′ E. long.), a township, in the county of Camden, police and electoral district of Shoalhaven, with postal, money-order, and savings bank facilities. The nearest railway station, situated at Berry, is eight miles distant, whilst there is also regular steamship communication with the metropolis, distance about eighty miles. There is a public school, a Union church, condensed milk factory, and several stores. The district is devoted principally to agricultural and pastoral pursuits. Geological formation: carboniferous. Population, about 300.

COOMA (36° 12′ S. lat., 149° 9′ E. long.), county of Beresford, police district of Cooma, and electoral district of Manaro, is prettily situated on high land, 2,657 feet above the sea level, on the creek of the same name, 264 miles to the SSW. of Sydney, with which city the communication is by rail; single fares, 51s. 9d., 34s. 9d.; return, £3 17s. 9d., £2 12s. Coaches run to Bombala, 25s.; Nimitybelle, 10s.; Adaminaby, 10s.; return 15s., Bega, 35s.; Kiandra, 20s., return, 30s.; Jindabyne, 12s. 6d., return, 20s. Seven hotels: Cooma, Prince of Wales, Railway, Free Selectors, Australian, Royal, and Union. The river Murrumbidgee flows about 5 miles distant. It has a post, money-order, Government savings bank, and telegraph-office, and is under municipal government, having 50 miles of roads, and ratable property of the annual value of £11,830; capital value, £28,800; assessed value, £12,490. The buildings in the town comprise, among others, the hospital, school of arts, with library of 1,200 vols., court-house, lands department survey office, gaol, police barracks, volunteer drill hall, eight stores, two chemists' shops, branches of the Commercial, Australian Joint-Stock, and N.S. Wales banks; English, Presbyterian, Catholic, and Wesleyan churches. A public school, average attendance 180. The Oddfellows (G.U.O.O.F. and M.U.), Salvation Army, Freemasons, Good Templars, and Orangemen have branches or lodges, and there is also a R.C. Convent, and two steam and one water flour mills. The surrounding country is pastoral, mineral, and agricultural. A new goldfield was recently discovered at Bushy Hill, about one mile from the town; prospects are of the brightest, the gold returns for 1899 being 1,620 ozs., valued at £6,180. The criminal Sessions and District Court for Manaro are held at Cooma every four months. Mining Warden's Court periodically. Land Board sittings held at Cooma, Adaminaby, Buckley's Crossing, and other centres, headquarters of land district being at Goulburn. The sporting institutions include the Cooma Jockey Club, Manaro Coursing Club, Cooma Athletic Club, Cooma Tennis Club, Royal Tennis Club, Cooma Polo Club, two cricket clubs, football, etc. There is a good business in skins (wallaby, opossum, etc.), and during the hare season, which embraces the winter months, large consignments are sent to Sydney and for the English market. The Cooma P. and A. Association holds its annual show in April, at which the surrounding districts are largely represented. Cooma is the accepted terminus for tourists visiting the Mount Kosciusko Observatory, the highest point of Australia, also the mountain country around Kiandra, the roads being in excellent condition. Guides for Kosciusko are obtained at Jindalyne. The Yarrangobilleg Caves are situated about seventy miles from Cooma, and sixteen from Kiandra, the road from Cooma being in splendid order, this route being preferred by tourists on account of the facilities of travelling and the picturesque nature of the scenery. The water supply is obtained from two creeks. Stock returns (1899): 7,492 horses, 39,462 cattle, 807,973 sheep; area, 1,877,411 acres. Produce of the district: wheat, barley, oats, rye, potatoes, maize. Dairy produce: butter, cheese, bacon and hams. There are soda-water springs about eight miles out. Formation: granite and trap. Population, 1,800; of the township and district together, 15,200. The *Manaro Mercury* and the *Cooma Express* (both bi-weekly) are the local papers.

COONABARABRAN (31° 16′ S. lat., 149° 18′ E. long.), a post, telegraph, savings bank, and money-order township on the Castlereagh river, about twelve miles from its source, and 267 miles (360 postal) from Sydney NW. It is in the electoral district of Gunnedah, county Gowen, and police district of Coonabarabran. The traveller's route is by mail coach *viâ* Mudgee or Gunnedah, 110 and 65 miles distant respectively, thence train. Coaches also run to Coolah, Coonamble, Baradine, and Pilliga. The Club House, Imperial, Royal, and Telegraph are among the hotels. Bank: Joint-Stock. Five stores. Churches: Episcopalian, Presbyterian and Roman Catholic. Public buildings: school, with average attendance of 98, a convent school, and a hospital. Mechanics' institute with 1,300 volumes, Oddfellows' lodge, court-house, gaol, police barracks and lock-up. There are also two steam flour mills, two steam sawmills, and Pastoral and Agricultural Society, with show ground of 11½ acres. The country is well watered and fitted for farming and fruit-growing, which are largely followed, but there are some large patches of unproductive land. District is noted for the

salubrity of the climate. Stock returns (1899): 5,768 horses, 11,809 cattle, 863,576 sheep; area, 3,514,825 acres. Formation: sandstone and basalt. Population of the township is about 1,800; of the census district 1,412. Newspaper: *Bligh Watchman.*

COONAMBLE (31° S. lat., 148° 28′ E. long.), a post, money-order, savings bank and telegraph town, situated at the junction of the Mogomodine creek and the Castlereagh river, in the electorate of Coonamble, 375 miles NW. of Sydney, and 100 miles N. of Dubbo, county of Leichhardt, police district of Coonamble. The inns are the Royal, Tattersall's, Commercial, Avenue, Morning Star, Club House, and others. Banks: Joint-Stock, Commercial. There are three churches, Episcopalian, Roman Catholic, and Wesleyan, and three schools—one public, with an average attendance of 300 scholars, mechanics' institute, with 1,500 vols., court house, hospital, (with detached fever wards) and gaol. Masonic & M.U. Oddfellows' lodges. The communication is by coach to Dubbo and Warren Stations, distant 97 and 70 miles respectively, and coach to Walgett twice a week (the railway is being extended from Dubbo to Coonamble); coaches also run to Wingadee, Coommbia, Baradine, Pilliga, Combogolong, Coonabarabran, &c. Coonamble is the centre of a municipal district, having 22½ miles of roads, and ratable property of the annual value of £11,710. Court of Quarter Sessions and District Court three times a year; Land Court every six weeks, Petty Debts Court alternate Mondays; resident P.M., Crown Land Agent and C.P.S. The district is chiefly devoted to pastoral pursuits, the Castlereagh being one of the finest sheep districts in the colony. Two cordial factories, ice and vinegar works, soap factory, flour mill and butter factory. An artesian bore has been put down, striking a daily supply of 2,000,000 gallons at a depth of 1,302 feet, and the water is reticulated through the town. Street lamps lighted with kerosene. Latest stock returns (1899): 5,542 horses, 1,311,482 sheep, 9,989 cattle; area, 2,746,781 acres. Formation: pliocene. Newspapers: *Coonamble Independent* and *Coonamble Times*, weekly. Population of municipality, 1,400; of district, 9,000.

COORANBONG (32° 57′ S. lat., 151° 32′ E. long.), a post town, with telegraph station, money-order office and Government savings bank, in the county and electorate of Northumberland, police district of Brisbane Water, 30 miles N. of Gosford, 25 miles SW. from Newcastle, and about 80 miles N. of Sydney, which can be reached by rail to Morissett, distant 4 miles, thence coach three miles. There is one hotel, a public school with an average attendance of 30 scholars, an Episcopal church (St. John's), and Roman Catholic place of worship, two Seventh Day Adventists' Colleges, a court-house with constables' quarters—a court of petty sessions being held every fortnight. It is the principal town on Lake Macquarie, and where the greater portion of the timber is shipped for Sydney, Newcastle, and Wallsend. The country around is very mountainous, and abounds with fine timber, fir, forest oak, blue gum, black-butt, forest mahogany, iron bark, and other trees. Population stated at about 500 or 600.

COOTAMUNDRA (34° 39′ S. lat., 148° 2′ E. long.), co. Harden, a post town, with money-order, savings bank and telegraph office, and incorporated under the Municipalities Act, 253 miles S. from Sydney, 36 miles NW. of Gundagai, and 32 miles SE. from Temora, situated on the Muttama and Flat Creeks, in the county of Harden, and electorate of Gundagai. It stands 1,079 feet above sea-level, and is an important station on the Great Southern Railway Line (fares, 50s. and 33s. 6d.), is the junction station of the line to Gundagai, the line to Temora and the lower Lachlan, and is about equi-distant from Sydney and Melbourne. There is train communication with Temora. Principal public-houses, Albion, Royal, Club, Emu Commercial, Globe, Terminus, Railway, Star, Cootamundra, Australian Arms, Farmers' Arms and others, and several private boarding establishments, twelve general and produce stores, five banks: New South Wales, Union, Australasian, City, and Commercial. It is an independent land and police district, devoted to mining, pastoral, agricultural, dairying, and horticultural pursuits, and famous for the good quality and abundance of its wheat, averaging about 20 bushels to the acre. The township is well laid out, and can boast of some very pretty residences, besides other public buildings, court-house and lands office, gaol, lock-up, police barracks and churches, including Christ Church, a large and handsome edifice, which cost nearly £2,000; Roman Catholic church, a similar building; Primitive Methodist, Salvationist, Wesleyan and Presbyterian churches; one large steam flour mill; good public school, with an average attendance of 300 scholars; Roman Catholic, also private schools, and a public assembly hall capable of accommodating 500; post and telegraph office; Town Hall and School of Arts. Quarter Sessions are held, also District, Licensing, Land, and the Petty Courts, with a resident police magistrate. A little way out of the town is a racecourse, comprising about 160 acres. There are also show grounds, comprising 30 acres, with every requisite for an Agricultural Exhibition. There are five resident ministers, Episcopal, Wesleyan, two Roman Catholic, and Presbyterian, a school of arts, free public library with 600 volumes, one lodge of Oddfellows (M.U.), Masonic lodge, Hibernians, Protestant Alliance Friendly Society, Rechabite tent lodge of the Orange Institution and Buffalo lodge; well-conducted Racing, Cricket, Football, Bicycle, Golf, and Tennis clubs, and a Mutual Improvement Society. Fire brigade has 1 reel and 1,400 ft. of hose. Cootamundra was proclaimed a municipality on May 20, 1884, and has 18½ miles of streets, and ratable property of the annual value of £19,100. The town is lighted with gas, and has a permanent water supply; the service reservoir has a capacity of 250,000 gallons, pressure 35 lb. to square in.; supplementary reservoir, 136,000,000 gallons. Two breweries are conducted in the town, also two cordial factories. Geological formation: heavy chocolate-coloured soil, principally granite rocks and black loam. Population, 2,700. Local newspapers, the *Cootamundra Liberal* and the *Cootamundra Herald*, both published bi-weekly.

COPELAND (31° 48′ S. lat., 151° 35′ E. long.), county and electorate of Gloucester, is a Government township under the Towns' Police Act, with post, Government savings bank, telegraph and money-order office, 186 miles N. of Sydney, between the Barrington and Bowman rivers, with rich gold reefs in the district. It is in the centre of a large pastoral district, with good agricultural land. The communication with Sydney is *viâ* Raymond Terrace and Hexham by coach, thence train. Three hotels and three stores. Public school, average attendance 42, and a Wesleyan Church. Population, 230.

COPMANHURST (29° 41′ S. lat., 152° 48′ E. long.), a village with post, telegraph, money-order office, and savings bank, 365 miles N. of Sydney, with district population of about 600. It is in the county of Clarence and electorate of Grafton. Route to Sydney is *viâ* Grafton, 20 miles SE. Glen Innes is the nearest railway station, 130 miles distant. Hotel: Commercial. The sea is 82 miles away, but the river Clarence, on whose banks Copmanhurst is situated, is tidal as far as the town. The famous "Gorge" is within easy distance. There are Episcopal, Presbyterian, and Roman Catholic churches, police-station, Mechanics' Institute, Protestant hall and two public schools, average attendance 60. Mining, agricultural, and pastoral district. Formation: sandstone. Population about 200.

CORAKI (29° 41′ S. lat., 152° 48′ E. long.), a Government township, situated at the head of navigation of the main Richmond river, at the junction of the north and south arms, 349 miles of Sydney. The principal portion of the town is on the southern bank of the river, but the boundaries extend across the river to the east and north points. Coraki is the principal shipping depôt of the district, the Casino and New England cargo being discharged here for transhipment by drogher to Casino. The ocean vessels occasionally go no higher up the river, and in the near future, when the bar improvements are completed, Coraki must become the terminus for large ships, and one of the most important towns in the northern districts. It is 14 miles from Lismore, and 18 miles from Casino by land, and 45 miles from the Heads by water, in the electorate of the Richmond. Access is gained with Sydney by the North Coast Company, running a tri-weekly service. The Clarence steamers are reached by coach to Harwood, or coach *viâ* Casino to Tenterfield, thence train. Coraki is right in the heart of the dairying and sugar district. Australian Dairy Company has a butter factory. It has a commodious post and telegraph office (with money-order and savings bank), court-house with regular monthly sessions, two public schools and convent school; English, Presbyterian, Baptist and Roman Catholic churches, Roman Catholic Presbytery (Rev. J. R. Fagan, resident priest). Commercial Bank, Oddfellows (M.U.); School of Arts and library, large public hall, agricultural society, several stores; four hotels, &c. Yabsley's extensive sawmill and ship-building yard affords constant employment for 50 men; and Yeager's sawmill (one of the most complete in the Colony), and shipping depôt, employs about 70 men. The municipality has 28½ miles of roads and streets, and ratable property of the annual value of £2,960. Coraki is included in the district telephone system, connecting with Casino, Lismore, and Ballina. Coal deposits, close to the town, are to be worked. Population, 700. Local newspaper: *Richmond River Herald*, published on Fridays.

COROWA (35° 59′ S. lat., 146° 25′ E. long.), a money-order, postal telegraph and savings bank township, in the county and electoral district of the Murray, prettily situated on the northern bank of the River Murray, 173 NE. of Melbourne, 438 miles SW. of Sydney. It is in the midst of good undulating grazing and agricultural country, which is also well adapted for the vigneron's purposes. The district is in direct touch with both Melbourne and Sydney by rail. The hotels are Royal (booking office for the coaches), Thomson's Riverina, Chenhall's Globe, King's Australian, and ten others. There are, a School of Arts, with 2,500 volumes, Episcopal (St. John's), Wesleyan, Presbyterian, and R.C. (St. Mary's) and Church of Christ churches, branches of the N.S. Wales, Commercial Banking Company of Sydney, and Australasian Banks, Custom House, two public schools, a Roman Catholic and two private schools, crown land office, a court-house, school of arts hall, Oddfellows' hall. The communication with the metropolis (fare 60s. and 44s.), is by the Southern line to Culcairn, thence to Corowa terminus; Corowa is easily accessible by rail by way of Melbourne, being only ½ mile N. of Wahgunyah Railway Terminus. Coaches leave the Royal, Riverina, Newmarket, Australian, and Globe hotels for the Wahgunyah Railway Station six times daily, also for Tocumwal, Deniliquin, Urana, Jerilderie, Albury, Berrigan, &c. Corowa is a fast growing, busy township, with a lovely climate, a very pretty situation, and an increasing population. Much wheat is grown in the district, and there are about 1,200 acres of land under the vine; the rich, red, chocolate soil has been found admirably adapted for the growth of heavy sweet wines. There are 764,221 acres under occupation in the district, carrying at the end of 1899, 4,926 horses, 5,424 cattle, and 436,379 sheep. There are 17,831 acres under cultivation in Murray Co., 36,829 under wheat. There are Racing, Cricket, and Football Clubs, Masonic, and Oddfellows' lodges, and a fire brigade with one fire engine, one reel, a ladder-wag on and 1,500 ft hose. Mining pursuits are on the increase; the Corowa Deep Lead G. M. Company works are the largest alluvial in the colony, and the plant is a very fine one. It is worked on the double shaft principle, in order to cope with the water, which was very

strong, but has now been overcome. A boiling down company has carried on operations for some time. Large stacks of grain are held in the district. A great accession to the rural population has set in from Victoria. The land formerly devoted exclusively to sheep-farming being taken on the halves system—the farmer finding labour and machinery, and the pastoralists find seed and land and dividing the yield; the system works well. Water from tanks and wells. Population, 2,000; inclusive of district, it is estimated at about 3,500. Newspaper, *Corowa Free Press*.

COWFLAT (33° 28′ S. lat., 149° 38′ E. long.) is a post town, with savings bank and money-order office, 57 miles W. of Sydney, in the electorate of West Macquarie (co. Bathurst). Copper has been found here, in small quantities. Communication is by coach to George's Plains Station 4½ miles distant, thence train. Public school here, with an average attendance of 20. Wesleyan church. Manufacturing, agricultural and pastoral district. Copper mines are at work. Population, 60.

COWPER a village in the municipality of Illawarra, on the south side of the South Arm, a narrow stream connected with Brughgrove by Government Ferry. Here is hotel, State school, convent school, Roman Catholic and Presbyterian churches, Receiving office, store and creamery. Population, about 200, principally farmers and dairymen.

COWRA (33° 52′ S. lat., 148° 45′ E. long.), an agricultural township, with post, money-order, and land office, Government Savings Bank, and telegraph station, situated on the north bank of the Lachlan river, 35 miles SW. of Carcoar, and 219 miles W. of Sydney. It is in the counties of Bathurst and Forbes, and electorate of Cowra, on the loop line of railway connecting Blayney with Harden. Railway communication with Harden on the Great Southern line, and Blayney on the Great Western (fares from Sydney, *viâ* Harden, 56s. 3d. and 37s. 9d., and *viâ* Blayney, 43s. and 28s. 9d.) has been established, and the line to Grenfell is approaching completion. A coach runs to Grenfell, Forbes, Canowindra, and Goolagong three times a week, Burrowa twice a week, Wheeo twice a week. A handsome composite bridge spans the Lachlan at this point. The railway bridge on the river, some half-mile above the town, is one of the finest in the colony. The Fitzroy, Royal, Court-house, Club House, Great Western, Railway, Australian Arms, and Royal Exchange are the principal inns. There are a Roman Catholic church and convent, Episcopal church built of rubble stone, Presbyterian church of brick, and a Wesleyan church, a superior public school—with an average attendance of 350, Roman Catholic schools, conducted by the Sisters of St. Brigid, with 250 scholars, branches of the Joint-Stock, New South Wales, and Commercial Banks, a commodious court-house, gaol, police-station and lock-up, one steam flour-mill, and six large stores. The land in the vicinity is well adapted for fruit, vine, and grain-growing. Formation: principally slate and granite. The surrounding country is highly auriferous and good sluicing ground, gold being found over a vast area. The Broula iron lode is very extensive and very rich. Limestone veins are in proximity to it. Copper has also been found. Silver has been found in the Broula range, at Breakfast Creek, and other parts of the district; Cowra has a thriving Pastoral and Agricultural Association, School of Arts (with well-stocked library, reading, and other rooms) Masonic, Oddfellows', Foresters', and Good Templars' Lodges. The water supply is obtained from the Lachlan. Court of Petty Sessions is held daily, and Court of Requests on second and fourth Tuesday in each month. Quarter sessions and district courts are held three times a year. Belubula Caves are 14 miles distant. The town is incorporated and has 9½ miles of roads, with ratable property of the annual value of £11,940. Population of borough 1,730, and district, 10,000. Newspapers, *Free Press* and *Guardian*. Geological formation, slate and granite.

CROKI (now Jones Island) (31° 53′ S. lat., 152° 40′ E. long.), a small village, situated about 8 miles from Harrington Inlet, 152 miles N. of Sydney, on the north bank of the Manning river, in the midst of a rich agricultural district, with postal, telegraph, money-order facilities, and Government savings bank. It is in county Macquarie, police and electoral district of the Manning. Steamers run weekly, and coasting craft at intervals for the metropolis. In the town are three general stores and an hotel (Victoria). Croki is the great emporium for oysters, and a very important shipping place, with considerable exports and imports, almost equal to any in the Manning district. In the locality, of which Croki is the post town, are a Wesleyan church, Temperance and Oddfellows' halls, public school—average attendance 60, and a public hall. Daily mails are received and despatched by coach, *viâ* Hexham as well as a weekly mail per steamer. Population, about 250. A butter factory is carried on in the district.

CROOKWELL (34° 17′ S. lat., 149° 14′ E. long.), chief town in the electorate of Argyle, a post town, with savings bank, money-order office, and telegraphic communication (telephonic to Loggan and Binda, 164 miles SW. of Sydney, and 30 miles NW. from Goulburn, the nearest railway station, daily coach thither, fare, 5s. It is situated on the Crookwell river, at an elevation of 3,000 feet above sea-level. A Court of Petty Sessions is held on the third Wednesday in each month. There is one steam flour-mill, eleven stores, four hotels, five churches, a roads office, a public school—with average attendance of 200 scholars, six places of worship, Temperance hall, branches of the English and Scottish and N.S. Wales Banks, and lodges of Oddfellows, and four butter factories. The district is chiefly agricultural, the principal produce being wheat, potatoes, and oaten hay. Many of the farming population combine sheep farming with tillage. There is a School of Arts, district Progress Committee, Public Park Trustees, Crookwell Race Club and Agricultural Society. The water supply is obtained from well tanks. The population is about 700 town; 2,000 district. Newspaper: the *Crookwell Gazette* (Tuesday and Friday).

CROYDON (33° 52′ S. lat., 151° 7′ E. long.), a rapidly extending suburb of Sydney, with railway and telegraph station, money-order, Government savings bank, and postal facilities, in the county of Cumberland, electoral district of Ashfield, and police district of Newtown, 6 miles W. of Sydney; fares, 7d. and 5d. It has one hotel, several stores, an aerated water factory, two steam brick works, Wesleyan, Congregational and Episcopalian churches, two public schools, with average attendance 800, Presbyterian Ladies College—a fine structure—one hotel, and a number of business places and superior residences.

CUDAL (33° 10′ S. lat., 148° 38′ E. long.), 217 miles west of Sydney, county Ashburnham, electoral and police district of Molong—mode of conveyance, coach to Borenore, 16 miles, thence rail. It is situated on the Boree Creek, and contains a post, money-order, savings bank, and telegraph office, a branch of the Commercial Bank, 3 hotels, an Episcopalian and a Roman Catholic church, police-station, court-house, steam flour mill, a school of arts, with a library of 600 vols., a public school, average attendance 80. The district is principally an agricultural one, but gold is obtained in payable quantities. Coaches run from Borenore to Forbes *viâ* Cudal and Eugowra. The municipality has 52 miles of streets, and ratable property of the annual value of £4,530. Population, about 600. Geological formation: basalt and limestone.

CUDGEGONG (32° 38′ S. lat., 149° 8′ E. long.) is a mining township with post and money-order office, in the county of Wellington, electorate of Rylstone and police district of Mudgee, situated on the river of the same name, 59 miles NW. from Hartley, 25 miles SE. from Mudgee, and 145 miles NW. of Sydney. Communication is by coach to Mudgee or Capertee, thence rail. Hotel: the Royal. It has a fine public school (average attendance 30), two stores, and an Episcopal church. The surrounding district is an agricultural one, although there are extensive alluvial gold-diggings in the neighbourhood, particularly at Campbell's Creek and the Meroo river, and the alluvial diggings at Appletree Flat (11 miles distant) are in a flourishing condition. Iron, copper, and coal are also found in the district. The country is clay-slate, with numerous quartz veins and antimony. Cudgegong is also the name of a municipality (Mudgee) Proclaimed July 20, 1860, having 306 miles of roads, and ratable property of the annual value of £20,650. Population, about 2,600.

CULCAIRN (35° 40′ S. lat., 147° 2′ E. long.), a township and railway station in county Hume, 356 miles S. of Sydney, and 30 from Albury. It has post, money-order, telegraph office, a savings bank, Presbyterian place of worship, a public school, enrolment 54, and two hotels. Fares from Sydney, 60s. and 44s. Culcairn is connected with Corowa by rail. Daily coach runs to Morven and Germanton; thence to Kyamba and Tumberumba, tri-weekly. There is no water supply. The district is agricultural and pastoral. Population, 150.

CULLENBONE (32° 25′ S. lat., 149° 36′ E. long.), a post town, 303 miles W. of Sydney, situated on the Cudgegong river, in the county of Wellington, electoral and police district of Mudgee. A bi-weekly coach runs to Mudgee and Wellington. It has two roadside inns, a public school, with an average attendance of 25, a Union church, and one store. Mudgee is the nearest railway station. Population, about 100.

CUMNOCK (32° 15′ S. lat., 148° 42′ E. long.) is a post town, with money-order office and telegraph station, in the electoral and police district of Molong, and county of Gordon, situate on the banks of the Burrawong Creek, 232 miles W. of Sydney. Mode of conveyance to Molong, the nearest railway station, distant 16 miles, is by coach, daily; coaches also run three times a week to Dilga, Yeoval and Obley, and Two-mile Creek. It contains a public school, court-house, post-office, Episcopalian and Roman Catholic churches, Progress Association, two hotels, a butter and jam factory, and a well laid out show-ground. An extensive fruit-canning industry is carried on at Burrawong. The district is principally agricultural, but is also devoted to pastoral pursuits. Geological formation: limestone. Population, 380.

CUNDLETOWN (31° 54′ S. lat., 152° 21′ E. long.), a postal, telegraph, savings bank and money-order township, on the north bank of the Manning river, 16 miles distant from the ocean, 4 miles below Taree, and 266 miles from Sydney, NE., with which it has direct communication by steamer, and a daily overland mail (Saturdays excepted). Hexham is the nearest railway station, 120 miles distant. Hotels: Manning River, and Bryant's Family. It is in the county of Macquarie, electorate of the Manning and police district of Manning river. The district is mainly an agricultural one, maize being extensively cultivated. Places of worship, Episcopal, Wesleyan, Presbyterian, and Roman Catholic. It has a police-station, public school, R.C. convent school and school of arts, with 400 vols., several lodges, three stores. Formation: principally limestone. Town population, 260; district, 650.

DALMORTON (29° 40′ S. lat., 152° 38′ E. long.), a mining centre and post town, with telegraph, money-order offices and savings bank, 478 miles N. of Sydney, in the county of Gresham, electorate of Raleigh and police district of Glen Innes. The mining is from the quartz, one reef being worked; 688 ozs. being obtained in 1899; public school here with average attendance 38. A daily coach runs from and to Grafton, and Glen Innes, the nearest railway station, 50 miles distant. Population of district, 140.

DALTON (34° 44 S. lat., 149° 13′ E. long.), a post town, with money-order, telegraphic and savings bank facilities, in the county of King, police district of Yass Plains, 172 miles SW. of Sydney. Communication is by conveyance to the Gunning railway station, distant 8 miles. Hotel: the Dalton. It is situated on the Oolong creek, in the electorate of Yass, about 1½ miles above its confluence with the Jerrawa Creek, and 4¾ miles from the railway. It contains Wesleyan and Episcopal places of worship, a public school, with average attendance 61, and a large steam flour-mill. Chiefly an agricultural district, wheat being the most extensively cultivated, but in the vicinity are extensive vine-yards, where much wine is made, and there are also some large apple orchards. Formation: granite and quartz. Population, about 340.

DANDALOO (32° 16′ S. lat., 147° 55′ E. long.), a post town, with savings bank, money-order (telephone to Lonsdale), and telegraph office, 362 miles west of Sydney, county Narramine, police district of Dubbo, and electorate of Condoublin, on the Bogan river. Mode of conveyance by coach to Trangie Railway Station, distant 26 miles. A coach also runs to Myngan (twice a week), Fifield diggings, Trundle, Bogan Gate railway station, three times a week. There is one hotel, a provisional school, Union church, police barrack and court-house, and one large store. Mining, agricultural and pastoral district. Formation: slate and granite. Population, about 100.

DAPTO (34° 28′ S. lat., 150° 50′ E. long.), a telegraphic, money-order and savings bank township on the south side of Mullet creek, in the Illawarra electoral district, 56 miles S. of Sydney. It is in the county of Camden, and police district of Wollongong. The means of travelling are by rail direct, fare 9s. 9d. and 6s. 3d.; or by steamer to Wollongong, 8 miles distant, thence conveyance. A substantial bridge spans the creek. There are three hotels, the Illawarra Central and Dapto, and three churches—Presbyterian, Wesleyan, and Anglican. West Dapto has a Roman Catholic place of worship, with school attached, and there are also two public schools, with average attendance of 150. Extensive sulphide works have recently been established on Lake Illawarra by the Smelting Company of Australia, and bid fair to become one of the most important industries in the colony. The assay of gold so far by this process has given splendid results. The district is principally taken up by dairy-farming; coal abounds in the neighbouring Illawarra range. Lake Illawarra, a magnificent sheet of salt water, is in the vicinity. Formation: limestone. The population of town and district is about 1,500.

DARLING POINT. One of the most picturesque and fashionable suburbs around Sydney, in the Woollahra electorate, situated on a lovely tributary on the shores of Port Jackson, separating the favourite watering places known as Rushcutter Bay and Double Bay. Its chief attractions are the magnificent views of the harbour that are obtained from its heights, and the number of mansions that overlook the water on all sides. The pretty little Episcopalian church of St. Mark occupies a prominent position on the Point, with its beautiful peal of bells and the most efficient Society of change ringers in the Southern Hemisphere. Communication from the city is by omnibus at intervals throughout the day, and the Ocean Street cable tram.

DARLINGTON (34° 28′ S. lat., 146° 0′ E. long.) is a municipal suburb on the South-Western boundary of Sydney, in the county of Cumberland and electoral district of Darlington; it has a post, money-order, telegraph office and savings bank. Communication to Sydney is by bus and tram cars every eight minutes, fare, 2d. Principal hotels are Lalla Rookh, Golden Grove, Royal Albert, Johnson's family, and McFaden's. There is also an iron foundry in the borough, a public school, average attendance, 850; a Wesleyan church, jam factory, cabinet factory, zinc works, cordial factory, several smaller works. A deaf, dumb, and blind asylum is here, with about 100 pupils. The borough has four miles of streets, and ratable property of the annual value of £25,700—is lighted by gas, and connected with the Prospect Water Supply. Population, 3,550.

DAYSDALE (35° 18′ S. lat., 146° 22′ E. long.), a post town, with money-order office, telephone station and savings bank, in the county of Hume, police district of Albury, and electorate of the Murray, 464 miles SW. of Sydney. Mode of conveyance, coach to Corowa and Berrigan, also to Urana, distances 26, 23, and 50 miles respectively. It contains a mechanics' institute, a public school, hotel, and several general stores. The land in the vicinity is highly adapted for pastoral and agricultural pursuits. Daysdale is situated on a travelling stock route (one mile wide) from Corowa to Narrandera, and thence further north. Geological formation: auriferous. Population about 100.

DEEPWATER, a township, postal, Government savings bank, telegraph and railway station, 445 miles N. of Sydney, and 350 from Newcastle, in the county of Gough, electoral district of Tenterfield and police district of Emmaville, situated on the Deepwater river, about midway between Glen Innes and Tenterfield, and acts as receiving depôt for a large mining district. Fares to Newcastle, 64s. 3d., and 43s. 6d., or direct to Sydney, 76s 3d. and 50s. Hotels: Deepwater and Commercial. It takes its name from a river. There are a Roman Catholic Church, school of arts, public school, with an average attendance of 80, court-house, Union church, two hotels, police barracks. Tin returns for 1899 were 200 tons. Coaches run to Emmaville, Castle Rag, and Nine Mile. Formation: granite. Population 370 (census district 5,040). Newspaper. *Deepwater Miner.*

DEEP CREEK post receiving office, situated about 5 miles from Nambucca, 9 miles from Bellinger Heads, and 356 miles N. from Sydney, in county Raleigh, electorate and police district of the Macleay. Coach to Grafton *viâ* Bellinger Heads. There is a State school, and a population of about 100, chiefly engaged in agricultural and timber-getting.

DELEGATE (36° 42′ S. lat., 149° 6′ E. long.), a post town, with savings bank, money-order office and telegraph station, 314 miles S. of Sydney, in the police district of Bombala (co. of Wellesley) and electorate of Eden-Bombala. The town of Bombala is 22 miles distant. Cooma is the nearest railway station, distant 82 miles. Communication is also thence by steamer to Merimbula, and coach. There are two hotels, Episcopalian, Presbyterian, Roman Catholic churches, public school, average attendance 60, branch of the Commercial Bank. Oddfellows' lodge. Two goldfields have been opened up—one at Brown's Camp in New South Wales, and the other just across the border, in Victoria, and known as "Roaring Camp." Court of petty sessions is held monthly. Formation: granite, slate, and sandstone. Population of town, 340; district, 1,377. Newspaper: *Delegate Argus.*

DENILIQUIN (35° 32′ S. lat., 145° 2′ E. long.), 534 miles SW. from Sydney, postal, money-order, savings bank, telegraph, and municipal township, on the Edward river, county Townsend, and electorate of Deniliquin, and the principal place of importance in what is known as the Riverine district. Hay, Jerilderie and Finley are the nearest railway stations; fare, 15s. from Jerilderie, 54 miles, and Finley, 40 miles; to the first named, 80 miles distant, a coach runs daily, fare, 20s. Coaches run from Hay six and Jerilderie three times and Finley twice a week; and to Moulamein, Tocumwaal, &c. It can be reached by rail from Sydney *viâ* Albury, Goulburn Valley, or Echuca, or from Melbourne, 195 miles S., being only about 45 miles distant from the terminus of the Victorian Railway—Echuca—with which place it is connected by a line of railway constructed by the Deniliquin and Moama Railway Co., opened on the 4th July, 1876. Under powers conferred by the Company's Act, the large iron bridge (constructed at a cost of over £80,000, at the joint expense of the N.S.W. and Victorian Government) is used for carrying the line over the Murray. Trains run between the two towns twice a day, and the traffic on the line is very great. There are now about 40 hotels within the municipal area, of which the principal are the Royal, Black Swan, Dublin, Court House, Tattersall's and Globe Hotels at South Deniliquin; and the Sportsman's Arms at North Deniliquin. The business of the town is principally connected with the interests of sheep and cattle farmers and free selectors. Stock returns, 1899: 5,632 horses, 8,441 cattle, 925,027 sheep. Area 22,666,176 acres. The public buildings in the municipality are the hospital, court-house, post-office, telegraph-office, Masonic Hall, Mechanics' Institute, and Town Hall. The Mechanics' Institute possesses a library of 4,000 vols. There is also a free public library containing about 600 volumes in connection with the School of Art. The various religious bodies, including the Episcopalians, Wesleyans, Presbyterians, and Roman Catholics, have substantial places of worship, and each of these denominations has a resident clergyman. There are four banks, viz.: New South Wales, Australian Joint-Stock, Union, and London Bank of Australia, and Salvation Army barracks. Over forty retail establishments of different kinds. Circuit Courts are held at Deniliquin twice and Quarter Sessions and District Courts three times a year. Deniliquin has a public school (one of the finest out of Sydney, costing £4,000), with average attendance of 230 scholars, a convent, and a private seminary. The Deniliquin Pastoral and Agricultural Society, inaugurated in 1876, has very complete yards and buildings for exhibition purposes. There is a flourishing Jockey Club, and a racecourse, situated about two miles to the south of the town. The estimated annual value of ratable property within the municipality of Deniliquin is £27,420, there being 33 miles of formed streets and roads. The district was originally entirely a pastoral one, consisting of vast plains of native grass and salt bush, intersected with clumps of timber, and in many parts not suitable for cultivation, but farming is now being tried with some prospect of success; the vine also flourishes in the neighbourhood. There are gasworks (private company), and waterworks erected by the municipality under the Country Towns Water Supply and Sewerage Act at a cost of £17,000, and a magnificent Supreme Court. The population of the town is about 2,950, and that of the town and district is 5,600. The Press is represented by the *Pastoral Times*, the *Deniliquin Chronicle*, *The Independent*, and the *Riverine Advertiser.*

DENISON TOWN (32° 2′ S. lat., 149° 27′ E. long.), a postal township, county of Bligh and police district of Cassilis, 240 miles N. of Sydney, 47 miles from Mudgee, and 40 miles from Cassilis, situated on the Talbragar river, in the electorate of Rylstone. Coaches run to Mudgee, 16s., and Coolah, 10s. Hotel: the Royal; Mudgee is the nearest railway station. Provisional school and Episcopalian church. The district is principally agricultural and pastoral, but silver is produced in payable quantities. Gold is also found. Population, about 30.

DENMAN (32° 25′ S. lat., 150° 43′ E. long.), a post, telegraph, savings bank, and money-order station, 194 miles NW. of Sydney, on the banks of the Hunter river, about 3 miles above the junction with the Goulburn. It is in the county of Brisbane, and police district of Muswellbrook, and electoral district of Robertson, distant 15 miles SW. from the Muswellbrook railway station. Coach to Muswellbrook (fare, 4s.), rail to Newcastle, and thence steamer or railway, are the means of reaching Sydney. Hotels: Fitzroy and Royal. Churches: Episcopal—a handsome stone building—Presbyterian, and Roman Catholic. Other buildings are a lock-up, a fine School of Arts, with 1,300 vols., two large stores, brick court-house and offices, and a public school, with average attendance 55. The district is a grazing and farming one, and consists of rich alluvial flats

backed up by lofty hills of sandstone. Stock returns for 1899: horses, 4,477; cattle, 31,636; sheep, 31,909. Area, 356,890 acres. Denman lying on the main road to Sydney, travelling stock has necessarily to pass through here. Population, 250.

DOUBLE BAY (33° 52′ S. lat., 131° 16′ E. long.), one of the prettiest suburbs of Sydney, electorate and police district of Woollahra, situated about three miles E. from the city, on the shores of the harbour, and approached by omnibus or cable tram, the latter running to within a few minutes' walk of the Bay. The tram is of the most recent design and cost, including a magnificent engine house and car-shed at Rushcutter's Bay, about £160,000. From the cable terminus at Ocean Street an electric tram line has been constructed to Rose Bay, a distance of about a mile-and-a-half. Hotels: the Royal Oak and Family. The village is built on a level with the sea, and is a favourite watering place for boating parties; many of the leading gentlemen of Sydney residing in the neighbourhood. There is a public school, with average attendance of 270, a nursery, public reserve and several small stores. The suburb has a sewerage system connected with that of Bondi, is lighted by gas, and connected with the Prospect Water Supply. On the west of the bay is Darling Point, noted for its numerous mansions and the beautiful views obtained from its heights, and the east is bounded by Point Piper, another beautiful headland, and which is being rapidly covered by substantially built mansions. Population, about 500.

DOUGLAS (34° 9′ S. lat., 150° 45′ E. long.) (formerly known as Douglas Park), a post town, telegraph and railway station on the Southern line, in the county electoral and police district of Camden, near the River Nepean (or Cowpasture), 45 miles S. of Sydney, lying 396 feet above sea-level. Fares, 7s. 8d. and 4s. 8d. It has a small population, scattered over an agricultural district. Public school with average attendance 43. Anglican church. There is good scenery at Nepean Water-dams and Tunnel, and a good cycling road to Bulli Pass.

DRAKE (28° 54′ S. lat., 152° 29′ E. long.), a post, telegraph, savings bank, and money-order station, is 32 miles distant from and in the electorate of Tenterfield, on the road to the Clarence river and Richmond river districts, 518 miles N. of Sydney, and is apparently embraced in the auriferous and metalliferous zone extending from Timbarra northwards. Coach daily to Tenterfield, Tabulam, Casino, and Lismore. Gold has been found in various parts of the district for many years past, in more or less payable quantities. Public school here, with average attendance of 123. Population, 70.

DRUMMOYNE, an elevated rapidly rising and highly picturesque suburb on the Parramatta river, with telegraph and savings bank facilities. It includes three districts, known as Drummoyne, Birkenhead, and Bourketown, formed into a municipality under the name of Drummoyne, distant about 3½ miles west from Sydney, and approachable by ferry steamers, which run frequently throughout the day. It is connected with Gladesville by a swing bridge across the Parramatta river, and with Balmain by a closed high bridge over Iron Cove. A line of omnibuses run direct to Sydney. Hotels: Oxford, Birkenhead, and White Horse. It has postal facilities, a public and Roman Catholic school, Episcopalian, Roman Catholic, and Wesleyan churches, Masonic, Free Gardeners, and M.U. Oddfellows' lodges, Mechanics' Institute, rubber factory, and iron foundry, several stores, three public halls, and other business premises; also a permanent water supply and fire brigade, and is lighted by gas. The municipality, which is situated in the electorate of Ryde, has 10¾ miles of roads, and ratable property of the annual value of £21,600. Geological formation: Ironstone, clay and free stone. Population about 2,300.

DUBBO (18° 21′ S. lat., 148° 35′ E. long.), a progressing township, 226 miles (278 by rail) NW. of Sydney, in the county of Lincoln, electoral and police district of Dubbo, on the Macquarie river, across which a fine bridge (300 ft. long, opened in May, 1886) is here thrown. It is 865 feet above sea-level. The town is well laid out with fine broad streets, is lighted by gas, and has a permanent water supply, pumped from a well into a reservoir of 337,000 gals.; pressure, 42 lb. to sq. in. The communication with the metropolis is by rail, fares, 53s. 6d. and 36s.; and west as far as Bourke. Coaches run to Gulgarbone, Gilgandra, Peak Hill, Coonamble, Ironbarks, &c. The principal hotels are the Royal, Post Office (booking office for Peak Hill), Court House (booking office for Coonamble), The Commercial, Australasian, Joint-Stock and N.S. Wales Banks, the Hospital—a brick building—Exchange Hall and Mechanics' Institute, in Macquarie Street, with a library of 1,800 volumes, Masonic Hall, new stone gaol, railway station, post, money-order and telegraph office, new court-house, Town Hall, Protestant Hall, also of stone, and the churches, Wesleyan, Episcopal, Presbyterian, and Roman Catholic, comprise the principal edifices in the town. Fire brigade has one reel and 500 feet hose. The School of Arts has a library of 1,400 volumes. The manufacturing works include a steam flour and two saw-mills, a soap and candle factory and tannery, two breweries, and four soda-water factories. There are also ten principal stores. It has a public school, average attendance, 558 scholars, and R.C. denominational school, under the charge of nuns, a high school, and several private schools. The district was principally a pastoral one, but of late considerable quantities of land have been taken up by free selectors for farming purposes. Wheat, oats, and maize principally are grown, with some green and fruit crops; but, though the soil is good, the climate is not altogether favourable for farming operations. Latest stock returns, 1899: horses, 13,180; cattle, 21,571, sheep, 1,568,111; area 4,105,891 acres. Produce of the district, wheat, maize, barley, oats, potatoes, wine, butter, cheese, bacon and hams. Coal and copper are found in the neighbourhood. The municipal district (proclaimed February 26th, 1872) has 12¾ miles of streets, and ratable property of the annual value of £22,150. The population of the municipality 3,250; with district it is 8,300 souls. Newspapers: the *Dubbo Dispatch* and *Dubbo Liberal*.

DUNDAS, a post town, 18 miles W. of Sydney, in the county and electorate of Ryde, and police district of Parramatta; mode of conveyance to metropolis by train and steamer. There is a public school, with average attendance 74, Episcopalian church. The district is incorporated, and has 16 miles of streets, and ratable property of the annual value of £9,600. The principal industry of the district is fruit-growing. Population of borough, 960.

DUNGOG (32° 28′ S. lat., 151° 45′ E. long.), a thriving post, money-order, telegraph, and savings bank municipality, picturesquely situated on the west bank of the river Williams, 34 miles from Maitland, and 156 miles N. of Sydney, which is reached by coach from Maitland daily, and steamer from Newcastle to Clarence Town, thence coach tri-weekly. The hotels are Royal, Farmer's Home, Settlers' Arms and Bank hotel. It is in the county and electoral district of Durham, and police district of Dungog. The district is principally an agricultural and dairying one, maize and wheat being the staple products; tobacco is also largely grown. Banks: Commercial and N.S. Wales. School: public, average attendance, 153, and a convent school. Churches: Episcopal, Presbyterian, Wesleyan, Roman Catholic, Baptist and Salvation Army; and five stores. Government buildings—court-house, post-office, and a cottage hospital. The School of Arts has a library of 1,000 vols. Wheat flour, maizena, and arrowroot of the best quality are produced in the district, there being two large mills—one for wheat and the other for maize and arrowroot, also barley, oats, rye, potatoes, tobacco, wine, oranges. Dairy produce: butter, cheese, bacon and hams. Gold has been found in payable quantities in the quartz at Little River, about 20 miles distant, and at Cherry Tree, Upper Wangat, Whispering Gully, and Monkerai. It is also the centre of the Durham Agricultural Association. The climate is very salubrious. Capital value of ratable property, £94,000. Population, about 1,170 persons; in the census district, 1,750. The district is incorporated, and has ratable property of the annual value of £5,240. Newspaper, the *Dungog Chronicle*.

DUNGOWAN (31° 23′ S. lat., 151° 9′ E. long.), a village about 300 miles N. of Sydney, and 16 miles from Tamworth Railway Station, which is reached by coach, in the electorate of Quirindi, police district of Tamworth, and county of Parry, with post-office, and Roman Catholic church, public school, and one hotel. The surrounding country is agricultural. The back-lying lands are mountainous, showing signs of minerals. Silurian formation. Copper ore is raised and sent to Cockle Creek from Fisher's and Trough Gulley Mines. Population, about 150.

DURAL, a postal, telegraph, money-order office, and savings bank township, in the county of Cumberland, electorate of Sherbrooke, and police district of Parramatta, 26 miles W. of Sydney, communication being by coach, *vid* Castle Hill to Parramatta railway station, distant 13 miles, or from Hornsby Junction 12 miles. There are two public schools, average attendance 48, Episcopalian and Wesleyan churches, two stores, and a population of about 350. The district is admirably adapted for fruit-growing and cereal crops.

EAST KEMPSEY. *See* Kempsey.

EAUABALONG (33° S. lat., 146° 42′ E. long.), a postal, savings bank, telegraph and money-order township in the county of Blaxland, police district of Hay and electoral district of Lachlan, 369 miles W. of Sydney, 80 miles NE. of Hillston, situated on the Lachlan river, which is spanned by a good timber bridge about 15 miles within the Riverine district. Condobolin is the nearest railway station. Coach runs four times weekly to Condobolin: twice to Hillston. Principal hotels: Eauabalong and Royal, and two stores. Court of Petty Sessions is held on the third Monday in each month. The country is level sandy loam, lightly timbered, with open plains and salt bush, suitable for cattle and sheep. Gold is obtained in small quantities. Population, about 100.

EDEN (37° S. lat., 149° 59′ E. long.) (co. Auckland) is situated on the north shore of Twofold Bay, 350 miles (postal) SW. of Sydney, in the electorate of Eden-Bombala, and 50 miles N. from Cape Howe by land, but only 35 miles by sea. From Heads to Heads it is 202 miles from Sydney. The U.S.N. Company run boats fortnightly to Eden in connection with Sydney-Hobart boats. Hotels: the Commercial and Great Southern. The locality has been settled since 1845, at which time it contained "a public-house and three or four huts, and 63 residents." It has always been the terminus of the main coast road to Manaro and all the Southern District. The town is built on the slopes and valley formed by two hills which jut out into the bay, dividing it into two parts, whence it derives its name. There is a good pier, a pilot establishment, and a lighthouse station. The houses are principally of wood, some few are of brick and stone. There are Anglican, Presbyterian, and Roman Catholic places of worship, court-house, post, money-order, savings bank, telegraph office, school of arts, three or four stores, one private boarding house, mill and a public school, average attendance 39. The principal trade consists in the shipment of live stock to Hobart, pigs to Melbourne, and hides to Sydney. Eden is the natural outlet of the Bega and Manaro country. The Illawarra Company's steamers trade between Eden and Sydney, calling en route at Tathra, Bermagui, and Merimbula.

The Port was to be the starting point of the proposed Eden and Bega railway. At present Cooma is the nearest railway station, 108 miles distant, and route by coach *viâ* Bega and Nimitybelle or *via* Bombala. The harbour is a good one, and valuable in stormy weather as a port of refuge, being easy of access and well sheltered from all winds; in size and security it is second only to Port Jackson. The larger bay is three miles broad by six miles in length. Whaling is carried on in open boats. The district is mountainous, and better suited for pastoral than agricultural purposes, though the latter has developed somewhat of late years; produce is wheat, maize, barley, oats, potatoes, rye. Stock returns, 1899: horses, 5,194; cattle, 50,862; sheep, 3,793. Dairy produce: butter, cheese, bacon. The population is estimated at 300 persons; in the census district it is 5,200.

ELLALONG (or Ællalong) (32° 53′ S. lat., 151° 24′ E. long.), a post town, in the county and electorate of Northumberland, police district of Wollombi, 138 miles N. of Sydney, on the Cachaboy Creek. It has two churches, English and Roman Catholic, one school, average attendance 36, four stores, and a police barracks and court-house. Inhabitants engaged in grazing, farming, and timber-getting. Communication is by coach to West Maitland, 27 miles distant SW., thence rail to Sydney. Population in town about 55, in the district estimated at 800.

EMMAVILLE (late Vegetable Creek) (29° 14′ S. lat., 151° 45′ E. long.), a post town, with telegraph, money-order and savings bank office, 463 miles N. of Sydney, in the county of Gough, electorate and police district of Glen Innes. A coach runs to the Deepwater Railway Station, 18 miles distant, six times a week carrying mails. Hotels: Miners' Home, Cricketers' Arms, Australian, Royal, and Tattersall's. Places of worship: Wesleyan, Episcopal, and Roman Catholic churches. There is also a Chinese Joss House. Other buildings—a public school, with average attendance of 166 scholars, and Roman Catholic school, Miners' Institute with 900 vols., hospital, a court-house, lock-up, and police quarters. Bank: N.S. Wales. About a dozen stores and numerous tradesmen. Large smelting works are within 3 miles of the town. Vegetable Creek is most happily situated; there is splendid agricultural land within a mile; the tin field is the best in N.S. Wales, and is officially stated to extend 26 miles in one direction and 38 miles in another. Deposits of emeralds have been found 6 miles distant, and a company floated on the London market to develop same; but operations have been suspended, owing to the difficulties of extraction. It is surrounded by large and important stations, viz., Wellington Vale, Rangers' Valley, Wellingrove, Strathbogie, and Maidenhead. Tin was first discovered here early in 1872, and almost immediately after survey these mines gave employment to a large number of men. Emmaville is surrounded on all points of the compass (except on S.E.) by silver-bearing lodes and veins; the pioneer of silver, Webb, first discovered the mineral here about seven years ago, the first mine opened out bearing his name. Population of town about 1,000. Geological formation, granite.

EMU (33° 41′ S. lat., 150° 41′ E. long.), a small postal and money-order township, in the county of Cook, and police district of Penrith, on the Nepean river, in which electorate it is situated, about three miles distant from Penrith, a mile from the nearest railway station (Emu Plains), and 37 miles W. of Sydney; railway fares, 4s. 10d., and 3s. The principal edifices are the Episcopal church, the Wesleyan chapel, two hotels: the Railway Inn and Clarke's Orient Hotel, and the railway station. It has one public school, average attendance 75, and two stores. The ascent to the Blue Mountains commences from about here. The district is partly agricultural, and partly pastoral. The formation is principally of ferruginous sandstone. Surface coal is found in Field's Gully, two miles from the township, and seams of coal are supposed to underlie. The river for several miles above the township is broad and deep enough to float vessels of large tonnage. On this river Laycock and Beach rowed Hanlan one race each for the championship of the world. The population is about 250; with vicinity it is upwards of 500.

ENFIELD, a post town, money-order office, savings bank, and telegraph station, about 8 miles S.W. of Sydney, in the electoral district of Canterbury and police district of Newtown, situated on Cook's river. Mode of conveyance, by tram to Ashfield thence train to Sydney. Steam tram connects Enfield with Ashfield, or bus to Burwood. There are two hotels—Enfield and Royal, Government savings bank, Anglican, Wesleyan and Roman Catholic places of worship, Protestant Alliance and Foresters Society, one public and four private schools, tanneries, poultry farm, and a population of about 2,500. The district is incorporated, and has 24 miles of streets, with ratable property of the annual value of £17,860. The township is lighted by electricity, and has a permanent water supply.

ERMINGTON, a post town and telegraph office, in the county of Cumberland, electorate of Central Cumberland, and police district of Parramatta, 10 miles WNW. of Sydney, on the Parramatta river, communication by coach to Ryde station, rail thence, or steamer direct. There is a public school, average attendance 65, an Episcopalian church, several stores. Population about 200. Geological formation, basaltic. The district is incorporated, with ratable property of the capital value of £83,600.

ERSKINEVILLE, a suburban municipal district, situated between Newtown and Alexandria (proclaimed May 23rd, 1872), in the county of Cumberland, and police district of Newtown, from which it is two miles distant, in a southerly direction, and having now a railway station, post and money-order office, and savings bank. Railway fares, 3d. and 2d. Hotels: Imperial, Rose of Australia, Erskineville and Cosmopolitan. There are 6½ miles of streets, and property of the annual ratable value of £29,000. The district is lighted by gas and has a permanent water supply. There are several private schools, superior public school (average attendance, 1,200), and Episcopal, Roman Catholic, Wesleyan and Free Presbyterian churches. Brick-making and glass industries. Population about 5,400.

EUGOWRA (33° 20′ S. lat., 148° 22′ E. long.), a post town, in the electorate of Ashburnham and police district of Forbes, situated on the Mandagery Creek, with money-order office, telegraph station, and Government savings bank, 240 miles W. of Sydney. The nearest railway station is Forbes, 26 miles distant, to which a coach runs daily, also to Borenore and Orange. There are two hotels, the Bridge and Eugowra, a public school, average attendance 37, school of arts, and Roman Catholic convent. Formation: granite. Population about 140.

EUROBODALLA (36° 5′ S. lat., 149° 68′ E. long.,) 264 miles S. of Sydney, in the electorate of Moruya, on the Tuross river, is a postal village, with telegraph and money-order office, public school average attendance 25, one hotel, blacksmith's shop, police station, and court-house. Nine miles W. is Nerrigundah, formerly one of the richest alluvial gold fields in the colony, now worked out. Tarago is the nearest railway station, 107 miles distant. Communication is by steamer to Moruya, thence per coach. Agricultural population of about 120.

EURONGILLY (34° 51′ S. lat., 147° 50′ E. long.), the postal centre of the Eurongilly goldfields, is in the county of Clarendon, electorate and police district of Gundagai. It is 4 miles from the Billabong creek, 7 miles from the Murrumbidgee river, and 290 miles (342 postal) SW. of Sydney. Gundagai, Junee (15 miles) and Illabo (12 miles) are the nearest stations. A public school, with average attendance of 20, and one store, and about 60 settlers scattered over the district, which is of granite and slate rock formation. The diggings are both alluvial and quartz. Agriculture is assuming an important phase, the land being exceptionally good. Population 250.

EUSTON (34° 32′ S. lat., 142° 41′ E. long.), a postal, telegraph, savings bank, and money-order township and port of entry, in the county of Taila, police and electoral district of Wentworth, on the Murray river, about 680 miles SW. of Sydney, 290 miles from Melbourne, and 53 miles W from Balranald. Coaches pass through three times a week to Hay Wentworth and Swan Hill. Hotels: Royal and Euston. Presbyterian church and public school, average attendance 32, and three stores. It is an important crossing place over the Murray river for stock into the colony of Victoria, and can be easily reached from Melbourne by rail to Swan Hill, thence coach direct and from Hay *viâ* Balranald, which is the nearest railway station 180 miles distant. It is on the main road from Balranald to Wentworth. A custom-house and police-station are here, also a bonded store, and a Court of petty sessions is held once a month. Population about 170.

FERNMOUNT, a post, telegraph, Government savings bank and money-order station, on the river Bellinger, in the county and electorate of Raleigh, police district of Macleay, 337 miles (371 postal) N. of Sydney, mode of conveyance to which is weekly coasting steamer or tri-weekly coach to Kempsey, or bi-weekly to Grafton. Hotel: Imperial. Business and public buildings are comprised in a public school (average attendance 60), Presbyterian, Wesleyan and Anglican churches, one store and Assembly hall. Fernmount is the business centre of the Bellinger river district, with a farming population of about 1,220 souls. When the North Coast Railway is constructed the New England Table-lands will doubtless be tapped by a branch line from the Bellinger, which would thus become an important seaport, as will also Coff's Harbour (14 miles distant), the jetty there being completed. A block of 30,000 acres of excellent land has been opened at the Dorigo Forest, New England (about 25 miles distant), but the land remains unsold and unoccupied. Raleigh is also a rising township on the Bellinger river, six miles from Fernmount; Bowraville (Nambucca river) is distant about 20 miles from Fernmount. Formation: rich alluvial land, permeated with quartz. Maize is the principal product. Population of the whole district, including Bellinger (rapidly growing into importance, having stores, hotels, sawmills, public school and school of arts), about 5,000. Newspaper: *Northern Courier*.

FIELD OF MARS (33° 51′ S. lat., 151° 9′ E. long.), a post town in the county of Cumberland and police district of Parramatta, 15 miles W. of Sydney. The district is noted for its fruit-growing capabilities, oranges largely predominating. The Northern Railway runs through the district, the local station being Carlingford. There are valuable quarries, too, here, which supply most of the metal with which the Sydney streets are macadamized. In the town limits are Episcopal and Wesleyan places of worship, two schools, and three stores.

FINLEY (35° 50′ S. lat., 145° 45′ E. long.), a post town with money-order office, savings bank, and telegraphic facilities, situated in the county of Denison, 447¾ miles south-south-west from Sydney. Daily mail from Victoria (except Sunday), and from Sydney on Monday, Wednesday, and Friday. Mode of communication with capital is by rail. It contains three hotels, branch of the Commercial Bank of Sydney and a public school. The various denominations conduct divine service in the School of Arts. There are several sport and literary clubs. The chief industry is wheat-growing, and the produce of 80,000 acres, chiefly under wheat, is sent from the station annually. The famous Tuppal Run adjoins the town. Annual rainfall 17 inches. Population of town and district, 750. Local paper: *Finley Free*

Press, weekly. Area under cultivation, principally wheat, 32,740 acres.

FIVE DOCK (33° 51′ S. lat., 151° 9′ E. long.), a post town, with money-order office, savings bank, and telegraph office, 8 miles W. of Sydney, located on the Parramatta river and Iron Cove creek, and Hen and Chicken Bay, in the county of Cumberland, electorate of Burwood. Communication is by tramway from the metropolis, and by steamer. It contains three hotels, State school—public (average attendance 160) and Roman Catholic Convent school. Episcopal, Roman Catholic, Wesleyan, Presbyterian and Congregational churches, a Roman Catholic Convent, and a town hall. The district, which is under municipal government (since July 25, 1871), contains about 800 acres, is of sandstone formation, and is largely occupied by villa residences that command charming views; it has 17 miles of streets, and property of the annual ratable value of £8,800. During 1900 the gas company refused to light the town, as they could not get paid; creditors impounded the rates. Much fruit and vegetables are grown here, a factory for the production of galvanized iron, &c. There is a good park, and Rodd Island, in Leichhardt Bay, is much frequented by picnic parties. The district has a permanent water supply. Population, including the neighbourhood, 1,400.

FORBES (33° 17′ S. lat., 148° 5′ E. long.), county and electorate of Ashburnham, is the principal town on the Lachlan river, having railway station, telegraph, money-order, savings bank and land and survey offices. Fares, 57s. and 38s. 3d. It lies west from Sydney, from which it is distant about 289 miles. Cowra is distant 65 miles, and by which latter route either the Western or Southern lines can be reached. Coaches run daily to Borenore, and tri-weekly to Cowra. Principal Hotels: Court House, Albion, Post Office, Royal, and others. From its geographical position and the vast mineral and other resources of the surrounding country Forbes is rapidly becoming one of the most important centres of population and commerce in the west. The Commercial Bank has a very handsome building, and the Australian Joint-Stock Bank, and Union Bank have commodious premises. Anglican, Presbyterian, Wesleyan, Salvation Army and Roman Catholic churches, court-house, gaol, police barracks, and town hall; a public school is here, average attendance over 300, and two denominational schools. Forbes has a large and well-supported School of Arts, with over 2,000 volumes, also a Free Public Library with 430 vols. The District Hospital stands on a commanding position near the town. There is one wool scouring establishment, meat-chilling works, two breweries, and two steam saw and flour mills. The Forbes municipality has completed a scheme for supplying the town with filtered water from the Lachlan, and water is laid on through all the principal streets, pressure about 30 lb. to square inch. Fire brigade has two fire engines, two reels, and 700 ft. of hose. The country is admirably adapted for either squatting or agricultural pursuits, wheat crops generally averaging 20 bushels to the acre. About 10,000 acres are under cultivation; produce of the district being wheat, maize, barley, oats, lucerne, potatoes, wine, fruit, oranges. Stock returns, 1899: 9,869 horses, 13,419 cattle, 1,107,593 sheep. Area, 2,636,590 acres. Dairy produce: butter, cheese, bacon and ham. In the municipal district of Forbes are 61 miles of streets and roads. Annual value of ratable property is £25,000. Population of town about 3,700, district between 6,000 and 7,000. The two newspapers are the *Forbes Times* and the *Forbes Gazette*.

FOREST REEFS (33° 20′ S. lat., 149° 15′ E. long.), a postal, money-order, and mining township in the county of Bathurst and electorate of Orange, 186 miles W. of Sydney and 13 miles from Orange. Mails run six times a week. Millthorpe is the nearest railway station, 6 miles distant. The Forest was once famous for its gold deposits, and promises to revive its faded glories, if sufficient capital can be brought to bear on its known rich but deep alluvial runs. The best known leads are the Great Extended, Lumpy Lead, the Band of Hope, the Grand Junction, Carbine, Blacksmiths, Beneroc Extended, &c. There is an hotel, a convent and Roman Catholic and Anglican churches, a Good Templars' Hall, Progress Association, and Farmers and Settlers Association, and a public school. A plentiful supply of water is obtained from wells and springs. The district is also agricultural and pastoral. Population about 200.

FORSTER (32° 15′ S. lat., 152° 29′ E. long.), a township, at the entrance of Wallis Lake from the coast, near Cape Hawke, about 50 miles from Bulladelah, in the electorate of Gloucester, and 201 miles N. from Sydney. Communication is by steamer from Sydney or Newcastle, coach from Hexham to Bulladelah. It has a post-office, savings bank, money-order office and telegraph station. There are here a School of Arts, with a library of 600 vols., one hotel (the Forster), three saw mills, four stores, and a public school (average attendance 36). A police court is held once a month. Hexham is the nearest railway station, 112 miles distant. Population, 330.

FREDERICKTON (31° 2′ S. lat., 153° 0′ E. long.), a post town, with money-order office and telegraph station, in the county of Dudley, police district of Kempsey, and electoral district of Hastings and the Macleay, 316 miles N. of Sydney, situated on the Macleay river and Christmas creek. Hotel: Dunn's Post-office. Places of worship, Church of England, Presbyterian, and Methodist chapel. A saw mill and several stores. The public school, a very handsome building, has an average attendance of 108. Agricultural and pastoral district. The communication with Sydney is by steamer, direct fare, 30s. Coaches run to Nambucca, Bellinger, Macksville, and Fernmount. Hexham is the nearest railway station, 208 miles distant. Population, about 350.

FROGMORE (34° 14′ S. lat., 149° 0′ E. long.), an old copper-mining township, with post and money-order office, about 16 miles from Burrowa, in the Burrowa police district, electorate of Boorowa, and 246 miles S. from Sydney. The land in the vicinity is principally occupied for grazing purposes, but not suitable for agriculture. Route is by rail to Binalong 36 miles, and thence coach *viâ* Burrowa. Hotel: Cassell's. Public school here (average attendance, 38). Wesleyan and Roman Catholic churches. One store. A court of petty sessions is held fortnightly. Population about 70.

GALSTON, (34° S. lat., 151° E. long.), a post town, with savings bank, money-order office, and telephone, situated in the police district of Ryde, county of Cumberland, and electorate of the Sherbrooke, 29 miles W. of Sydney, on the northern road to Wiseman's ferry. Mode of conveyance to Parramatta or Hornsby Junction, the nearest railway station, 8 miles, is by coach. There is a public school, School of Arts with library, Orange lodge, stores, and Union church. Fruit-growing (citrons especially) is the principal industry. Geological formation, sandstone; sub-soil, shale. Population, 500.

GEORGE'S PLAINS, in the electorate of Blayney 33° 22′ S. lat., 149° 34′ E. long.), a post and telegraph station, 152 miles W. of Sydney. It is a station on the Great Western line (fares, 30s. and 20s.), and lies at an altitude of 2,260 feet above sea-level.

GERMANTON (Ten Mile Creek), (35° 44′ S. lat., 147° 16′ E. long.), a postal, telegraph, and Government savings bank township, with money-order office, in the county of Goulburn, electorate of the Hume, and police district of the Murray, on the Ten Mile Creek, and the Sydney Road, 38 miles NNE. of Albury, and 386 (373 postal) miles SW. of Sydney. Culcairn (17 miles distant W.) is the nearest railway station. Coach runs to Albany, Culcairn, Wagga, Kiamba. Hotels: Criterion, Riverina and Germanton. There is a new Presbyterian church, a new Episcopal place of worship (St. Paul's) and Roman Catholic church. There are two schools (public school has an average attendance of 59 scholars), court-house, two public halls, police barracks, a flour mill, a branch of the Commercial Bank, four stores, about half a dozen tradesmen's shops, Masonic and I.O.G.T. lodges, School of Arts containing about 600 volumes, handsome Presbyterian manse, Church of England parsonage, and Roman Catholic presbytery and convent. Pastoral and agricultural shows are held here annually. The district is occupied by farms, stations, and vineyards, and has a population of about 400 souls. Formation: Silurian, granitoid rocks; post tertiary. There is no permanent water supply.

GEROGERY (35° 40′ S. lat., 147° 2′ E. long.), co. Goulburn, and electorate of Albury, a small post town and railway-station, telegraph, savings bank, and money-order office, 368 miles S. of Sydney, on the main coach road to Albury 18 miles) and the Creek of the same name (799 feet above sea-level). The township is 3 miles from the station. Fares, 60s., 44s. Hotel: Missouri Tavern. It is divided into two parts, called respectively Gerogery Railway Station and Gerogery Township, the former having an hotel and about 50 inhabitants; the latter a store, German Lutheran church, and one public school (average attendance 20). Wheat-growing is carried on to a fair extent, there being upwards of 4,000 acres under cultivation. Good building stone is also found in the neighbourhood. Population 225, who are principally employed in the pursuit of agricultural farming.

GERRINGONG (34° 44′ S. lat., 150° 49′ E. long.), a railway station and municipal district, on the South Coast road, 78 miles S. of Sydney, and about 7 miles S. of Kiama (in which electorate it is), where the steamer can be taken for the metropolis; overland route is *viâ* Kiama by rail. Two hotels; Wesleyan, Congregational, Anglican, and Roman Catholic places of worship, three stores, a public school, average attendance 81, and telegraph, savings bank, money-order office, School of Arts and I.O.G.T. lodge, a branch of the English and Scottish Bank. It was proclaimed April 22, 1871, has 53 miles of streets and property of the annual ratable value of £10,510. Population 750.

GILGANDRA (31° 30′ S. lat., 148° 40′ E. long.), a post town, Government savings bank, telegraph, and money-order station, in the county of Ewenmar, 292 miles NW. of Sydney, police district of Coonamble, electorate of Coonamble, on the Castlereagh river; mode of conveyance is by coach to Dubbo railway station, 40 miles distant; tri-weekly coaches also run to Baradine, Coonamble, and Dubbo, and bi-weekly to Mundooran. Hotels: Bridge, Telegraph and Post Office. There is a public school (average attendance 80), police barracks, court-house, Union church, and a Mechanics' Institute, with library of 200 vols. Three sawmills. Geological formation: sandstone and trap. Agricultural and pastoral district. Population, about 400.

GINNINDERRA (35° 10′ S. lat., 149° 3′ E. long.), a small post township, with telegraphic, money-order, and savings bank facilities, in the electorate and police district of Queanbeyan and county of Murray, 210 miles S. of Sydney. Mode of conveyance to Queanbeyan, 15 miles distant, is by coach, communication tri-weekly. There is a public school, School of Arts, Roman Catholic, English, Wesleyan, and Presbyterian churches within a radius of 3 miles, police-station, and several general stores. Ginnindera Falls are about 7 miles distant, and are very picturesque. There is auriferous country between the township and Yass, 28 miles distant. Geological formation: granite, with subsoil principally of clay. Population, which is very scattered, being composed of selectors chiefly, about 300.

GIRILAMBONE (31° 18′ S. lat., 147° 3′ E. long.), a post town, with money-order office, savings bank, telegraph and railway station, 405 miles W. of Sydney (fares, 73s. and 49s. 9d.),

county of Canbelego and electorate of Cobar. Hotel: Railway. A public school (with average attendance of 50), one store, School of Arts and Orange lodge, and a church used by all Protestant denominations. Police-court and police-station. Agricultural district. Population of district about 250.

GIRILAMBONE MINE (co. Canbelego, electoral district Cobar) has post and money-order office, and savings bank. It is two miles distant from Girilambone Railway Station, reached by coach. There is one hotel (Great Western), State school with average attendance of 60, Roman Catholic Church, and a Union church used by all denominations. Water from Government tanks. Copper and gold mines in locality. Population 300.

GLADESVILLE, or TARBAN (33° 51′ S. lat., 151° 7′ E. long.), electorate of Ryde, a village with telegraph station, money-order, post office and savings bank, on the north bank of the Parramatta river, 6 miles W. of Sydney, and 3 miles from Ryde railway station. The Parramatta steamboats call at intervals. It can be reached, too, by the road and the bridge over the river. Oranges and other fruits are largely grown in the district, and much of the neighbourhood is taken up by the residences and grounds of well-to-do citizens and others. The Hospital for the Insane is located here, with its magnificent buildings and beautiful grounds attached for the comfort of the afflicted. There are two places of worship, two hotels, several small stores, and public school with average attendance of 180. Population of township about 400.

GLADSTONE (31° 6′ S. lat., 152° 51′ E. long.), a post, telegraph, money-order, and savings bank town, in the county of Macquarie, and police district of Hastings and the Macleay, 326 miles NNE. of Sydney, situate at the confluence of Belmore and Macleay rivers, and reached by Clarence and Richmond river steamers to Kempsey, thence by river steamer. Places of worship, Church of England, Wesleyan, Presbyterian church, and Templars' hall. It has a court-house, police station, one hotel, school-house with average attendance of 52 scholars; several stores, one accommodation house, and branch of English and Scottish Bank. Agricultural district; maize is principally grown. Formation: alluvial, arising from drift and sediment from floods. Population, about 250.

GLANMIRE (33° 23′ S. lat., 149° 44′ E. long.), a postal (postal notes issued) and mining township, in the county of Roxburgh, electoral district of Macquarie and police district of Bathurst, situated on Sydney-Bathurst road, about 7 miles E. of Bathurst, and 117 miles (144 postal) W. of Sydney. A coach runs to and from the Raglan Railway station, 4 miles distant. The diggings were first discovered in June, 1865; from time to time a fair number of miners have been employed. Half-time school has an average attendance of 12 scholars. Agricultural and pastoral district. Formation: decomposed granite and clay. Population about 50.

GLEBE (33° 52′ S. lat., 151° 12′ E. long.), a suburb of Sydney, near Blackwattle Bay, on the SW. side of the city, to which it is immediately contiguous, in the electorate of the Glebe, with postal, money-order, telegraphic, and Government savings bank facilities. The tramcar runs every 10 minutes throughout the day, fare 2d. It is an independent municipality, having been proclaimed August 1, 1859, and contains an area of three-quarters of a square mile; 23 miles of roads; and ratable property of the annual value of £147,280. Many of the citizens of Sydney have their residences here. There are upwards of 20 hotels, 15 schools, comprising a public—with average attendance of 1,100, to 1,200—a denominational, Ragged school, and 12 private schools; also 8 places of worship and Salvation Army barracks, a branch of the Joint-Stock Bank, School of Arts and Free Library with 1,600 volumes, handsome Town Hall, police-station, court-house, flour mills, biscuit factory, and a number of other manufactories. Formation: ironstone and sandstone. A hospital for sick children has been established here, under the management of a Board having both ladies and gentlemen on its Committee. The suburb is lighted by gas and has a permanent water supply. Population about 17,550. Newspaper: *Glebe Argus*.

GLEN INNES (29° 45′ S. lat., 151° 46′ E. long.) is pleasantly situated at an elevation of 3,518 feet above the sea-level, on the Rocky Ponds, about four miles from the Beardy river, on the main Northern Overland Railway, 399 miles (423 postal) NNW. of Sydney; rail being the means of reaching the metropolis; fare to Sydney, 374 miles, 73s. and 48s. 9d. Coaches run to Inverell and Grafton. The main Northern line to the Queensland border is through the town. Hotels: Royal, Great Central, Tattersall's, Mount Pleasant, Railway. It is in the county of Gough, electorate and police district of Glen Innes, and takes its name from Major Innes, one of the oldest of the New England settlers. There are four churches—Episcopal, Roman Catholic, Wesleyan, and Presbyterian and Salvation Army; a superior public school (average attendance 350), convent school, with average attendance of 150, grammar school, and ladies' boarding school, and Church of England school; court-house, post savings bank, money-order and telegraph office, branches of the N.S. Wales, Joint-Stock and Commercial Banks, free public library with 600 volumes, School of Arts, and Good Templars', Masonic, and Church of England halls. It has been a municipal district since June 17, 1872, having 204 miles of roads and streets, of which 42 miles are formed. Annual value of ratable property £20,100. There are eight stores and numerous other business places, also two tanneries, sawmills, flour mill, butter factory, boot factory, &c.; police barracks, hospital, town hall. Fire brigade has fire engine and 1,500 ft. of hose. The water supply is obtained from tanks holding 16,000 gallons, and township lighted by gas. The district is principally agricultural, but sheep stations and sheep-farming have numerous representatives; much mining is carried on, and the country is believed to be rich in minerals, particularly tin, gold, silver and bismuth. Most of the mines are worked on tribute. The output of gold for 1899 was 500 ounces.—VEGETABLE CREEK, now called Emmaville, the most important tin and emerald field in the colony, is within 26 miles distance. The soil is of a rich black character. Formation: principally basalt with outcrops of granite. The Newton Boyd road affords a useful means of communication between the New England district and the seaboard by daily coach to Grafton. To South Grafton the distance is 110 miles, but the distance by the proposed Railway Survey is 96 miles. To Inverell the distance is 42 miles, and the coach runs daily. Wheat, oats, and cereals generally are principally cultivated. Stock returns for 1899: 13,908 horses, 98,186 cattle, 752,997 sheep. Area 2,528,140 acres. Population about 3,200; in the census district, 12,000. The local newspapers are the *Glen Innes Guardian* and *Examiner*, both bi-weeklies.

GLOUCESTER (32° 2′ S. lat., 152° 0′ E. long.), a post town with money-order office, savings bank, and telegraph station, 184 miles N. of Sydney, in the police district of Port Stephens, and electorate of Gloucester. A coach runs to Hexham, the nearest railway station, 68 miles distant. There is a hotel, an Episcopal place of worship, provisional school, and a police-station. The district is chiefly pastoral, over 4,000 acres under crop producing wheat, maize, barley, potatoes, and oats. Population, town and district, 450.

GONGOLGON (30° 12′ S. lat., 147° 0′ E. long.), a township, on the Bogan river, with post, money-order, and telephone office and savings bank, about 27 miles from Brewarrina, 464 miles (466 postal) W. of Sydney, and 36 miles SE. from Byrock railway station, county Cowper, police district of Bourke, and electorate of Cobar. Byrock is the nearest railway station, to which a coach runs twice a week (fare 15s.), and from Nyngan once a week. Hotels: Commercial and the Royal. State school. Gongolgon is the main stock route to Brewarrina. Population about 50.

GOODOOGA (29° 0′ S. lat., 146° 59′ E. long.), (co. of Narran and electorate of the Barwon), a township, with telegraph station, savings bank, and money-order office, on the banks of the Bokhara river, 80 miles NW. of Brewarrina, 562 miles N. of Sydney, and about 10 miles from the Queensland border. Byrock is the nearest railway station, distant 141 miles, to which coaches run *viâ* Brewarrina. Hotels: Commercial and Telegraph, a hospital, and a public school, average attendance, 40. Population, 220. Goodooga is a pastoral district.

GOOLAGONG (33° 36′ S. lat., 148° 35′ E long.), co. Forbes, electorate of Grenfell, on the Lachlan river, 244 miles W. of Sydney, between Cowra and Forbes, distant from the former 25 miles, and from the latter 33 miles, with postal, savings bank, telegraph, and money-order facilities. Hotels: Royal and Commercial. It has two churches, Episcopal and Roman Catholic, Progress Committee, public school with average attendance of 40, two stores, and a police barracks. Cowra, the nearest railway station, is reached by coach. Coaches also to Forbes and Grenfell. The district is agricultural and pastoral, and the land in the locality is of a very superior quality. The progress of the town is greatly hampered by the want of a bridge, drovers and stock-owners being particularly inconvenienced. Population of town about 225; within a ten mile radius, 1,000.

GORDON (late LANE COVE) (33° 40′ 30″ S. lat., 151° 10′ E. long.), a post town with money-order office, telegraph station, and savings bank, in the county of Cumberland, electorate of Willoughby, 9 miles N. of Sydney, situated about midway between the Lane Cove river and Middle Harbour, 1½ mile from each. It is a railway station on the Milsons Point Hornsby Junction Line, 379 feet above sea-level; fares 1s. 3d. and 10d. Hotels: the Gardeners' Arms, Green Gate, Traveller's Rest, and three general stores. About here are located some of the finest orange orchards in the colony. Grapes are also cultivated, and the whole district, which is of a pleasing and undulating character, is celebrated for its high degree of fertility and the luxuriance of its vegetation. Slate is abundant, but the kind used for roofing purposes is not met with. Brick-clay and freestone abound in most parts. The schools here are public (average attendance 225), a Roman Catholic school, and a convent. The population numbers about 1800, for whose spiritual wants are provided an Episcopal, a Wesleyan, Presbyterian, and Roman Catholic places of worship. There is a permanent water supply. It was incorporated in 1895, and has ratable property of the annual value of £10,680.

GOSFORD (33° 28′ S. lat., 151° 22′ E. long.), a post, savings bank, telegraph and money-order township, and railway station, on the shore of Brisbane Water, at the head of a fine sheet of water, near Broken Bay, about 50 miles N. of Sydney. It is in the county and electorate of Northumberland, and police district of Brisbane Water, and is divided into Gosford and East Gosford, the former being the Government township. The hotels are the Royal, Union, Fern Tree. Public buildings are: Episcopalian, Wesleyan, and Roman Catholic churches, a public school with average attendance of 100 scholars, School of Arts, Oddfellows and Masonic lodges, with a library of 900 vols., a court-house, lock-up, several stores, and police barracks. The Homebush-Waratah railway line passes through the township, fares to Sydney, 8s. 6d. and 5s. 6d. It is chiefly a timber-producing district, of which great quantities are exported, but is also highly adapted for fruit-growing, and large blocks of land are being cleared for farms. The town was incorporated on 10th November, 1886, and has ratable property of the capital value of £56,300. Formation:

principally coal and iron. Population, town, 670, and district, 1,500. Newspaper: *Gosford Times*, published every Friday.

GOULBURN (34° 45′ S. lat. 149° 45′ E. long.), county Argyle, with post, money-order, telegraph and savings bank facilities, is a city of great importance, being the principal depôt of the southern inland trade, with postal, telegraphic, money-order office, and Government savings bank. It is situated about a mile S. of the junction of the Mulwarree Ponds and Wollondilly river, and lies distant from Sydney 134 miles in a south-westerly direction, at an elevation of 2,071 feet above the sea-level. Fares: Sydney to Goulburn, 26s. 6d. and 17s. 9d. The line to Cooma branches off from here; the distance by rail from Goulburn to Cooma is nearly 130 miles. The most important hotels are the Royal, Commercial, White Horse, Mandelson's, Palace, and Hibernian. It was made a city in 1864, the diocese being known by the same name; the first occupant of the see was the Right Rev. Mesac Thomas, D.D., who died 16th March, 1892. The present bishop is the Right Rev. W. Chalmers, D.D. There is also a Roman Catholic bishop, Dr. Lanigan, and a coadjutor bishop, Dr. Gallagher, with right of succession. The city is well laid out with broad thoroughfares, crossing each other at right angles. The more important of the public edifices are the various places of worship, of which the Church of England cathedral is one of the most prominent; The Roman Catholic cathedral is a very fine edifice, built of stone. Other places of worship are Presbyterian, Wesleyan, and one at West Goulburn (Church of England), and Primitive Methodist chapel; there are also three small religious edifices at North Goulburn, St. Nicholas (Church of England) Sacred Heart (Roman Catholic) and Wesleyan. The hospital is an old-established and important institution, erected at a cost of about £7,000. The Mechanics' Institute, with library of over 8,000 separate works, Convent of the Sisters of Mercy, St. Patrick's College, the post and telegraph office are fine buildings. The gaol, erected at a cost of £72,000, and the railway station, are important places, the court-house is another ornament to the city, and the town hall is a neat building adjoining the post office. Kenmore Hospital for the Insane, is about a mile-and-a-half from the city boundary. There are four public schools (average attendance, 1,500) and a Roman Catholic denominational school; also several private schools. Banks: Commercial, N.S. Wales, English and Scottish, Joint-Stock, Australasia, City, and London. Fire brigade (two stations) has two fire-engines, three reels and ladder waggon, and 2,100 feet of hose. There are two tanneries here; also two large boot and shoe factories, two flour mills (City and Argyle), and two breweries. Coaches run to Taralga, Laggan, Crookwell and Wheeo. The prosperity of Goulburn mainly depends on its commercial position and on the agricultural resources of the country, which are of a very productive character. Goulburn was proclaimed a municipality on June 4th, 1859. It has ratable property of the annual value of £57,570, and 145 miles of roads. The city is lighted with gas, and a copious supply of water is laid on from the Wollondilly river, about a mile and a half from the town; capacity of settling tank, 2,388,000 gallons; of service reservoirs, 265,000 gallons; pressure in main, 20 lb. to 70 lb. to square inch. Chief produce of the district are wheat, maize, barley, rye, oats, potatoes, butter, cheese, bacon and hams. Stock returns, 1899: horses, 7,317; cattle, 34,576; sheep, 403,180. Area, 1,085,054 acres. Population of the city, 10,720; number of dwellings, 2,020. Area, 4 square miles. The newspapers are the *Goulburn Herald*, Monday, Wednesday, and Friday; *Evening Post*, Tuesday, Thursday and Saturday.

GRAFTON (29° 40′ S. lat., 152° 55′ E. long.) is a city, with postal, money-order, telegraphic, and savings bank facilities, distant from Sydney by land 528 and by sea 342 miles NE., several steamers belonging to the North Coast Steam Navigation Company plying between Grafton, Sydney, and Newcastle with marked regularity; return fares: £2 5s. saloon, £1 5s. steerage. The principal hotels are Holmstein's, McMahon's, Egan's, and the Crown. In South Grafton the principal hotels are the Steam Ferry, Post Office, and Cowan's. The Roman Catholic See of Grafton was created in 1888, with the Rt. Rev. J. J. Doyle as Bishop. Dr. A. V. Green is Bishop of the Anglican See of Grafton and Armidale. It is a municipality (proclaimed July 19, 1859), with 38¼ miles of roads and streets, and property of the annual ratable value of about £24,470, and port of entry and departure, in the county of Clarence, electoral and police district of Grafton. It is pleasantly situated on both sides of the Clarence river, about 45 miles from the sea, from which it is navigable, the river here being about half a mile in width, with good wharves and a patent slip for the shipping. The entrance is being improved in conformity with plans prepared by Sir John Coode. The city is composed of North and South Grafton. The North side is divided into four wards—East, North, South and West. South Grafton has been formed into a separate municipality, with ratable property of a capital value of £65,100. North Grafton is the larger and more important section of the city; a steam ferry and punt connect the two, and another ferry, about a mile lower down, gives communication with the parishes of Clarenza and Ulmarra. Grafton may be considered a steadily rising place, the rich agricultural lands being its mainstay. There are local branches of the Commercial of Sydney, New South Wales, Australian Joint Stock, and English and Scottish and Savings Banks of New South Wales. The churches rank in about the following order as regards architectural merit: Church of England, Presbyterian Church of New South Wales, Roman Catholic, Baptist, Presbyterian (Synod of East Australia), Wesleyan, and German Evangelical. The Church of England cathedral is a brick building of considerable architectural pretensions. South Grafton has also a Roman Catholic and an Anglican church and a mechanics' institute. There are also three saw-mills, one tannery, two engineering establishments, gas works, two aerated water manufactories, and the city is well supplied with stores of every description. In the Court-house, two Courts of Assize, three Quarter Sessions and four District Courts are held during the year. This is the headquarters of the Chairman of the Land Board for the Northern district, also of the district surveyor and district inspector of schools. The hospital consists of two large two-storey brick buildings, having the services of two paid medical officers, and two honorary medical officers, and is under the management of a large staff of trained nurses. There are also a district gaol and a lock-up, with police quarters, an Agricultural and Pastoral Society, one Oddfellows', two Foresters', German Club, A.H.C. Guild, Masonic lodge, and other local institutions. The streets are laid out at right angles, and lighted with gas. There are two public schools, with average attendance of over 1,100 pupils, and several private schools in Grafton, besides two convent schools. The leading insurance companies have agencies at Grafton. There is a fire brigade with two stations, two fire engines, and 800 feet of hose. The lowlands on either side the Clarence river are among the richest in the colony, and suitable for the growth of sugar, tobacco, and many other tropical productions, acres being under cultivation in the Grafton and Clarence districts, producing maize, potatoes, sugar, and oranges. There are several sugar-mills, of which the Colonial Sugar Refining Company's is among the largest in Australia. They are all worked by steam power, and crush for about five months of the year, commencing in July and August. Cereals, except maize, are not extensively cultivated. The value of crops in 1899 was:—Maize, £82,500; sugar cane, £48,600; potatoes, £7,500; dairying, £70,536; eggs and fowls, £45,000; cattle, £66,755; timber, £40,000; also pigs: fat and baconers, £15,000; fruits and vegetables. Fat cattle, trucked by rail at Glen Innes and Tenterfield, and sent per steamer direct. Horses sold for Indian and Sydney market. Fish sent per steamer bi-weekly to Sydney. The New South Wales Fresh Food and Ice Company have established a branch business at Grafton, where creamery butter is made, bacon cured, and ice manufactured. In connection with this large business the company have fifteen creameries, and also treat the cream from most of the district factories. The dairying industry is developing into large proportions. The Solferino gold reefs are still worked on a small scale. Reefs are also being worked near Nana Creek, Coramba and Bucca Creek. There is a copper lode about 12 miles above the navigable part, and antimony is abundant. Cinnibar leases are being worked at Yugilbar, and coal exists all over the district. The country is well suited for pastoral purposes, and is taken up with stations principally devoted to the rearing of horses and cattle. Stock returns, 1899: 17,432 horses, 91,011 cattle, 3,116 sheep. Area, 1,355,022 acres. The Australian Meat Works are at Ramornie, nine miles distant, the first of the kind in Australia. Several steamers run weekly trips between Sydney and Grafton, and besides this there is a daily mail to Sydney by coach *viâ* Dalmorton and Glen Innes. Coaches also leave Lawrence bi-weekly for Casino, and daily from Chatsworth for Woodburn. There is a bi-weekly coach service with Bellinger, Bucca Creek, and Coramba. It is 110 miles from Grafton to Glen Innes, 83 from Grafton to Lismore (*via* Casino), and 25 from Chatsworth (Clarence) to Woodburn (Richmond River). Small steamers ply daily between Grafton and centres on the Lower Clarence, at very reasonable fares. Steam droghers and a passenger launch ply to the upper part of the river as far as Copmanhurst, 35 miles above Grafton. A large shipping trade is carried on with Sydney, and a considerable portion of the New England and Tableland trade still finds its way here for shipment. Grafton has two jockey clubs, two water brigades, two rowing clubs, and a theatre. Water supply from wells, tank, creek, and river. Formation: principally sandstone. The population of the city is 5,020. The *Clarence and Richmond Examiner*, the *Grafton Argus*, the *Grip*, *South Grafton Clarion*, and *Diocesan News* are the local newspapers.

GRANVILLE is a town in the county of Cumberland 13 miles W. of Sydney, fares, 1s. 3d. and 10d. It is an important railway junction, has a post, money-order, savings bank, and telegraph office. It is situated on the Duck River, in the electoral district of Granville, and police district of Parramatta. There are five hotels (Granville, Royal, Exchange, Race-course, and Vauxhall), branch of Commercial Bank; places of worship, Episcopal (St. Mark's), Roman Catholic, Presbyterian, Wesleyan, Baptist, Congregational and Primitive Methodist, three public schools with average attendance of 736, and a School of Arts, with over 1,000 vols. The Town Hall is a handsome building, one room being set apart for a public library. The following are the principal manufactories in the district:—Clyde Engineering Company, Victoria pipe and tile works, numerous brick-works, Ritchie's plough factory, Brunton's extensive flour-mills, Bergan & Son's tweed factory, several tanneries, kerosene works, and a co-operative fire-brick yard. The Stockowners' Meat Export Company have expended £40,000 in the erection of a large meat works. The Rose Hill race-course is within the Borough, which was incorporated in January, 1885, has 60 miles of streets, and ratable property of the annual value of £25,990, and a population of about 4,700. The borough is lighted by gas. Newspaper: *The Advertiser*.

GREENWICH, a post-town and telegraph station situated on the Lane Cove River in the county of Cumberland, about three miles west from Sydney, with which there is frequent daily communication by steamer; nearest railway station is Edward's Road. There is a public school, from the immediate

vicinity of which are some picturesque views. The water supply is permanent. Lighted with gas. Has asphalt and petroleum works; in the latter, tanks to hold 1,000,000 gallons are being built. A channel is being made in Gore Bay to admit vessels of 6,000 to 7,000 tons; these works are estimated to cost £25,000. Other improvements are in contemplation. Population about 300. Geological formation: sandstone.

GRENFELL (33° 53 S. lat. and 148° 13′ E. long.), 287 miles WSW. of Sydney, is an agricultural, pastoral, and goldfield town, on the Emu creek, bounded on the north by Forbes, east by Cowra, south by Young, and west by Marsden and the Bland Country, communication being by rail from Sydney daily to Young, and thence by daily mail coaches, which leave about 9 A.M., reaching Grenfell at 1.20 P.M.; travellers may also come *viâ* Cowra, from whence there is a tri-weekly coach, leaving on Tuesday Thursday, and Saturday. A mail leaves Grenfell daily for Sydney *viâ* Young. A railway is to be built shortly from Koorawatha on the Blaney-Howden line, 29 miles. The Weddin Mountains rise to the SW., 7 miles from the town. Grenfell is an extensive and important district as regards its agricultural and pastoral resources. Its mineral resources, chiefly gold, embrace extended areas in various directions in the immediate vicinity, and for miles around defined quartz reefs encased between granite walls, and in which some extraordinarily rich deposits of gold have been taken. Deep alluvial leads are also known to exist, and there are three steam saw-mills, two flour-mills, and two cyanide works, and eucalyptus factory. The town is principally sustained by agricultural and pastoral pursuits, wheat and corn thrive, and the vine appears to luxuriate here equally as well as it does in the Albury district. Grenfell is in the county of Monteagle, parish of Brundah, and Southern gold-fields and Grenfell electoral and police district. The district is incorporated, and has 10 miles of roads, and ratable property of the annual value of £6,230. It is a Government savings bank, money-order and telegraph station, with a very successful Agricultural, Pastoral, and Horticultural Association, a Mutual Improvement Society, and Debating Institution, and Mechanics' Institute, with library of 1,200 volumes; also Masonic, Oddfellows' and Foresters' lodges. Principal hotels: Royal, Tattersall's, Still's, Albion, and Brian Boru. Banks: Joint Stock, N.S. Wales, Union and Australasia. Schools: one public, average attendance 180, and a denominational (R.C.). Churches: Holy Trinity (Episcopal); St. Joseph's (R.C.); St. Andrew's (Presbyterian); and Wesleyan; Salvation Army barracks. The principal public offices are the police and district court, land office, hospital, the telegraph and post-office, Municipal Council Chambers and School of Arts. There is a Masonic hall, Temperance hall, Oddfellows' hall, and a number of general stores. There are about 80,000 acres of land under cultivation, producing wheat, maize, oats, potatoes, and wine. Formation: granite. Population of town 1,000, of district about 14,000. Newspapers, *Grenfell Record* and *Grenfell Vedette*.

GRESFORD (32° 28′ S. lat., 151° 32′ E. long.), a postal town, with Government savings bank, money-order office, and telegraph station, county, electorate, and police district of Durham, 144 miles N. of Sydney, on the Paterson river. There is a good road from Gresford to Maitland, distant about 28 miles SE., which is the nearest railway station, coach fare, 5s. Two hotels, the Junction and the Gresford; Anglican and Roman Catholic churches, public school, with average attendance of 54 pupils, a School of Arts, butter factory (outputting four tons weekly), wine cellars, and three stores. Country round both agricultural and pastoral. Vines are largely grown. A police court has been established, and sits fortnightly. Formation: principally limestone. Population, about 400. Water is obtained from tanks and the river.

GRETA (32° 40′ S. lat., 151° 36′ E. long.), a colliery town and railway station, which has a post, telegraph, money-order office, and savings bank, 3 miles from Branxton, 32 miles from Newcastle, and 107 miles N. (postal) of Sydney, in the county of Northumberland, police district of Maitland and electoral district of Singleton. Fares from Newcastle, 4s. 0d. and 2s. 4d.; or direct from Sydney, 10s. 6d. and 10s. 4d. Hotels: Sportsman's Arms, Prince of Wales, Family, Railway, and Tattersall's. There are two collieries in the district, employing about 177 men, the output of coal for 1899 being 63,154 tons, valued at £13,563. There are two public schools, a Roman Catholic school, conducted by sisters of charity, mechanics' and miners' institute, with 1,000 volumes. Anglican, Presbyterian, Wesleyan, Primitive Methodist, and Roman Catholic places of worship, four large stores, and minor ones, 2 medical dispensaries, and a population of about 1,000. In addition to being a mining district, it is also largely cultivated for vines, the wines known as the Dalwood, Fernhill, Cote d'or, &c., being in considerable repute. The vineyard "Kirkton," about 8 miles distant, is famous for its wines. The district is incorporated, and has 18¾ miles of streets, formed and unformed, and ratable property of the annual value of £3,680.

GUILDFORD, a post town and railway station, 16 miles S. of Sydney, county of Cumberland, electorate of Sherbrooke and Granville, and police district of Parramatta; fare, 1s. 7d. and 1s. There is a public school, average attendance 43. Episcopalian church, I.O.G.T. society, several stores, and a population of about 500, employed principally in agricultural pursuits.

GULGONG (32° 22′ S. lat., 149° 32′ E. long.), a mining township, in the county of Phillip, 198 miles W. (207 postal) from Sydney, and 18 from Mudgee, between the Cudgegong river and the Wyaldra or Reedy creek, in the electorate of Mudgee. Communication with Sydney is by coach to Mudgee, 18 miles, thence the rail. The hotels are Tattersall's, Centennial, Post Office, Young's, Family, Commercial, Prince of Wales, and Belmore. It is mainly an alluvial goldfield extending over a considerable area, being 8 miles east and west, and 9 miles north and south, the leads lying under basalt, average sinking, 150 feet. It has three churches, Anglican, Roman Catholic, and Presbyterian: branches of the Australian Joint-Stock Bank and Bank of N.S.W., one flour mill, two schools, public school has an average attendance of 130 pupils, hospital, post, telegraph, Government savings bank and money-order offices; police camp, and court-house. A free library, under the control of the Municipal Council, with 1,040 vols. The output of gold for 1899 being 3,098 ozs., valued at £11,992. Reefing is coming into prominence. Fruit and vine growing also receiving attention. Agriculture is now to a great extent superseding mining, and a large portion of non-auriferous land has been selected. It is well adapted for farming, being alluvial flats and low hills, with a good depth of rich red soil. Gulgong has been incorporated since February 5, 1876, the municipality covering 36 square miles, there being 68 miles of roads and streets, and property of the annual ratable value of £8,870. Water is supplied from a reservoir near the town. There are estimated to be about 300 miners at work in the district, the total population being about 2,100. Newspaper, the *Gulgong Advertiser*.

GUNDAGAI (35° 4′ S. lat., 148° 6′ E. long.), a post town, with money-order, post office savings bank, telegraph office, and railway station, on the banks of the Murrumbidgee river, 251 miles (289 postal) SW. of Sydney, fares, 55s. 3d. and 37s. It is in the county of Clarendon, electoral and police district of Gundagai, and comprises Gundagai North and South. District Courts and Courts of Quarter Sessions are held periodically and Courts of Petty Sessions are held daily. The Commercial and Bank of N.S. Wales have a branch here. There are four schools, two public (with average attendance of 160) (one at North and one at South Gundagai), a Roman Catholic and a private school; three churches, Anglican, Wesleyan, and Roman Catholic (St. Patrick's), a gaol and police barracks, literary institute, with 1,800 vols., and an assembly room. Several insurance companies are represented, and there are five first-class hotels with others of a less pretentious character. The iron bridge over the Murrumbidgee, connecting with South Gundagai, together with the viaduct. Gundagai possesses 2 Masonic, Oddfellows', Good Templars', and Sons of Temperance Lodges. The Murrumbidgee is navigable as far as Gundagai. The river flats are liable to floods, but the present township is high and dry. The original township on the river flat was washed away in June 1852, when 71 dwellings were wrecked and 81 lives lost. The country is taken up principally by squatters and small farmers. The land is in places, particularly along the banks of the river, of a very fertile character, producing wheat, maize, barley, oats, potatoes, tobacco and wine. Stock returns: 1899, 13,461 horses, 42,474 cattle, 982,990 sheep. Area, 1,452,460 acres. Dairy produce: butter, cheese, bacon and hams. Several gold mining properties are in active operation in the immediate neighbourhood. Gold returns for 1899 were 15,484 ozs., valued at £57,776. Slate quarries have been opened here, and splendid white marble exists within a few miles of the town. Large deposits of chromium have been discovered. A line of railway from Gundagai to Cootamundra, a distance of 34 miles, join the main Southern line. Coaches run to Tumut and Adelong daily, fare, 7s. 6d. The district is incorporated, and has ratable property of the annual value of £9,460. Population, 1,250; in the census district, 3,680. The *Gundagai Times* (Tuesday and Friday), established 1858, is the local paper.

GUNDAROO (also known as LOWER GUNDAROO) (35° 2′ S. lat., 149° 18′ E. long.) is a post town, with telegraph station, money-order office, and savings bank, on the Yass river, 20 miles NW. of Queanbeyan, and 181 miles SW. of Sydney. It is in the county of Murray, police and electoral district of Queanbeyan. There is coach communication with Gunning and Queanbeyan, Gunning being the nearest railway station, 20 miles distant. There are in the locality two hotels—Royal and Star—school (public, has average attendance 47), a court-house, and four stores. Roman Catholic and Presbyterian places of worship. M.U.I.O.O.F. lodge, public library and reading-room. Wheat, rye, maize, oats, barley, and potatoes are principally grown in the district. There are also several stations. Population about 150.

GUNNEDAH (31° 0′ S. lat., 150° 16′ E. long.), a postal, Government savings bank, money-order township and telegraph station, in the electorate of the same name, on the Namoi river, near its junction with the Mooki, 296 miles NW. of Sydney, connected with Newcastle by a line of railway called the North-Western, opened in September, 1879, which branches from the Great Northern at Werris Creek (41 miles), fares from Newcastle (196 miles), 38s. 9d. and 25s. 9d., or direct from Sydney, 50s. 9d. and 33s. 6d. Hotels: Royal, Court House, the Freemasons', Imperial, Railway View, Paragon, and Caledonian. It is in the county of Pottinger, and police district of Gunnedah. It lies 50 miles W. of Tamworth, 874 feet above sea-level, and is incorporated, having 35 miles of roads and streets and ratable property of the annual value of £10,220. Coaches run to Coonabarabran, Coolah, Mullaley, Tambar Springs, Carroll, and Tamworth. Institutions: N.S. Wales and Commercial banks, public school, with average attendance 380 scholars, 2 private, and a convent school; Episcopal, Wesleyan, and Roman Catholic churches, and Presbyterian services bi-weekly; court-house, lock-up, and police barracks; post and telegraph office, and school of arts, with 4,000 vols., 11 large stores, wool washing and soap works, boiling down and meat freezing works, and two sawmills. Irrigation for

farming purposes on the banks of the Namoi has been established. Formation: sandstone. 25,000 acres under cultivation, 10,000 acres under wheat. Produce: wheat, maize, barley, potatoes, cheese, butter, bacon and hams. There are five small collieries in the district. Population of town, over 1,000. Local papers: *Namoi Independent* and *Gunnedah Advertiser.*

GUNNING (34° 45′ S. lat., 149° 16′ E. long.), a postal, money-order, savings bank, and telegraph township, situated on the main southern road, and Meadow Creek (1,893 feet above sea-level), 24 miles NE. of Yass, in which electorate it is, about midway between Goulburn and Yass, and 165 miles SW. of Sydney, in the county of King. It is in direct railway communication with the metropolis; there are four trains each way daily, fares, 32s. 6d. and 21s. 9d. Coaches run to Gundaroo (fare, 7s.) and other places. Hotels: Frankfield, Telegraph, and Commercial. Churches: Roman Catholic (of stone), Church of England, and Wesleyan; public school, average attendance 80, four principal stores, creamery, a steam flour-mill, branch of the Commercial Bank, Temperance Hall, School of Arts, Good Templars, Oddfellows' lodge, and Sons of Temperance Society, a court-house, and an Agricultural Society. Court of Petty Sessions is held fortnightly, and a Land Court every month. Water supply from well 21 feet deep. Agricultural and pastoral district. Population about 600.

GUNTAWANG (32° 21′ S. lat., 149° 32′ E. long.), a post town in the electorate and police district of Mudgee, 298 miles W. from Sydney, and situated on the Cudgegong river. Mode of communication is by coach, Wednesday and Saturday, to Mudgee (15 miles), the nearest railway station. Coaches also run to Gulgong on Wednesday and Saturday, to Wellington Friday and Tuesday. It has Episcopalian church, a public school, average attendance 32, condensed milk factory, and School of Arts with 400 vols. Agricultural and pastoral district. Formation: basalt, slate, and sandstone. Population about 200.

GUYRA (30° 22′ S. lat., 151° 35′ E. long.), a mining, agricultural and pastoral township, 386 miles N. of Sydney, in the counties of Sandon and Hardinge, electoral districts of Bingera and Glen Innes, and police district of Armidale, with postal, telegraphic, money-order, and savings bank facilities, a railway station, fares from Sydney 67s. 3d. and 44s. 9d.; two hotels, the Guyra and Royal; Anglican, Union, and Roman Catholic places of worship, public school (with library), School of Arts, court-house, police-station, several stores and shops, and a saw-mill and a chaff factory. Coaches run to Ollera, Wandsworth, Kangaroo Camp, and Tingha, fares 6s., 10s. 6d., 12s. 6d., and 15s respectively. Population 200.

HAMILTON (32° 57′ S. lat., 151° 46′ E. long.), a post town, with telegraph, and money-order office, savings bank and railway station, in the electorate of Waratah, on the Great Northern Railway, 100 miles N. of Sydney; fares from Sydney, 12s. 6d. and 8s. Among the hotels are Cherry's, Miners' Exchange, and Queen's Arms. Omnibuses and trams ply frequently to Newcastle. It has English, Roman Catholic, Presbyterian and Wesleyan churches; a Mechanics' Institute, with a library of 1,200 vols., public school, with average attendance of 700, a denominational school (R.C.) and neat municipal chambers. Fire brigade has two reels and 1,800 feet hose. The Castlemaine brewery is here. The municipal district was proclaimed December 11, 1871. Annual ratable value of property is £26,960, there being 19 miles of streets. Population estimated at 5,800, a large number of whom are employed in the collieries of the Australian Agricultural Company. The water supply from Hunter District Water Supply; reservoir has capacity of 405,000 gallons, pressure 60lb. to square inch, and the township is lighted by gas (incandescent lamps).

HANGING ROCK. *See* NUNDLE.

HARDEN (34° 34′ S. lat., 148° 18′ E. long.), a railway station, post, telegraph, money-order office, and Government savings bank, on the Great Southern Railway line, 228 miles from Sydney (fares, 45s. and 30s.), police district of Young, electorate of Boorowa, situated on Murray's creek, and is the starting-point for the Young, Cowra, Carcoar and Blayney Railway line, the shortest route by twenty-four hours for southern passengers to places west of Blayney to Bourke, &c. There are three hotels—Doncaster, Carrington, and Commercial; police station, a mechanics' institute, Wesleyan church, and several stores. The town is provided with a water supply. Geological formation: granite. Murrumburrah is 1 mile distant. Population of 700, engaged in mining, agricultural, and pastoral pursuits.

HARGRAVES (formerly LOUISA CREEK) (32° 38′ S. lat., 149° 29′ E. long.) is a post town with a money-order and telegraph office and savings bank, situated in the county of Wellington, police and electoral district of Mudgee, and extends from the Lewis ponds to Louisa creek. It is 181 miles NW. of Sydney, to which the coach running between Mudgee and Hill End, and passing through thrice a week, is the means of access. Tambaroora is about 21 miles, and Mudgee railway station 25 miles distant. It has two hotels, Roman Catholic, Anglican and Presbyterian churches, a public school, with average attendance of 48 scholars, police quarters, court-house, lock-up, and two stores. The district is of slate and sandstone formation, and is more or less of an auriferous character, gold returns for 1899 being 1,951 ozs., valued at £7,405. Population about 600.

HARTLEY (33° 31′ S. lat., 150° 12′ E. long.), a money-order township, in the electorate of Hartley situated on the river Lett, 33 miles NW. of Sydney, contiguous to the Great Western Railway, the nearest stations being Mount Victoria (7 miles) and Hartley Vale (4 miles). Hotel: Royal. It has Anglican and Catholic places of worship. Public school has average attendance of 36. Area under cultivation, about 4,000 acres, producing wheat, maize, rye, oats, potatoes, and tobacco. New South Wales Shale and Oil Company produced at Hartley Vale and New Hartley at Capertree for the year 20,953 tons shale, valued at £21,119. The population numbers about 800 persons; in the census district were 9,000. Hartley Vale, four miles distant, has a money-order office, railway station, savings bank, two hotels and a public school.

HARWOOD ISLAND, a post town, on the Clarence river, 312 miles N. of Sydney, county and electorate of the Clarence, and police-district of Grafton, with postal, telegraphic, money-order, and savings bank facilities. Mode of conveyance to the metropolis is by steamer, bi-weekly. Coaches run to Chatsworth Island and Woodburn. There are two hotels, Harwood and Morpeth, a public school, average attendance 120, Episcopalian, Presbyterian, Wesleyan, and Roman Catholic places of worship, and a population of about 450, engaged principally in agricultural pursuits. Harwood Island is the centre of the Clarence sugar industry, the Colonial Sugar Refining Company having their great mill here, to which the cane from all parts of the river is brought. Population in crushing season, 1,000; at other times about 500.

HAY (34° 30′ S. lat., 144° 56′ E. long.) is situated in the heart of the Riverine district, on the Murrumbidgee river, 305 feet above sea-level, 454 miles SW. of Sydney in the electorate of Hay. Post town, with money-order, telegraph office, railway station, and savings bank. The railway fares are 70s. and 45s.; return tickets are also issued to and from Melbourne *viâ* Albury at £5. Cobb's coaches leave Hay for Deniliquin (80 miles) daily, Saturday excepted, fare, 20s., and for Booligal, 20s.; Balranald, 60s. Mossgiel, 45s., three times a week, and Wilcannia twice a week, 120s. The leading hotels are Tattersall's, Caledonian, Commercial, Royal, and Crown. It is in the county of Waradgery, police district of Hay. In the municipal district are 66 miles of street, (10 formed), and property of the annual value of £27,520, representing a capital value of about £306,700. The town is well laid out, and the principal streets are planted with shade trees. There is a public park of 88 acres. Hay is the principal receiving depôt for the wool produced on the numerous stations about the Lachlan and Murrumbidgee rivers, and the railway terminus of the South-Western line. It is an important crossing place, by a fine iron bridge over the Murrumbidgee river. This bridge is 400 yards in length, with a swing to enable steamers to pass in flood seasons. The river is navigable from the Murray to Wagga-Wagga (470 miles) for a short period of the year, and from Echuca to Hay for about nine months of the year. The highest rise in the river above summer level ever known here has been 24 feet. The Episcopalians, Presbyterians, Roman Catholics, Wesleyans, and Salvation Army have places of worship here, also a convent with eight nuns, who preside over 350 children; there is also a hospital, benevolent society, Athenæum, and free library, with about 3,200 vols. Banks: Commercial, Australian Joint Stock, N.S. Wales, London and Union. Principal buildings, besides those mentioned, are the court-house, post and telegraph office, lands office, survey office, police barracks, public school (average attendance 480), Masonic hall, a theatre, two skating rinks, municipal chambers, and gaol. Hay is the centre of the Hay Land Board district, which extends to the Victorian and South Australian borders; the Board sits about 10 times a year, and the Appeal Court when necessary. Circuit Court sits twice a year; Quarter Sessions three times yearly. There are Masonic, Foresters', Oddfellows', and Temperance lodges, brewery, soap works, gas works, jockey club, Pastoral Association and Horticultural Society, and fire brigade, with one fire-engine, two reels and 500 feet hose. The town is lighted by gas and supplied with water from the municipal waterworks, pumped up from the river and carried in pipes through all the principal streets. Two tanks contain 40,000 and 30,000 gallons respectively, pressure 17 lb. to square inch. The surrounding country is principally taken up for sheep stations, but settlement is rapidly becoming thicker. Stock returns, 1899: 4,201 horses, 3,127 cattle, 535,948 sheep. Area, 4,578,402 acres. By the passing of the Hay Irrigation Act the whole of the north common, about 10,000 acres, has been vested in a trust, and most of it has been applied for. About 80,000 bales of wool are sent from Hay during the season. Hay is the cathedral city of the Riverina diocese. Population over 3,500. The *Riverine Grazier* and *Hay Standard* are the local journals.

HAYDONTON. *See* MURRURUNDI.

HELENSBURGH (E. long. 151° 8′, S. lat. 34° 10′), a post town and railway station, with money-order, telegraphic and savings bank facilities, 27 miles S. of Sydney, county Cumberland, electorate of Woronora, and police district of Wollongong, situated on Camp creek. (Fares 3s. 2d. and 1s. 10d.) There are two hotels (the Paragon and Centennial), public school, average attendance 160, branch of the A.J.S. Bank, several general stores, and a population of about 650, engaged principally in coal mining, which is the staple industry of the district, the output for 1899 being 239,310 tons, valued at £61,597. Geological formation: sandstone overlying the carboniferous strata or coal measures.

HEXHAM (32° 55′ S. lat., 151° 40′ E. long.), a small post town, with Government savings bank, telephone, and money-order office, on the south bank of the Hunter river, and railway station on the Great Northern line, and the main road to Maitland, 10 miles from Newcastle, and 108 N. of Sydney; fares from Sydney, first-class 13s. 4d.; second class 8s. 7d. The North Coast line of coaches, for about 200 miles, start daily from this place to Stroud, Gloucester, Copeland, Kempsey, &c. It is in the county of Northumberland, electoral district of Waratah, and police district of Newcastle, lies on the main road

between Newcastle and Maitland. Maize and lucerne are extensively cultivated, and dairy farming, milk vending, and vegetable gardening are the chief occupations of the farmers. Churches: Wesleyan, and Primitive Methodist; also a public school, average attendance 70. A steam ferry is here for conveying passengers, stock, and vehicles across the Hunter. Formation: carboniferous, with rich and extensive coal beds. From Hexham the mail coaches to Stroud and the Barrington start. It is the terminus of Messrs. J. and A. Brown's Minmi and Duckenfield Railway, and here are also two private shoots, where a large quantity of the Minmi coal is shipped, and a large workshop, where between 60 and 70 persons are constantly employed. Population is about 220.

HILL END (33° 5′ S. lat., 149° 29′ E. long.), an important mining township, in the county and electorate of Wellington, 3 miles from Tamba roora, about 37 miles NW. from Bathurst, by coach route 58 miles, by bridle track only 37 miles, and 145 miles (203 postal) NW. of Sydney; also by a tri-weekly coach from Mudgee. The hotels are Weir's Royal, Club House, and Commercial. It is a post town, money-order, savings bank, and telegraph station. It was proclaimed a municipality Aug. 6, 1873. It has 10 miles of road, and property of the annual value of £3,260. It dates its existence from 1853, when a rich reef was discovered near the surface, but it was in the year 1872, that the locality became famous as being one of the richest goldfields in the colony. The workings are principally in quartz, though there is alluvial ground, which however can only be profitably worked during the winter season. There are Anglican, Presbyterian, Roman Catholic, Wesleyan, and other churches, Oddfellows' lodge, and a public school, with an average attendance of 150, free public library with 500 vols. and several stores. Public buildings, in addition to those mentioned, post and telegraph office, court-house, hospital, and police barracks. Population of borough, 750.

HILLGROVE (30° 10′ S. lat, 152° 10′ E. long.), a mining township situated on Bakers Creek, with post and money-order office, telegraph station, and savings bank, in the county of Sandon, electorate and police district of Armidle, 381 miles N. of Sydney, with which communication is by coach to Armidale, 18 miles distant, thence by rail; it has a public school, average attendance 400, a convent school, and a private school, Anglican, Wesleyan and Roman Catholic churches, court house, hospital, and gaol, branch of the City Bank, and several hotels, Commercial, Sydney, Hillgrove, Tattersall's, Miner's Arms, and Eleanora. Masonic, Oddfellows'. Foresters'. Rechabites, Hibernian, Protestant Alliance, and Miners' Societies. Geological formation: metamorphic slate and granite. The district is rapidly developing, antimony gold and scheetite being the chief exports. There are a number of mineral workings, the most important mines being Baker's Creek, Eleanora, Sunlight, Baker's Creek Consols, Garibaldi, Starlight and others; gold returns for 1899 being 20,524 ozs., valued at £71,809. West Hillgrove or Metz, 5,471 ozs., valued at £19,036. A magnificent water supply is conserved, adjacent to the town, and water power and electricity are being brought into use in the mines. The town is also lighted with electricity, and is now incorporated. Population, 3,000. Local newspaper: *Hillgrove Guardian*, published weekly.

HILLSTON (33° 29′ S. lat., 145° 35′ E. long.), county of Nicholson, electoral district of the Lachlan, a post town, with telegraph station, money-order office, savings bank and Crown Lands office, 494 miles W. of Sydney, and 90 miles NE. of Hay, on the Lachlan river. A coach runs to the Hay Railway station, and three coaches per week to and from Carrathool (75 miles), also from Hay *viâ* Booligal twice a week. Coaches also run to Mount Hope, Lake Cudgellico, Gunbar, Willanthry, also to Mount Ida, Yathong, Coombie, Roto, Rankine's Springs, Mosgiel and Ivanhoe, Euabalong, Condobolin, and Forbes. Hotels: Royal Mail, Hillston Club, Gladstone, Albion, and Tattersall's; a court-house, gaol, Episcopalian, Roman Catholic, Wesleyan, and Presbyterian places of worship, a branch of the A.J.S. Bank, G.U.O. Oddfellows, mechanics' institute and library, and free public library, a brewery, wool-washing establishment, steam saw-mills, steam roller flour mill, large hospital, public school (average attendance 70), and a convent, also tennis, an athletic and racing club, and a Pastoral and Agricultural Association. The district is a grazing one, and adaptable for wheat cultivation, and settlement is progressing rapidly. Stock returns, 1899: 2,275 horses, 2,602 cattle, 290,253 sheep. Area 3,748,563 acres. Courts of Quarter and Petty Sessions are held here. The district is incorporated, and has ratable property of the annual value of £5,370. Population 760. Newspaper: *Hillston Spectator*.

HINTON (32° 45′ S. lat., 151° 40′ E. long.), post town, with telephone, telegraph, money-order office and Government savings bank, in the county and electorate of Durham, 94 miles (122 postal) N. of Sydney, in the electoral district of Paterson and Raymond Terrace, situated at the junction of the Hunter and Paterson rivers, seven miles from West Maitland, and connected with Morpeth by ferry. It has a good wharf on the Paterson river, one hotel, Episcopalian, Presbyterian, and Baptist places of worship, a brick school of arts, with 500 vols., a public school (average attendance 101). Part of the town lies high, and is reputed healthy. The district is chiefly agricultural, lucerne and maize being largely grown. The water supply is obtained by means of underground tanks. Population of town and district about 400.

HOMEBUSH (33° 53′ S. lat., 151° 10′ E. long.), a pretty suburb on the railway line, about 8 miles from Sydney, in the electorate of Canterbury, having a large frontage to Parramatta river, telegraph, money-order, and savings bank offices; also a public school (average attendance 218). There are frequent trains; fares, 10d. and 7d. Hotels: Great Wentworth and Horse and Jockey. Cattle and sheep sale yards are here. Population about 600.

HOME RULE (32° 23′ S. lat., 149° 35′ E. long.), a money-order, post, and savings bank township, in the county of Phillip, and electoral and police district of Mudgee, 185 miles (204 postal) W. of Sydney, 7 miles from Gulgong and 13 miles from Mudgee, on the banks of the Cooyall Creek. One coach runs daily to the Mudgee Railway Station (fare, 4s.), coach also to Gulgong. It has one hotel (the Queensland), and two stores, Church of England and a public school. The district is noted both for its mining, grazing, and dairying capabilities. Gold mining is also carried on, and copper has been discovered at a depth of 170 feet, about 4 miles distant, but not in payable quantities. There are two extensive vineyards, and a butter factory, about 3 miles distant. The township has a reserve of 6,000 acres, and a never-failing supply of good water. Population, about 200; district, 350.

HORNSBY (late HORNSBY JUNCTION), a post town, with money-order office, Government savings' bank, telegraph office, and railway station, county Cumberland, electorate of Willoughby and police district of Ryde, 21 miles N. of Sydney and 13 miles to Milson's Point by rail; fare 1s 3d. return; *viâ* Strathfield, 1s. 11d. return. There is a public school, enrolment 220 pupils, School of Arts, Oddfellows' lodge, Episcopal, Presbyterian, Wesleyan and Roman Catholic churches, convent, two hotels, Australian Rifles, and a population of about 1,000, engaged principally in fruit-growing. Waitara, a railway platform, is a part of Hornsby; also South Hornsby, with a post-office and public school.

HOWLONG (35° 59′ S. lat., 146° 37′ E. long.), a post-town, with money-order office, savings bank, and telegraph station, situated in the electorate of Albury, about 18 miles W. of Albury, and 389 miles (405 postal) SW. of Sydney. There is coach communication with Albury Railway Stations and Brocklesby. Hotels: Howlong, Court House, and Mill. There are Episcopal, Presbyterian and Roman Catholic places of worship, a public school, with average attendance of 65, a Roman Catholic school, Mechanics' Institute, a branch of the Bank of Australasia. Court of Petty Sessions is held every Thursday. The district, which is watered by the Murray, is of an undulating character, and is utilized for farming, wine-growing, and pastoral pursuits. The river is crossed by a splendid bridge. Population, about 200.

HUNTER'S HILL (33° 51′ S. lat., 151° 10′ E. long.) is in the county of Central Cumberland, electoral district of Ryde and police district of Ryde, and a municipality, 4 miles N. of Sydney, of which it may be considered a suburb; it is lighted with gas, and has a permanent water supply. Two lines of steamers run constantly to and from Sydney; fare, 6d. return. The principal hotels are the Gladstone Family Hotel, Garibaldi, Fig Tree, and Woolwich Pier. It was proclaimed Jan. 5, 1861, and has 40 miles of roads, and ratable property of annual value of £26,690. There is a post, money-order and telegraph office and savings bank. It is pleasantly situated on the Parramatta and Lane Cove rivers, and is a favourite place of residence for the citizens, possessing numerous fine buildings of the villa order, to which well laid-out gardens are attached. A great dock is being built for Messrs. Mort & Co. At Woolwich Point there are tin smelting works, and Laver's Manufacturing Company have put up an extensive plant. Places of worship: Episcopal (All Saints), Roman Catholic, and Congregational. Two public schools, with average attendance of 150, and a girls' grammar school. Police station, court of petty sessions, and small debts court. There is also a Roman Catholic school and Marist Brothers' College, Foresters' lodge, and a workmen's club, and several recreation grounds in the vicinity, with public wharves, at which steamers call every half hour. Population about 4,150.

HURSTVILLE (34° 1′ S. lat., 151° 12′ E. long.), a railway station on the Illawarra line, 9 miles S. of Sydney, lying 217 feet above sea-level. Fares, 11d. and 8d.; return, 1s. 4d. and 11d. It has a post, telegraph, and money-order office, two public schools (average attendance 330), several stores, two hotels, a branch of the A.J.S. Bank, two large timber yards, and a number of private residences; also Church of England, Roman Catholic, and Wesleyan places of worship. The district, which is situated in the electorate of St. George, was incorporated on 25th March, 1887, and has 113 miles of road, and ratable property of the annual value of £28,040. It is lighted with gas, and connected with the Prospect Water Supply. Population, 6,500.

ILLABO (35° 2′ S. lat., 144° 12′ E. long.), a railway station, in the county of Ashburnham, electoral district of Gundagai and police district of Forbes, 276 miles WNW. of Sydney, 2½ miles from Goobang Creek, on the main road to the Bogan, and 2 miles N. of Parkes, whence the metropolis is reached; railway fares, 53s. 3d. and 35s. 9d. The formation of the district is principally trap and slate, and allows of farming, grazing, and mining operations being carried on with success. The auriferous ground extends over a very large area. The agricultural land is unsurpassed, and is also unequalled for fruit and vine growing. The timber is principally box, currajong, myall, and pine, public school here, with average attendance 15. Population about 100.

ILLAWARRA (34° 30′ S. lat., 150° 40′ E. long.) is the name given to a beautiful, fertile, and romantic district containing the electorates of Woronora, Illawarra and Kiama, and the Northern part of Shoalhaven, commencing at Coal Cliff or Clifton, about 33 miles S. of Sydney, and consisting of a belt of land lying between the coast ranges and the ocean, and extending southwards for a distance of about 40 miles to Shoalhaven. It is of exuberant fertility, and thickly populated, being

the principal district for supplying Sydney with dairy produce, of about £600,000 sterling yearly value. The district has seven municipalities — Illawarra North and Central Illawarra, Wollongong, Shellharbour, Jamberoo, Kiama, Gerringong. The geological formation is that of the coal measures, with several areas of intrusive sub-aqueous volcanic rocks; many seams of coal of commercial value, 400 to 600 feet above water-level, from 5 to 25ft. in thickness, are seen cropping out of the mountain sides, but only one is worked. The collieries are: Mount Keira, Mount Pleasant, Mount Kembla, Bulli, Corrimal, South Bulli, Woonona, Bulli Pass, South Clifton, Coal Cliff, and Metropolitan Collieries, and the coal is of very superior quality for use of steam shipping and smelting purposes. Freestone, fireclays, and rich iron ores are abundant. Very extensive smelting works employing about 500 have been erected at Dapto by the Smelting Company of Australia. The coke industry is also an important one, extension works being in operation at Port Kembla, Bulli, &c. The chief towns and seaports are Wollongong, Kiama, Clifton, Shellharbour, Bellambi, and Bulli, and other important centres are Dapto, Albion Park, Unanderra, (which see). The municipalities of North Illawarra, Wollongong, Central Illawarra, Shellharbour, Kiama, Gerringong, are all within this thriving and wealthy district. The celebrated Illawarra Lake is also in this district. It is about 9 miles in length and 3 miles in breadth, surrounded by hills 400 to 500 feet in height, connected with the sea by a narrow channel. The views of the mountain range seen from the lake, with the surrounding scenery, are amongst the finest and most enchanting in any part of the world, and captivate tourists and artists. The highest peak is Mount Kembla, 1,752 feet. Wild fowl and fish abound. Several fishermen are maintained by supplying Sydney with fish from the lake; 200 baskets of fish weekly are frequently sent by steamer, *viâ* Wollongong, to Sydney. Produce of the district: maize, potatoes, wine, butter, bacon and hams. By the census return of 1891 the population was 12,660.

INGLEBURN, a post-town and railway station in the county and electorate of Camden, twenty-eight miles south-west of Sydney. There is a public school (enrolment 120), and two Mission churches. The district, which is chiefly agricultural, also contains a number of orchards and vineyards. Ratable property of annual rental of £1,900. Railway fare, 3s. 5d. and 2s. 2d. Population 580.

INVERELL (29° 48′ S. lat., 151° 10′ E long.), county Gough, a flourishing township on a flat bordering on the Macintyre river, 341 miles (464 postal) N. of Sydney, and 42 miles W. of Glen Innes, which is the nearest railway station. but the railway *viâ* Werris Creek and Moree has been extended to Inverell. It is in the police and electoral district of Inverell. There are coaches to Uralla, Glen Innes, Armidale, Tingha, Boggy Camp, Bora Creek, Bundarra, Warialda, Wallangra, and Bingera, thence rail to Sydney. The principal hotels are Royal Oak, Telegraph, Australian, Royal, Tattersall's, and Oxford. There are numerous accommodation houses. The churches are Episcopal, Roman Catholic, Wesleyan, and Presbyterian, all brick edifices, and Salvation Army barracks. Other buildings are the court-house, the public school (average attendance 260), a school of art with 1,500 volumes, post, money-order, savings banks, and telegraph office, roads office, gaol, hospital, and the Joint Stock, Commercial, and N.S. Wales banks, public school, and several private schools, also convent school. There are two flour-mills, about fifteen stores, and one wool-washing establishment. Among social institutions are a Masonic lodge, Oddfellows', Good Templars', and a Druids' lodge, Caledonian Society, Jockey Club, &c. The country surrounding Inverell is principally a pastoral and farming one: the soil is of a rich red and black character, especially adapted for the growth of cereals; produce of the district being wheat, maize, potatoes, barley, oats, wine, brandy, butter, cheese, bacon and hams. The vine is extensively grown, and there are some large stations. The discoveries of tin led to a great influx of population, and the soil being admirably adapted for agricultural purposes a vast quantity of land has been taken up by free selectors. Diamond mining is also very extensively carried on within a few miles of the town, with very favourable results. The recent discoveries of silver have given a fillip to mining, several claims being at work, employing several hundred men. The municipal district of Inverell (proclaimed March 4, 1872) has 150 miles of streets, 72 metalled and ratable property of the annual value of £21,990. The P. and A. Society holds an annual exhibition. The population is 3,400. The *Inverell Times* and *The Argus* are the local papers. Geological formation: granite and black soil.

IVANHOE (32° 48′ S. lat., 144° 25′ E. long.) is a post, telegraph, money-order, and savings bank town, 595 mail route miles S.E. of Sydney (situated on the Willandra and Billabong Creeks), co. Mossgiel, police district of Hillston, electorate of the Lachlan. Communication is by coach to the Hay railway station, 139 miles distant, thence rail. Coaches also run twice a week from Hay and once a week from Wilcannia and Balranald. There are two hotels, two stores, public school, police barracks and station. Several stations in police district. Stock returns, 1899: horses, 1,127; cattle, 1,839; sheep, 284,121. Area 5,325,112 acres. Population of town and district, 260. The district is purely pastoral. The water supply is obtained from the Government tank.

JAMBEROO (34° 36′ S. lat., 150° 52′ E. long.), a post, telegraph, savings bank, and money-order township in the electorate of Kiama, between Wollongong and Kiama, about 5 miles from the latter town W., and 77 miles S. of Sydney. Communication with Sydney is by coach to Kiama, thence by rail. Hotels: Ryan's and Hunt's. The district is agricultural and a dairy-farming one, and contains several butter factories. There are several stores in the village, and four places of worship—Episcopal, Wesleyan, Presbyterian, and Roman Catholic; a Protestant Hall, and a branch of the English and Scottish Bank. There are two schools. Public school has an average attendance of 60. Formation: sandstone; surface is hilly and well-watered. Three miles N. of Jamberoo is the "Whispering Gallery," which is entitled to rank among the natural wonders of the colony. The district is incorporated, with 67 miles of roads and streets, and ratable property of the annual value of £14,530. Population of district, about 1,500.

JENOLAN CAVES (formerly known as Fish River Caves), one of the grandest sights in the world, situated 113 miles W. of Sydney, in the electorate of Hartley, and about 36 miles from the Tarana railway station. The coach route most used is that *viâ* Mount Victoria. There are postal, money-order, Government savings bank and telegraphic facilities, with a public school, and a population of about 30 persons. The caves are situated in a deep valley, down which a zigzag road is being formed for about 1,200 feet. An accommodation house erected by the Government offers every convenience to tourists; assistants, guides, etc., furnished as required. The caves are in groups, very numerous, of dazzling grandeur and countless beauties, and are lighted throughout with the electric light. In the Bone Cave are numerous remains of wallabies and other animals, which have become encrusted with limestone. One lovely spot in the Imperial Cave is called the Crystal City; the stalactites are very beautiful, while immense masses of snow-white limestone hang from the roof in all directions; nothing can exceed the beauty of these caves. Recent discoveries far surpass former ones both in interest and magnitude.

JERILDERIE (35° 21′ S. lat., 145° 48′ E. long.), a municipal town, and railway station, on the Billabong River, 412 miles SW. of Sydney, and 40 miles from the Murray frontier; fares, 65s. and 45s. In the county Urana, police district of Deniliquin, and electoral district of Murray. A railway now connects Finley with the Jerilderie-Narandera line. Jerilderie has post, money-order, savings bank, and telegraph office, Mechanics' Institute, with 860 vols., public school, average attendance 100, a private school, Roman Catholic school, and three churches (Church of England, Presbyterian, and Roman Catholic), and a free public library, Masonic and Oddfellows' Lodgers. Flour-mill, five hotels — Royal, Albion, Jerilderie, Court House, and Riverina—four stores, police station, hospital, branches of N.S. Wales, and Australasia banks. Coaches run to Deniliquin, Urana, Tocumwal, Conargo, Murray Hut, Corowa, Darlington Point and Mulwalla. The district is incorporated, with 31 miles of streets, and ratable property of the annual value of £7,130. Population about 700 (district 3,600), engaged in pastoral and farming pursuits. An agricultural and pastoral show is held yearly. Stock returns, 1889, 3,155 horses, 2,456 cattle, 476,806 sheep. Area, 1,241,492 acres. Weekly newspaper: the *Jerilderie Herald*.

JERRY'S PLAINS (32° 30′ S. lat., 150° 50′ E long.), a post town, money-order, telegraph station and savings bank, on the right bank of the Hunter river, 169 miles N. of Sydney 22 miles W. of Singleton, the nearest railway station (to which a coach runs), and 25 miles S. of Muswellbrook, on the road from Singleton to Cassilis. Hotels: Victoria, Post Office, and Horse and Jockey. It is in the electoral district of Singleton, and police district of Patrick's Plains. There are two large stores, Episcopal and Roman Catholic churches, a public school (average attendance 44) and a school of arts. The district is an agricultural one principally, the low lands being especially fertile. Formation: sandstone and basalt. A court of petty sessions is held every alternate Thursday. Population, 250; of district, 3,308.

JINDABYNE (36° 23′ S. lat., 148° 42′ E. long.), a postal, telegraph and money-order township, 292 miles S. of Sydney, on the Snowy river, electorate of Manaro, co. Wallace. Communication is *viâ* Cooma, the nearest railway station, 35 miles distant. It has two public-houses, two stores, and a public school (average attendance 16), and Anglican church. Good deposits of tin have been found about the locality, and gold-mining is carried on to a small extent. From here guides and horses are obtained for the last stage on the ascent of Mount Koscuisko, 7,308 feet high, at the top of which Mr. C. Wragge established a meteorological station in 1897. Population about 100.

JINDERA (35° 57′ S. lat., 146° 53′ E. long.), a postal township, with telegraph, savings bank, and money-order facilities, county of Goulburn and electoral district of Albury, 396 miles SW. of Sydney. A coach runs to Albury station (11 miles). Hotels: the Mill and the Forest. It has an Episcopal (St. Thomas) and two German Lutheran churches, a public school, average attendance 28, a German school, two stores, a mill store, agricultural implement works, a blacksmith's shop, and a Government reservoir, with troughs for watering travelling stock. The district is an agricultural one, and the settlers mostly Germans. Population about 150.

JOADJA CREEK (34° 25′ S. lat., 150° 33′ E. long.), a postal township, with money-order office and Government savings bank, county Camden, electorate of Bowral, and police district of Berrima, 93 miles S. of Sydney, to which communication is by the company's train to Mittagong, 16 miles, thence rail; fares, 14s. 6d. and 9s. 7d. There is a public school (average attendance 117) and a Presbyterian church. Geological formation: principally sandstone. Population, 400.

JONES ISLAND (*see* CROKI).

JUGIONG (34° 47′ S. lat., 148° 37′ E. long.), a postal township, with telephone and money-order office (county of Harden, electorate and police district of Gundagai), on the river Murrumbidgee and the road between Gundagai and Yass, 226 miles (292 postal) SW. of Sydney. Coolac is the nearest railway station, 14 miles distant. There is one hotel, two stores, police barracks, and lock-up; an Episcopal (St Jude's) and Roman Catholic (St. John's) church, and a public school, with average attendance of 40, and mechanics' institute with library of 300 vols. A Court of Petty Sessions is held once a month. Much land is under cultivation in the district by small farmers, and there are numerous large sheep stations in the vicinity. Formation: granite. Population about 300.

JUNEE (Old) (34 40′ S. lat., 147° 33′ E. long.), a postal centre, in the parish of Junee, county of Clarendon, electorate of the Murrumbidgee, and police district of Wagga-Wagga, being the centre for all wool and grain traffic. It is situated on Houlahan's Creek, 290 miles SW. of Sydney, and lies 833 feet above sea-level. It is a railway station on the South-Western line, fares, 55s. 3d. and 37s. There are two hotels, Old Junee and Enterprise; a money-order, post, and telegraph office, savings bank, one store, public school, with average attendance of 24 pupils, Anglican and Wesleyan churches. There is a spacious and beautiful park. Formation: granite. In the district, which is of a mining, grazing, and agricultural character. Population about 500 persons.

JUNEE (34° 40′ S. lat., 147° 33′ E. long.), an incorporated borough, a station on the Great Southern line, 287 miles S. from Sydney, at the junction of the Narandera and Hay line, 16 miles from Murrumbidgee river (fares, 55s. 3d. and 37s.) It is in county Clarendon, electorate of Murrumbidgee, and police district of Wagga Wagga. The township contains six hotels, Royal, Union Club, Railway, Loftus, Commercial, Locomotive and the finest railway refreshment rooms in Australia; twelve stores, superior public school, with average attendance of 320, Episcopalian (St. Luke), Presbyterian, Wesleyan, and Roman Catholic (St. Joseph) churches, also a convent school, branches of the Union Bank and Bank of N.S. Wales, and Masonic, Oddfellows', Orange, and Good Templars' lodges, Salvation Army barracks, Burns club, Lizard club, court-house, Pastoral and Agricultural Association, Mechanics' Institute, Hibernian lodge and Catholic Benefit Society. Has foundry, soap works, cordial factory, and coach factory; fire brigade has 2 reels and 900 feet hose. Coaches run to Sebastopol and Temora thrice a week, and to Eurongilly twice a week. The surrounding country is chiefly pastoral, but agriculture is steadily on the increase, it being one of the largest wheat-producing centres in the colony. There is a money-order and telegraph office and savings bank. Height above sea-level, 985 feet. Junee is one of the most thriving towns in the colony; being in a good position it is a railway locomotive depôt, large sheds being in use for the purpose, and about 36 engines are stationed here. The water supply of the town is one of the largest gravitation schemes in the colony from Bethungra, 20 miles distant; the reservoir holds 137,000,000 gallons of water, and the service reservoir, 2½ miles, has a capacity of 350,000 gallons. The town, lighted with kerosene, was incorporated on the 26th of July, 1886, and has ratable property of the annual value of £12,980. Population about 2,300. Geological formation: granite. Local newspapers: *Southern Cross* and *Junee Democrat*.

KANGAROO VALLEY (34° 30′ S. lat., 150° 30′ E. long.), a post town, with telegraph, money-order office, and savings bank, in the counties of Camden and St. Vincent, electoral district of Kiama, and police district of Shoalhaven, 107 miles S. of Sydney, on the Kangaroo river. It has English, Roman Catholic, Presbyterian, and Wesleyan churches; also two hotels—Pioneer and Commercial, five stores, six schools, and a school of arts, Principal public school has an average attendance of 80 scholars. Branch of the English and Scottish Bank. Nearest railway stations are Berry, 13 miles, and Nowra, 14 miles (Illawarra). Mail coach daily to and from Moss Vale (22½ miles), Nowra, and Berry. The district is principally of a dairying character, with a large extent of land under cultivation, the soil in many places being very rich. Gold mining is carried on to a slight extent down the river. The principal shipping port for Kangaroo Valley is Bomaderry (Nowra), but traffic is also conducted by teams to Moss Vale. Formation: principally sandstone. Population 1,700, engaged principally in dairy farming; three factories being in operation. A court of Petty Sessions is held every alternate Thursday. Local newspaper: *Kangaroo Valley Times*.

KATOOMBA (33° 27′ S. lat., 150° 24′ E. long.), a post town, with telegraph, and telephone line is in use between Sydney, Katoomba, and Bathurst, money-order office, savings bank, and railway station on the Western line, 66 miles W. of Sydney, county Cook and electorate of Hartley; Friday and Saturday excursion fares, available ten days, return, 14s. 9d. and 9s. 9d. It is on one of the most elevated portions of the line, 3,350 feet above sea-level, and, being on the eastern slope of the Blue Mountains, commands one of the most extensive views in N.S.W. There are four hotels, principal being the Carrington, a number of private boarding establishments, institute, Masonic, Druids', and Rechabite lodges, Agricultural and Horticultural Society, and several sports clubs, several stores, ladies' college, branch of the Australian Joint-Stock Bank, school of arts, Episcopalian, Roman Catholic, Congregational and Wesleyan places of worship, also a number of social institutions. Court of Petty Sessions held weekly. The Katoomba shale mines are at present practically suspended. Waterfalls, magnificent valleys from 1,000 feet to over 2,000 feet deep, and other mountain scenery are within easy distance. Public school has an average attendance of 150. The district is incorporated and has ratable property of the annual value of £12,130. Jenolan caves can be reached from this place by a bridle track, or coach *viâ* Mount Victoria. Coaches also run to Katoomba Falls, Leura Falls, Minni-ha-ha Falls, Echo Point (view of the Three Sisters), Nellie's Glen, Wentworth Falls, Valley of Waters, Narrow Neck, Govett's Leap, &c. Local newspaper: *The Mountaineer*. Population about 2,000.

KAYUGA (32° 15′ S. lat., 150° 57′ E. long.), a postal township, on the banks of the river Hunter, about 4 miles N. of the Muswellbrook Railway Station, and 164 miles (182 postal) NW. by N. of Sydney. It is situated in the county of Brisbane, electorate of Robertson. Public buildings, a Primitive Methodist chapel, Church of England and public school, with average attendance of 21 scholars. The inhabitants of the surrounding district are chiefly free selectors, deriving their livelihood from the produce of the land—wheat, vegetables, fruits, and oaten hay. The formation is a kind of sandstone, overlying coal measures. A small coal mine is at work. Population about 100.

KELSO (33° 26′ S. lat., 149° 43′ E. long.), a postal, telegraph, and money-order township, Government savings bank, and railway station (fares, 28s. 3d. and 19s.), on the eastern bank of the Macquarie river, in the county of Roxburgh, police and electoral district of Bathurst, about 1¼ mile from Bathurst, with which it is connected by a substantial bridge. Coach runs to Sofala, 31 miles. Hotels: Royal and Melbourne. It lies 143 miles W. of Sydney, and contains Episcopal and Roman Catholic places of worship, a public school, average attendance 97, and a Roman Catholic school. The railway station is a neat brick building. Two large tanneries and a waggon factory. It is surrounded by country well suited for agricultural and pastoral purposes, and more or less auriferous. It is on elevated ground, about 2,154 feet above sea-level. Population, about 600.

KEMPSEY (31° 9′ S. lat., 152° 50′ E. long.) is situated on the Macleay river, in a bend of the river, about 280 miles (311 postal) NE. of Sydney. It is about 25 miles distant from Macleay river Heads, and is the principal township in the Macleay district. It is a post, Government savings bank, telegraph, and money-order township, and is in the county of Dudley, electoral and police district of the Hastings and Macleay. The three townships join each other, and are all increasing in size and importance. Kempsey proper, or as it is called—Central Kempsey—is the centre of business. The hotels and private boarding-houses are numerous, and accommodation very reasonable, principal hotels being Victoria, Royal, Commercial, West Kempsey, Great Northern, and Court House. There are numerous stores. The principal public buildings are the post and telegraph office, Hospital, Court-house, Rechabite, Good Templars', Oddfellows', and Masonic lodges, and Protestant Halls, theatre; Episcopalian, Roman Catholic, Wesleyan, two Presbyterian, one Primitive Methodist churches, two public schools (average attendance 700), and a denominational school. Municipal Free Library. Branches of the Joint-Stock, Commercial, and English and Scottish Banks are established. Fire brigade has one fire engine and 725 ft. hose. There is also a dock and slip. Dairy-farming and bacon-curing are also carried on to a considerable extent. The town is incorporated, and has 21 miles of streets, with ratable property of the annual value of £9,610, and comprises an area of about 118 square miles, embracing East, West, and Central Kempsey. Water supply from Macleay river and underground tanks. Maize, butter, and pigs are the principal products, the district ranking highest in the official returns of maize-growing districts. Zinc, copper, and antimony mines in the district. The communication with Sydney is by steamer direct, or *viâ* Port Macquarie, fare 30s., or coach weekly to Armidale Railway Station, thence rail. River steamers ply between Jerseyville and Kempsey, calling at the various townships. A fine bridge now spans the river, connecting Central and East Kempsey. Coaches run to Fernmount, Bellinger, Macksville, and Nambucca. There are splendid scenic views on the road to Armidale. Population of East, West, and Central Kempsey, about 2,200. Geological formation: alluvial river flats, with undulating hills of trap and fertile belts of chocolate soil. Local newspapers: the *Macleay Chronicle* and *Argus*.

KEMPSEY WEST. *See* Kempsey.

KIAMA (34° 38′ S. lat., 150° 53′ E. long.) (electorate of Kiama, county of Camden), a seaport town, with Government savings bank, money-order office, and telegraph station, 71 miles to the S. of Sydney by rail (fares 13s. and 8s. 10d.). It was erected into a municipality on Aug. 11, 1859, and has 17 miles of roads, and property of the annual value of £11,580. There is communication with Sydney by train three times a day and steamer twice a week. Coach runs to Jamberoo twice daily. The hotels are: Tory's, the Grand, and Brighton. A considerable trade is done with the metropolis, a large portion of the butter supply coming from the dairy farms in the immediate neighbourhood of the town. Large quantities of milk are daily shipped to the Sydney Fresh Food and Ice Company and Co-operative Milk Company. The town is lighted with gas, is pleasantly situated, and has numerous stores, two soda-water manufactories, a brewery, hospital, and dairy factory; three banks: Commercial, City, and English and Scottish, a collegiate school; with the usual public buildings, among which the churches are the most notable. These latter consist of the Scotch Church and the Episcopal Church in Terralong Street, the Wesleyan Chapel, and the Roman Catholic Church in Manning Street, and Salvation Army barracks. The post and telegraph office facing the ocean is a handsome building. Public school has average attendance of 250. There is a school of arts, and a free library, containing 1,200 vols. Orange lodge, Protestant Alliance, Oddfellows, Sons and Daughters of Temperance, Good Templars, ladies' and

gentlemen's swimming baths. Stock returns, 1899: 6,863 horses, 56,781 cattle, 5,693 sheep. Area, 378,449 acres. The soil is of a very fertile character, 3,500 acres being under cultivation, producing maize, barley, and potatoes. The mineral products of the district consist of coal of a more than average quality (one of the many seams being 22 feet thick), iron, and freestone. One of the "lions" at Kiama is the Blow Hole. It is a cave into which the sea enters, and, in rough weather, is violently thrown up in gusts of foam and spray through a natural aperture in the rock. Formation: basaltic. Staiths have been erected at the basin to facilitate the loading of vessels with blue metal, which is shipped from this port in great quantities, employing a large number of men. Population of the town is about 2,300 persons. The township is connected with Nowra by railway. The *Kiama Independent* and *The Reporter* are the local journals.

KIANDRA (35° 52′ S. lat., 148° 32′ E. long.), once an important goldfields township, Communication with Sydney is *viâ* Tumut to Cootamundra station, or coach to Cooma, 51 miles distant, thence rail. Hotels: Kiandra and Alpine. It is situated on the Eucumbene river, a tributary of the Snowy river, 316 miles SW. of Sydney, in the county of Wallace and electoral district of Monaro. It lies 4,640 feet above the sea-level. It has postal, telegraph, telephone with Yarrangobilly Caves, savings bank, and money-order facilities, court-house, School of Arts, five stores, mechanics' institute, temperance hall, Medical Assistance Society, Benevolent Society, and a public school (average attendance 40). There is no permanent water supply, but a scheme for water conservation recommended by Colonel Home provides for building a wall 150 feet high in places, and which will impound the largest sheet of artificially stored water in the colonies. The diggings lie at various distances from the town, and are alluvial. From the mountainous character of the country the temperature is very low, the thermometer sometimes registering 4° below zero; the mean annual temperature in the shade is 46°. Snow-shoeing and tobogganing indulged in during winter months. During summer the vegetation is luxuriant. The Yarrangobilly Caves, Lobb's Hole (at which copper is found), and Mount Kosciusko are 12 and 50 miles distant respectively. Population about 300, of whom about 20 are Chinese.

KOGARAH (33° 55′ S. lat., 151° 12′ E. long.), a rising township on the Illawarra railway line, about 7 miles from Sydney (train fares, 8d. and 6d.), with postal, telegraph, telephone exchange, savings bank and money-order facilities. County of Cumberland, electorate of St. George, and police district of Newtown. Lighted by gas, and has a permanent water supply. Coaches ply to Port Hacking, fare 2s. 6d., Sylvania sanatorium, fare 1s., Sans Souci, 2s. Hotels are the Sandringham, Woniora, Gardeners' Arms, Sans Souci, Moorfield, and Railway. The district is incorporated, and has 60 miles of roads with ratable property of the annual value of £19,670. There is a branch of the Bank of Australasia, Oddfellows' Hall, School of Art, with 1000 volumes, a superior public school, average attendance 900, Church of England, Roman Catholic, Congregational, Presbyterian, and Wesleyan places of worship, neat railway station, and an excellent race-course. Population of district, 3,400. A tramway runs from Kogarah to Sans Souci and Sandringham. Local newspaper: *St. George's Advocate*.

KOOKABOOKRA (29° 50′ S. lat., 152° E. long.), a mining and pastoral township, 459 miles N. of Sydney, in the county of Clarke, electorate and police district of Glen Innes; mode of conveyance is by coach (12s. 6d.) to Glen Innes or Guyra, 40 miles distant, thence rail; coaches also run to Red Range and Bear Hill. There is post and money-order office, public school, hotel, store, police-station, court-house, several stores, and a population of about 55. Little mining is being done. Geological formation: granite and slate.

KURRAJONG, NORTH and **SOUTH** (33° 30′ S. lat., 150° 50′ E. long.), 46 miles NW. of Sydney, is situated on Wheeney's creek, which takes its rise near here, in the county of Cook, and police district of Windsor. A coach runs daily to the Richmond Railway Station, 9 miles distant. Coach also to Kurrajong Heights, 11 miles. There are in the locality three churches—Episcopal, Roman Catholic, and Wesleyan—two public schools, with average attendance of 68 and 41 respectively, a store, and numerous boarding establishments. Telegraphic communication with Sydney *viâ* Richmond. The district is of an agricultural and pastoral character, the formation being alluvial deposit overlying clay and sandstone. The climate is very salubrious, and the views are delightful, embracing a wide panorama of country. Splendid orangeries abound. Kurrajong South, postal name, Gross Vale.

KURRAJONG HEIGHTS (Northfield) is a postal village in the county of Cook, and police district of Windsor, about 49 miles W. by N. of Sydney, and 11 miles distant from the Richmond Railway Station, to which a coach runs, and is connected by telephone with Kurrajong. Daily coach meets morning train, but special coach may be had. It is, as its name implies, on the summit of the Kurrajong hills, a spur of the Blue Mountain range. The buildings comprise a school, Anglican, Presbyterian churches, and two or three boarding-houses, besides several handsome gentlemen's residences. The district is much resorted to by invalids on account of its healthy and invigorating climate, tracks to points of interest have been formed by the owner of the Northfield estate. It is a beautiful and romantic locality commanding magnificent far-stretching views of the low country, fine glimpses of Mounts Hay, Wilson, Tomah, and King George, with the bold precipitous cliffs of Govett's Leap in the distance, and the deep mysterious gorges of the Grose river and Big Wheeny winding all round. Most of the English fruits flourish—apples, pears, plums, cherries, raspberries, and even gooseberries—but the orange is chiefly cultivated. It is a place of general resort as a sanatorium, and are over 2,000 feet above the level of the sea. Population about 350.

KYAMBA (35° 29′ S. lat., 147° 44′ E. long.), a post town, with telegraph office, situated 346 miles SW. of Sydney, county Wynyard, police district of Wagga Wagga, electorate of the Hume, on the Kyamba Creek; mode of conveyance, coach to Wagga Wagga railway station (9s.); coaches also ply to Tarcutta (3s.), Germanton (7s.) and Tumbarumba (10s.). Has provisional school. Geological formation: granite and slate. Population about 100.

LAGGAN (34° 26′ S. lat., 149° 33′. E. long.), a postal village, with telegraphic facilities, in the county of Georgiana, electorate of Argyle, and police district of Goulburn, 158 miles SW. from Sydney, situated on the Cutty Cuttygung creek, and the main road from Goulburn to Bathurst. Communication is *viâ* Goulburn, 28 miles distant. It contains hotel, a Roman Catholic church (1 mile distant), a public school (average attendance 28) Presbyterian church, a large steam flour-mill, and two stores. The district is reported to be auriferous, and rich also in tin, copper, lead, and other minerals. Much wheat and potatoes are also grown about here. Population about 456.

LAKE CUDGELLICO (33° 12′ S. lat., 146° 36′ E. long.), a postal town, 391 rail and coach miles W. of Sydney, with a post and money-order office, savings bank, and telegraph station. Electorate of the Lachlan, and police district of Hillston. Has hotel, Roman Catholic and Anglican churches, public school, with an average attendance of 83. Communication with Sydney—coach to Condobolin, thence train. Coaches run to Whitton railway station, 110 miles distant, to Condobolin railway station, 60 miles (*viâ* Eaubalong) and Hillston, each twice a week. Population of township about 300.

LAMBTON (32° 57′ S. lat., 151° 43′ E. long.), a postal, money-order, savings bank, telegraph station, and municipal township (proclaimed June 24, 1871), in the county of Northumberland, electorate and police district of Waratah, 103 miles N. of Sydney, distant inland 3 miles from the Hunter river and 5 miles N. of Newcastle. There are eleven hotels, thirteen places of worship, a court-house and police quarters; a fire brigade station, with 2 fire engines, 2 reels and 260 ft. hose (there is also a new fire brigade at New Lambton); permanent water supply from Hunter District Water Supply, a large music-hall, Druids' hall, theatre, and assembly-room. Public school, with average attendance of 455, a mechanics' and miners' institute, having 2,000 vols., and four temperance hotels. Coal-mining is the industry of the district; there are several collieries at work, producing in 1899 over 120,500 tons, valued at £41,800. The seam is about 8 ft. 6 in. in width. In the neighbourhood there are numerous orange orchards, vineyards, and flower gardens, 3 quarries of good building stone, a candle manufactory, and steam saw-mills. Formation of the district, shale and sandstone. A tramway runs from Newcastle through Lambton to Platsbury and Wallsend. The town consists of about 720 houses, tenanted by a population of about 3,400; in the entire municipality there is ratable property of the annual value of £10,170. It is lighted by electricity.

LANE COVE. *See* Gordon.

LA PEROUSE (34° 6′ S. lat., 151° 22′ E. long.), a small harbour, surrounded with many historic associations, at the entrance to Botany Bay, in the county of Cumberland, electorate of Botany, and police district of Sydney; mode of conveyance by tram or 'bus. Distance from Sydney about 11 miles. It is a postal and telegraphic station, and the office through which the New Zealand cable business is transacted close by are Bare Island and Henry Head Batteries; also coast hospital and leper station at Little Bay. The residents are chiefly fishermen, who carry on a large and profitable trade. There are also Custom officers' station, barracks, and soldiers' residences. Population about 110. Geological formation: sandstone.

LAURIETON. A post town, 160 miles N. of Sydney, situated on the Camden Haven river in a very picturesque position at the foot of the North Brother Mountain, in the county of Macquarie, electorate of Manning. Mode of conveyance either by tug to passing steamer, or by coach to Taree or Port Macquarie, and thence per steamer to Sydney. There are four stores, three saw-mills, money-order, telegraphic, and savings bank facilities. No hotels. Fine school of arts. The court-house for the district is eight miles up the river, and is presided over once a month by the police magistrate from Kempsey. Population, 250.

LAWRENCE (29° 32′ S. lat., 153° 51 E. long.), a postal, telegraph, money-order and savings bank township, on the left bank of the Clarence river, electorate of the Clarence, at a point termed the Elbow, about 9 miles above the Rocky Mouth, 20 miles from Grafton NE., and 464 miles (330 postal) N. of Sydney. Coaches run to Casino (Richmond river), 50 miles distant, on Mondays and Thursdays. Hotel: Vesper's family. Steamers call regularly to ship maize, stock, and other products, Lawrence being the shipping port for much of the wool raised about Tenterfield. Presbyterian, Episcopal, Baptist, and Roman Catholic places of worship, one public school, with average attendance of 108 scholars, and a School of Arts, with a library of 350 vols. There is one sugar-mill, a saw-mill, and a creamery. Population 400, of district, about 1,200.

LAWSON, situated on the Blue Mountains, 58 miles W. of Sydney, in the county of Cook, electoral district of the Nepean, and police district of Penrith, with railway station, (fares 10s. 3d. and 6s. 6d.), postal, telegraph, savings bank, and money-order facilities; it has two hotels (one the Blue Moun-

tain), public school, with average attendance 70, and several private boarding-houses; Anglican and Congregational churches and Mechanics' Institute. The climate is most salubrious, and the district is a favourite resort for tourists and others in the summer months. Dante's Glen, and Adelina and Junction Falls are places of interest in the neighbourhood. Geological formation: sandstone. Population 250.

LEICHHARDT (33° 53′ S. lat., 151° 12′ E. long.), an improving suburb 3 miles W. of Sydney, county of Cumberland, and electoral district of Leichhardt, situated on Iron Cove Bay, contains a post, telegraph, money-order office and savings bank, town hall, hotels, three public schools (average attendance of 1,400), and eight places of worship: Episcopalian, Presbyterian, Roman Catholic, Primitive Methodist, Baptist and Wesleyan. The borough has ratable property of the annual value of £87,100, is lighted by gas, and has a permanent water supply. Bank: Australasia. Mode of conveyance, omnibuses from Circular Quay, and tram from Bent Street, or rail to Stanmore and Petersham. The tram for Five Dock and Abbotsford, on the south bank of the Parramatta river, starts from the town hall. Population 15,600. Newspapers: *Leichhardt Standard* and *Budget*.

LEWIS PONDS (county Bathurst).—This was one of the last discovered silver fields, situated 16 miles from Orange, and 208 miles W. of Sydney, near the banks of the Lewis Ponds creek, at the junction of which with the Summer Hill, gold was first discovered in Australia. It has postal, telephonic, money-order and Government savings bank facilities, rail from Sydney to Orange, coach thence. Deposits of marble have been found. A promising looking lode of gossan was found, and assays from it proved its argentiferous nature. For some time the ground was worked methodically, first by the prospectors, then by the Lewis Ponds Company, and lastly by the New Lewis Ponds Company, but with not very satisfactory results. There are two stores, a public school, average attendance 43. Anglican, Wesleyan and Australian churches. It is in the electorate of Orange, county of Bathurst. Population, 130.

LIDSDALE (33° 15′ S. lat., 150° 9′ E. long.), a post, Government savings bank and money-order township, 105 miles W. of Sydney, situated in the Hartley electorate; one mile from Wallerawang Railway Station.

LIONSVILLE (29° 23′ S. lat., 153° 5′ E. long.), a postal station, in the county of Drake, police district of Tenterfield, and electoral district of Grafton, 60 miles from Grafton, and 520 miles NE. of Sydney. The Grafton steamer is the means of conveyance to and from Sydney. The registrar and warden's office, and the stores, comprise the larger buildings of the place; public school here, with average attendance of 20. The country has good mineral resources of copper, tin, antimony, and iron, with some pipe-clay, and has, too, grazing and agricultural capabilities. Several quartz-crushing machines were at work here, and some very good returns have been reported; but the gold appears to be patchy. Population, 90.

LISMORE (28° 50′ S. lat., 153° 21′ E. long.), a railway township, with money-order and telegraph office and Government savings bank and telephone, situated in the centre of what is a rich agricultural and dairying district, at the head of the Richmond river, about 520 miles N. (579 postal) from Sydney. It returns a member to Parliament, and is the principal town of the North Coast district. It is about 100 miles from the Tenterfield railway station, from which there is a coach six times a week. It is at the head of navigation for sea-going vessels and steamers, and the town is placed at the junction of Leycester and Wilson's creeks, about 22 miles by land and 65 miles by water W. from Ballina, in the county of Rous, and electorate of Lismore. Hotels: Lismore, Commercial, Exchange, Royal, Imperial, Bridge, Junction, Freemasons' and others. Lismore has Anglican, Roman Catholic, Presbyterian, and Wesleyan places of worship, brick court-house, lock-up, land office, public school with average attendance of 310 Roman Catholic school, Ladies' College under St. Mary's Presentation Nuns, and private school, post-office, fourteen stores, hospital, theatre, Protestant hall, branches of the Commercial, English and Scottish, Joint Stock, and New South Wales Banks, a school of arts with 1,500 vols., free public library with 350 vols., six boarding-houses, two saw mills, foundry, &c. District Court, Quarter Sessions, courts of Petty Sessions and Small Debts are held here. Four steamers trade regularly to Sydney, leaving at intervals of three days, several small steamers are also engaged in the river traffic. The district is partly pastoral and agricultural, some very fine stock being raised by the squatters, while sugar, maize, potatoes, &c., are grown, the land is rich and prolific, and eminently suited for all kinds of cultivation, and there is an immense area of land open for Crown occupation. Stock return, 1899: 9,815 horses, 67,039 cattle, 630 sheep; area, 318,340 acres. The district abounds with coal of a good description, which will in time prove a great source of wealth, and gold is found in payable quantities. The main exports of Lismore are butter, bacon, pigs, poultry, eggs, pine and cedar timber; of the former large quantities are exported, while maize and other colonial produce are rapidly increasing. Produce of the district is butter, cheese, bacon, maize, sugar, and fruit. Two large butter factories are located in the district. Creameries are spread over the whole district. The municipal district of Lismore was proclaimed March 4, 1879. It has 54 miles of roads and streets, and property of the annual ratable value of £24,540, with municipal gas works and water supply, the reservoir having a capacity of 72,000 gallons. Fire brigade has 2 fire engines, 2 reels, 1 hose-cart, and 2,000 ft. hose. The population of Lismore and vicinity is about 8,500. The town is connected by rail with Bexhill, Eltham, Bangalow, Byron Bay, Mullumbumby and Murwillumbah (daily train), and thence by coach to Nerang, or steamer to Tweed Heads, and from either place to Brisbane by railway. The Colonial Sugar Co.'s and the Richmond River Sugar Co.'s mills employ 1,000 men in the crushing season. Cane is largely grown along the section of railway to the Tweed. Population, 3,840. Local papers: the *Northern Star* and *Lismore Chronicle*.

LITHGOW (33° 35′ S. lat., 150° 31′ E. long.), a township, in the electoral and police district of Hartley, situate on either side of the Great Western Railway, in a valley of the Blue Mountains, "in the wide and westerly portion of that secluded rocky glen, into which the Western Railway abruptly descends by the well-known Great Zigzag," 96 miles W. from Sydney; fares, 18s. 6d. and 12s. 2d. There are nine hotels, the Royal, Volunteer, Commercial, Club House, Zigzag, Imperial, Court House, Tattersall's, and Cosmopolitan; two breweries, court-house, soap works, and a jockey club, an agricultural and pastoral society, handsome School of Arts, with hall capable of seating 500 persons, also Protestant hall, Temperance hall, and a new Oddfellows' hall, with seating accommodation for about 800. Height above sea level 3,006 feet. There is a telegraph office, money-order office, post-office savings bank, branches of the Commercial, and English and Scottish Banks, and a public school, average attendance 602. The Episcopalians, Roman Catholics, Presbyterians, Wesleyans, Primitive Methodists, and Salvationists have places of worship. There are seven collieries in the township—which afford employment for upwards of 250 hands—the Lithgow Valley Colliery, the Eskbank Pit, the Eskbank Old Tunnel, Vale of Clwydd, Hermitage, Zigzag, and Oakey Park. The output of coal in the western district for 1899 was 247,010 tons, valued at £76,871. The Eskbank Iron Works (the only works of the kind in the colony) have a large foundry on the ground and iron rolling mills, where iron rails are now made in quantities, the output for 1899 being 6,500 tons of iron, valued at £55,550. There are two brick-making establishments, the largest pottery in the colony, and a terra-cotta works, and two steam saw-mills, also a tweed factory (Cooerwull) having 24 power looms. The country abounds in coal, iron ore, freestone, and kerosene shale, and the borough has a plentiful supply of water from the municipal supply, completed at a cost of £14,000. There is a police-station, and a court of petty sessions is held regularly, also a small debts court. The fire brigade has 1 reel and 800 ft. hose. The town is incorporated, and has ratable property of the annual value of £26,950. The streets are lighted with gas. The population of the municipality is estimated at 4,500 souls. Local paper: *Lithgow Mercury*.

LIVERPOOL (33° 54′ S. lat., 150° 58′ E. long.), one of the very early Government settlements of the colony, in the electorate of Canterbury, is situated on George's river, at the head of navigation, 22 miles S. of Sydney. It is a post, telegraph, and money-order town, and also a station of the Great Southern line, which gives it easy access from the metropolis. Fares, 2s. 4d., and 1s. 4d. There are several hotels, of which the principal are the Commercial, Cloke's, Family, Railway, the Royal, Tattersall's, and Brewer's. It takes its name from the Earl of Liverpool, who in 1812 was Premier of Great Britain. It is under municipal government (proclaimed June 27, 1872), having a council of nine, 98 miles of streets, and property of the annual ratable value of £15,640, is in the county of Cumberland, and police district of Liverpool, and is lighted by gas. There are several places of worship—St. Luke's (belonging to the Church of England, an old building erected as far back as 1819), Roman Catholic church, Wesleyan chapel (new building completed in 1885), Presbyterian church, Salvation Army barracks, capable of seating 400 people, a free public library with 660 volumes. The Roman Catholics have a school with average attendance of 217, and there is also a public school (average attendance, 310). The Benevolent Asylum for male paupers is an old building on the western bank of the river. Moore College, formerly an institution for training candidates for holy orders in the Anglican Church, has been converted into a Grammar School. Two large stores and a number of small shops, gaol, court-house, and police barracks, also branches of the N.S. Wales and Commercial Banks, and a post and telegraph office. The district is partially taken up by dairy farms; much milk and butter is produced. There is a large paper-mill here, supplied with the newest machinery. The works cover an area of 5½ acres, and employ five steam engines of from 10 to 50 horse-power, and upwards of 100 hands. A branch line connects the mills with the main railway. There are two large wool-washing establishments, a fellmongery, a saw-mill, and a tannery. Formation: sandstone. Population, 3,210; of the census district, 5,860. Local paper, *Liverpool Herald*.

LIVERPOOL PLAINS (31° 14′ S. lat., 150° 58′ E. long.) (native name *Cobbon Comleroy*) is the name given to a tract of pastoral land containing 10 millions of acres, in the NE. part of the colony. It was discovered by Mr. Oxley in 1818, and by him named after Lord Liverpool; it is supposed to have been at one time the bed of an immense inland lake. Much of the land is now under cultivation, and the district contains the following diggings—Hanging Rock, Nundle, Peel River, Wood's Reef, Ironbarks, and Barraba. It is watered by the Namoi river, and its tributaries—Thalaba Creek, Baradine Creek, Brigalow Creek, Turrabeile Creek, Maules Creek, and other branches, and the Peel River. The towns are—in the East, Tamworth, Quirindi, Breeza, Gunnedah, Wallabadah, Manina, and Nundle; Narribri, Wee Waa and Pitliga in the centre, and in the extreme west, Walgett. The River Darling divides it from the Warrego district.

LOCHINVAR (32° 43′ S. lat., 151° 28′ E. long.), county o

Northumberland, electoral district of West Maitland, and police district of Maitland, a postal village, a mile and a half from the railway station on the Great Northern line, 8 miles from Maitland, 26 from Newcastle, and 125 miles N. of Sydney, with telegraphic, savings bank, and money-order facilities. Fares from Newcastle, 3s. and 1s. 9d., or direct from Sydney, 15s. 6d. and 9s. 9d. Hotel: Red Lion. The Hunter river runs close by, and the Great Northern road passes through it. The district is a very fertile one, immense crops of maize, potatoes, barley, and oats being raised when floods do not occur. There are also numerous large vineyards, the wines from the Kaludah press having an English as well as an Australian reputation. The township consists of one main street. The Episcopalians, Wesleyans, Roman Catholics have places of worship here. There is a Roman Catholic school and convent, an hotel, creamery, one store, and a public school (average attendance, 45). Lochinvar lies about 210 feet above sea-level. Population, about 360. The water supply is obtained from tanks.

LONG REACH (34° 30′ S. lat., 149° 50′ E. long.), postal district, 121 miles SW. of Sydney, situated in the county of Argyle, electorate of Marulan, and police district of the Goulburn. It lies on the S. side of the Wollondilly river, on the old Southern road. The route to Sydney is *viâ* Marulan Railway Station, 6 miles distant. Public school here, average attendance 26, Anglican church. The country is principally open forest, with limestone and granite formation. Lime-kilns at work. Population, with vicinity, estimated at 400.

LONG SWAMP (33° 40′ S. lat. 149 30′ E. long.) is a postal town, in the county of Georgiana, in the police district of Carcoar, 155 miles (190 postal) W. of Sydney. The district is agricultural and grazing. Newbridge, 17 miles distant, is the nearest railway station. The population of town and district is between 200 and 300.

LOUTH (30° 35′ S. lat., 145° 11′ 15″ E. long.), a post town, money-order and telegraph station and savings bank on the left bank of the Darling river, 60 miles below Bourke and 563 miles NW. of Sydney, county of Yanda and parish of Yandagulla, electorate of Cobar. Communication is by rail to Bourke, 503 miles distant, thence coach; the river at times is also available, and is largely used for the carriage of goods and station produce. Hotels: Royal, Post Office, and Telegraph. One store, police-station, and lock-up. It lies on the direct overland travelling stock track from Queensland to Victoria and South Australia. Coaches run to Wilcannia, Cobar, and Bourke. The district is almost entirely of a pastoral character. Public school here with average attendance of 14. The water supply is obtained from the River Darling. Population of town about 100; of district, 1,000. Geological formation: ironstone, quartz, and sandstone.

LOWESDALE (35° 47 S. lat., 146° 20′ E. long.), a small post town, with telephone to Corowa, in the electorate of the Murray, police district of Albury and county of Hume, 11 miles from Corowa, and 421 miles S. of Sydney, which is reached by conveyance to Hopefield, 5½ miles distant, thence train. Coaches run from Corowa to Urana. It contains Anglican and Wesleyan churches, a public school, an hotel, and store. The district is agricultural and pastoral. Population about 70.

LUCKNOW (33° 16′ S. lat., 149° 15′ E. long.), a post, money-order, savings bank, and telephone station 198 miles W. of Sydney, in the electorate of Orange, on the main road from Bathurst to Orange, 6 miles from the last-mentioned town. Lucknow sprung into prominence in consequence of the discovery there, over thirty years ago, of very rich gold deposits. When the alluvial and the brown vein carrying the gold was worked out, operations were carried on in the lode formed at the contact of diorite and serpentine rocks. Several companies have at various times worked the ground most profitably. It is in the hands of a single proprietary (the Wentworth Goldfields Proprietary Company—with its subsidiary companies, the Aladdin's Lamp, the Amana, and the Wentworth Extension), and undergoing energetic development with splendid results. The Amana is a low grade alluvial mine, the workings being in an old river bed overlaid by a basalt flow. In 1899 the Wentworth Proprietary produced 3,300 ozs., the Aladdin, 5,102 ozs. Mines lighted by electricity. It has a public school, average attendance 84, Church of England, Roman Catholic and Wesleyan churches, all good substantial buildings, two public-houses, two large and several small stores, and the equipments of the various mines are not excelled. Lucknow is situated in the midst of a rich agricultural district, and obtains railway communication within a few miles, at Orange, Huntley, Spring Hill, and Millthorpe.

LYNDHURST, a post, money-order, telephone, and telegraph town and railway station 191 miles W. of Sydney (fares *viâ* Blayney, 37s. 9d. and 25s. 3d., *viâ* Harden, 60s. 6d. and 40s. 9d.), county Bathurst, electoral district of Cowra and police district of Carcoar, situated on Two Mile Creek. It has a public school, average attendance 30, Anglican and Roman Catholic churches, three hotels, I.O.G.T., and two general stores. Population of township 185; of district 700, engaged principally in agricultural pursuits. Geological formation, limestone.

LYTTLETON (now BEMBOKA, 36° 26′ S. lat., 149° 30 E. long.), 308 miles S. of Sydney, is situated on the Bemboka river, 23 miles west of Bega, and 16 west of Candelo, county Auckland, electoral district of Bega, and police district of Bega. It contains post, telegraph and money-order office, savings bank, police-station, public school, with an average attendance of 70, and two churches—Anglican and Roman Catholic. The Wesleyans hold services in the School of Arts. The means of communication for passengers is by coach daily to Cooma station, 48 miles, or steamer *viâ* Tathra and coach, 41 miles, *viâ* Bega. The business places consist of two hotels, three general stores and a produce store, two saddlers', two butchers', three blacksmiths' shops, and a school of arts; a progress committee and a jockey club. Hardwood timber of excellent quality is abundant, and there is a saw-mill to supply the wants of the building trade in that respect. The district is of granite formation, nicely undulating, well watered by numerous perennial streams, and is admirably adapted for grazing. Dairying and pig-farming are the leading industries. Maize is grown for fattening pigs, and oats and sorghum for winter fodder for the dairy cows. A co-operative factory and creamery is carried on in the district, the output of butter being one ton per week. Teams ply regularly between Lyttleton and Merimbula, through which port the produce is despatched and stores received by the I.S.N. Co.'s steamers. Population 200.

MACKSVILLE (late NAMBUCCA) (30° 45′ S. lat., 153° 1′ E. long.), a mining and agricultural district with post, money-order office, savings bank, and telegraph station, situated on the Nambucca river, 346 miles N. of Sydney, in the electorate of Raleigh; communication being by steamer and tri-weekly coach *viâ* Kempsey. Hotel: the Star; two creameries, public school, with average attendance of 65, two places of worship, a court-house, and police station. The pilot station is at Nambucca Heads, 8 miles away. The district is noted for its valuable timber productions, especially cedar. Also its dairying industry. Agriculture is carried on to a large extent, while both gold, silver and antimony are obtained in the district. Population, town 150; district 400.

MACLEAN (29° 25′ S. lat., 153° 19′ E. long.) (formerly ROCKY MOUTH) is situated on the south or right bank of the Clarence river, at the junction of the North and South Arms with the main river. Maclean is an increasing township of much importance. It is distant from the Clarence Heads about 15 miles, 30 miles from Grafton, and about 318 miles (323 postal) N. of Sydney, and is in the county and electoral district of The Clarence. Communication with all the other towns and villages on the river is kept up by four passenger steamers, plying twice daily to Grafton (30 miles), twice a week to Sydney, Maclean being the principal terminus, but lower townships are adequately provided in this respect. Hotels: Commercial, Maclean, Argyle, Criterion, and Clare Castle. It is the centre of the sugar industry on the Clarence, and the main central depôt for the agricultural products on both sides of the main river and its numerous branches for some distance above and below the township, with extensive accommodation in four stores and three wharf sheds, having deep-water frontages. Dairying industry has expanded rapidly. A road has been surveyed between Maclean and Coraki, the central town on the Richmond river, a distance of 28 miles, and upon which route the Government has been asked to construct a cheap line of railway. There are five churches Presbyterian, Roman Catholic, Wesleyan, and Episcopalian, also a Salvation Army; a mechanics' institute with a library of 7,000 volumes, Protestant hall, Good Templars hall, Masonic hall, a court-house (with police residence), where District Court is held every four months. Police, Petty Debts and Licensing Courts are held as occasion requires, presided over by resident magistrates and the P.M. from Grafton periodically; superior public school, average attendance, 200, and a convent school, average attendance, 120; post, telegraph, savings bank, and money-order offices and a splendid hospital; Banks: New South Wales Joint-Stock, and Commercial; two aerated water-works; brewery, foundry and engineering works, belonging to W. Boden. Gold, coal and ironstone abound in the neighbourhood. Maclean was incorporated in 1888, having 23 miles of streets and ratable property of the annual value of £6,380. Population of town, 1,090; of electorate, 10,000. Bi-weekly newspaper: *The Clarence River Advocate*, published Tuesday and Friday.

MACPHAIL (32° 15′ S. lat., 148° 30′ E. long.), co. Narramine. A mining village, 8 miles north of Peak Hill; has post and money-order office, telephone bureau, savings bank, public school (average attendance 90), Wesleyan church, Accident Society, Progress Committee, several sports clubs, two hotels, several stores and shops. Connection—coach twice weekly to Narramine, thence rail; also coach to Dubbo three times a week. Mining, agricultural, and pastoral district, principal mine being Myall's United, worked by an English company. Population about 600.

MAITLAND (32° 45′ S. lat., 151° 35′ E. long.) is the second town in N.S. Wales, and comprises both East and West Maitland. The former was the original Government town. It lies 120 miles N. of Sydney, in the county of Northumberland, and police district of Maitland, and is situated on the Hunter river; its proximity to this has been the cause of the numerous disastrous floods which have from time to time devastated the town and district, the last one occurring in March, 1893, and causing a great amount of damage. The question of protecting the town and district in part from flood ravages is still under consideration; an elaborate report, in which straightening a part of the river-channel, embanking and dredging, are recommended, having been presented to the Government by an eminent hydraulic engineer. Should an effective scheme of mitigation be adopted, the value of all landed property in the district will be enormously enhanced. The river banks at West Maitland are now protected by stone and embankments at a cost of upwards of £30,000, half of which sum was subscribed by the West Maitland Borough Council, and privately by residents. The Great Northern Railway connects the town with Newcastle and Sydney, and also links it with the following towns lying northerly and to the north-west—Singleton, Muswellbrook, Scone, Murrurundi, Quirindi, Tamworth, Uralla, Armidale, Gunnedah, Narrabri, Moree, Glen Innes, Tenterfield, Wallangarra,

and Queensland. There is also a branch line to Morpeth, 4 miles distant. The railway stations in West Maitland are at Church and High Streets, the latter being more popular for passenger traffic. At the former place there is a large and commodious station-house, now known as Church Street station, also a station-house at East Maitland. The principal hotels in West Maitland are Davies', Barry's Commercial, Lane's Exchange; besides these there are some forty others. The fire brigade has 1 fire engine, 2 reels, 1 hose-cart, and 1,000 ft. hose. 11,000 acres of land are under cultivation in the Hunter and Maitland district, the crops ranking in the following order:—Lucerne, maize, wheat, barley, oats, potatoes, pumpkins, and melons. The grape is widely cultivated in the district, and much wine is made. Coal of excellent quality and unlimited supply is found in the neighbourhood, and about six pits are almost constantly at work. A very large trade is done with the inland towns. The two parts of Maitland are distinct municipalities, each being governed by mayor and councillors. Hunter district water supply. Coaches run to Largs, Paterson Gresford, Dungog, and Wollombi.

EAST MAITLAND has 30 miles of streets, and annual ratable property valued at £17,250. The boundaries of East Maitland are marked by the Hunter river and Wallis's creek as far as the Victoria Bridge, a new iron structure, which here spans the creek, alongside of which flood-gates have been erected for preventing the submersion of the lowlands, at the rear of West Maitland during heavy freshes in the river); these gates have proved a great boon to the district, and cost the adjoining borough of West Maitland about £12,000; but since their erection more than five times this amount has been saved in crops, the gates being of great service during the 1889 flood. The streets, which are lighted with gas, are wide and well made, and contain numerous stores and many substantial-looking private residences. Maitland is the see of a Roman Catholic bishop (Dr. Murray). The public buildings in East Maitland are, the court-house, telegraph and money-order offices, savings bank, Districts Land office, gaol—one of the largest and strongest in the colony—Mechanics' Institute, with 2,260 vols., the Bank of Australasia (a rather ornate edifice), the new Church of England, Roman Catholic, Wesleyan, and Presbyterian churches, the Free Church, and the Public School, completed in 1883, is one of the finest buildings in the Colony, average attendance, 350. A new handsome and commodious public high school for boys was opened in 1892. Omnibuses ply between East and West Maitland every half hour throughout the day. East and West Maitland are both electoral districts, which, in each case, include the town and a wide extent of farming, mining and pastoral country. Population, 3,250.

WEST MAITLAND, much the larger and more populous of the two divisions, containing telegraph and money-order offices, and savings bank, was proclaimed a municipality on November 13, 1863. It has about 34 miles of roads, and ratable property of the annual value of £55,670. The town itself, which is lighted by gas, consists mainly of one long, somewhat straggling thoroughfare, called High Street, winding as the river winds, containing the principal business houses, and it is intersected by several cross streets. Some of the business premises are of a superior order. The banks deserve mention, the Australasia, Union, New South Wales and Australian Joint-Stock Banks being fine structures. The Commercial Banking Company a few years ago completed a magnificent building, and one of the grandest out of Sydney, costing about £20,000. A new Masonic hall is erected in Victoria Street, a Town Hall (one of the largest in the colony) was completed in 1890. A conspicuous and ornamental public building is the Court-house at the corner of High and Sempill Streets. The industrial interests of the town are comprised in several coach-building factories, brewery, two mills, and three boot factories, employing a large number of hands. The public buildings are the hospital, situated on an elevated site at Campbell's Hill, one of the best and most economically managed institutions in the colony; the School of Arts, which possesses a valuable library of upwards of 7,000 vols., and the Benevolent Asylum, a magnificent building. The places of worship in West Maitland comprise three Episcopal churches, one Wesleyan, Congregational, and Presbyterian church, also a Roman Catholic cathedral (St. John's). There is a convent of Dominican nuns, devoted chiefly to education, and in addition numerous schools—the Superior Public has average attendance 650, a Roman Catholic school, High School for girls, also several ladies' schools, the Sacred Heart College at Campbell's Hill. The principal insurance companies have agents in Maitland. Fire brigade has fire engine, reel, hose-cart, ladder-waggon and escape, and 2,500 ft. hose; resident superintendent and firemen on premises all night. Telephone alarms are placed throughout town. The town is lighted with gas. Hunter district water supply. The West Maitland branch of the Savings Bank of New South Wales is a useful institution, and largely patronised. There is daily communication with Sydney by railway three times a day, and by steamer *viâ* Newcastle. Rail fares to Newcastle, 2s. and 1s. 2d.; direct to Sydney, 14s. 3d. and 9s. 1d. Mail coaches run daily to Gresford, Paterson, Dungog, Clarencetown, Largs, and Wollombi, and the town is, by means of the railway, placed in daily communication with the north and north-west. Stock returns, 1899: 13,422 horses, 64,572 cattle, 2,521 sheep. Area, 596,612 acres. Formation of country principally sandstone, with overlying alluvial deposit. Population: West Maitland, 7,550; East Maitland, 3,250. The *Maitland Mercury* is the oldest newspaper in New South Wales (*Sydney Morning Herald* excepted), being established in 1843, and it is the largest provincial journal in the colony. The paper has a very wide circulation, and carries the whole of the great pastoral, agricultural, and mining centres in the north and north-west parts of the colony. In the principal towns branch offices of the *Mercury* are established. The head office is one of the largest printing establishments in the colonies. The *Mercury* is issued as a daily evening paper, with the issue of a large weekly edition on Saturdays.

MAITLAND EAST. *See* MAITLAND.

MAJOR'S CREEK (35° 27′ S. lat., 149° 35′ E. long.), a post town, with telegraph station, savings bank, and money-order office, 198 miles S. of Sydney. It is on the creek from which it takes its name, in the police and electoral district of Braidwood, and is distant about ten miles from the town of Braidwood. Tarago is the nearest railway station, 39 miles distant. Hotel: Hezlett's. Churches: Anglican and Roman Catholic. Public school, average attendance 110. It is a gold-mining district; the gold is in pyritous veins, from which it is difficult to extract it; the returns for 1899 being 1,549 ozs., valued at £5,813. The chlorine process, used in Victoria, the only known successful one, is said to be too expensive to be used profitably. Similar stone raised at Lucknow is sent to England to be treated. Population, 960.

MANILLA (30° 45′ S. lat., 150° 45′ E. long.), railway township, a post town, savings bank, money-order and telegraph and railway station, 309 miles N. of Sydney, situated at the junction of Namoi and Manilla rivers, county Darling, electoral district of Bingara and police district of Tamworth. Mode of conveyance to Sydney is per rail. Telephonic communication with Upper Manilla, eight miles distant. Has flour mill, saw mill industries; also wheat-growing and sheep-breeding district. About 25,000 acres under crop in 1900. There is a court-house, Land Court, Progress Committee, Anglican, Roman Catholic, and Wesleyan churches, Presbyterian minister visits, four hotels, five stores, one public school (enrolment of 205) a School of Arts with about 600 volumes, and Oddfellows' lodge. Geological formation: trap. Population, town, about 720; district, 2,500, principally wheat-growers and sheep-farmers. The water supply is obtained from private tanks. Newspaper: *Manilla Express*.

MANLY (33° 50′ S. lat., 151° 17′ E. long.), county of Cumberland and electoral district of Warringah, a post town, with savings bank, money-order office, and telephone and telegraph station, 6¾ miles distant NE. from Sydney, to which large, commodious steamers run frequently throughout the day. It lies on the isthmus connecting the North Head with the mainland, and has good sandy beaches both on the Ocean and the Harbour sides. It has six hotels, Pier, Steyne, Clarendon, New Brighton, Aquarium, and Ivanhoe, a large number of business establishments, and other essentials of a good watering place, and is at all times a favourite and frequent place of resort of the citizens of Sydney, and especially thronged at holiday times. Public school here, with average attendance of 400 scholars. Churches: Congregational, Presbyterian, Wesleyan, English and Roman Catholic. Masonic and Oddfellows' lodges; fire brigade. Bank: Joint-Stock. It was proclaimed a municipal district on January 6, 1877; it has 37 miles of road and streets (16 made), and ratable property of the annual value of £44,330. The borough is lighted by gas, and has a permanent water supply. Formation: sandstone. Coaches run regularly to Narrabeen Lakes, Rock Lily, Bay View, Newport and Pitt Water, two and three times a day. The municipal baths are admittedly the finest in the Southern Hemisphere. Population about 3,800.

MARENGO (34° 22′ S. lat., and 148° 30′ E. long.), a small post town, with money-order office, savings bank and telegraph office, 241 miles SW. of Sydney, situated on the right bank of the Marengo or Murringo creek, in the county of Monteagle, and police district and electorate of Young. The means of reaching Sydney is by coach, tri-weekly, to Young, 14½ miles W., and thence rail; or coach to Burrowa, 14½ miles, tri-weekly, thence rail. Has hotel, public school with average attendance of 55, Episcopal and Roman Catholic churches, fine stone police barracks, and three stores are here. The district is in a fairly prosperous condition, particularly as regards sheep rearing and farming, and well suited for wheat-growing and first-class grazing country. It is 15 miles distant from Burrowa, and 14½ from Young. Court of Petty Sessions held first Wednesday of every month. Formation: granite, overlying in some cases limestone. Population, town, 80; district, 300.

MARRICKVILLE (33° 35′ S. lat., 151° 12′ E long.), an important and rapidly advancing suburban borough, in the county of Cumberland, electorate of Marrickville and police district of Newtown. Lighted by gas and has a permanent water supply. It lies about 3½ miles SW. of Sydney, and has a post, money-order, telegraph office, railway station, and savings bank. Communication to Sydney is by train, tramway, and omnibus; railway fare, 4d. and 3d., the tram also runs through to Dulwich Hill, and a line of buses from the Warren Cook's river to Petersham railway station every hour. There are eight hotels, three public schools, average attendance 1,503—one at Marrickville, Marrickville West, and Dulwich Hill, and two Roman Catholic schools; Church of England, Presbyterian, Congregational, Roman Catholic, Baptists, Church of Christ, two Wesleyan, and three Primitive Methodist churches; branches of Bank of Australasia, Oddfellows', Rechabite and Foresters' lodges, a leather and boot factory, several cordial factories, coach builders, four brickyards, one pottery works, tweed and soap factories, and a few market gardens at the extreme end of the borough. Lighted with gas. The water supply is obtained from the metropolis. There are 74 miles of made roads and streets, and ratable property of the annual value of £124,640. The Town Hall is situated on the Illawarra road. Population about 18,000. Local newspaper: *Weekly Review*.

MARSDEN (33° 39′ S. lat., 147° 40′ E. long.), a post, telegraph, telephone and money-order station with savings bank, 318

miles W. of Sydney, on the Bland creek, electorate of Grenfell, county Gipps and police district of Goulburn ; conveyance to Sydney is by coach to Young, 75 miles distant, thence rail ; coaches also ply to Forbes, Ungarie and West Wyalong bi-weekly. There is one hotel (Marsden), School of Arts, Episcopalian church, court-house, public school (average attendance 30), and one store. Population of town and district about 300, who are employed solely in pastoral pursuits.

MARULAN (34° 43′ S. lat., 150° 1′ E. long.), a post, money order, savings bank, and telegraph township, 18 miles E. of Goulburn, and 114 miles SW. of Sydney, at an elevation of 2,105 feet above sea level, at a junction of the main southern road and the Great Southern Railway line, in the county and electorate of Argyle, police district of Goulburn. It is a station on the Great Southern line, fares, 22s. 6d. and 15s. Public buildings : an Episcopal church, a stone-built Roman Catholic church, Presbyterian church, Oddfellows' hall, police-station, a school (average attendance 58), Court of Petty Sessions, Oddfellows' and Orange lodges, and a School of Art. Principal hotels : Royal and Terminus. District is principally pastoral, but is also agricultural, wheat and hay being the leading crops. A marble quarry and lime and freestone quarries are in the vicinity. Formation : granite and freestone. Population, 300.

MARYLAND (28° 35′ S. lat., 152° E. long.), in the electoral and police district of Tenterfield, a post town on the Northern frontier on the Maryland creek, 468 (499 postal) miles N. of Sydney. There is one hotel (Droyer's), Church of England place of worship, and two stores, but no public buildings of importance. Public school has average attendance of 23 scholars. The district is of a tin-mining and pastoral nature. It is more easily reached *viâ* Tenterfield, Jennings and Dalveen Railway stations. Formation : basalt and rich agricultural soil. Population of town 170 ; of district, 504.

MARYVALE (32° 20′ S. lat., 148° 50′ E. long.), a railway station 254 miles W. from Sydney, situated on the Macquarie river, police and electoral district of Wellington ; fares, 50s. and 33s. 6d. It has a post, telegraph, money-order office, and savings bank. There is an Episcopalian church a public school, average attendance 47 ; an hotel, and a general store. Population numbers about 300, employed in agricultural and pastoral pursuits.

MATHOURA (35°45′ S. lat., and 144°50′ E. long.), a post town, telephone, telegraph, money-order and railway refreshment station, in the county of Cadell, Murray and Moama police district of the Murray, electorate of Deniliquin, 488 miles WSW. of Sydney, situated on the banks of the Gulpha creek. The metropolis is more easily reached *viâ* Melbourne, on the Goulburn Valley Railway line, than *viâ* Hay, to which place a coach runs daily. There are three stores, one flour, one saw mill, and three hotels. It is a pastoral and agricultural district, and is benefited by the Deniliquin and Moama Railway, which passes through here. Police-court is held once a month before the police magistrate of Mathoura. Public school here, with average attendance of 80 scholars, also Roman Catholic, Anglican and Presbyterian churches, police barracks and court-room. Water supply laid on from railway tank. Principal exports of the district, fodder, wheat, butter, logs, live stock, sawn timber, and wool. Formation : alluvial river flats. Population, 250.

MENANGLE (34° 8′ S. lat., 150° 45′ E. long.), a railway, money-order and telephone station and township in the county and electorate of Camden, and police district of the same name, situated on the Cowpasture or Nepean river (270 feet above sea-level), 40 miles S. of Sydney, fares, 6s. 3d. and 4s. There are two places of worship—Church of England and Roman Catholic—a public school with average attendance of 40, an extensive creamery, improved butter factory, public hall, and School of Arts. The land is partly taken up with farms, and in part used for grazing and dairy purposes. Formation : principally sandstone. The viaduct and bridge, which at this point carries the railway over the river, is one of the finest pieces of engineering work in the colonies. The bridge is on the box girder principle, 498 feet long, and is carried on four piers 65 feet high. The viaduct is 978 feet long on the Sydney side and 432 feet in length on the southern side. The river is not navigable, in fact, in the summer season it can be easily forded in places—but the scenery on the banks is very fine, and well worth a visit. Population, about 300. There is a good water supply.

MENINDIE (32° 30′ S. lat., 142° 25′ E. long.) is a township, on the west bank of the Darling river, 100 miles from Wilcannia, 175 from Wentworth and 880 WNW. of Sydney, in the electorate of Wentworth, and police district of Mitchell. The communication with the metropolis is *viâ* Broken Hill, Adelaide and Melbourne. Hotels : Menindie, Crown, West End, and Albemarle. It has a public school, with average attendance of 45 scholars, Anglican and Roman Catholic places of worship, court-house, police barracks, post, money-order, Government savings bank and telegraph station, the latter being the principal building, and a mechanics' institute, with over 600 volumes. The town is irregularly built on sandy rises, back from the Darling and out of flood reach. The district is altogether occupied by stations. Stock returns, 1899 : 3,093 horses, 5,745 cattle, 492,648 sheep. Area, 9,495,382 acres. Menindie has some historic interest from the fact of Burke and Wills having made it the starting point of their fatal expedition in 1860. Population, about 200.

MEREWETHER (32° 58′ S. lat., 151° 42′ E. long.), a post town, with money order office, telegraph and telephone station, in the county of Northumberland, and electoral district of Kahibah, and police district of Newcastle. Coaches run to Newcastle half hourly and thence rail. There are two public schools, seven places of worship, mechanics' institute, Masonic and G.U.O.O.F. lodges, potteries ; fire brigade has two reels, one hose-cart and 1,400 feet hose ; several general stores, ten hotels, and a population about 4,500, engaged almost exclusively in coal-mining. The district is incorporated, and has 16 miles of streets ; annual value of ratable property, improved £17,718, and unimproved capital value £60,400. Geological formation : sandstone. Trams run every half hour between Newcastle and Merewether. Hunter district water supply, reservoir holding 402,000 gallons.

MERIMBULA (36° 52′ S. lat., 149° 56′ E. long.), a postal township, with money-order, Government savings bank, and telegraph office, in the county of Auckland, and electoral district of Eden-Bombala, 260 miles (372 postal) SSW. of Sydney, situated on Merimbula lake, and is the chief seaport resorted to by the inhabitants of Monaro for export of produce to Sydney. Hotel : the Merimbula, opposite the Company's wharf stores. The township is mainly formed and owned by Munn's Maizena Company, which gives employment to the inhabitants, and the I.S.N. Company have two wharves and stores in connection with their carrying trade, which is very large. There is a small wooden church used as a Union church by the various Protestant denominations, one hotel, and a public school, with average attendance of 37 scholars. Mails overland *viâ* Bega and Pambula daily. Cooma is the nearest railway station, 114 miles distant. Formation : old red sandstone. Population, about 250. The water supply is obtained from Page's Creek, distant about four miles.

MERRIWA (32° 8′ S. lat., 150° 20′ E. long.), a thriving township in the Upper Hunter, with postal, money-order, telegraphic, and savings bank facilities, electorate of Rylstone, and police district of Muswellbrook, county Brisbane, situate on the Merriwa river (Smith's rivulet) and the old main north-western route to Fort Bourke, 220 miles N. from Sydney, 46 from Muswellbrook, 30 miles from Cassilis, 40 from Scone, and 60 from Gulgong (cross country route). Route : rail to Muswellbrook, thence by coaches daily, except Sunday, making the journey through from Sydney in about eighteen hours. Hotels : Cricketers' Arms, Fitzroy, and Rose Inn. Gold has been found in the vicinity on the Worondi Hill. The district is thickly timbered in parts with box, gum, iron-bark, stringy-bark, and pine. The soil is admirably adapted for the growth of wheat, maize, potatoes, vines, and grain of all kinds. Pursuits : pastoral and agricultural combined. Climate salubrious and dry ; altitude about 1,000 feet above sea-level. A good producing district only lacking railway accommodation. Altogether the scenery is beautiful—wooded slopes and rivers, interspersed with homesteads, vineyards, and cornfields, and a network of paddocks, dotted with the Merino sheep, for which the Brindley Park and Collaroy estates are so famous, the wool being of high character. Stock returns, 1899 : 4,753 horses, 13,098 cattle, 443,703 sheep. Area, 698,605 acres. The buildings are of wood, except those erected by Government ; among the principal are the court-house, police barracks, telegraph, post, savings bank and money-order office, School of Arts, with a good library of 1,000 volumes ; Episcopal church, with a parsonage on a slope of the river, built of stone ; six large stores, flour-mill, Roman Catholic and Anglican churches, a R.C. denominational school, and a cottage hospital. Joint-Stock Bank. Public school with teacher's residence, average attendance of 50 scholars. A substantial bridge spans the Merriwa river at West End. Formation : basalt, sand, and limestone, partly auriferous. Population about 1,400. Local newspapers : *Merriwa* and *Cassilis Standard*.

MICHELAGO (35°39′ S. lat., 149°13′ E. long.), a postal village with savings bank, telegraph, money-order office, and railway station, on the banks of the creek of the same name, the Murrumbidgee river bearing about 1 mile to the westward, and 224 miles S. of Sydney ; fares, 44s. 3d. and 29s. 6d. It is in the county of Murray, and electoral and police district of Queanbeyan. One hotel, Roman Catholic church. School : a public one, with average attendance of 35. Court-house, police barracks, lock-up, and four stores. The district is suited for pastoral and farming purposes, and has some mineral wealth. Michelago Falls and Lincertone Caves in the district. Formation : granite and limestone. Entire population estimated at 200

MILBURN CREEK (33° 5′ S. lat., 148° 56′ E. long.) county Bathurst, electorate and police district of Cowra, 215 miles W. of Sydney, postal township (receiving), situated about the centre of the Mount Macdonald goldfield. Mode of conveyance is coach daily to Woodstock, 8 miles distant, thence rail to Sydney. There is a public school, average attendance 21. Copper company at work. Population is about 200, engaged in mining and pastoral pursuits.

MILLFIELD (32° 50′ S. lat., 151° 15′ E. long.), a post (postal notes issued) and telephone town, in the county and electorate of Northumberland, situated on the Wollombi brook, 140 miles N. of Sydney. It has one place of worship (Church of England), a public school with average attendance 33, one store and a flour and saw mills. Coaches run to Allendale or West Maitland railway stations, whence the train can be taken for Sydney. The road through the village is one of the oldest in the colony, and was made by convict labour, and heart-rending tales are told of the cruelty of the overseers. Formation : sandstone. Coal is said to exist in the district. Wheat, tobacco, maize, oats, and the vine are cultivated here. Population, about 100.

MILLIE (29° 39′ S. lat., 149° 45′ E. long.), a post town, money-order and telegraph station, about 391 miles NNW. of Sydney, county Courallie, and police district of Namoi, on the Waterloo Creek. Communication with Sydney by coach to Gurley Siding, or Woolabra, thence rail ; coaches run also to Mogil Mogil and to Bullarah. There is one hotel, a private

school, court-house, lock-up and police barracks, several small stores, and a population of about 300, engaged principally in pastoral pursuits.

MILLTHORPE (late SPRING GROVE, in 149° E. long. and about 33° 30′ S. lat.), a post town, with telegraph, money-order, and savings bank office, and railway station on Bray's creek, a branch, or rather the head of Brown's creek, a tributary to the Belubula river, 179 miles NW. of Sydney, in the electorate of West Macquarie. Trains thrice daily. Fares, 35s. 6d. and 23s. 9d. It is in the county of Bathurst and police and electoral district of Orange, and has a public school, average attendance 190, school of arts, Oddfellows' and Druids' lodges, Church of England and Wesleyan places of worship, three hotels, a mill, five general stores, police court once a month, resident and visiting medical men, Good Templars' Hall, chemist, and a branch of the New South Wales Bank. Formation: limestone. Soil is a red loam; and the district, which has about 900 residents, is reputed to be one of the best wheat and fruit-growing localities in the colony. Mining is extensively carried on at Forest Reefs. The whole district is auriferous. There is no permanent water supply. Newspaper: *Post.*

MILPARINKA (29° 45′ S. lat., 141° 45′ E. long.) is the largest township on the Albert goldfield, near Mount Browne, on Evelyn Creek, lying about 924 (862 postal) miles from Sydney, with postal, telegraph, savings bank, and money-order facilities. There is weekly coach communication with Hay railway station, 408 miles distant, and bi-weekly coach to Wilcannia, and tri-weekly thence to Cobar railway station, but the shortest route is weekly *viâ* Bourke and Wanaaring. It has three hotels, Royal Albert, Royal Standard, Royal. It is on the south bank of Evelyn creek, near a large water hole of the same name, about 200 miles NW. of, and in the electorate of, Wilcannia. Branches of the Commercial Bank, court-house, and a public school, average attendance 26. Mining and stock-breeding district. Stock returns, 1899: horses, 3,321; cattle, 6,049; sheep, 6€5,762. Area, 7,314,961 acres. Population of district, about 700. Local newspaper: *Milparinka Advertiser.*

MILTON (32° 9′ S. lat., 150° 24′ E. long.), a neat and flourishing township, 4 miles from the port of Ulladulla and the central ward of the municipal district of Ulladulla, containing a population of about 800, and post office, Government savings bank, telegraph and money-order office, and branches of the Commercial and English and Scottish Banks. It is situated in the county of St. Vincent, electoral district of Moruya, police district of Milton, 155 miles S. of Sydney, 18 miles S. of Shoalhaven, 40 miles N. of Bateman's Bay. Hotels: Commercial, Star, and Milton. Lake Burrill is three miles and Lake Conjola four miles distant. Direct communication with the metropolis is by the Illawarra Company's steamers and Shellharbour steamers three times a week, and overland *viâ* Nowra, thence by railway to Sydney, daily. The places of worship comprise: Church of England, with a branch church at the Forest, 4 miles distant, Roman Catholic chapel with a branch chapel at the Forest, Congregational church and Wesleyan chapel. M.U. and Independent O.O.F. and Freemason lodges. The public buildings consist of court-house, telegraph and post-office, school of arts, agricultural hall, large and commodious public school with average attendance of 140. The township is supported by the dairy farmers. The Ulladulla Refrigerating Butter Company's central factory is situated in Milton, where butter is manufactured on the most scientific principles. Granite formation: clay subsoil, the land in the immediate neighbourhood being of wonderful richness, whilst the cattle are amongst the best in the colony. Newspaper: *Ulladulla and Milton Times.*

MINMI (32° 40′ S. lat., 151° 38 E. long.), a post town, with money-order, savings bank, telephone and telegraph office, and railway station, on a creek of the same name, 89 miles N. of Sydney (111 postal), 14 miles from Newcastle, and 6 miles from Hexham. It is in the county of Northumberland, and electoral district of East Maitland. The district is a coal-mining one, and the product of the collieries (belonging to Messrs. J. and A. Brown) has a good reputation for its heat-producing and steam-generating qualities. A private line connects the colliery with the Great Northern Railway and the coal shoots at Hexham. The output of coal for 1899 was 321,000 tons, valued at £97,500; about 900 hands are employed. There are seven hotels; fire brigade with fire engine, reel, hose-cart and 1,725 feet hose. Anglican, Roman Catholic, Presbyterian, Free and Primitive Methodist, Christian Brethren, and Salvation Army places of worship, School of Arts, and ambulance association, and a public school, average attendance 530; also Masonic, Oddfellows' (M.U.), Rechabites', Druids' and Good Templars' Lodges. Population, about 6,500. Hunter district water supply; capacity reservoir 69,200 gallons.

MITTAGONG (34° 17′ S. lat., 150° 31′ E. long.), a post town, with money-order, telegraph and savings bank office, in the county and electorate of Bowral, police district of Berrima, on the Great Southern Railway, 77 miles S. of Sydney, fares, 14s. 6d. and 9s. 7d. Inns: Morris's, Gallwy's, and Hilder's. It lies at an altitude of 2,069 feet above the ocean level, and is one of the most healthy and popular resorts on the Southern line. It is a coal and iron district, and the country round is of a pastoral and farming character. Bank: Commercial Banking Co. of Sydney. There are four churches, public and one private school, the former with average attendance of 260, also a Court of Petty Sessions, 18 stores, fine new School of Arts, a recreation club, excellent band, an energetic Progress Committee (John Elliott, chairman), and a horticultural society. Fifteen miles from here are the Australian Kerosene Oil and Mineral Co.'s Works (near Joadja Creek); about 1,944 acres are in occupation, in which there is a proved seam estimated at a million and a half tons of kerosene mineral, besides almost unlimited quantities of coal. A large stationary engine has been erected for winding the mineral out of the valley, and extensive works for the manufacture of the kerosene. Sapphires and zircons have also been found in the district, and diamonds are said to exist in some localities. It is connected by railway with the Southern Line near Mittagong. The famous Wombeyan Caves are reached from here, and there is a good macadamised road. The district is incorporated, with ratable property of the annual value of £7,150. Population, 1,100. Newspaper: *Berrima District Leader.*

MOAMA (36° 3′ S. lat., 144° 56′ E. long.), a post-town, with money-order, savings bank, telegraph office and railway station, formerly known by the name of Maidens' Punt, situated on the north bank of the river Murray, opposite Echuca, in Victoria, being the border town of New South Wales at this point. It is in the county of Cadell, and police district of Moama, electorate of Deniliquin. It lies 516 (578 postal) miles SW. of Sydney, the communication overland with the metropolis being by rail to Deniliquin, thence coach to Hay or Jerilderie; also by rail through Echuca *viâ* Seymour and Albury. Hotels: Bridge, Border Inn, Riverina, Railway Terminus, and Vine. It is in direct railway communication with Melbourne (158 miles S.), from which it is easily reached in a few hours' journey. A railway connects it with Deniliquin, the chief town of Riverina, and a substantial iron bridge, that is used for the railway and general traffic, spans the Murray. It has been constructed at the joint expense of the two colonies, at a cost of about £100,000, and is, without doubt, the finest structure of the kind in the Southern hemisphere. Bank: New South Wales, also an Agricultural Society and Jockey Club. Public school, with average attendance of 94 scholars. Court-house, post-office, police barracks, and a customs house. Fire brigade has fire engine, two reels, and 1,000 feet hose. The Episcopalians, Bible Christians and Roman Catholics have large places of worship. Moama is now a municipality. The district is chiefly devoted to agriculture and grazing. There are valuable red gum flats along the banks of the Murray, which are now preserved from being cut, for the future use of the colony. A police-court is held here, presided over by a police magistrate. The population is estimated at upwards of 900; in the census district are 3,380 souls. The district is incorporated, has 50 miles of roads and streets, with ratable property of the annual value of £8,950, and a Hunter district water supply with reservoir of 33,000 gallons. The *Riverine Herald* circulates here, also the *Echuca and Moama Advertiser.*

MOGIL MOGIL (29° 15′ S. lat., 149° 47′ E. long.), a postal town, in the electorate of the Barwon, with telegraph and money-order offices and Government savings bank, situated on the Barwon river, 490 miles W. of Sydney, to which communication is by coach to Narrabri bi-weekly, 128 miles distant, thence by rail. There is one hotel—the Mogil Mogil—a private school and a general store. Population of district about 250, who are engaged in pastoral pursuits.

MOGO (35° 32′ S. lat., 150° 9′ E. long.), a post town, with telegraph and money-order facilities, on the coast, 205 miles S. of Sydney, and about 12 miles from Moruya, in which electorate it is situated. It has three places of worship and a public school, with an average attendance of 31 scholars. Mining (quartz-reefs) and agricultural district, principally the latter. Tarago is the nearest railway station, 97 miles distant. Population, with neighbourhood, about 250.

MOLONG (33° 6′ S. lat., 148° 54′ E. long.) (electorate of Molong) lies on a rivulet of the same name, on the road from Orange to Wellington, 172 miles (216 postal) WNW. of Sydney; it has a money-order and telegraph office, Government savings bank, and railway station; fare to Sydney, 42s. 6d. and 28s. 6d. Coaches run to Cumnock, Obley, &c. Hotels: Freemasons', Commercial, Telegraph, Royal, Court-house, Post Office. Places of worship: Episcopal, Wesleyan, Presbyterian, Roman Catholic, and the Christian Army. Public buildings: court-house and police barracks, public school —a commodious brick building—with average attendance of 150, and a R.C. convent school: Progress Association, branches of the Joint-Stock and Commercial Banks, a Mechanics' Institute, with a library of 1,100 volumes, a fine brick hall, M.U.I.O.O.F. lodge, dairy company and creameries, and steam flour mills. Fire brigade has fire engine with 226 feet hose. The district abounds with copper ore, and two mines, the Goodrich and the Copper Hill, have been worked. Quartz reef with fair indications has been discovered at Buckinbah, 30 miles from Molong, Delaney's Dyke Gold Mine is a few miles from the township, and Mount Aubrey on the outskirts of the district between Molong and Peak Hill is now being developed. Extensive deposits of valuable marble exist in the town and district, grey, chocolate, and encrinite. This stone is excellent for monumental and building purposes; also natural pigments have been recently discovered in various parts of the district. Farming is now extensively carried on, the produce being wheat, maize, oats, barley, potatoes. In 1899 there were 984,308 sheep in the district, 13,871 head of cattle, and 10,110 horses; area, 1,711,479 acres; and in every respect the district will compare favourably with any other in the colony. Places of petty sessions are Molong, Cudal, Obley, Toogong, and Cumnock. Molong is a municipal centre, proclaimed November 13, 1878, having property of the annual ratable value of £6,830, and 37 miles of roads, and is lighted by gas. Water supply from Molong Creek, railway tank, wells, &c. Boring for artesian water is being carried out. The population numbers about

1,150 persons. Newspapers, *Molong Express* and *Argus*. Geological formation: limestone.

MOLONGLO (35° 25′ S. lat., 149° 25′ E. long.), a post, telegraph, money-order office, Government savings bank, on the river of the same name, 188 miles S. of Sydney, to which communication is coach to Bungendore station (12 miles), thence rail. It is a farming and grazing settlement, situated in the electorate of Queanbeyan. Has half-time public school and Anglican church. There is plenty of good shooting in the district.

MONTEFIORES (32° 20′ S. lat., 149° 2′ E. long.), a postal township, on the western bank of the Macquarie, in the Wellington electorate. The communication with the metropolis is by rail from Wellington; distance from Sydney 198 miles W. (253 by rail). It contains two stores and three hotels. It is named after its founder and original proprietor.

MOONAN BROOK (31° 50′ S. lat., 151° 15′ E. long.) is a small mining township, 35½ miles from Scone, and about three miles from the Hunter river, in the electoral and police district of Robertson, county of Durham, 224 miles N. of Sydney. Mode of conveyance is by mail coach, which leaves Scone, the nearest railway-station, every Tuesday, Thursday, and Saturday; fare, ten shillings. There is a telephone station, money-order office, savings bank, one hotel, general stores, public school, Union church, and a buttery employed about three months in the year. Geological formation: slate and granite. Population, 100.

MOORWATHA (35° 52′ S. lat., 146° 44′ E. long.), a postal township, in the county Hume, and electoral district of Albury, on the banks of a small stream called Major's creek, 410 miles SW. of Sydney. The only building of more than average size is the church (Anglican), St. Mary's. Two public schools here, average attendance 21. The communication with the metropolis is *viâ* Albury (16 miles SE.) or Gerogery; to both places there is a good road. Brocklesby is the nearest railway station, 14 miles distant. District is principally of an agricultural character, and has mostly been taken up by selectors; much wheat is grown, exports being about 100,000 bushels annually. A large vineyard is in the neighbourhood. Population, with the vicinity, is stated at between 400 and 500.

MORANGARELL, a post town with savings bank, money-order, and telegraphic facilities, 286 miles S. of Sydney, county Bland, police district of Young, electorate of Grenfell, situated on the Bland, or Yeo Yeo creek; conveyance is by coach to Young, 46 miles distant, thence rail; coaches also run to Marsdens and to the Cootamundra Temora railway line. There is one hotel, a provincial school, Presbyterian church, police station, and court-house, and a population of about 50 (district 500). Geological formation: plains, saline soil.

MOREE (29° 30′ S. lat., 149° 55′ E. long.), a post town, with money-order, savings bank, telegraph office telephone and railway station, 413 miles N. of Sydney, county Courallie, situated on Mehi river; fares, 71s. 6d. and 48s. It is in the police district of Tamworth and electoral district of Moree. Hotels: Bank, Post Office, Criterion, Royal, and Sportsman's Arms, Tattersall's, Imperial, and others. Public school, average attendance 270. Banks: N.S. Wales and Commercial; Anglican, Roman Catholic, Presbyterian, and Wesleyan churches, and Salvation Army barracks. Public buildings: court-house, gaol, land and survey offices. Coaches run to Warialda, 20s.; Bingara, 20s.; Meroe, 20s.; and Mungindi, 25s. each way. It is a farming and grazing district, and supports two Racing Clubs, Pastoral and Agricultural Society, and a School of Arts, with library of 1,000 vols. Oddfellows' I.O.G.T. and Druids' lodges. Area under crop in the electoral district 3,000 acres, produce being wheat, maize, potatoes. Stock returns, 1899: 7,559 horses; 1,194,174 sheep; 28,012 cattle. Area, 2,854,437 acres Dairy produce: butter, cheese, bacon. The district is incorporated and has 43 miles of roads, streets and lanes, and ratable property of the annual value of £13,558 17s. Population, 2,000. Local newspapers: *Moree Examiner* and *Moree News*.

MORPETH (32° 49′ S. lat., 151° 35′ E. long.), prettily and healthily situated at the head of the navigation of the river Hunter, about half a mile from its junction with the Paterson, 30 miles from Newcastle (fares, 2s. 4d. and 1s. 4d., or direct from Sydney 14s. 6d. and 9s. 2d.), 3 miles from East Maitland, with which it is connected by a branch line or tramway (fare, 6d.), and 120 miles N. of Sydney, with which it has daily communication by steamer and railway. The hotels are the Royal, Hunter River Steam Packet, Settler's Arms, Crown and Anchor, Commercial, Farmers' United Home, and Caledonian. It is in the county of Northumberland, electorate of East Maitland, parish of Alnwick and Morpeth, and police district of Maitland, and has a telegraph station, money-order office, and savings bank. The trade of the town depends, in a large measure upon the agricultural interests. Every kind of produce is grown, but the staple articles are maize, lucerne, rye, millet, barley, wheat, potatoes, and wine. Dairy produce: butter, bacon and hams, and cheese. The Episcopal church is said to be one of the most romantic and English-looking in the colony; the Wesleyan, Primitive Methodist, Presbyterian and Catholic places of worship are neat and good structures, the last being lately built at a cost of about £3,000, and is one of the handsomest structures in the Northern district. Fire brigade has reel, hose-cart and 750 feet hose. A schoolhouse serves the Roman Catholics for educational purposes, also a convent. The public school (average attendance 180) is a superior building. Bank: Commercial. The School of Arts has a fine hall, library and reading-rooms, with 1,300 vols.; the court-house is a substantially-built structure. The Newcastle and Hunter River Steam Company has two wharves for the loading and discharging of its steamers free of wharfage duties. These wharves communicate with the railway. Vessels up to 800 tons can navigate the river to Morpeth. The town was erected into a municipality on December 1, 1865. It has six miles of streets, and ratable property of the annual value of £7,650. Hunter district water supply. The population is estimated at 1,200 persons. Local newspaper: *Morpeth Want*.

MORTLAKE (34° 10′ S. lat., 150° E. long.), a post town with telephone station, in the county of Cumberland, about seven miles west of Sydney, with which there is communication both by coach and steamer, also cab to Burwood, thence train. There are here two hotels, a public and Catholic school, institute and Anglican, Roman Catholic, and Congregational churches. The Australian Gasworks Company carries on its business at Mortlake. Population about 2,000. Geological formation: coal.

MORUYA (35° 53′ S. lat., 150° 6′ E. long.), a money-order, Government savings bank, and telegraph town, five miles from the Heads, on the River Dena, in the county of Dampier, electoral district of Moruya, and police district of Broulee, 198 miles (242 postal) S. of Sydney, with which there is regular communication by steamer to Bateman's Bay, from which place coaches run, also direct steam communication and mail coach six times a week to Tarago station, 85 miles distant, and *viâ* Bateman's Bay and Milton to Nowra railway station six times a week. The leading hotels are Keating's, Adelaide, Commercial, Club House, Royal, and Criterion. There are several places of worship in the town—Episcopalian, Roman Catholic, Wesleyan, and Presbyterian—six stores, court house, police station, and branches of Bank of N.S. Wales and Commercial Bank of Sydney. Public school (average attendance 100), also a R.C. school and convent. In the neighbourhood are a tannery, several cheese and bacon factories, one saw mill, a flourishing Agricultural Society, mechanics' institute, with over 1,000 vols., also Oddfellows' (M. U. Good Templars', and Masonic lodges. Coaches run to Braidwood, Bateman's Bay, Bega, Bodalla, Nerrigundah, and Eurobodalla. The district is an agricultural and mining one. The Moruya silver mines are within four miles of the town, and have been profitably worked; other minerals, including gold, also exist. The Bim Bimbie mines, about ten miles distant, towards Batesman's Bay, are now being extensively worked. At Burra, 7 miles from the town, a fine slate quarry exists, but has not yet been worked, and from a quarry on the river were obtained the splendid granite columns of the Sydney post-office. Large crops of maize, wheat, barley, oats, and potatoes have been raised on the cultivated land, which mainly consists of fertile alluvial flats. Two expensive breakwaters have been constructed at the river entrance; and other extensive improvements are being carried out; a sand pump is working with great success, a granite training wall is being erected, and a new bridge is in course of construction. Nine miles from Moruya township is the beautiful harbour of Broulee, 30 miles south are the Dromedary mountains, where rich quartz reefs exist. The population is estimated at 1,100 persons. The district is incorporated, and has 46 miles of streets, with ratable property of the annual value of £5,810. The *Moruya Examiner* is the local paper.

MORVEN (35° 39′ S. lat., 147° 7′ E. long.), distant 36 miles from Albury, on the Wagga Wagga road, and 345 miles (360 postal) from Sydney, S., is situated on the Billabong creek, which at this point is spanned by a wooden bridge. The district, which is in the Hume electorate, is a squatting one, the creek frontages being all secured by the owners of the adjacent runs. The principal buildings are a Church of England, a hotel and store. There is a post-office, and mails are made up daily for Wagga Wagga and Albury. Culcairn is the nearest railway station, 5 miles distant.

MOSMAN (33° 51′ S. lat., 151° 13′ E. long.), a healthy and beautifully situated suburb, about 2½ miles from Sydney, on the north shore of the harbour, in the county of Cumberland, parish of Willoughby, electorate of Warringah, and police district of St. Leonards. The district is incorporated, and has ratable property of capital value of £268,813, annual value of £48,982, and an assessed value of £57,543, a revenue of £2,877. Ferry steamers run every half-hour to Circular Quay (morning and evening every twenty minutes), also electric tram to North Sydney and to the Spit, in course of construction; it has a savings bank, money-order office, postal and telegraph and telephone facilities, three hotels; there is a public and Roman Catholic school, Episcopalian, Presbyterian and Wesleyan, and Congregational churches, Masonic and Oddfellows' lodges, eight general stores, several other shops, and a number of substantially built private residences; the land rises to a considerable height and commands a splendid view of the harbour. Population, about 4,000. There is a permanent water supply, and the suburb is lighted by gas. Municipal baths. Balmoral Beach.

MOSSGIEL (33° 10′ S. lat., 144° 40′ E. long.), a post-town, with telegraph, savings bank and money-order office, county of Waljeers, and electoral district of the Lachlan, 562 miles W. of Sydney, and about 70 miles W. of Hillston. Hay is the nearest railway station, to which a bi-weekly coach runs. Has three stores; public school, average attendance 28. Court of petty sessions is held monthly. Inns: the Mossgiel and Royal. Population about 120.

MOSS VALE (34° 19′ S. lat., 150° 23′ E. long.), a post, telegraph, savings bank, and money-order town, situated 2,205 feet above the sea-level, on Waite's creek, and Bong Bong river, 86 miles S. of Sydney, in the county of Camden, electorate of Bowral, and police district of Berrima. Communication is direct by the Great Southern line, fares 16s. 6d. and 10s 9d., and on Saturdays excursion trains run at 1d. per mile. Hotels: Commercial, Central, Family, Royal, and splendid railway refreshment rooms. Elm Court now belongs to the Roman

Catholic body, and is used as a ladies' college and primary school. A public school is here, with average attendance of 101 scholars, a Roman Catholic school, and three ladies' seminaries, and branches of the English and Scottish and Commercial Banks. Coaches run to Nowra, Kangaroo Valley, Berry, Sutton Forest, Berrima, Burrawang, Robertson, and other places. A Court of Petty Sessions, District Court, Land and Licensing Courts are established at Moss Vale, and there is a commodious court-house; Anglican, Roman Catholic, Presbyterian, and Wesleyan places of worship, Salvation Army barracks, Centennial hall, Oddfellows' hall, and Council chambers; the town is lighted with electricity, and the Berrima Agricultural Society hold their show annually in March. The water supply is from the Wingecarribee river, the reservoir dams holding 2,500,000 gallons and the service reservoir 500,000 gallons. A summer residence for the Governor has been built two miles from here, near Sutton Forest, enclosed in spacious grounds; and numerous summer residences of Sydney gentry have been built in the vicinity of the township. The School of Arts is a fine substantial edifice containing large library, reading, and smoking rooms, &c.; the post office is also a splendid building. The town contains three public halls. Also numerous stores and several public societies, including Oddfellows, Protestant Alliance, and a local fire brigade. The land in the district consists mainly of rich black and chocolate-coloured soil, admirably suited for farming. Moss Vale railway station is the outlet to Sydney and Goulburn, of the rich dairying and agricultural districts of Burrawang, Robertson, Sutton Forest, Berrima, Kangaroo Valley, Yarrunga, Kangaloon, Myra Vale, Bundanoon, and Meryla. Butter factories have been successfully established in various parts of the district. A recreation club and Musical Society exists in the town, also a rifle club. Fire brigade has reel and 1,050 ft. of hose. Within easy distance are the Fitzroy Falls, Carrington Falls, Belmore Falls, Macquarie Pass, and many other famous views. The district was incorporated in 1888, and has about 25 miles of streets, with ratable property of the annual value of over £12,500. Population of town 1,580. Local papers: the *Moss Vale Scrutineer* and *Moss Vale Record*.

MOULAMEIN (144° 5′ S. lat., 35° 5′ E. long.), a postal township, with money-order office, Government savings bank and telegraph station, in the county of Wakool, electoral district of Deniliquin, on the Edward river, at the junction of the Billabong creek, 541 miles SW. of Sydney. Hotels: Sportsman's Arms and the Moulamein. A Presbyterian church with resident minister; a court-house, police barracks, a public school, with average attendance of 17 scholars; one large store The district is principally a pastoral one, surrounded on all sides by stations. Stock returns (1899): 1,535 horses, 4,678 cattle, 554,683 sheep; area, 1,609,298 acres. Conveyance to Deniliquin, about 75 miles distant SE.; thence coach to Hay, is the route to Sydney, or per train *viâ* Echuca to Melbourne. Population, 131.

MOUNT BILLAGOE. *See* COBAR.

MOUNT BROWNE (29° 45′ S. lat., 141° 46′ E. long.), a postal township called after Dr. John Browne, who accompanied Sturt in his exploration of 1845, is a mining locality, situated in the Grey range in the north-west corner of New South Wales, in the county of Evelyn, electorate of Wilcannia, equidistant from the boundaries of Queensland and South Australia, some sixty miles from each, and about 926 miles NE. of Sydney. The district itself is said to be of historic interest, as nine miles NW. of Mount Browne is "Depot Glen," where Sturt's party rested so long; where remains of the boat with which he was to have sailed over Central Australia are still preserved. The whole country is said to be sandstone impregnated with quartz. By the mail route the distance from Wilcannia is 170 miles. Communication is bi-weekly coach *viâ* Cobar and Wilcannia, but the shortest route is weekly *viâ* Bourke, Wanaairing and Milparinka; it can also be reached *viâ* Adelaide, Broken Hill, and Milparinka. The mining population is about 80. There is a public school, court-house and police station, and two hotels, Royal Standard and Albert.

MOUNT COSTIGAN (34° S. lat., 145° E. long.), 204 miles SW. of Sydney, a post town, on the Tuena creek, county Georgiana, electorate of West Macquarie, and police district of Tuena. Communication with Sydney is by coach to Newbridge (Monday and Friday), 40 miles distant, fare 14s., thence by rail or coach *viâ* Peelwood to Goulburn. Principal hotel: the Commercial. A public school, average attendance 27, and Roman Catholic church. The district is chiefly mining. Population, 130.

MOUNT HOPE (33° S. lat., 146° E. long.), a postal town, having facilities of telegraph, money-order, and savings bank. It lies 425 miles W. of Sydney, county Blaxland, electorate of the Lachlan, and police district of Hillston; it has two hotels, Royal and Commercial, public school (average attendance 50), police station and court-house, several small stores; coaches run to Bymagee, Cobar, and Hermidale once weekly, to Euabalong and Condobolin twice weekly. Route to Sydney is coach to Condobolin or Hermidale, thence rail. The local industry is almost solely confined to mining pursuits. Population of town about 250.

MOUNT KEMBLA, a post, money-order and savings bank township, one of the highest peaks of the Illawarra range of mountains, is 1,730 feet above the sea-level, distant about 6 miles SW. from the port of Wollongong, reached by coach, 1s., and 58 miles S. of Sydney, in the electorate of Illawarra. Is a noted landmark and guide to mariners sailing along the coast. The steepness of the mountain side on the north of Mount Kembla discloses a section of the geological formation of "the coal measures," five seams of coal being seen *in situ* at this locality. The lower seam is above the level of the plain, and the others lying superimposed at convenient working distances above each other and all cropping out to view in several places, can be easily and cheaply worked by adits driven into the mountain side. These five seams are respectively 7 ft., 4 ft., 17 ft., 7 ft., and 14 ft. in thickness. From the report of an experienced mining engineer it has been estimated that these seams will yield in the aggregate coal at the enormous rate of 52,000 tons per statute acre. There is also found in this locality abundance of fire-clay. Mount Kembla is divided into two townships, Kembla Heights, where the majority of the miners reside, and Lower Mount Kembla. The local public school has an average attendance of 140. There are Anglican, Roman Catholic, Presbyterian and Primitive Methodist, Oddfellows' and Druids' lodges, miners' reading-room, rifle and other clubs. Dairying is carried on in the district. Population, about 1,000.

MOUNT McDONALD. *See* MILBURN CREEK.

MOUNT VICTORIA (33° 36′ S. lat., 150° 15′ E. long.), a post town, with money-order, telegraph office, savings bank, and railway station and Government savings bank (fares, 14s. 6d. and 9s. 7d.), 77 miles NW. of Sydney, in the electoral and police district of Hartley, and county of Cook. It lies 3,500 feet above the sea level. Buildings: three hotels, Royal and Imperial, &c., and several private boarding establishments, a public school, with average attendance of 50, Church of England, Wesleyan and Roman Catholic churches, a large public hall, a boys' private boarding school, and a number of stores, and an Oddfellows' lodge. District is very mountainous, with magnificent scenery, and possessing a climate that fits it for a sanatorium; and during the summer season is a favourite resort of tourists from all parts. From here the Jenolan Caves, Katoomba Falls, Wentworth Falls, and the celebrated Govett's Leap can be visited. A new road has been opened to the celebrated Jenolan Caves, distant 36 miles. Formation: Sedimentary layers of carboniferous and Triassic ages compose the mountains, which are of especial interest to geologists. Population about 300 persons.

MUDGEE (32° 35′ S. lat., 149° 32′ E. long.) is a town of some importance, on the Cudgegong river, about 153 miles (190 by rail, fares 37s. 6d. and 25s.) NW. of Sydney, and about 80 miles N. from Bathurst, in the county of Wellington, electorate of Mudgee. It is 1,635 feet above sea-level. It has several substantial stores and shops, and numerous hotels. Among the latter are the Tattersall's, Imperial, the Paragon, Club House, Post Office, and the Mudgee. It is located in the centre of a very rich auriferous district, and has besides the advantage of being environed by country valuable alike to squatter and farmer. The diggings are both alluvial and quartz. The wool from the Mudgee district has long had both a London and a colonial reputation, and the butter industry is assuming large proportions, there being numerous factories within a radius of 30 miles. The town, which is well built and lighted with gas, with streets laid out at right angles, is presided over by a mayor and eight aldermen, and has been a municipality since February 21, 1860. There are 13½ miles of roads, with ratable property of the annual value of £18,560. The Cudgegong municipality, which surrounds the town proper, and extends about nine miles from Mudgee in every direction, has ratable property of the annual value of £19,840. The public buildings are the hospital, the Mechanics' Institute, with a library of 4,500 vols., the court-house, the gaol, with accommodation for eighty prisoners, the churches, Salvation Army Barracks, and the Town Hall, which cost £5,000, and the Cudgegong Council Hall. At the corner of Market and Church Streets are the R.C. church, a towered stone structure, and St. John's (Church of England); the Wesleyan chapel is a fine roomy building, and a splendid Presbyterian church has been erected at a cost of £4,000. There is also a Primitive Methodist chapel, four schools, one Roman Catholic, a public school, having an average attendance of 480 scholars, a boys' high school, and an excellent ladies' school known as "Braeburn." At the end of Church Street a wooden bridge spans the river. Three banks: New South Wales, Joint Stock, and Commercial, all of which are located in fine buildings, also an agency of the Savings Bank of New South Wales. Fire brigade has fire-engine with 660 ft. of hose; water supply from Mudgee Waterworks. The mining capabilities of the Mudgee district are not limited to gold, as silver, iron ore, coal, slate, antimony, cinnabar, manganese and other minerals abound, only needing capital for their profitable development. There is a large breadth of land under cultivation, producing wheat, maize, barley, oats, potatoes, wine, tobacco. Dairy produce: butter, cheese, bacon and ham. The manufacturing interests in the district are represented by three coach factories, a soap works and candle factory, two tanneries, two boot factories, three steam flour-mills. To the post-office is attached telegraph, savings bank and money-order office. Coaches run to Gulgong, Hill End, Denison Town, Coolah, Stony Creek, Wellington, Home Rule, Capertee, Cudgegong, Gilgandra, Coonabarabran, Cassilis, Gunnedah, Wollar, and Barragan. Stock returns (1899): 11,518 horses, 36,353 cattle, 679,961 sheep; area, 1,721,577 acres. The population comprises about 2,600 persons; in the census district there are 20,000. Newspapers: *Mudgee Guardian* and *Western Post*.

MULGOA (33° 50′ S. lat. and 130° 40′ E. long.), 40 miles W. of Sydney. It is a municipal district on the Cowpasture river, in the county of Cumberland, electorate of the Nepean, and police district of Penrith. The country is noted for its pasture land and fruit cultivation, and the magnificence of the surrounding scenery; the old township is on the estate of the Hon. G. H. Cox, and is rising in importance. It has a public school, with average attendance of 30, Episcopal church, a telephone, money-order office, and savings bank. Communica-

tion with Sydney is by way of Penrith, 8 miles distant, coach thence daily. Formation: generally sandstone. Annual value of ratable property, £4,400. Population, 600.

MULGRAVE (33° 37′ S. lat., 150° 49′ E. long.), a railway township, with postal and telegraphic facilities, in the police district of Windsor, electorate of the Hawkesbury and county of Cumberland, 33 miles NW. of Sydney; fares, 4s. 1d. and 2s. 5d. It contains two hotels and a public school. The district is agricultural. Population scattered.

MULLENGANDRA (35° 57′ S. lat., 147° 4′ E. long.), a small township on the Main South road, 20 miles NE. from Albury and 353 miles (398 postal) from Sydney SW., in the electorate of Albury. It has an Episcopal place of worship (Morrice Memorial), (Presbyterian services also held), a public school, average attendance 23, two hotels—Rose and Crown and Royal Oak, and a store. Communication is *viâ* Albury or Culcairn railway stations, distant 20 and 25 miles respectively. Agricultural, wine, and fruit-growing district. Population about 200.

MULLUMBIMBY (co. Rous), township on the Brunnuck river, with post-office, money-order office, telegraph, savings bank, and railway station. Sydney is reached by rail to Byron Bay (10 miles), thence steamer, 346 miles. There are two hotels, State school, Roman Catholic church, School of Arts (in which several denominations hold services). It is 39 miles from Lismore and 22 from Murwillumbah. Surrounding district is very fertile, and the dairying industry is developing. A large export trade in cedar, pine, teak, and hardwood gives considerable employment. Formation: granite, basalt. Population, about 400.

MULWALA (35° 59′ S. lat., 146° 0′ E. long.), a border town in the county of Denison, electorate of the Murray, and police district of Albury, situated on the Murray river, 340 miles S. of Sydney, to which conveyance is per coach to Corowa station, 25 miles distant. Hotels: Post Office, Federal, and Royal Mail. It has postal, money-order, Government savings bank, and telegraph facilities, School of Arts, a public school, average attendance 88, Church of England and Roman Catholic places of worship, and a court-house. Coaches run to Tocumwal and Corowa, fares, 12s. and 8s., and Berrigan, fare 10s. Population of town, 500. Agricultural and pastoral district.

MUNDOORAN (31° 52′ S. lat., 149° 10′ E. long.), a post town, money-order office and telegraph station, and Government savings bank, on the Castlereagh river, in the county of Napier, electorate of Wellington, and police district of Mudgee, 212 miles (256 postal) W. of Sydney and 44 miles S. from Coonabarabran. Travellers' route is per coach to Mudgee, 73 miles distant. Coaches run to Mudgee, Gilgandra, Coonabarabran, Cobbora, and Gulgong. It contains two hotels, a police station, public school, with average attendance of 30, Anglican church, mechanics' institute, several dwellings, and about 100 inhabitants.

MUNGINDI (29° 2′ S. lat., 149° 10′ E. long.) consists of two townships, one on each side of the Macintyre River in New South Wales and Queensland respectively. The two townships and Colonies are connected by a large timber truss bridge, constructed jointly by the two Colonies. A tri-weekly mail plies to and from Moree, distant seventy-four miles, which is the nearest point on the railway, and a bi-weekly coach plies to and from St. George (Queensland), distant ninety-five miles, and another bi-weekly to Goondiwindi, 110 miles. Mungindi is situated 501 miles NW. of Sydney. The township on the New South Wales side is much larger and more progressive than that on the Queensland side. It is an important stock crossing. Population of town and district about 600. There are two hotels; postal, telegraphic, money-order, and savings bank facilities; public school, Custom-house, and a number of brewing and cordial industries. The district is wholly pastoral, and there are several artesian bores. Newspaper: *Mungindi News.*

MURRUMBURRAH (34° 32′ S. lat., 148° 27′ E. long.), county of Harden, electoral district of Boorowa and police district of Young, a post, telegraph, savings bank, and money-order township, 1,268 feet above sea-level, on the Murrimboola creek, a tributary of the Jugiong, about twenty miles each way from the towns of Young, Binalong, Jugiong and Cootamundra, and 230 miles SW. of Sydney. There is a station on the G.S. line of railway here, fares, 45s. and 30s. 3d. The Federal Commercial, Criterion, Exchange, Carrington, Telegraph, and Railway are among the principal hotels, twelve stores, and a mill. Bank: Commercial. A steam flour-mill is here (Allsopp's). The town is making satisfactory progress. A new post-office was erected during 1879, a court-house and public school (average attendance 250), convent school; also a Mechanics' Institute with 500 vols., Free Public Library, containing 700 volumes, and a Pastoral and Agricultural Society. There is a Roman Catholic church (St. Mary's), Episcopal (St. Paul's), and handsome parsonage, also Presbyterian and Wesleyan churches, Masonic, Oddfellows' (M.U. and G.U.), Protestant Alliance and Hibernian Societies. Courts of Petty Sessions are held on alternate Fridays; a district Court also held. Police magistrate of Young attends. The line connecting the Great Southern and Western systems of railway junctions is at Demondrille, about a mile from the town. Formation: granite. The Blind Creek diggings are situated within two miles of the town. Population, 1,500. The district is incorporated, and has 21 miles of streets and ratable property of the annual value of £7,500. Newspaper: *The Signal* (published weekly).

MURRURUNDI (31° 16′ S. lat., 150° 50′ E. long.) is situated on the Page river, which runs through the town and divides it into two parts, 192 miles (217 postal) NW. of Sydney, at the foot of the Liverpool range of mountains, at an elevation of about 1,546 feet above the sea-level; at a distance of three miles is Mount Murrula. It is in the county of Brisbane and electoral district of Robertson, and on the Great Northern Railway, and has a telegraph, Government savings bank, and money-order office. Railway fares to Newcastle (120 miles), 23s. 9d. and 15s. 9d., or direct to Sydney 35s. 9d. and 23s. 6d. The Royal Railway, Commercial, Club, and White Hart are among the leading hotels. The places of worship are substantial buildings in use by the Roman Catholics, Episcopalians, Wesleyans, Presbyterians, and a convent and school. There is also a Pastoral and Agricultural Association. The Commercial Bank has a branch here. The public offices comprise two post and telegraph offices, hospital, court-house, gaol, public school, with average attendance of 150, a convent school, and a school of arts, with a library of over 1,100 vols. The town is connected by a strong wooden bridge with Haydonton, a township of nearly equal importance, but generally considered as forming a part of Murrurundi, the whole being a municipal district with 3 miles of streets, and ratable property of the annual value of £5,690. About 13 miles distant is Warrah station, the property of the A.A. Company. A few miles from here is the tunnel which pierces the Liverpool range. It is 528 yards long, and is lined throughout with brickwork set with Portland cement. About three miles north of the town is a kerosene shale mine, which boring operations have proved to contain an immense quantity of the best quality of shale, but it is not being worked at present Geological formation: sandstone and conglomerate. Stock returns (1899): 8,016 horses, 30,870 cattle, 555,719 sheep; area, 868,090 acres. Newspaper, the *Murrurundi* and *Quirindi Times.* The population is enumerated at about 1,250 souls, the census district returns give 7,306. The village of Blandford lies 4 miles distant. It has a public school, Episcopalian church, post and telegraph office, railway station, and several business premises. Ardglen is about 4 miles distant, with a public school, post, and telegraph office, one hotel, and a population of about 150.

MURWILLUMBAH, or Kynumboon (28° 15′ S. lat., 153 31′ E. long.), a post-town, with money-order, Government savings bank and telegraph office, on the Tweed river, 407 miles N. of Sydney, in the county of Rous, and electoral district of The Tweed. The best route is *viâ* Brisbane and Southport. Other coach route is *viâ* Nerang from Brisbane. The Tweed-Lismore railway is now open, and trains run daily between the Tweed and Lismore. There are eight hotels, branches of the Commercial and Bank of New South Wales, one public school, Anglican, Roman Catholic, Presbyterian, and Wesleyan churches, court-house, school of arts and M.U. Oddfellows. It is a place of Petty Sessions. Communication by sailing vessels and weekly by steamers from Sydney. The Colonial Sugar Company operate extensively here, and have erected machinery for crushing the cane. There are two sugar-mills in the district, and about 5,500 acres of land under cane, the average being two tons of sugar per acre, two large butter factories, and about 200 private separators. Petty Debts Courts are held regularly, and District Court thrice a year. Hotels: Club House, Australian, Cosmopolitan, Court House and Imperial. In South Murwillumbah there are three hotels. Population of town, 800, district about 30,000. Newspapers: *Tweed and Brunswick Advocate* and *Tweed Herald.* Geological formation: volcanic and alluvial flats.

MUSWELLBROOK or Musclebrook (32° 16′ S. lat. 150° 59′ E. long.), electorate of Robertson, and police district of Muswellbrook, is situated on Muscle creek and the Hunter river, about 475 feet above sea-level, on the main northern road, 60 miles N. from Maitland, and 150 miles (178 postal) NW. of Sydney, and is a station on the Northern Railway; fares to Newcastle (80 miles), 15s. 3d. and 10s., or direct to Sydney 27s. 9d. and 18s. The township is lighted by gas. The principal hotels are Barklay's, Smith's, Phillips', and Davis's. The district is agricultural and pastoral, principally the former. Wheat, pumpkins, and maize are largely grown; the grape also receives some attention. The places of worship belong to the Episcopal, Roman Catholic, Presbyterian and Wesleyan denominations. Masonic and Oddfellows' lodges. A public school, with average attendance of 200, Catholic school, average attendance 70, also Grammar school, and Church of England school. The Anglican church is said to be one of the finest ecclesiastical edifices north of Sydney. Other public buildings are the hospital, the school of arts, with library of 1,700 vols., and branches of the Commercial and Australasia Banks. There is also a money-order office, telegraph station, a number of stores, and a branch of the Government savings bank, and a butter factory. Coaches run to Merriwa and Cassilis. The municipal district was proclaimed April 13, 1870. It has 9 miles of streets, and ratable property of the annual value of £10,450. Population, 1,600; of the whole district, 4,000. Local newspaper: *Muscellbrook Chronicle.*

MYALL RIVER. *See* Bulladelah.

NARANDERA (34° 47′ S. lat., 146° 34′ E. long.), an important municipal town, with a post, telegraph, savings bank, and money-order office, on the Murrumbidgee river (county of Cooper), electorate of Murrumbidgee, police district of Narandera, 347 miles SW. from Sydney, on the South-Western Railway line, fares, 64s. 3d. and 43s. 6d. A branch line from here is constructed to Jerilderie, distant 65 miles, and tri-weekly Jerilderie to Berrigan, 22 miles, and to Finley 15 miles There are thirteen hotels, the principal being the Royal and Royal Mail. The Government buildings comprise a court-house and land-office, police barracks, a public school with average attendance of 250, a Roman Catholic, and two private schools, Mechanics' Institute, free public library, a fire-brigade, with reel and 1,000 ft. of hose, and a well-

conducted local hospital. Banks: Australian Joint-Stock, Commercial Bank of Sydney and New South Wales. A Court of Petty Sessions is held every week, a Small Debts Court once a week, District Court and Quarter Sessions thrice yearly, and Land Board sits every month. Places of worship, Church of England (St. Thomas), Presbyterian, Roman Catholic (St. Bridget), and Wesleyan, all commodious brick structures. Masonic, I.O.G.T. and I.O.O.F. lodges. The river is navigable to here during six months of the year. There are several large saw-mills about Narandera; a flour-mill, chilled meat factory, bicycle factory, carriage and implement works, cordial factory and soap works, a large brewery and three woolwashing establishments; the pine and red gum are exported to a great extent. The district is principally a pastoral one, but good agricultural lands have been taken up, and very large areas are under wheat and hay. Gold is also found in small quantities. A magnificent bridge here spans the Murrumbidgee river and is the chief crossing-place for stock travelling from Queensland to Wagga, Albury and Melbourne. The municipality has 15½ miles of roads and streets, and ratable property of the annual value of £15,730. Also a permanent water supply from Murrumbidgee river, reservoir capacity, 100,000 gallons. About 38 miles from here is the Aboriginal station of Warangesda, a reserve of 600 acres, which is now under the direct supervision of the Government. Stock returns (1899): 4,801 horses, 5,684 cattle, 391,231 sheep; area, 2,689,661 acres. Population of borough, 1,950; district, 7,000. Newspapers: *Narandera Argus* bi-weekly, and *Narandera Ensign*, weekly.

NARELLAN (34° 0′ S. lat., 150° 46′ E. long.), a village of some 120 inhabitants, 38 miles S. of Sydney, between Campbelltown and Camden. It is in the county of Cumberland, electorate of Camden. The route to Sydney is by tram to Campbelltown railway station, four times daily (fares, 5s. return, 3s. 6d. single). There are here one inn (the Queen's Arms), one store, a post-office, telephone station, a good school, average attendance 61, and an Episcopal church. Dairying and wood-cutting industries. Numerous small farms are in the neighbourhood. Population about 120.

NARRABRI (30° 19′ S. lat., 149° 45′ E. long.), in the electoral and police district of Narrabri, is a post, telegraph, money-order, railway station, and Government savings bank town, county Nandewar, on the Narrabri Creek, a branch of the Namoi river (half a mile distant), 351 miles NW. of Sydney, (fares 62s. 6d. and 41s. 6d.), and 252 miles from Newcastle, fares, 50s. 3d. and 33s. 9d. There are twenty hotels, West's Family Hotel, Commercial, Club House, Greyhound, Victoria and others. Narrabri contains hospital, two public schools (average attendance 494), convent school and branches of the Commercial, Australasia, and New South Wales Banks; a mechanics' institute with 1,900 vols., a flour-mill, seven saw-mills, land-office, court-house and gaol. There are 16 miles of streets, and ratable property of the annual value of £15,817. Churches: Episcopalian, Presbyterian, Catholic and Wesleyan. Coaches run to Walgett, Mogil Mogil, St. George and Goodooga, calling at intermediate places. The district is pastoral and agricultural, the soil fertile. Area under cultivation, about 8,000 acres, produce being wheat, maize, and potatoes. Stock returns (1899): horses, 4,301; cattle, 5,684; sheep, 391,231; area, 1,109,007 acres. Dairy produce: butter, cheese, bacon and ham. The low-lying lands are somewhat subject to inundation, but thousands of acres of first-class wheat land at the foot of the ranges are entirely beyond the reach of the floods, and are being free-selected. A railway line connects Narrabri with Moree, and the line is being built to Inverell, 81 miles. Water is obtainable almost everywhere for the sinking, and numerous creeks traverse the country. The locality has been pronounced carboniferous, but nothing definite has been discovered. Population about 2,400, of census district 5,890. Local journals, the *Narrabri Herald* (published Tuesday and Friday), *Narrabri Age*. Geological formation, sandstone and rotten basalt.

NARRAMINE, a pastoral and agricultural district, 300 miles W. of Sydney, with railway station, postal, telegraphic, savings bank and money-order facilities; situated on the Macquarie river, in the electorate of Dubbo, and police district of Dubbo. There is a public school, with average attendance of 130, Anglican, Roman Catholic, and Wesleyan churches, hotels (Commercial, Exchange, Royal, and Railway), 6 stores, cordial factory, two sawmills, and a population of about 1,500 (town and district). Coaches run to Peak Hill bi-weekly. Newspaper: *Narramine News*. The district is pastoral and agricultural. The water supply is obtained from the river, tanks, and wells. Railway fares, 57s. and 38s. 6d.

NATIONAL PARK. PORT HACKING. In 1880 the Government of New South Wales dedicated by proclamation in the *Government Gazette* an area of 36,300 acres of land for a public park and pleasure grounds for the use of the inhabitants of the colony, under the designation of "National Park." This is one of the largest public parks in the world. The management is vested in trustees, the Legislature voting money for beautifying and improving the grounds. The boundaries of this immense domain for the people's use has a frontage of 7½ miles to the Pacific Ocean (with a good boat harbour at Wattamolla, and good fishing grounds), 3¾ miles to Port Hacking Bay, and 1¼ mile to Woinora river, 1⅞ miles to the former main road between Sydney and Illawarra, *viâ* Woinora River, and 8 miles to the main road now in use between those places. There are within the boundaries of the park from north to south about 7 miles of the Illawarra railway. The Port Hacking river flows through it for 9¾ miles of its course into the bay, 5 miles being navigable for boats and small steam-launches. The northern boundary of the park is distant, by road and by the Illawarra railway, 15 miles from Sydney Railway Station, and about 17 miles from Liverpool. The southerly boundary is 8 miles from Clifton, 17 miles from Bulli, and about 25 miles from Wollongong, the nearest railway stations being Sutherland, Loftus Junction, and Loftus. Salt-water fish are at times plentiful; fresh-water fish—trout and perch—from Ballarat, Victoria, have been introduced. There are clean sandy beaches for bathing, an accommodation house and refreshment room with horse boxes. Telephone, boat-sheds, ferry punt, and every convenience for visitors. The park generally has an excellent aspect, and abounds with very beautiful, picturesque, fairylike scenes. From the high table-lands at numerous places most extensive views are obtained of the Pacific Ocean eastward of Port Hacking; Botany Bay, Randwick, and Sydney on the north; the coast line towards Wollongong and Illawarra Mountains on the south, and of the Blue Mountains on the west. The valleys of the principal watercourses, notably of Port Hacking river and Bola creek, are to a large extent covered with rich foliage, including stately cabbage-trees and bangalo palms, tree-ferns, Christmas myrtle, waratahs, gigantic lilies, and other handsome shrubs, growing in tropical luxuriance and brilliancy of colour, numerous well-grown blackbutt, woollybutt, turpentine, ironbark, and other noble forest trees, growing up to nearly 200 feet in the southerly part of the park, most of them bordering adjacent beautiful streams, having occasional long reaches of deep, shaded, pure, cool, fresh water. About 50 miles of carriage roads have been formed through the park, and other roads are in course of formation, securing varied and most beautiful drives and pleasant walks. Principal drives are Lady Carrington Road, from Loftus to the southernmost boundary of the park, along which at frequent intervals pretty and extensive views and glimpses of Port Hacking river, and the handsome palm and fern foliage bordering thereon, come into view, not surpassed for picturesque scenery in any part of the world.

NELLIGEN (34° 45′ S. lat., 150° 5′ E. long.), a seaport town, with telegraph station, money-order office and Government savings bank, in the county of St. Vincent, electoral district of Moruya, on the Clyde river, about 180 miles S. of Sydney; two steamers ply weekly between the two places. Tarago is the nearest railway station, distant 59 miles. Nelligen is connected by mail with Sydney, *viâ* Braidwood and *viâ* Bateman's Bay, three times a week. Hotel: the Steam Packet. It is the outlet of most of the trade between Braidwood and the Metropolis. Bateman's Bay is 6 miles distant E. by road, and Moruya 24 miles S. There is a R.C. church, a Church of England, and a Union church, branch I.O.G.T., a public school with average attendance of 50, a court-house, three saw-mills, four stores. The district is principally a pastoral one, though there were some alluvial workings in the vicinity of the town. The population numbers about 200

NERRIGUNDAH (36° 3′ S. lat., 149° 55′ E. long.), a postal and money-order village on the Gulf creek, 30 miles S. of Moruya, and 273 miles S. of Sydney, in the county of Dampier, electorate of Moruya, and situated in a valley enclosed by ranges. In the village are: 1 hotel, Free Selection, 3 stores, 2 places of worship, Catholic, and Presbyterian, a court-house, and public school (average attendance 22). The travellers' route is by conveyance to Moruya, thence by coach, *viâ* Tarago or Nowra. Gold mining is extensively carried on in the district, the workings being both alluvial and quartz. They are sometimes known as the Gulph diggings. Population about 250.

NEUTRAL BAY (33° 51′ S. lat., 151° 13′ E. long.), one of the most picturesque suburbs of Sydney, situated on the foreshores of Port Jackson, in the county of Cumberland and electorate of St. Leonard's. It is in the municipality of North Sydney and electorate of Warringah, and has postal, money-order, savings bank, and telegraphic facilities; one hotel; one superior public school, two Roman Catholic schools; Anglican, Presbyterian, and Wesleyan places of worship. The municipality is lighted with gas, and contains a permanent water supply and sewerage system. Population about 3,400. Geological formation: sandstone. There is frequent communication with Sydney by ferry boat.

NEVERTIRE (31° 50′ S. lat., 147° 45′ E. long.), a post-town with railway station, from which a branch railway is run to Warren, 12 miles, money-order, savings bank, and telephonic facilities, in the county of Oxley, and electorate of Coonamble, 341 miles north-west of Sydney; fare, 63s. 3d. and 42s. 9d. It contains four hotels, public school, and Anglican and Roman Catholic churches. The district is eminently suited for both pasture and agriculture. Population of town, 200; district, 503.

NEW ANGLEDOOL (29° 1′ S. lat., 147° 3′ E. long.), a post town, with money-order, savings bank and telegraphic facilities, situated in the county of Narran river, police district of Walgett, electorate of the Barwon. Communication is by rail from Sydney to Narrabri or Moree, thence coach. It is distant 557 miles NW. of Sydney, the nearest railway, Moree, being 146 miles away. There are three hotels, one public school, average attendance 35, police barracks, School of Arts, hospital, and one or two general stores. The district is pastoral. Geological formation: alluvial flats and stony ridges. Population, 150.

NEWBRIDGE (33° 25′ S. lat., 149° 25′ E. long.), a post town, telegraph, money-order, savings bank, and railway station, on the Western line, 164 miles W. of Sydney, lying 2,877 feet above sea-level, on Back creek, in the county of Bathurst, and electorate of West Macquarie. Railway fares 32s. 3d. and 21s. 6d. It is 19 miles W. of Bathurst, and 28 miles E. of Orange. It has three hotels, public school, average attendance 60, police barracks, two stores, and Church of England and

Wesleyan places of worship. An iron mine is here, and at a radius of a few miles are gold diggings, both alluvial and quartz, and a valuable slate quarry. Abercrombie Caves in the district. Population about 100.

NEWCASTLE (32° 55′ 15′ S. lat., and 151° 49′ 15″ E. long). is the principal shipping port on the northern coast, the amount of its tonnage being frequently above that of Sydney, from which it is distant about 62 miles by water and 102 miles N. by railway, and to which it is connected by telephone line Newcastle is connected by rail with the northern towns, the railway extending right through to Brisbane. At Werris Creek station the North-Western line branches off to Narrabri and Moree, a distance of 256 miles from Newcastle. The bridge over the Hawkesbury, 36 miles from Sydney, was opened on May 1, 1889, its estimated cost being £350,000, but this has been increased from unforeseen circumstances. Fare to Sydney, 12s. 6d. and 8s. Numerous hotels, of which the Great Northern, Criterion, Terminus, Centennial, Newmarket, Central, Westminster, The Grand, Shortland, Oxford, Clarendon, Exchange, Metropolitan, Crystal Palace, and Crown and Anchor may be considered as the most prominent. It is a city under the Episcopal supervision of Dr. Stanton, Bishop of Newcastle, with Bishop Stretch as Dean of the Cathedral. It is situated at the mouth of the river Hunter on the south bank, and is the coal emporium of the Northern district. The entrance to the harbour, however, is dangerous in ESE. stormy weather, owing to the heavy sea which breaks across, and many disastrous wrecks have from time to time occurred. The construction of the Southern Breakwater, which is a seaward prolongation of the Nobby's Head peninsula (the first portion of the work was the connection made between Nobby's Head and the mainland), and the formation of the Northern breakwater, have already proved of service, the bar being now sheltered, where formerly there were heavy seas and SE. gales to contend with. Near the end of the breakwater a small tower, showing a red light, has been erected, to enable masters of vessels to define the end of the breakwater when entering or leaving the port at night. The lighthouse on Nobby's Head carries a fixed white light, visible at 17 miles distant. The depth of water at the wharves is about 23 feet, and 27 to 30 feet in mid-harbour. Powerful dredges are continually employed deepening and clearing the channels and the wharf frontages. In the Horseshoe there is now room for 8 loaded vessels to lie at single moorings. Parliament voted £114,000 for harbour improvements, and many important works are being carried out. A lifeboat, built in 1897, is stationed here, with an efficient crew, and paid coxswain, and assistant. A steam pilot service is established in connection with the port. Nearly all the produce of the Hunter river district finds its way to Newcastle for shipment; but coal, wool, and frozen meat are the principal articles, of which enormous quantities are exported. The total output of coal in the northern district during 1899 was 3,259,708 tons, valued at £1,005,420, the price per ton ranging from 6s. 2d. to 8s. It is considered that the seams now being worked contain enough coal to keep up the present rate of production for 500 years. These give employment to 6,249 miners underground, and 1,566 at the surface, who are able to conduct their operations with considerable freedom from the dangers which beset English pitmen, explosions from fire-damp being of rare occurrence. The deepest pits are New Wallsend, Richmond Vale, South Burwood (Dudley), Burwood Extended, Durham, Greta, Stockton, and the Newcastle Companies; some of them are worked by tunnels. At present there are 59 coal mines under examination in the Northern district. The machinery for loading vessels is very complete; originally it consisted of three steam cranes, belonging to Government, two shoots belonging to the A.A. Company, and two shoots belonging to the Waratah Company, the estimated capabilities of all being 28,000 tons per day, These, however, have been considerably increased by the appliances on Carrington (late Bullock Island) Dyke (twelve hydraulic cranes) to an estimated loading capacity of 22,400 tons per day. The hydraulic cranes erected on the wharf formed by the Dyke, comprise ten of 15 tons power, and two others of 25 tons. This fine stretch of wharf, 2,340 yards long, is lighted by 59 electric arc lights of 5,000 candle-power each. Additional cranes are being imported from England to provide loading facilities at the new harbour being formed out of the inner basin. A branch line, with viaduct over Thorsby's creek, connects the wharves at Carrington with the Northern Railway. The appliances for shipping coal are believed to be unequalled at any coaling station. Eighteen steam tugs, nine of which are owned by Messrs. J. and A. Brown, and seven by the trustees of the late Mr. John Dalton, are employed in towing vessels to and from their moorings; Messrs. Fenwick and Co., also having a fleet of tugs engaged in towing. During 1899 exclusive of coasters, 1,273 vessels entered and cleared the harbour, with a registered tonnage of 1,707,108 tons. The accommodation for berthing vessels has been largely increased; there are now about 2¼ miles of wharf frontage. The principal coal mines are the Wallsend, Australian Agricultural, Co-operative, Lambton, Brown's, Duckenfield, New Lambton, Greta, Newcastle, Dudley, Waratah, Stockton, Wickham and Bullock Island, Hetton, West Wallsend, Pacific, Co-operative, Burwood, Hetton, East Greta, Seaham, Wallarah and Gartlee. All the pits belonging to these companies, except Stockton and Wallarah, are connected by private lines with the Great Northern Railway. Another important branch of commerce has taken permanent root in this city, the shipment of wool direct from Newcastle to foreign or English ports was commenced in 1883 by Messrs. Dalgety & Co. Messrs. Gibbs, Bright and Co. and other firms also have entered into wool-shipping. This has been the means of affording the northern squatters the opportunity of shipping their wool direct from the natural port of the northern district, thus avoiding coastal expenses in sending it to Sydney for shipment. The business is now on a firm footing, and has been the means of inducing many large and high-class steamers to visit the port. The first tramway was opened through the mining townships, from Newcastle to Plattsburg, a distance of 9 miles, and two other lines to Merewether on the south, and Tighes Hill to the north-west, were opened in 1894; extensions to Adamstown and Maryfield are being made. A fort has been erected on what was long known as Allan's Hill, now designated Fortification Hill, or Fort Scratchley, as a sea defence; it is armed with three 6-inch breech-loading guns on disappearing mountings, one 8-inch breech-loading gun on disappearing mountings; one battery of quick-firing guns, protecting the mine-field at the harbour entrance; one 80-pounder barbette gun; also a movable armament of machine and quick-firing guns, making the fort the strongest in the colonies. A second fort was lately completed on Shepherd's Hill, and one 8-inch breech-loading Armstrong gun, with an effective range of 6 miles, mounted thereon. A detachment of the Royal Australian artillery force is stationed here, in addition to the partially paid companies. Newcastle is well laid out, and has considerably improved of late years, all the streets being well paved and lighted with electricity. Hunter Street contains many fine shops, including several magnificent piles of buildings recently erected by the Corporation and private individuals. The ground upon which the city is situated rises rather steeply from the sea, and some portions of the town are therefore considerably elevated —a fact to which it owes its comparatively low rate of sickness and mortality. Newcastle proper possesses a substantial court-house, a hospital, a post-office, a benevolent asylum, a trades' hall, a hospital for the insane (originally used as barracks for the military, afterwards as an industrial school for girls) with about 300 inmates; a technological museum and college, four public schools, with an enrolment of 2,871 pupils, and an average attendance of 2,400, independent of a Roman Catholic school, several private schools, a handsome school of arts, in Hunter Street, with library of 14,300 vols., reading room, lecture hall, class-rooms for technical and other kinds of education. A magnificent railway station was completed in 1898. Several large churches adorn the city, belonging to the Episcopalians (3), Presbyterians (2), Wesleyans, Congregationalists, Primitive Methodists, Baptists, and Roman Catholics. There is an extensive and well-conducted convent and school connected with the Roman Catholic church; spacious Corporation public salt-water baths in Newcomen Street, erected at a cost of £4,000. The swimming area will accommodate 150 bathers, and there are 25 private baths. The Custom-house, including the new Water and Sewerage Board Office, is a spacious yet compact edifice, with clock tower, surmounted by a time ball, which is dropped daily at one P.M.; this building is of brick with stone facings, and is 137 feet long by 53 feet deep. The Victoria Theatre opened in September, 1891, is one of the finest in the colonies, seating 1,750 people, and costing £26,000. The shops and places of business are above the average of Australian towns. The banks in Newcastle are Australasia, New South Wales, Australian Joint-Stock, Commercial of Sydney, London, Union, City of Sydney Commercial of Australia, and Savings Bank. There are fire brigades in Newcastle City (with 3 fire-engines, 3 reels, and 3,000 ft. of hose), in Newcastle Central (with 3 reels and 2,000 ft. of hose), and in Newcastle West (with one fire and one steam engine, 3 reels and 2,000 ft. of hose). At STOCKTON, on the northern side of the harbour, is a patent slip, upon which vessels of large tonnage frequenting the port can be taken up for repairs. A dock, involving an expenditure of about £150,000, is now in contemplation, a lease having been secured at Stockton for 99 years. A lease has also been granted for a floating dock for the port, and for the establishment of marine baths on a large scale. The large shipbuilding yard of Callen Bros. has turned out some very fine steamers. Newcastle was formed into a municipality on June 7, 1859. It has 25 miles of roads and streets. The annual ratable value of property is £147,997; capital value is £90,028. Newcastle is divided into four Wards: the City, Honeysuckle, Macquarie, and Belmore. There were until some years back two lines of steamers regularly plying between Newcastle and Sydney, viz., the Hunter river and the Newcastle Steamship Company's boats. These companies have since become amalgamated, and all these fine steamers now run under the one flag. Various industrial establishments are in full operation in Newcastle and its vicinity, viz., boot manufactories, copper works, an extensive brewery, cordial factories, shipbuilding yard, fellmongery, steam biscuit factory, carriage factories, foundries, engineering establishments, and extensive smelting works at Cockle Creek. A new industry has been established, namely, the export of frozen meat; the Australian Meat Chilling and Freezing Company, of London, have erected extensive works at Aberdeen, a town on the Great Northern Railway, where 4,000 sheep are slaughtered daily, a large business also being done in the export of live stock, the value of these exports for 1899 being £58,644, a large increase on previous year. The city is now well supplied with water, the scheme extending as far as Maitland, all the 13 municipalities around Newcastle being now reticulated. The water supply to Newcastle cost £400,000. For Newcastle City there are two reservoirs with a capacity of 523,600 gallons and 137,130 gallons respectively, and one tank of 20,000 gallons; for Newcastle West there is a reservoir of about 4,000,000 gallons. The mouth of the Hunter river, formerly called Port Hunter,

but now known as Newcastle harbour, was discovered on Sept. 9, 1797, by Lieut. Shortland, while on an expedition to Port Stephens in search of runaway convicts. He called the stream the Coal river, from the fact of having found some pieces of coal on the banks. It was afterwards named after Governor Hunter. For many years after its discovery it was a convict depôt. In 1821 the district was thrown open to free settlement, from which date its progressive career commences, but it is only within the last few years that the trade of the town has made such gigantic strides. The centenary of the landing of Shortland was celebrated on September 16th, 1897, and a monument now stands on the high land overlooking the ocean, in commemoration of the event. The population of Newcastle proper is 30,000, and the immediate district brings the entire population up to about 66,000. Newspaper: the *Newcastle Morning Herald*, price one penny (the largest provincial paper issued daily in Australia). Newcastle and district returns six members to the Legislative Assembly, the representatives for Newcastle East and Newcastle West being respectively Mr. W. T. Dick and Mr. J. Thomson. The district provides three members of the Legislative Council, and the present Minister for Mines, &c., the Hon. J. L. Fegan.

NEW ENGLAND (30° 30′ S. lat., 151° 30′ E. long.) is the name given to a pastoral district, comprising a vast tract of grazing country, discovered by Oxley in 1818, in what is now the county of Sandon. It lies in the NE. part of the colony, and is traversed by the great Dividing Range. The main northern road goes through the centre of the district, and the railway to the Queensland border bisects it. It forms an immense tableland at an elevation of about 3,000 feet above the sea-level, and has an area of 13,100 square miles. The climate is genial, but in winter rather severe, frost, snow, and sleet occur, particularly on the mountains Ben Lomond, etc. Much of the soil is well adapted for agriculture. It contains the following gold diggings: Rocky River, Timbarra, Tooloom, Pretty Gully, Oban, Puddledock, Congi, Rock Vale, Cameron's Creek, Gostwyck, Macleay, Lunatic, Perseverance, and Boorook, near Tenterfield. The "Isabella" "Eleanora," and other extensive gold and antimony mines at Gara Falls are now in full operation. Silver has also been found in many parts of New England. The tin mines of Skeleton and Vegetable Creeks, Tent Hill, and others, are also in New England. Area under cultivation 13,428 acres, producing wheat, maize, barley, oats, potatoes, rye. Dairy produce: butter, cheese, bacon and hams. Dr. Robertson reports as follows regarding the discovery of bismuth, in this district: "The backbone of the country is of granite, which is replaced on the northern or Queensland border by felsites and transmuted rocks. At the irregular line of junction, some claims were recently taken up for the purpose of prospecting for tin. Of this metal none was found, but the quartz veins disclosed a variable quantity of coarse gold and an unknown mineral, which the Government chemist pronounced to be 'native bismuth.' Some native metal has been obtained in Bolivia, and in smaller quantities from Cornwall and South Australia, but, until the discovery of the mines, it was a mineral curiosity." Population, 15,141.

NEW LAMBTON, a colliery township, situate about one mile south by east of Lambton, in the county and electoral district of Kahibah. It is on the Brown and Dibbs estate, which covers about 1,500 acres. There are in the village two churches, Wesleyan and Primitive Methodist, 4 hotels, several shops and stores, Benefit Society, and Oddfellows' lodge. There are two collieries here, employing about 150 men. Annual value ratable property £6,220. The copper works, the property of the English and Australian Copper Company (Limited), are situate close to the New Lambton Railway line. A public school (average attendance 320), and teacher's residence, cost about £4,000. Population 1,550.

NEWPORT, a beautiful and picturesque watering place, 20 miles N. of Sydney, in the county of Cumberland, electorate and police district of Wahringah, with postal and telegraph facilities, situated at the head of Pittwater, an arm of Broken Bay. Communication is by coach from Manly, and steamer direct; coaches run from Manly to Narrabeen, Rock Lily, and Newport daily. There are two hotels, a well-conducted boarding-house, public school, average attendance 30; public hall, and a general store. The scenery in the vicinity is most beautiful, and attracts a large number of tourists at holiday times, points of interest being—"Ocean Beaches," "Hole-in-the-Wall"—a large cave with ironstone stalactites; "Bush-rangers Hill"—a high point giving good view of coast line; Barranjoey Lighthouse; "The Basin"—a favourite yachting resort, &c. Population about 100.

NEWTOWN (33° 52′ S. lat., 131° 12′ E. long.), a suburban municipality of Sydney, proclaimed December 19, 1862, adjoining the city on the SW., having 24 miles of roads, and ratable property of the annual value of £157,600. It is connected by railway —fares, 3d. and 2d.—and tramway; there is also frequent omnibus communication from the Circular Quay, fare, 2d. Principal hotels: May's, Carter's, Rodgers'. Its proximity to the city renders it a popular place of residence for merchants and others, and is the great emporium for a large surrounding district, has post, money-order, telegraph, telephone exchange and savings bank offices, and branches of the Commercial, Australasia, New South Wales, City, and English and Scottish Banks. Three public schools here, having 1,600 average attendance, and there are Episcopal and Roman Catholic schools, grammar school, Salvation Army barracks, ten churches. A biscuit factory, paint works, iron works, &c. Newtown is well supplied with public buildings, including St. George's hall, two Oddfellows' halls, court-house, Temperance hall, &c. It is well lighted by gas, and is connected with Sydney Water Supply. A handsome new post and telegraph office has been completed at a cost of £4,700. Population, 20,500. Newspapers: the *Suburban Independent* and *Chronicle*.

NIMITYBELLE (36° 28′ S. lat., 149° 17′ E. long.), a post, telegraph (telephone with Holts Flat), and money-order town, with Government savings bank, in the county of Wellesley and electoral district of Cooma, police district of Cooma, 23 miles from Cooma SSE., and 287 miles SSW. from Sydney. Conveyance to Cooma, thence railway to Sydney, is the usual way of reaching the Metropolis, or steam *via* Eden. Merimbula or Tathra is the alternate route, little used excepting for the carriage of goods. Hotels: Royal and Commercial. A court-house and lock-up; two police; Episcopal, Roman Catholic, Presbyterian, and Wesleyan places of worship; six stores; public school, average attendance forty-five to fifty; blacksmiths' and saddlers' shop, and a butter factory are in the town. The district is a farming and grazing one, sheep and cattle breeding being the chief pursuit. Brown Mountain, 13 miles on Bega Road, affords magnificent scenery. Koscinsko and Snowy Mts. in full view of town. Gold, silver, copper, and bismuth are found in the district, but not worked to any extent. Formation: basalt and trap, outcrops of granite and slate. Population about 300.

NORTH RICHMOND (33° 20′ S. lat., 150° 58′ E. long.), a post-town and telegraph station, 3 miles from Richmond, on the opposite side of the river, and 41 miles W. of Sydney. It is the leading thoroughfare to the famed Kurrajong heights, and is of importance owing to the splendid orangeries surrounding it. Coaches between Richmond and North Richmond, fare, 1s. It has one hotel, a public school, with average attendance of 55, an Episcopal and Wesleyan place of worship, and a diffused population of about 100. It lies on the Hawkesbury river and Red Bank creek, and is a fruit country. For further particulars of the district, *see* RICHMOND.

NORTH SYDNEY (33° 51′ S. lat., 151° 13′ E. long.), a fast-extending suburb, lying on the northern shore of Port Jackson, in the county of Cumberland and electoral district of St. Leonards, with postal, money-order, savings bank, telephone and telegraph facilities. Its religious places of worship comprise four Anglican, one Congregational, three Roman Catholic, three Wesleyan, and three Presbyterian. There are also two convents, a Jesuit College, and large a number of hotels The Public Education Department supports four schools, with an average attendance of 963. Banks: Commercial, New South Wales, and English and Scottish. The School of Arts has a well-stocked library of at least 3,500 volumes, and the locality boasts of a musical society of nearly 100 members. There is an Oddfellows' hall, owned by the Grand United Order, a Salvation Army hall, a court of petty sessions, and a Masonic hall. The district is incorporated under one municipality, with 58 miles of roads, ratable property of the annual value of £198,741, with a permanent water supply, and is lighted by gas. Transit to Sydney is by a 1d. steam-ferry every quarter of an hour, from 5 A.M. until midnight. In the interval a steam-packet plies every half-hour. The traffic for vehicles across the harbour is conducted by the company owning the passenger ferries, and from Milson's Point, which is the nearest approach to the metropolis, a cable tramway conveys passengers to the junction of Falcon Street with the Lane Cove Road. A cable tramway runs to Ridge Street Reserve and thence by electric to Willoughby and to Middle Harbour Spit Road, near Balmoral, and Mossman's Bay. The Church of England Grammar School occupies a prominent position on Blues Point. There are probabilities of either a bridge or a tunnel joining the two shores, as the distance from Dawes Point, Sydney, to Milson's Point does not exceed 1,300 feet. The Hornsby Junction, Pymble, Wahroonga, Turramurra, Gordon and Chatswood railway line comes to Milson's Point, the station ground being a quarter of a mile long, extensive accommodation being given in anticipation of the prospective traffic of North Sydney, with the country through which the line passes. There is a suspension bridge at the north end of the borough, which is amongst the few largest of its kind in the world, cost £100,000, and was constructed for the purpose of giving access to a tract of several thousand acres of land lying towards Middle Harbour Heights, which will shortly be available for residential purposes. Population about 20,200. Newspapers: *North Shore and Manly Times* and *North Sydney Recorder*.

NOWRA (34° 51′ S. lat., 150° 43′ E. long.) the Government township of Shoalhaven, and the chief centre of a large district laid out by the Crown lands surveyors, on the southern bank of the Shoalhaven river, 10 miles W. of Greenwell Point, the seaport of Shoalhaven, at the mouth of the river, and 92 miles S. of Sydney by railway, which was opened on 3rd June, 1893, occupying part of the counties of Camden and St. Vincent, electoral and police district of Shoalhaven It has post, telegraph, money-order, and savings bank offices; also branches of the English Scottish, City and Commercial Banks, four public schools, average attendance 231, one private school, a school of arts with library of 1,400 vols., 13 stores and four hotels: Duff, Bridge, Prince of Wales, and Albion. Nowra is the chief place of petty sessions, district court, &c., for the Shoalhaven district; and contains a new court-house, principal police-station and lock-up, the office of the Shoalhaven clerk of petty sessions, district court registrar, district registrar, Crown lands agent, mining warden, officer of customs, &c. The ecclesiastical edifices include Anglican, Roman Catholic, Wesleyan, and Presbyterian. In Nowra there are lodges of Freemasons and Oddfellows, volunteer fire brigade with reel and 800 ft. hose, and civilian rifle club, both under Capt. Marriott. The main South coast road passes through it; there is daily mail

communication between it and Sydney, *viâ* Mossvale, and Milton 10s.; adjacent is the Shoalhaven iron bridge, which covers 1,050 linear feet of water, and cost £42,000. Nowra has direct steam communication with Sydney, three times a week, and is also connected by railway, the line terminating at Bomaderry, on the northern side of the river. Trains to and from Sydney run three times daily. The town, from its situation on a gently sloping eminence, bounded on the north by the Shoalhaven river, which swarms with fish, and on the West by Nowra Creek, with the superb beauties of tropical plant-life, including an extensive variety of the most delicate ferns which adorn its banks, commands a splendid view of the rich pastoral and agricultural alluvial flats of Shoalhaven, of the unsurpassed mountain and water scenery along the coast range, from Saddle Back north to Kiama, and south-west to the mist-covered peaks through which the upper Shoalhaven leaps along in its serpentine course, all forming a panorama matchless in this country for the varied beauties of settled and unsettled country it contains. Municipal district of Nowra, proclaimed Dec. 29, 1871, has 34 miles of streets, and ratable property of the annual value of £12,640, and a permanent water supply from Camp Creek, on top of Cambewarra Mountain, with reservoir of 100,000 galls. The land—of alluvial and trappean origin —is devoted to dairy-farming and the growth of cereal crops, potatoes, &c. Nowra town, parish, and municipality form part of the electoral and police district of Shoalhaven. Population of town 2,120, and district, about 15,000. Newspapers: *The Shoalhaven Telegraph, Shoalhaven News, Nowra Colonist,* and *The Leader.*

NUMBA. *See* SHOALHAVEN.

NUMERALLA (36° 9′ S. lat., 149° 27′ E. long.), a post town in the county of Beresford, and police district of Cooma, 20 miles from Cooma railway station, 316 miles (279 postal) S. of Sydney, situated on the Numeralla river and Big Badger creek. Pastoral, mining, and farming locality Formation: granite and slate. Population about 200.

NUNDLE (31° 30′ S. lat., 151° 5′ E. long.), a township, with savings bank, telegraph and money-order office, in the centre of the Peel river goldfield, within the county of Parry, electorate and police district of Quirindi, on the Peel river, 36½ miles SE. of Tamworth, and 234 miles (321 postal) NW. of Sydney. The Manning and Burnard rivers take their rise about two miles from the Hanging Rock. Coach to the Tamworth railway station, thence rail *viâ* Newcastle, are the means of reaching Sydney. Hotels: Schofield's, Devine's and Taylor's. It has Presbyterian, Primitive Methodist and Roman Catholic churches, school of arts, a handsome public school, average attendance 90, a court-house, and 5 stores. Farming is now principally carried on. Gold is obtained in payable quantities, the output for 1899 being 2,694 ozs, valued at £9,874. It is a very picturesque and healthy locality, being the commencement of the New England district. There are small tracts of very fine agricultural land, and magnificent timber abounds.—HANGING ROCK is a village about 5 miles off. Formation: Basalt The inhabitants number about 250; the entire district is returned at 8,000.

NYMAGEE (32° 3′ S. lat., 146° 20′ E. long.), a postal township in the police district of Hillston, and electorate of the Lachlan, having savings bank, money-order and telegraph facilities. 452 miles W. of Sydney. There is a tri-weekly coach from Hermidale (46 miles), on the Cobar and Nyngan railway line. Coach to Cobar and Bobadah, twice weekly, to Mount Hope and Euabalong weekly. There are five hotels, several large stores, Roman Catholic and Wesleyan churches, a public school, with an average attendance of 80. also a convent school, with an enrolment of 100, M.U.I.O.O.F. lodge, and a branch of the Commercial Bank, and a hospital. Geological formation: limestone, slate, and iron. The celebrated Nymagee copper mine employs about 250 hands when in full work, and the North Nymagee 20 men. Population about 1,500. The water supply is obtained from the Government tank.

NYNGAN (31° 40′ S., 147° 20′ E. long.), county Gregory, electorate of Cobar and police district of Bourke. It is a railway station, on the line from Sydney to Bourke, with postal, telegraph, money-order, and savings bank facilities. It is 99 miles from Dubbo, 126 miles from Bourke, and 377 miles NW. of Sydney; fares, 68s. 9d. and 46s. 9d. There are thirteen hotels, principal being Great Western, Tattersall's, and Barrett's Family Hotel, several stores, two banks (Commercial and Joint-Stock), a court-house, public school, with average attendance, 160. Episcopalian, Wesleyan, and Roman Catholic churches, to which last is attached a small convent and primary school, and an agricultural society, two boiling-down establishments, chilling works, and a lands office. Masonic and Oddfellows' lodges. Coaches run to Cannonbar, Dandaloo, Willeroon, Tubbo, Monkey and Gongolgon. The district is incorporated, and has 8½ miles of formed roads and streets, with ratable property of the annual value of £7,329. Extensive waterworks have been completed, the supply of water being obtained from the Bogan river. Local newspaper: *Nyngan Observer.* Population of town 1,300, of district about 4,500.

OBERON (33° 40′ S lat., 149° 51′ E. long.), a postal, telegraph, savings bank and money-order township, 120 (136 postal) miles W. from Sydney, with which it has daily communication, about 39 miles equi-distant from Bathurst and Hartley: in the county of Westmoreland, police district of Bathurst, and electorate of Macquarie, situated on the Fish River creek. Hotel: the Royal; three stores. Churches: Episcopal, Roman Catholic, and Wesleyan, and a branch of the A.J.S Bank. Public buildings: court-house, police-station, public school, with average attendance of 60 scholars. Principally a farming and mining district; several payable quartz reefs are being worked about four miles from the township, the output for 1899 being 308 ounces, valued at £1,150. Copper has also been found about 10 miles from the township. Tarana is the nearest railway station (16 miles). Eighteen miles from here are the famous Jenolan Caves, which are connected with Oberon by telegraph. Photographs of them have been taken by means of the magnesium light. Oberon is the final halting-place *en route* for the Jenolan Caves, *viâ* Tarana. Coaches run daily to Tarana, fare 5s. Formation, volcanic, with columnar basalt, quartz diorite. Population of district about 400.

OBLEY (32° 44′ S. lat., 148° 31′ E. long.), a post town, with savings bank, money-order office and telegraph station, in the county of Gordon, electorate of Molong and police district of Dubbo, 208 miles (253 postal) W. of Sydney, situated on the Little river. There is one church, used promiscuously by Wesleyans, Presbyterians, Baptists, and Churchmen, one hotel, a court-house, public school, average attendance 22, police-barracks, with a lock-up. The celebrated Goodrich copper mine is within 5 miles of the township south. There is tri-weekly mail communication by coach with Molong and bi-weekly with Dubbo Railway Stations, distant 37 and 86 miles respectively. Soil and climate are well suited for a moderate population of agriculturists, but the district is more of a mining than grazing character. Population about 60.

O'CONNELL (33° 34′ S. lat., 149° 43′ E. long.), a post town, with money-order, telephone, and telegraph office on the Fish river, in the county of Bathurst, electoral district of Macquarie, 139 miles W. from Sydney, and four miles from Brewongle railway station. There is one hotel, a Roman Catholic school, a public school, average attendance 29, an Episcopalian and Roman Catholic church, one store, a steam flour-mill. The district is principally agricultural. Formation, volcanic red clay or granite rock. Population of district, about 200.

OLD JUNEE. *See* JUNEE.

OPHIR (33° 9′ S. lat., 149° 20′ E. long.) is contiguous to the Summerhill creek, 154 miles (216 postal) to the W. of Sydney. It is in the county of Wellington, police and electoral district of Orange, and is famous as being the first goldfield in New South Wales, having been discovered by Mr. Hargraves, on Feb. 14, 1851. There is one hotel, Diggers Arms, one church, two stores, and a public school, average attendance 22. The land in the vicinity of the village is taken up by sheep and cattle stations. The communication with Sydney is *viâ* Orange (16 miles), or Mullion Creek Station, 10 miles distant, The country is alluvial ground, abounding with veins of quartz. It has now very few marks left of its former greatness, and the population, from thousands, has dwindled away to about 150 persons.

ORANGE (33° 16′ S. lat., 149° 11 E. long.), a postal, telegraph, savings bank and money-order township, situated on what was originally known as Blackman's Swamp creek, now converted by masonry and concrete walls into a storm-water channel, on the road from Bathurst to Wellington, Dubbo and Bourke, 192 miles by railway W. of Sydney, at an elevation of 2,843 feet above the sea-level. It is in the counties of Wellington and Bathurst, electorate of Orange, and is famed for its bracing climate. The district is highly recommended by doctors to consumptives in the Spring, Summer, and Autumn seasons, the cool days and refreshing nights effecting recuperation in all but practically incurable cases. The town contains numerous excellent shops and hotels, among the latter being the Royal, Telegraph, Club, Occidental, Exchange, Metropolitan, Carrington Club, Empire, &c. The Great Western hotel is close to the railway station. Numerous trades flourish in the town, which also contains some of the finest stores in the colony out of Sydney, a very large business, wholesale, retail, and produce, being transacted with the western interior. Orange is principally noted as a fruit and wheat-producing district. Other crops are also largely grown in considerable variety, comprising chiefly maize, barley, oats, and potatoes. There is a very large area of land under cultivation, and the orchard industry has attained great proportions. From its position on the Great Western Railway and the suitability of the soil for fruit production, Orange has been found to be capable of supplying the whole western country with the best qualities of English fruits, which are here later in season than in other parts of the colony. Apples and cherries grow to perfection, and orchardists devote themselves to growing them chiefly Orange is surrounded by considerable mineral wealth. The Ophir, Cadia, Forest, Rosedale, and Lucknow are the principal gold-fields. At this last place are situated the rich and unique Wentworth Mines Extensive reefing operations at the old Ironbarks field, and alluvial mining on a large scale in the leads under the basalt on the Macquarie river are in progress, English capital having been secured for the purposes. Copper and silver also abound in the neighbourhood. There is communication with Sydney by railway (fares, 37s. 9d. and 25s. 3d.), and from its favourable climate and situation Orange should become an important depôt for the slaughter of meat for the Sydney market. The town is lighted with gas, and contains numerous handsome buildings, amongst the most prominent of which may be mentioned the general stores of Messrs. Dalton Brothers, and Messrs. Davis Brothers, McDermott, Bonnor, Buckham & Company, Gifford & Co., Gillies & Co., and others. Banks: the Commercial, Joint-Stock, N.S. Wales, Union, and Bank of Australasia. Land Board offices, the post-office, telegraph, telephone exchange, and public offices. There is one steam flour-mill, Mr. James Dalton's being considered the most complete in the colony, two breweries, tanneries, two soap and candle manufactories, foundries, &c. The various religious denominations are represented by Roman Catholics (with new church), Church of England, (a handsome structure in course of erection), Wesleyans, Presbyterians, Congregational, Plymouth

Brethren, and Baptists. The School of Arts has a library of over 5,000 vols. The town was proclaimed a municipality January 9, 1860, and is governed by a mayor and eight aldermen. The Town Hall is a very handsome edifice. Orange has 14 miles of roads, and the estimated annual ratable value of property is £31,540, the gross value of all ratable property being £420,000. The fire brigade has fire-engine, reel, and 1,300 ft. hose. A public school, with average attendance of 523, a Roman Catholic denominational school and convent are at Orange, besides private seminaries. Water is supplied the town from a reservoir containing 140,000,000 gallons at Gosling Creek, three miles away, the construction of which was carried out by the Harbours and River Department. Every street in the borough is reticulated with the water-mains, and the cost of the scheme was about £32,000, the reservoir holding 145,000,000 galls. About 24,000 acres are under crop, principally for wheat, maize, barley, oats, potatoes; dairy produce: butter, cheese, bacon, and hams. Gold returns, 1899, 10,842 ozs., valued at £41,815. The town contains a population of 3,830 persons, while the census district of Orange has a population of nearly 9,000. The *Western Advocate*, *Orange Leader* and *The Sun* are the local papers.

ORANGE, EAST.—This is a suburb of Orange proper, in the parish of Orange, county of Bathurst, and adjoins it on the eastern side. It was proclaimed a municipality on March 29th, 1888. East Orange is divided into three wards—North-west, South-west, and East—governed by a council of mayor and eight aldermen. The borough has an area of 685 acres, and 14 miles of streets, with ratable property of the annual value of £10,270, and is entirely free from debt. Population about 2,200. The Great Western Railway line passes through its entire length, and the railway station is on the south-western boundary. It is in the electorate and police district of Orange and county of Bathurst. There are three hotels, a public school, average attendance 190, an assembly hall, and many substantial and handsome private residences. A large tannery and bootmaking industry is carried on in the town, the plant being one of the most complete of its kind in the colony. Acetylene gas lamps are being tried. Brickmaking is another prosperous industry.

OURIMBAH (34° 35′ S. lat., 152° 153′ E. long.), a post town, with telephonic facilities, situated in the electoral district and county of Northumberland, police district of Brisbane Water, on the Great Northern Railway, distant 56 miles from Sydney; fares, 9s. 9d. and 6s. 3d. It contains a post-office, Progress Committe, public school, Episcopalian and Wesleyan churches, hotel and wine-shop. Fruit-growing is the principal industry carried on in this district, which is famed for its timber, ferns, and wild flowers. Geological formation: sandstone ridges and deep alluvial flats. Population, about 200.

OURNIE (35° 50′ S. lat., 147° 56′ E. long.), co. Selwyn, electorate The Hume, is a postal township on the Upper Murray, in a quartz-mining district, having rich reefs, and lying 20 miles S. of Tumberumba, and 339 miles (463 postal) S. of Sydney. Communication is by coach from Albury railway station, 77 miles distant. The stone from here has yielded an average of two ounces to the ton. Public school here, with average attendance of 20. Population, 100.

PADDINGTON (33° 52′ S. lat., 151° 15′ E. long.), a suburban municipality, proclaimed April 17, 1860, having 27 miles of streets, and ratable property of the annual value of £168,110; number of houses about 4,500. It is in the electoral district of the same name, and police district of Sydney, and joins on to Sydney by the Old South Head road; it is well lighted by gas, and has a permanent water supply. Numerous omnibuses ply to and from the city during the day, fare, 2d.; also tramcar, fare, 2d. The Victoria Barracks are in the municipality. There are three public schools with average of 1,800, several private and denominational schools, several places of worship, and telegraph, money-order, and savings bank offices, a brewery, tannery, soap works, and a number of manufactories of various descriptions. Banks: English and Scottish, and Commercial. A town hall, the finest outside of Sydney, was opened with great ceremony by Lord Jersey on October 3rd, 1891: the magnificent building stands on a block of land connected with the military barracks, and cost about £12,000 A free public library has been established by the Council, with upwards of 2,500 volumes, and a large reading-room attached. Population of the borough, 22,000.

PALMERS ISLAND, a postal township, telegraph, money-order office, and Government savings bank, situated on the Clarence river, in the Clarence electorate, 308 miles N. of Sydney, to which there is steamer communication bi-weekly. There is one hotel, a public school, average attendance 54, School of Arts, and Oddfellows' lodge, three places of worship, Episcopalian, Presbyterian, Roman Catholic, and Wesleyan, and a population of about 650, engaged almost solely in sugar-growing, dairying, and mixed farming.

PAMBULA (36° 49′ S. lat., 149° 57′ E. long.), a postal, money-order, savings bank, and telegraph township in the county of Auckland, and electoral district of Eden-Bombala, on the Pambula river, about 339 miles S. of Sydney (270 miles by sea), 4 miles from Merimbula, 25 miles from Bega, and about 12 miles from Twofold Bay. The communication with Sydney is by the Merimbula steamer bi-weekly, fare 30s. Cooma is the nearest railway station, 100 miles distant *viâ* Bega. Hotels: Royal, Club and Commercial. Coaches run to Eden, fare 5s., Bega 9s., Bombala 20s, Cooma 40s. Churches: Episcopalian and Roman Catholic, both of stone, also Wesleyan and Presbyterian. Bank: Australian Joint Stock. Public buildings: Court-house, public school, average attendance 80, and teachers' residence, also of stone. There are three stores, two tanneries, Masonic and Oddfellow Lodges, and a School of Art, with 800 vols. Co-operative Creamery and Dairy Company, an hospital, Court of petty sessions is held once a week. Large areas of the surrounding district have been free-selected during the past years. The exports consist of wattle bark, bacon, hams, cheese, butter, maize, potatoes, &c. The goldfields are still steadily productive, and since the introduction of the cyanide treatment, the gold which formerly escaped in the tailings has been recovered. Work in abandoned mines has also been resumed with payable results. The output for the year ending December 1899 was 2,161 ozs., valued at about £7,209. The silver mines at Jingera, 12 miles distant, employ a good number of hands, and are of great benefit to the district. Formation: Belts of barren quartz-clad ridges, gold-bearing strata, slate, and volcanic soil. Population of town about 450, and of district 2,000. Newspaper, *Pambula Voice*.

PARKES (33° 9′ S. lat., 148° 17′ E. long.) (co. Ashburnham), electorate of Ashburnham and police district of Forbes, a mining and agricultural township, with post, money-order office, Government savings bank, railway station, and telegraph station on the Billabong creek, 268 miles W. of Sydney, *viâ* Orange by railway, which runs on to Bogan Gate, Burrowang and Condobolin, also connected with Forbes by railway. Hotels: Exchange, Commercial, Grand, Club House, Occidental, Cambridge, Bushman's, Tattersall's, Star, Railway Parkes, and Royal. Coaches run to Wellington (fare 20s.), Tomingley 15s., Trundle 10s., and Peak Hill 7s. 6d., Manildra *viâ* Bindogundia and Bunbury, 7s. 6d. Places of worship: Church of England, Wesleyan, Roman Catholic, Presbyterian and Salvation Army. Banks: Joint Stock, Commercial, Union, and Bank of Australasia. In the township are a court-house, hospital, Masonic hall, assembly hall, municipal council, free public library, with 400 vols., and Peoples' Institute, with 1,000 vols., a public school and seven other public schools within eight miles of the post-office, also a convent and school. Five quartz-crushing machines, five cyanide works, flour-mill, one saw-mill, a lock-up, fire brigade, with fire-engine, reel, and 1,000 ft. hose, and numerous stores. Railway fares, 53s. and 35s. 6d. The municipality has ratable property of the annual value of £20,050, and 53½ miles of roads. The district is of a good agricultural and pastoral character, and several valuable gold reefs are being worked near the town, the yield for 1899 being 6,186 ozs. Geological formation: limestone, slate, granite freestone and diorite. Population of municipality about 3,500, and district about 6,000. Water supply from Bunbury Mountains, reservoir holding 27,000,000 galls., Parkes service reservoir holding 300,000 galls. Newspapers: *Parkes Independent*, *Parkes Examiner*, and *Western Champion*.

PARRAMATTA (33° 46′ S. lat., 151° 1′ E. long.) is, next to Sydney, the oldest town in the colony, with postal, telegraph, money-order, and savings bank facilities. It is situated on what is called the Parramatta river, which in reality is an elongation of Port Jackson. The borough is an electorate, returning one member to the Legislative Assembly, and police district of Parramatta. It is distant from Sydney 14 miles W., with which constant communication is kept up by the river steamers and the Great Western railway; fares, 1s. 5d. and 11d. The Woolpack, Railway, Commercial, Tattersall's, the White Horse, the Star, Park, Emu, Royal Oak, The Cornstalk, and Royal Exchange, are the prominent hotels. It was originally known under the name of Rosehill, which was afterwards changed to its old aboriginal name of Parra-mat-ta, which means "head of the waters." It was established as early as November 2nd, 1788, on which day "His Excellency the Governor (Phillip) went to the Crescent to choose the spot and to mark out the ground for a redoubt and other necessary buildings. Ten convicts were ordered to clear some land on a rising ground which his Excellency named Rose Hill;" the natural beauty of the country and the fertility of the soil having attracted his attention, and caused him to make it his residence. In July, 1790, the Governor laid down the lines for a regular town, the principal street extending for a mile westward from the landing place, 205 feet wide, huts capable of containing ten persons each at a distance of 60 feet apart being built on either side. Much of the early history of the colony is bound up with Parramatta; the first grain was grown and harvested here, and the earliest grants of land to convicts, who had served their time, were made. The town had many features of interest, it is well laid out, and is not altogether unlike an English town of the same size. The public buildings are numerous, and comprise the Town Hall and Council Chambers, School of Arts, the Government House, which is now let on lease by the Park authorities as a boarding-house under the name of Park House; the Parramatta and district hospital, the Asylum for the Infirm and Destitute, George Street, formerly the factory for female convicts, and a building formerly used as a tweed factory; Macquarie Street Asylum, and Newington Asylum for old women; the Roman Catholic Orphanage has been converted into an industrial school, and the Protestant Orphan School into a branch of the lunatic asylum; the court-house, and several places of worship—two Episcopal, St. John's and All Saints, the former of which was opened as early as April 10, 1803; Wesleyan, Primitive Methodist, Presbyterian, two Roman Catholic, Baptist, and a handsome Gothic Congregational church. There is also one tweed manufactory, a brewery, a drain pipe and tile works, kerosene and shale works, a Benevolent Society, two lunatic asylums, a new hospital for female lunatics, a very extensive gaol, and several schools—viz., four public, two superior, one Church of England grammar school, one

Roman Catholic school for boys, under the supervision of the Marist Brothers, and one for girls, under the management of the Sisters of Mercy. The Town Hall, Masonic Hall and Victoria Theatre are available for public entertainments, &c. The King's School is the oldest grammar school in Australia, having been founded in 1832. Cottage homes for aged and indigent couples have been established here, and contain about 25 couples; also Cottage home for State children on Pennant Hills Road. A beautiful park is reserved for the recreation of the inhabitants, and a centennial monument and drinking fountain has been erected at a cost of £600. The Rose Hill racecourse is situated near the town, and is acknowledged to be one of the prettiest in the colonies. The walks in the park are planted with oaks, which are the largest in Australia. Banking facilities are afforded by branches of the Commercial, A.J.S., and N.S.W. Banks, and a savings bank. Another institution is a school of arts, with 2,400 vols. A tramway line, constructed by the Parramatta River Steamer and Tramway Company at a cost of £20,000, connects the river with the township; it is about 3 miles in length, and was opened for traffic on October 1, 1883. Coaches run daily to Castle Hill, Dural, Galston, Kellyville, Pennant Hills, Rydalmere, and Carlingford. The district is mainly devoted to fruit-growing, and the orangeries and orchards of Parramatta have an almost world-wide reputation. The largest orange-trees in the world are believed to be here, on the estate of the late Mr. James Pye, a gentleman who devoted the greater part of his life to the introduction and cultivation of the best varieties of this favourite fruit, the earliest having been planted soon after the colony was founded. Upwards of 10,000 oranges have been gathered in a season from one tree. The total area of holdings in the electoral district of Central Cumberland is nearly 128,000 acres. The town has been under municipal government (four wards) since Nov. 27, 1861. It is lighted with gas, and well supplied with water, contains 109 miles of streets, and the annual value of ratable property is £58,750. The population is estimated at 12,500. The local newspapers are the *Cumberland Argus* and *Times*.

PATERSON (32° 39′ S. lat., 151° 40′ E. long.), a post, telegraph, Government savings bank, and money-order township, on the right bank of the river of the same name, at the head of navigation, in the county and electorate of Durham, and police district of Paterson, 128 miles N. by E. of Sydney, between the Williams and Hunter valleys. The communication is *viâ* West Maitland (12 miles), by mail coaches, fare 2s. 6d., and *viâ* Morpeth, 10 miles distant S., by steamer. Courthouse and Commercial are the hotels. Bank: Commercial. The principal buildings are the Episcopal church, near the river, and Roman Catholic chapel, police barracks, lock-up, the court-house, the Oddfellows' hall and a public school, with average attendance 55·4, and a library of 330 vols. The school of arts has a library of 987 vols. The district is partly an agricultural one, broken up into numerous small farms; and, in addition to cereal and root crops, large quantities of fruit of all kinds, particularly oranges and grapes, are grown, and also tobacco. Owing to its low site and the lofty hills that environ it, it is at times liable to destructive floods; the uplands are mostly of rich loam over sandstone, and the flats are all flood or alluvial deposit, varying from 5 to 18 feet in depth. The produce of the district comprises cheese, butter, eggs, poultry, bacon, and large quantities of oaten and lucerne hay are sent by road to Maitland. Adjoining here are the noted and choice herds of Tocal, Gostwyck, and other celebrated estates. The population of the town comprises about 330 persons, and of the district 2,760.

PEAK HILL (lat. 32° 33′ S., 148° 49′ E. long.), a municipal mining township, with postal, money-order, savings bank, telephonic, and telegraphic facilities, county Narramine, electorate of Condobolin, and police district of Dubbo, situated on the Bogan river, 272 miles W. of Sydney, communication being coach to Dubbo, Narramine, or Parkes, distant 45, 35 and 32 miles respectively, thence rail; coaches also run to Narramine, Dubbo, Parkes, and Alectown. Hotels are the Royal Exchange, Commercial, Cambridge, Club, Royal, Carrington and Tattersall's. One public school, enrolment 300; also a convent school, average attendance 100. Court-house, police-station, six stores, hospital, Roman Catholic, Anglican, and Salvation Army places of worship. Masonic, Forester, Oddfellow, and Buffalo societies. Geological formation: silurian, intersected by diorite dykes. The water supply is obtained from Government tanks. About 50,000 acres in the immediate vicinity of the town have been taken up as homestead selections for agricultural purposes. Agricultural, pastoral, and mining district. Population, town and surrounding district, 900. Annual value of ratable property, £4,320. Local newspaper: *Peak Hill Times*.

PEAKHURST (33° 50′ S. lat., 151° 2′ E. long.), a post town, in the municipality of Hurstville, police district of Sydney, county of Cumberland, electorate of St. George, 12 miles south of Sydney. There is a railway station at Penshurst (to which 'bus 3d.), 1 mile distant: fares, 11d. and 8d. It contains a public school and Weslevan church. Water supply from Sydney water supply. Population, about 300, devoted to agricultural pursuits.

PEEL (33° 17′ S. lat., 149° 45′ E. long.), a postal village, on Clear Creek, in the county of Roxburgh, police district of Bathurst, and electoral district of Macquarie, 128 miles (150 postal) W. of Sydney. Within the boundaries of the township are a public school, with average attendance of 30 scholars, a Roman Catholic school, an Episcopal and a Roman Catholic place of worship, Church of England Temperance Society, two stores. Coaches run to Bathurst (fare 2s. 6d.), nearest railway station, 6 miles distant. Thence rail to Sydney, coach also to Hill End *viâ* Peel, Wyagdon, Wattle Flat and Sofala. Mining, pastoral and agricultural district. Formation: slate, with quartz reefs. Gold, silver, lead, and other metals have been found in the neighbourhood. In July, 1900, a heavy snowstorm covered the ground to a depth of 24 inches. Population of town about 140; within four miles, 300.

PENNANT HILLS (33° 48′ S. lat., 151° 4′ E. long.), a small railway station, in the county of Cumberland, police district of Ryde, and electoral districts of Willoughby, Ryde, and Sherbrooke, with postal and telephonic facilities, 18 miles west of Sydney; fares, 1s. 9d. and 1s. 1d. It contains hotel, one public school, with an average attendance of 100, a church, Government observatory, Band of Hope, Progress Association, and three general stores. Fruit-growing is the principal industry engaged in by the population, which is very scattered. Geological formation: carboniferous sandstone.

PENRITH (33° 45′ S. lat., 150° 44′ E. long.), a municipal township (proclaimed May 12, 1871) on the east bank of the Nepean river, 88 feet above sea-level, 34 miles W. of Sydney, in the county of Cumberland, and electoral district of the Nepean. It is a railway and telegraph station, with money-order and savings bank facilities; fares, 4s. 2d. first-class, 2s. 6d. second; return fare 6s. ordinary first; 5s. 3d. holiday excursion first, and 3s. 6d. ordinary second, 3s. holiday excursion second. Tourist and excursion trains on Saturday, return fare 1d. and 2d. per mile. The principal hotels are the Commercial, Royal, Federal, Tattersall's, Red Cow, Australian Arms and Nepean. There are ninety-two miles of streets in the municipal district, with ratable property of the annual value of £17,640. The iron tubular bridge which carries the railway over the river at this point, is one of the finest pieces of work in the colony. It consists of three openings of 186 ft. clear, and one span of 127 ft., carried at an elevation of 49 ft. above the ordinary river level. The viaduct over Knapsack Gully, a few miles from here, is the largest specimen of railway architecture in New South Wales. It has five spans of 50 ft. each, and two of 20 ft. each; its total length is 388 ft., and height 126 ft. The Station yard at Penrith is the next largest to Sydney, being the junction for the Western goods traffic, and having large engineering and fitting shops for rolling stock, the whole of the township being lighted by electricity, and has a permanent water supply. The larger buildings in the town comprise post, telegraph, money-order and savings bank office, a court-house, town-hall, temperance hall, Foresters' hall, the schools—public, average attendance 400—and Roman Catholic, the police office, the railway station, and places of worship for the Episcopalians (St. Stephen), Roman Catholics (St. Nicholas), Presbyterians, Wesleyans, Primitive Methodist, and Salvation Army. Banks: N.S. Wales and Commercial. Nearly all the Friendly Benefit Societies are represented, also a lodge of Freemasons under the N.S.W. constitution. There is also a free public and lending library, under the control of the Penrith Municipal Council, with about 2,000 vols. Principal storekeepers: W. & E. Fulton, Judges Brothers, R. Mills, George Nash, Noble & Co., H. Neale, and an extensive stationery warehouse connected with the *Nepean Times*. The district is almost purely an agricultural one, but the town residents are principally railway employés. Maize is the most extensively grown crop. There are four tanneries in Penrith and several at St. Mary's, employing a large number of hands. The population is 4,590 for the town of Penrith, 1,700 for town of St. Mary's, 618 for town of Emu. Local newspaper: *Nepean Times*—weekly.

PERTH, a post town with telephone exchange, savings bank office and railway station, situated on Vale Creek, 149 miles W. of Sydney, in the county and electorate of West Macquarie, and police district of Bathurst; fare, 29s. 6d. and 19s. 9d. Coaches run to Rockley, 18 miles; fare 5s. There are two hotels, Hen and Chickens and Bridge, Temperance hall, a public school, with average attendance of 40, convent school, Wesleyan, Anglican, Baptist, and Roman Catholic places of worship, and a population of about 500.

PETERSHAM (32° 53′ S. lat., 151° 11′) is a municipal and electoral suburb of Sydney, and one of the fashionable railway suburbs, lying 3 miles W., situated at 100 feet above the sea-level, the highest point on the railway lines between Sydney and Campbelltown, one of the high-level water reservoirs being placed on the heights on the Canterbury Road; fares, 4d. and 3d. It was proclaimed a municipality on December 14, 1871; it has 27 miles of metalled roads, and ratable property of the annual value of £118,780. To the post-office is attached money-order, telegraph, and savings bank office, also a branch of the Bank of Australasia. There are two public schools here with an average attendance of 960 scholars, and there is an Episcopal and a Roman Catholic school; a new town hall of brick was opened on April 19, 1882, which cost £5,000, with hall to seat 400 persons, and additions made in 1893 provide three extra halls for public use. Masonic, Oddfellow and Orange lodge, hospital for women and children; Anglican, Wesleyan, Roman Catholic, Congregational, Presbyterian, Baptist and Anglican Mission churches, and technical college. There are three railway stations in the boundaries of the borough, viz., Stanmore, Petersham, and Lewisham. Principal hotels are the Carrington and the Masonic, Hotel Salisbury. The suburb is lighted by gas, and connected with the Prospect Water Supply. Population, 14,300.

PICTON (formerly known as STONEQUARRY) (34° 10′ S. lat., 150° 44′ E. long.) is a postal, money-order, savings bank, railway, and telegraph station in the county and electoral district of Camden; fares, 9s. 3d. and 6s. The leading inns are the George, the Royal, Commercial, Club, and Great Southern.

It lies in a valley 550 feet above sea-level, on the Stonequarry creek, 53 miles SW. of Sydney, on the main southern road. It has a Church of England, Wesleyan, Presbyterian, and Roman Catholic churches, two schools (public school has average attendance of 150 scholars); court-house, school of arts, Protestant hall, some half-dozen stores, a branch of the Commercial Bank, lands office, and a hospital for incurables, maintained by public subscriptions, a lease of the building (a most handsome structure) being handed over to the committee at a very nominal rent by Mr. J. H. Goodlett, of Sydney. The railway viaduct here is 270 feet long and 78 feet high, and has 5 openings of 40 feet each. The district is an agricultural one, much of the land on the banks of the creek being very rich. The chief occupation of the inhabitants is dairy farming. Kerosene shale has been found in the neighbourhood. Silver and iron are also known to exist in great quantities. Formation: sandstone and a Wainamatta shale. Picton has the character of being a healthy district. From the many little hills surrounding it large tracts of country of a pleasing and varied character are presented to the view. There are several family residences in the neighbourhood, Nepean Towers, Morton Park, Stanbury Park, and Clifton on the East, Abbotsford and Mowbray Park on the West, Jarvisfield on the North, and Broomhill on the South. Six miles to the West are lagoons, at all times containing a large body of water, now called Picton Lakes. Picton was incorporated as a borough during 1895; it has property of the annual ratable value of £6,370. Stock returns, 1899: 4,098 horses, 24,845 cattle, 7,380 sheep. Area, 218,594 acres. Population, about 1,110 persons. Newspaper: *Picton Post and Advocate.*

PICTON LAKES (34° 15′ S. lat., 150° 39′ E. long.), postal township with telegraph station, situated 59 miles from Sydney, on the main southern line, about 1,000 feet above sea-level, in the police district of Picton, electorate of Bowral, and county of Camden. The lakes are located in a valley about half a mile from the railway platform, the largest being about three-quarters of a mile long, and a third of a mile wide, and the smallest 600 yards long, and 250 yards wide. They abound in wild duck, while excellent fishing is to be obtained. There is an accommodation house for the convenience of tourists. The population numbers about 20, principally fruit-growers. The lakes are about two and a half miles from Thirlmere, and 6 miles from Picton, at both of which places there is excellent hotel accommodation; fares, 10s. 6d. and 6s. 9d.

PILLIGA (30° 15′ S. lat., 148° 59′ E. long.), a post town, with money-order office, savings bank, and telegraph and police station on the lagoon of the same name, on the road from Narrabri to Walgett, about 36 miles W. from Wee Waa, and 384 miles (412 postal) NW. from Sydney, county of Barradine, electorate of Narrabri, and police district of Bourke. Coach runs to Narrabri, which is the nearest railway station 60 miles distant, fare 25s., also to Walgett (65 miles), Coonable (52 miles), and Coonabarabran (fare 25s.). Has three hotels, Pilliga, Royal and Imperial, three stores, three saw-mills, aerated water factory, and several business establishments of various kinds, and is surrounded by large pastoral properties and numerous selections. It is a place of petty sessions, Walgett police magistrate visiting once a month. There is a public school, with average attendance of 50, School of Arts, court-house and lock-up. The Namoi river runs within 3 miles of the township, and when high is navigable from Walgett to Narrabri, which was the case in 1890. Stock returns, 1899: 1,995 horses, 4,607 cattle, 413,004 sheep. Area 1,215,364 acres. Population about 200; of district about 400. Geological formation: alluvial.

PITT TOWN (33° 35′ S. lat., 150° 54′ E. long.), a postal village (issuing postal notes), about 38 miles distant from Sydney W., in the county of Cumberland, near the Hawkesbury river, in the Hawkesbury electorate. Windsor is 4 miles off. The trains can be met at Mulgrave, 4 miles distant. The village consists principally of a very long street; it contains a butter and condensed milk factory, an Episcopal church, a Presbyterian church (both of stone), public school, average attendance 75, a wine hall, and a number of dwelling-houses. Water from Hawkesbury and private tanks. Formation: rich alluvial on low grounds, light sandy soil on higher grounds. Agricultural district. Population, 300; of district, about 600.

PLATTSBURG (32° 57′ S. lat., 151° 42′ E. long.) is a municipal township, in the electorate of Wallsend, county of Northumberland, 85 miles N. of Sydney, adjoining the township of Wallsend, lighted with gas, and having a court-house and police barracks. A school building capable of holding 800 children has been erected; it is one of the best schools in the district, average attendance 580. The mechanics' institute is a splendid building, having a large hall, reading room, library, lecture rooms, class room and lodge room. The library contains about 3,000 volumes. There are also Presbyterian, Baptist, Primitive Methodist, and Roman Catholic places of worship and Salvation Army barracks. The principal business places in connection with the township of Wallsend and Plattsburg are situated in this borough, including 11 large hotels. There is a permanent water supply. The estimated annual value of ratable property is £14,900. There are 14 miles of roads and streets within the borough. Within a short distance is the Co-operative Colliery, at which over 400 hands are employed, the output for 1899 being 187,224 tons, valued at £50,818. The seam worked is known as the Wallsend, being a continuation of the seam worked by the A. A. Company at Newcastle. In connection with the colliery there are a large number of ovens, where coke of an excellent quality is produced; there is also the Maryland Colliery, employing about 47 hands, with an output of 30,735 tons, valued at £10,685. Population, 3,100.

POONCARIE (33° 23′ S. lat., 142° 38′ E. long.), county Perry, electorate of Wellington, a post town, with money-order office and telegraph station, pleasantly situated on rising ground on the River Darling, about 80 miles NE. of Wentworth, and 800 miles W. of Sydney. Hotels: Pooncarie and Telegraph, and State school. Two sheep stations are in the vicinity. Coaches pass through on the way from Wentworth to Broken Hill, the nearest railway station, 150 miles distant. Population about 50.

PORT MACQUARIE (31° 25′ S. lat., 152° 54′ E. long.) is picturesquely situated on the sea-coast, on a promontory at the entrance of the River Hastings, 180 miles (256 postal) N. of Sydney with which the communication is direct by steamers twice a week, or sailing vessels, or the route *viâ* Manning river steamer can be taken. A coach runs six days every week to the Hexham railway station, 167 miles distant. Passengers are occasionally embarked or landed by the Richmond, Clarence, and Macleay river steamers. A daily coach also runs to Kempsey. There are four hotels in the town, the leading ones being the Royal and Star. It is in the county of Macquarie, Hastings and Macleay electoral district, and has handsome post and money-order, telegraph, Government savings bank office, and School of Art, with library of 1,000 volumes. It is also a pilot station. There is an Episcopal Church—St. Thomas's—a Wesleyan, Roman Catholic, and Presbyterian chapel, a brick court-house, a superior public school (average attendance 190), a gaol, 14 stores and branches of the New South Wales and Commercial Banks. Court of Petty Sessions is held every day; Small Debts Court second Tuesday in every month; District Court three times a year, also County and Quarter Sessions. The surrounding district is an agricultural one, the principa crops being maize, barley, oats, and potatoes. The vine is, next to maize, the principal object of culture, soil and climate suit it well, and the quantity of wine made is yearly increasing. The dairying industry has made great strides in the district, and the maize farmers are now laying down much of their land in grass for dairying purposes. Stock returns, 1899: 11,142 horses, 62,842 cattle, 1,102 sheep. Area 598,400 acres. A steam saw-mill is three miles up the Hastings, at which coasting vessels take in cargo; there is also a large saw-mill in the west suburb of the town, and another at Wauchope, on the Hastings. A steam drogher brings produce down the rivers from over 20 miles. Cobalt and tin mining. A very flourishing Agricultural and Horticultural Society holds its annual shows at Port Macquarie. The town is incorporated, the annual value of ratable property being £4,800. The population of the town is about 1,000; that of the district about 3,500. Local newspaper: *Port Macquarie News.*

PORT STEPHENS (32° 42′ 30″ S. lat., 152° 11′ 45″ E. long.) with fine harbour, about 80 miles NE. of Sydney. It is principally used as a harbour of refuge, and is well lighted. The lighthouse is a circular white tower 60 ft. high, showing a revolving red and white light alternately every minute, visible 16 miles. Stock returns, 1899: 7,576 horses, 57,410 cattle; 1,270 sheep. Area, 560,383 acres. Carrington, at the head of the harbour, is a small township.

PROSPECT (33° 41′ S. lat., 151° 3′ E. long.) is on the main Western road in the county of Cumberland, electorate of Sherbrooke, and police district of Parramatta, 22 miles W. of Sydney, and 6 miles W. of Parramatta. The township has two hotels, a post-office, two public schools, average attendance 69, and English, Church of Christ, Seventh Day Adventist, and R.C. churches. The Blacktown railway station is 3 miles distant, but passengers generally travel to and from Fairfield station, 4 miles distant. A blue metal quarry is being worked in the district, turning out about 100 tons per week. The reservoir to conserve the water in connection with the New Sydney Waterworks is here. Municipality of Prospect and Sherwood comprises 30 miles of formed and metalled streets, and ratable property of the annual value of £15,610. Population, 2,700.

PYMBLE (33° 44′ S. lat., 151° 8′ E. long.) A post town, with money-order office, telegraph and railway station; fares, 1s. 3d. and 1id., in the Metropolitan police district and electorate of Willoughby, county of Cumberland, 10 miles N. of Sydney. There is one hotel, one school, and Anglican, Presbyterian, Wesleyan and Roman Catholic churches. District agricultural. Formation: Narrabeen shales and Hawkesbury sandstone.

PYRMONT (33° 52′ S. lat., 151° 12′ E. long.), in the electorate of the same name; a thickly populated division of Sydney, situated on the western shores of Darling Harbour, on an elevated position, with a post, money order, savings bank, and telegraph office; communication is by electric tram and omnibus, or over Pyrmont bridge. There is a public school here (average attendance 700), as well as a Roman Catholic school and Church of England's infants' school, and Episcopalian, Roman Catholic, and Wesleyan places of worship; Bank: English and Scottish, a large number of hotels and business establishments; the Government abattoirs are situated at Glebe Island, between which and Pyrmont is a large bridge (now being replaced by a stone causeway). Formation: sandstone. One of the largest quarries in the colony is worked here, and has supplied stone for all the principal buildings in the city. Chief industry: sugar refining—Colonial Sugar Refining Co. having elaborate machinery of latest description and employing about 560 men. Also ice works, iron works, timber and joinery works, and boat-building establishments. In 1899 the Darling Harbour Railway was extended to "Darling Island," where the Government has constructed extensive concrete wharves capable of berthing the largest steamers trading to Australia.

QUAMBONE (31° S. lat., 148° 5′ E. long.), a post town, on the Merri-Merri creek, in the police and electoral district of

Coonamble, 350 miles (382 postal) W. of Sydney. A coach runs to Dubbo and Warren railway stations, 104 and 78 miles distant. It has one hotel, the Quambone, and one store. Population about 80.

QUEANBEYAN (35° 20′ S. lat., 49° 15′ E. long.) is a railway station, money-order and Government savings bank, telegraph township on the river of the same name, 194 miles SW. of Sydney; fares, 38s. 3d. and 25s. 6d. It is in the county of Murray, and electoral and police district of Queanbeyan. Hotels: Royal, Victoria, Commercial, and Pooley's. The town is incorporated, has 10 miles of roads and streets, and ratable property of the annual value of £6,600. Places of worship: Episcopal, Wesleyan, Presbyterian, and Roman Catholic. Queanbeyan also possesses a hospital, School of Arts, convent, public school (average attendance 154), a court-house, a gaol, police-barracks, a convent, two large stone flour-mills, one roller flour-mill, a large wool-washing establishment, fire brigade with two fire engines and 750 feet hose, new post and telegraph office and two banks, Commercial and N.S. Wales. Public buildings Oddfellows' Hall, Protestant Hall, Masonic Hall, and Grand United Hall. The district is both pastoral and agricultural. The number of acres of land under cultivation is about 6,000; producing wheat, maize, barley, oats, potatoes, rye. Live stock returns, 1899, 3,591 horses; 16,242 cattle; 545,633 sheep; total area of holdings, 986,480 acres. Queanbeyan, now a mining district, is picturesquely situated, and has many natural advantages, including valuable deposits of copper, silver, lead, iron, manganese, and gold. The Gooda Creek mines are 16 miles distant; Bywong 17 miles; and the famous Captains Flat silver mine 28 miles. Water from Queanbeyan river stored in four tanks, holding about 7,900 gallons. Coaches run to Yass, fare 10s., Uriarra and Tharwa, 6s. Formation: schist. The population comprises about 1,100 persons, the district numbering 5,455. Newspapers: *Queanbeyan Age* and the *Observer*.

QUIRINDI (31° 23′ S. lat., 150° 48′ E. long.), a post town and railway station on the Great Northern Railway, is situated 1,278 feet above sea-level, on the Quirindi and Jacob and Joseph Creeks, in the electorate of the same name, eastern tributaries of the Namoi, on the northern slope of the Liverpool range, in the county of Buckland, and Murrurundi police district, 242 miles N. of Sydney It is the nearest station for the greater portion of the Liverpool Plains. A great number of stock are trucked for the metropolitan markets. Business premises comprise six hotels: the Terminus, Commercial, Royal, Central, Club House, and Imperial, six principal stores, the Commercial and Australian Joint-Stock Banks, four butter factories, two flour-mills, Masonic and Oddfellows' lodges, and mechanics' institute. There are four churches and a superior public school (average attendance 250), also a Roman Catholic school and convent, and four other schools within 5 miles' radius, a money-order office, savings bank, telegraph station, court-house, and police barracks. The train *viâ* Newcastle (144 miles S.) is the means of reaching Sydney; fares, 40s. 6d. and 26s. 9d. Coaches run to Yarraman, and Collie Blue twice a week. The district is incorporated, and has 20 miles of roads and streets, and ratable property of the annual value of £9,660. Farming locality; grain principally grown here, return being about 200,000 bushels annually; many sheep and cattle reared here. Population about 1,500, Local newspapers: *Quirindi Gazette* (Wednesday and Saturday), and *Quirindi Magpie* (Tuesday and Friday).

RAGLAN (33° 27′ S. lat., 149 44′ E. long.), post, telegraph and railway station on the Great Western Railway, in the county of Roxburgh, electoral district of Macquarie, and police district of Bathurst, 140 miles (122 by road) WNW. of Sydney. Fares, 27s. 6d. and 18s. 6d. It lies 2,436 feet above sea-level. Coach runs to Sunny Corner fortnightly. It has a public school, with average attendance of 30 scholars, and Anglican and Baptist churches, and was formerly a principal coaching centre. The soil is of a deep alluvial character, and the country is mainly extensive plains (Macquarie), used for grazing purposes and agricultural pursuits. Water from wells. Population about 120.

RAMORNIE (29° 40′ S. lat., 152° 44′ E. long.). A post town, with telephone station, in county of Clarence, the electoral and police district of Grafton, from which it is distant 30 miles by water, 10 by road. Steamers and coaches run regularly between Ramornie and Grafton, and coaches ply when required It is 378 miles N. of Sydney, and contains one hotel, large hall, Mechanics Institute, and a public school, with an enrolment of about 70 pupils. The Australian Meat Preserving Works are carried on here. The meat is exported, together with tallow, extract of beef, hides, butterine, horns, bones and bonedust. The works provide employment for about 150 hands during the busy season, whose wages amount to £12,000. Geological formation: sandstone. Population about 300.

RANDWICK (33° 55′ S. lat., 151° 14′ E. long.), an improving suburban municipality, in the electoral district of Randwick, on the south side of the city, and distant from it about four miles. Tramcars ply at frequent intervals during the day, fare 3d. It has money-order, telegraph, and savings bank office, and branch of the Joint-Stock Bank. There are many villa residences of the Sydney merchants, four hotels, a large asylum and hospital for destitute children, with about 180 inmates. Randwick is noted for its racecourse, admitted to be one of the finest in Australia, the principal meetings attracting visitors from all parts of Australia. The first Australian Derby and Leger were contested here, and won respectively by Clove and Falcon. The course has, up to the present time, cost over £200,000. Kensington racecourse is also in the borough. Randwick joins Waverley on one side, Botany on another, Sydney on the north, and the ocean is the eastern boundary. There are two public, a Roman Catholic, three private schools, and five churches, two Episcopalian, a Roman Catholic, Presbyterian, and Wesleyan. Masonic and Protestant Alliance lodges, and asylum for destitute children. There is good building stone (freestone), with plenty of sand, and a good water and gas supply laid on. Moore Park and the Centennial Park are partly in the Randwick borough. It was proclaimed a municipality on February 22, 1859. It has 77 miles of roads. Estimated annual value of ratable property, £90,180. The model suburb of Kensington, consisting of 1,025 acres, is situated alongside the racecourse. Population about 8,200.

RAYMOND TERRACE (32° 46′ S lat., 151° 42′ E. long.) lies on the east bank of the Hunter river, near its junction with the Williams river, 18 miles N. from Newcastle. It is in the parish of Eldon, county and electorate of Gloucester, and police district of Raymond Terrace, and has a post, money-order, and Government savings bank, and telegraph office. Steamers Newcastle and Hunter River Steamship Company ply daily to Sydney, 114 miles to the SE. Hexham is the nearest railway station, distance 6 miles, daily coach, fare 1s. 6d. Raymond Terrace forms the starting point of the coaching system on the northern coastal district. The principal hotels are the Agricultural, Cosmopolitan, Clare Castle, and the Junction. The town is prettily situated, being built on a gentle slope, the river running at the foot. It contains a few good buildings, among which are a steam saw-mill, the court-house, and lock-up; and four places of worship occupied by the Episcopal, Roman Catholic, Wesleyan, and Presbyterian bodies, a Salvation Army barracks, a Roman Catholic, and a public school (average attendance, 170). Commercial Bank has branch here, and there are three principal stores. The School of Arts has a library of 760 vols. The municipality has ratable property of the annual value of £4,300, and 8½ miles of roads. The district is principally agricultural and dairying; the grape is also extensively cultivated, some of the earliest vineyards in the colony being within a short distance of the town. Formation: old red sandstone, with splendid stone quarries. There are about 900 persons resident in the town and outskirts, and 2,760 in the census district (1891). Local newspaper: *Gloucester Examiner*.

REDFERN (33° 53′ S. lat., 151° 12′ E. long.), the principal suburb of Sydney, on the SSW. side, in the county of Cumberland, electorate of Redfern. It was proclaimed a municipality on August 11, 1859, and has an area of one square mile. There are 20 miles of streets, annual value of ratable property. £164,630. Omnibuses run frequently to and from the city; fare 3d., also tramcar, and railway. Redfern is lighted by electricity, and connected with the Prospect Water Supply; has town hall and council chambers, money-order, savings bank, post-office, and telegraph facilities. The Free Library here has 2,500 vols. There are two public schools, with average attendance of 1,500, a denominational school (Episcopal), a Roman Catholic and several private schools; three Episcopalian, two Roman Catholic, one Congregational, Wesleyan and two Presbyterian places of worship; about 36 hotels; the extensive railway works at Everleigh; 11 boot factories, nine ironworks, seven coach factories, five cooperages, several dairies, three cordial factories, three printing offices, two broom factories, three iron foundries, two brass foundries, vinegar works, nursery, art metal works, three soap factories, besides Anthony Hordern & Sons' bedding factory, and the New York and Brooklyn tobacco factory; also a park of 12 acres, planted with trees. Banks: Joint Stock and Commercial. Population estimated at 24,000.

REEDY FLAT (now BATLOW) (35° 30′ S. lat., 148° 10′ E. long.), a post town, money-order office and telephone station, 333 miles SW. of Sydney; county Wynyard, electoral and police district of Tumut; situated on the Gilmore and Reedy Flat creeks, 2,700 feet above sea-level. Communication to the metropolis is coach to Gundagai, 40 miles, thence rail. There is a public school, School of Arts, hotel, Roman Catholic, and Union Protestant places of worship. A saw-mill, jam factory, and one general store. Geological formation: basalt. The township has a population of about 200, who are principally engaged in mining, fruit growing and agricultural pursuits.

REEFTON, a gold-bearing district, 16 miles north of Temora, and on the road to Barmedman and Wyalong, in the electorate of Grenfell, county of Bland. A daily coach runs from Temora; fare 7s. 6d. There is one hotel, school, and stores; also postal facilities, communication daily. Several quartz reefs have been discovered, gold being traced from the surface to 60 and 70 feet, the reefs being vertical. Battery and cyanide works have been erected. Population, approximately, 100.

RICHMOND (33° 36′ S. lat., 150° 46′ E. long.), one of the most English-looking towns in the colony, is situated in the county of Cumberland, police district of Windsor, and electorate of the Hawkesbury, within a short distance of the Hawkesbury river, 4 miles from Windsor, and 38 miles NW. from Sydney, with which it is in direct communication by railway, fares 5s. 0d. and 3s. 1d. The principal hotels are: Royal, Commercial, Black Horse, and Imperial. It has a post, savings bank, money-order office, and telegraph station, and has been a municipality since June 18, 1872. It has 7½ miles of road, and ratable property of the annual value of £7,910. The town is traversed by several streets, of which Windsor is the leading one. The more important buildings are the Episcopal church, a fine large brick building; the Roman Catholic church, a recently-enlarged edifice; the Presbyterian church, a compact building of brick with a palatial manse; and the Wesleyan chapel, an unpretending structure of brick; a School of Arts, with library of 1,600 vols.; branches of the N.S Wales, Joint-Stock and Commercial Banks:

one public school with average attendance of 250, and denominational school belonging to the Roman Catholics, conducted by Sisters of Charity, and a court-house. There is a spacious park-like reserve, with handsome pavilion, in the centre of the town. Masonic, Oddfellows', Temperance, and Druids' Lodges are also established in the town. Fire brigade has reel and 800 feet of hose. The district is an agricultural one, and similar in many respects to the Hunter river country, the river flats being of the most fertile character. In 1867 the river rose 63 feet above its usual height, submerging a vast expanse of country. The alluvial flats are extensively cultivated, and large quantities of oaten and lucerne hay, and heavy crops of maize are raised. About 4,400 acres of the Ham Common is occupied by the Agricultural Department as an agricultural college and farm, the college accommodating about 100 students. The Kurrajong Mountains, about 5 miles west of the town, are the chief seat of the orange and stone fruit industry; the Kurrajong Heights, 10 miles from the railway station, and to which coaches run daily, are considered one of the sanatoriums of New South Wales. Water supply from Richmond Water Supply Works. The population of the town is 1,400 persons, of the district, 3,400.

RIVERSTONE (33° 33′ S. lat., 150° 52′ E. long.), a post town, telegraph, money-order office, Government savings bank, and railway station, 28 miles NW. of Sydney; fares 3s. 4d. and 1s. 11d. It is situated on the Eastern Creek, about midway between Blacktown and Windsor, in the electorate of the Hawkesbury, and police district of Windsor. There are two hotels, a private and public school, average attendance at latter, 100; two public halls; churches—Episcopalian, Roman Catholic and Presbyterian: several small stores and saw-mills, several handsome substantial brick residences, branch of the A.J.S. bank, large orchards and vineyards. Extensive meat works are in operation here. Population about 900.

ROBERTSON (34° 33′ S. lat., 150° 36′ E. long.), a post town, with telegraph station, money-order office, and savings bank, in the county of Camden, and police and electoral district of Kiama, about 102 miles S. of Sydney, which is reached by coach from Bowral or from Moss Vale Railway station, from which it is 14 miles distant. It lies at an elevation of about 2,500 feet above the sea-level, on the road between Kiama and Moss Vale, and commands fine scenery. Fitzroy, Belmore, Carrington, Jersey, Bridal Veil, Macquarie Waterfalls, and Macquarie Pass being within 8 miles of the township. A public school is here, with average attendance of 62; there are two places of worship—Church of England and Wesleyan—three hotels, Sanatorium, Criterion and the Royal; two stores, a saw mill, Commercial Bank of Sydney, Court of Petty Sessions, an Agricultural Society, Orange lodge, and a school of arts. The land is principally taken up for dairy farming, large quantities of butter being manufactured and sent to Sydney; five butter factories being within a radius of 5 miles of Robertson Population is estimated at 500. Trial surveys completed of proposed railway from Moss Vale and Bowral to Robertson. Local paper: *Robertson Advocate.*

ROCKDALE, a flourishing suburb, with post, telegraph, money-order office, savings' bank, and railway station, 6 miles from Sydney (fares, 7d. and 5d.), on the Illawarra line, county Cumberland, police district of Newtown, and electorate of St. George. Hotels: Royal, Brighton and Grand. It has a public school, average attendance 500, six churches, representing all denominations, and several large stores. Saywell's tram line connects the railway with the beautiful pleasure grounds at Lady Robinson's Beach, "Shady Nook," the most picturesque spot on the shores of the beautiful and romantic Botany Bay. There is an electric tram to the beach. There are a number of handsome and commodious residences, handsome public baths, and a large recreation reserve. The municipality has 65 miles of streets, and ratable property of the annual value of £44,410; is lighted by gas, has a permanent water supply, and is generally making rapid progress. Population, about 7,000. Newspaper: *St. George's Advocate.*

ROCKLEY (33° 43′ S. lat., 149° 43′ E. long.), a small picturesque postal township with telegraph, savings bank, and money-order office, on Pepper's creek, near its junction with Campbell's river, 22 miles south of Bathurst, and 147 miles (167 postal) W. of Sydney. It is situated in the midst of a cluster of low hills, in the county of Georgiana, police district of Bathurst, and electorate of West Macquarie. The traveller's route is by coach to and from George's Plains Railway station daily, 15 miles, fare 5s.; also by coach to and from Bathurst twice a week. Hotels: Club House and Commercial. The township consists of about 50 to 60 dwellings; a substantial stone-built Wesleyan chapel; an Episcopal and Presbyterian church, both of brick; and Catholic church, all of these places of worship being erected on elevated sites; a flour-mill, four stores, a branch of the Joint-Stock Bank; School of Arts, a public school, with average attendance of 50 scholars, and a court-house. There are some farms and sheep stations in the district, and also some alluvial and quartz workings, but not of a very rich character, though supporting a moderate population. Formation: quartz, limestone and basalt. Population of town 200, and district about 1,500.

ROCKY RIVER (30° 45′ S. lat., 151° 30′ E. long.), a postal centre, in the county of Sandon, electoral and police district of Armidale, 304 miles (348 postal) NNE. of Sydney. Communication with the metropolis is by private conveyance to the Uralla railway station, distant 3 miles, thence by train *viâ* Newcastle. It has one hotel; one public school, average attendance 64, and a general store. This district, which is of granite formation, was formerly a thriving gold-field, but has of late years declined. It is, however, a good fruit growing district.

ROOKWOOD (33° 50′ S. lat., 151° 4′ E. long.), a post town, with Government savings bank, telegraph, and money-order office, on Haslam's creek (by which name it was formerly known), situated 10 miles SW. of Sydney, with which there is railway communication; fares, 1s. and 8d. It is four miles from Parramatta. It is in the county and electorate of Granville and police district of Parramatta. There are here a Church of England (St. Stephen's) a Congregational chapel, a public school, average attendance, 166, a temperance hall, and two hotels. A large area of land has been set apart for the purposes of interment, and is named "The Necropolis." This City of the Dead is already numerously tenanted, and many graceful memorials of affection have been erected. Funeral trains leave twice a day. Formation: clay combined with slate. The Australian Meat Preserving Company's works are in the neighbourhood, and in the vicinity at Brixton are extensive brick-fields. The district is incorporated with ratable property of the annual value of £11,150. Population, about 3,800.

ROOTY HILL, a post town, money-order, telegraph office, and railway station, 25 miles W. of Sydney, electorate of Sherbrooke, and police district of Penrith; fares, 2s. 10d. and 1s. 8d. There are two public schools, one hotel (Imperial), two places of worship, and several small stores. Population about 200.

ROUSE HILL (33° 33′ S. lat., 151° 1′ E. long.) derives its name from the Messrs. Rouse, old residents of the district. It is a post town, in the county of Cumberland, electorate of the Hawkesbury, and Windsor police district, 28 miles W. of Sydney, and an old settled locality. Riverstone is the nearest railway station, 4 miles distant, but coaches run daily from Parramatta and Riverstone, arriving at Rouse Hill at midday and 7 P.M. respectively. There are here a public school, with enrolment of 24 children, an English church, a police station, a store, one hotel, and about 50 residents. Formation: sandstone, slate, and clay. The timber here is iron-bark, box, and gum. Population of district, about 300.

RYDAL (33° 29′ S. lat., 150° 3′ E. long.), a money-order, telegraph, Government savings bank, and railway station on the Great Western Railway, 111 miles W. of Sydney, fares, 22s. and 14s. 9d. Hotels: the Royal and Commercial. It lies 3,121 feet above sea-level on the Solitary Creek, in the electoral district of Macquarie, and police district of Bathurst. Churches: Presbyterian, Union and Roman Catholic; with one public school, having average attendance of 40 scholars. The surrounding country is taken up by farmers and squatters. The district is well adapted for farms and the growth of fruit. About 15 miles from here are the Sunny Corner silver mines, which can be reached by daily coaches. Coaches also run to Jenolan Caves, with view of the Zigzag. Formation: slate. Population, 160.

RYDE, or KISSING POINT (33° 51′ S. lat., 151° 7′ E. long.), is a railway station, with money-order, telegraph, Government savings bank and post office, on the north bank of the Parramatta river, 8 miles NW. of Sydney and Parramatta. The new line of railway to the Hunter river runs through Ryde; fares 1s. 3d. and 10d. The railway station is about a mile from the township. The Parramatta steamers call on their journeys up and down; fares 9d., and land passengers close to the town. The leading hotels are the Steamboat, Bay View, and the Royal. It is in the county of Cumberland, electorate of Ryde, and Parramatta police district, and is one of the most picturesque suburbs about Sydney. It was proclaimed a municipality on November 11, 1870, re-proclaimed June 11, 1872. It has 64 miles of roads and streets, ratable property of the annual value of £20,723 is lighted by gas, and has a permanent water supply. Bank: New South Wales. Churches: St. Ann's (Episcopal), a stone Wesleyan chapel, Presbyterian, Baptist chapel, and St. Charles', Roman Catholic; the latter has a school attached. Two public schools here, average attendance, 340. At North Ryde there is now an Episcopal Church (St. John's). A stone Church of England (Christ Church) has been erected in East Ward. Freemason, Oddfellow and Druids' lodges. Public buildings: court-house and police-station. The country is celebrated for its orange and other orchards, 4,000 acres being under cultivation. Omnibuses run daily to and from Sydney. Population about 2,550.

RYLSTONE (32° 47′ S. lat., 149° 59′ E. long.), a postal township in the electorate of the same name, with telegraph, Government savings bank, and money-order office, in the county of Roxburgh, lying 1,983 feet above the sea, on the left bank of the Cudgegong river, 32 miles SE. from Mudgee, and 158 miles W. of Sydney. The town is connected with Sydney *viâ* Wallerawang by rail, the line to Mudgee running through the centre of the district; fares 31s. 3d. and 20s. 9d. Hotels: Rylstone, and Globe. A branch of the Australian Joint-Stock Bank is here, a public school (average attendance, 125), Episcopal, Roman Catholic, and Wesleyan places of worship. Horticultural and Agricultural Society, Druids' lodge. Government buildings are a court-house, police barracks, gaol, and handsome telegraph and post-office. Population is about 650; the police district, numbering 3,690 persons, now forms part of the sheep and registry district of Mudgee. Diamonds have been found in the river bed, and cinnabar, gold, coal, ironstone, copper, shale and lime are being procured in the district, which is also noted for its pastoral and agricultural development. Local newspaper: *Rylstone Express.*

ST. ALBANS (36° 15′ S., lat., 151° 0′ E. long.), a secluded and picturesque township, situated on the left bank of the Macdonald (tributary of the Hawkesbury), 70 miles W. of Sydney, and 36 miles from Windsor railway station. Communication by coach to Wiseman's Ferry, steamer to Hawkesbury River Railway Station, thence rail to Sydney. It belongs to the

electoral district of Northumberland, and police district of Windsor, 60 miles NW. of Sydney (postal 75). There is one hotel, public school (with average attendance 44), a post and money-order office, and telephonic communication with Wiseman's Ferry; Episcopalian, Roman Catholic, and Wesleyan churches; police-station and court-house. The district is an agricultural one, of sandstone formation, and very suitable for fruit-growing. Population of district 500.

ST. MARYS (33° 29′ S. lat., 150° 48′ E. long.), a postal township, with money-order, savings bank, telegraph office, and railway station, a mile and a half from the town (fares 3s. 6d. and 2s. 0d.), in the county of Cumberland, electorate of the Nepean, and police district of Penrith; situated on South Creek and the Western Road, 29 miles W. of Sydney. There are nine tanneries, four hotels, branch of the Joint-Stock Bank, a convent, also Church of England (St. Mary's), Roman Catholic, Presbyterian, and Wesleyan places of worship, nine stores, a public recreation ground, public school, average attendance 210, and mechanics' institute. The district is incorporated, and has 3½ miles of metalled streets, with ratable property of the annual value of £7,300. Population of town and district about 1,700.

ST. PETERS (33° 56′ S. lat., 151° 12′ E. long.), a municipal suburb and railway station, about 4 miles S. of Sydney, on the Cook's river, county Cumberland, and electorate of St. Peter's, extending from the southern boundary of the borough of Newtown to Cook's river, composed of a ridge of high land, bounded by Shea's creek and Cook's river on the east, and Gumbramorra Swamp on the west. It has post, money-order, and telegraph office, and savings bank. There are seven hotels, two places of worship, public school (average attendance 550), Roman Catholic school, private lunatic asylum, with about 100 inmates. There is also a large town hall here, with spacious room for entertainments, &c., a free library, and reading-room with 1,000 volumes, Foresters' hall, and St. Peter's School hall. The municipality has 19 miles of streets, and ratable property of the annual value of £27,080. It is lighted with gas, and has a permanent water supply. The Illawarra Railway skirts the western boundary. Omnibuses run frequently, also electric tram *viâ* Newtown. Population 5,750. Tempe station is within the municipality; fares, 3d. and 2d.; omnibuses also run frequently.

SCONE (32° 3′ S. lat., 150° 54 E. long.), a post town, with money-order, Government savings bank, and telegraph office on the northern road, 75 miles from Maitland, 9 miles N. from Aberdeen, and 194 miles N. of Sydney, in the electorate of Robertson. It is a station on the Great Northern Railway; fares from Sydney 31s. and 20s. 4d. The principal hotels are the Golden Fleece, Belmore, Willow Tree, the Crown and Anchor, and Railway. The town is prettily situated on the stream called the Kingdon Ponds, on the slope of a small hill, about 680 feet above the sea level, almost surrounded by mountains, and from its elevated position and natural advantages, as regards drainage, has a high character for healthiness. Other buildings of note are the four places of worship—Church of England, Roman Catholic, Wesleyan, and Presbyterian; hospital and benevolent asylum, the court-house, School of Arts (with library of 2,000 vols.), Good Templars' Hall, Oddfellows' Hall, and the public school, average attendance about 110. There are also several stores, a branch of the Bank of N.S. Wales, and Australian Joint-Stock bank, and one steam flour-mill. The district is a mining, agricultural, and pastoral one; the yield of gold, from Stewart's Brook, the Denison and Omadale Brook has caused a revival of mining industry all round the district. Wheat, maize, and tobacco are the leading crops. The land in the neighbourhood of the town is well adapted for tillage, and many thousands of acres have been conditionally purchased. About one mile from Scone is a wild and picturesque spot known as the Flat Rock, the romantic scenery of which is highly spoken of and well worth visiting. About 10 miles from Scone in a northerly direction, on a spur of the Liverpool range and 1½ miles from the Great Northern road and about 2 miles from the Wingen railway station, is the only burning mountain in Australia supposed to be covered with coal beds continually on fire. It is a great attraction to tourists and visitors. Coaches run to Belltrees, Moonanbrook, and Denison three times a week. The population comprises about 1,200 persons, the whole district fully 7,000. The district is incorporated, having 5¾ miles of streets, and ratable property of the annual value of £6,500. Local newspaper: *The Scone Advocate*.

SEVENHILLS (33° 38′ S. lat., 150° 57′ E. long.), a post town, telegraph, and railway station in the county of Cumberland, electorate of Sherbrooke and Parramatta police district, 20 miles W. of Sydney; fares, 2s. and 1s. 2d. The formation is hilly, with slate strata; the soil is rich and admirably adapted for oranges, the orchards being numerous and very productive. There are forests of native timber here. In the township is an Episcopal church, and a public school, with average attendance of 58. Population of district about 400.

SHELLHARBOUR (34° 27 S. lat., 150° 57′ E. long.), a municipal district, three miles from the famous Lake Illawarra, proclaimed June 4,1859, with 56 miles of streets, and ratable property of the annual value of £16,980 situated 66 miles SSW. from Sydney, county Camden. Mode of conveyance to Sydney, per steamer direct, or coach to railway station three miles from township; railway fares 12s. and 8s. It is in the electoral district of Illawarra, and police district of Kiama, contains a post, money-order, telephone and telegraph office, savings bank, two hotels, a public school (average attendance, 70), a branch of the Commercial Banking Company, Anglican, Roman Catholic, Wesleyan, and Presbyterian places of worship, division of Sons and Daughters of Temperance (with hall), three stores, bacon factory, public library with 1,000 vols., and lock-up. The district is principally pastoral, with basalt and sandstone formation. Tourist tickets from Sydney from Friday to Monday, 5s. 6d. There is good beach and schnapper fishing; Long Point is a picturesque locality 2 miles distant by beach; and there are picnic grounds at Illawarra. Population of the borough about 1,000.

SHOALHAVEN (34° 50′ S. lat., 150° 47′ E. long.) is the name of an electoral and police district devoted to agriculture, dairying and mining, situated upon the river of that name, 100 miles from Sydney by steamer to Greenwell Point, 120 by road and rail *viâ* Moss Vale, coach 40 miles; or 92 miles by rail, South Coast Line. The sea frontage of the district is about 50 miles. The Shoalhaven electoral district embraces the SE. portion of the county of Camden and the NE. portion of the county of St. Vincent. The places of petty sessions are Nowra, Berry and Kangaroo Valley. A district court is held at Nowra thrice a year. Within the district of Shoalhaven there are four municipal districts, viz.: Berry, Nowra, Broughton Vale, and South Shoalhaven. In the electorate are 25 postal and money-order towns and six villages, 37 public and private schools, a number of churches, chapels, and other places of public worship, three free municipal libraries and five Schools of Art, a substantial court-house (which cost £4,000). Bank branches: Commercial of Sydney, E.S. and Australian, and City of Sydney. The district is very extensively under farms, the Hay Estate (late Berry's) alone having 44,000 acres, and between 200 and 300 tenants. There are fourteen butter factories in the district, also a milk condensery, two saw-mills, and two bacon-curing establishments on a large scale. Independently of the arrival and departure of three steamers weekly, there are a number of small coasters trading to the river, principally in the timber trade. The water supply is derived from a source at the top of the Cambewarra, and is a gravitation supplied, designed and carried out by the Public Works Department. Formation: Devonian slate and sandstone, with ranges of eruptive lava. Annual value of ratable property, £11,420. The population of the municipality is 850, of the district is over 15,000. Newspapers: the *Shoalhaven News*, *Nowra Colonist*, *Shoalhaven Telegraph*, *Berry Register*, *Broughton Creek Mail* and *The Leader*.

SILVERTON (35° 38′ S. lat., 141° 12′ E. long.), situated on the Umberumberka creek, in the electorate of Sturt, about 18 miles in a direct line from the Border of South Australia and distant from Sydney about 820 miles W., with Railway station on the Cockburn to Broken Hill Railway, postal, telegraph, money-order and savings bank facilities. There are two hotels: Silverton and Barrier Ranges, a public school with average attendance of 80; two general stores, a brewery, and boarding houses, in addition to a Court-house, gaol, and police station. Roman Catholic, Wesleyan, and Bible Christian places of worship. The district was proclaimed a municipality on 22nd October, 1886, but is now defunct. Has a permanent water supply. The mining district is a very extensive one, commencing at Thackaringa on the south, and extending beyond Mount Gipps, comprising a tract of country known at present to be argentiferous, at least fifty miles long by half that distance broad. At Thackaringa the first discovery of silver was made. The lodes there are principally galena. The Umberumberka mines are situated about twelve miles north of Thackaringa, and extend to within a mile of Silverton, but are not at present working. About 50 miles north of Silverton is the Poolamacca or Euriowie tin-field, covering an area as yet but imperfectly known. A railway has been built by the S.A. Government from Petersburg to Cockburn, on the border, which is continued to Silverton and Broken Hill by a private company. The route from Sydney is by rail *viâ* Melbourne and Adelaide; or by rail to Hay or Bourke, thence by coach *viâ* Wilcannia. Silverton has of late years greatly declined owing to the stoppage of all the mines, save a few which are still worked by private parties. Population, 550.

SINGLETON (32° 24′ S. lat., 151° 7′ E. long.), county of Northumberland, electorate of Singleton, is a post, telegraph, savings bank and money-order town on the Hunter river, 29 miles to the N. of Maitland and 147 miles NW. of Sydney, with which it is connected by rail *viâ* Newcastle. Fares to Newcastle (49 miles), 9s., 5s. 9d., or direct to Sydney 20s. 9d. and 13s. 4d. Coaches run to Jerry's Plains, Whittington, Vere, and Broke. The principal hotels are the Royal, Imperial, the Percy, and the Caledonia, and there are eleven others. It is named after Mr. Benjamin Singleton, who in 1825 was one of a party who first explored the Valley of the Hunter. The railway station is 135 feet above sea-level. Singleton is a place of considerable business importance, and is the head post town of the district. It is well laid out, lighted with gas, and has some superior buildings, public, private and commercial; among the former are the Benevolent Asylum and hospital, affording now accommodation for 50 to 60 inmates; the Mechanics' Institute (with 5,000 vols.), the court-house, the Oddfellows' hall, the post and telegraph offices, the public school (average attendance 420), the various churches, and some of the clergymen's residences, the grammar school, Bank of New South Wales, &c. There are Anglican, Roman Catholic, Wesleyan, and Presbyterian places of worship. A very large trade is done with the surrounding district, and dairying has made great advance, about 9,000 cows being milked in the registered dairies. A volunteer infantry corps has a muster roll of 60 members, and the half squadron of New South Wales Lancers has a members' roll of 50. The banks are the New South Wales, Joint-Stock, and the Commercial; several of

the insurance companies have agencies also in the town. Fire brigade has engine, ladder waggon, and 300 feet of hose. The country in the vicinity of Singleton is known as Patrick's Plains (so named by the first explorers, John Howe, Benjamin Singleton and party, who camped here on St. Patrick's day). It is principally an alluvial flat, and therefore very fertile, but subject to occasional inundation. About 12,500 acres of land are under cultivation, producing wheat, oats, maize, barley, potatoes, wine, and fruit of every kind. There are numerous stations in the district. Stock returns, 1899: 6,641 horses, 52,663 cattle, 41,627 sheep. Area, 516,622 acres. One member is returned to Parliament. Singleton was proclaimed a municipality on January 30, 1866. It has 11¼ miles of streets, and property of the annual ratable value of £14,330. The Junior Municipality, South Singleton, has about five miles of streets and property, of the annual value of £5,830. The Northern Agricultural Association, one of the most flourishing of its kind in the Colony, has its show grounds in South Singleton, where it possesses freehold property valued at upwards of £10,000. Four collieries are being worked in the district, employing about 40 hands. The product is a bituminous coal, suitable for manufacturing and household purposes. Singleton was first lighted by gas in September, 1881. The town has three reserves, one known as Burdekin Park, which is planted with numerous trees, and has asphalted paths; a second, Victoria Square, chiefly used for cricket; and the other, Howe Park, a block of 33½ acres, and in course of permanent improvement. The permanent Town Common, 1½ mile distant, is an extensive forest of about 2,400 acres. The Masons, Druids, Oddfellows, Orangemen, R.C. Guild, Sons of Temperance, Protestant Alliance Friendly Society, and Good Templars, are severally represented by local lodges. Water from Hunter river, municipal tank holding 6,000 gallons. The population is about 3,000; that of the district 10,000. The local newspapers are the *Singleton Argus* (published every Tuesday, Thursday and Saturday) and the *Budget*.

SMITHFIELD (33° 49′ S. lat., 150° 59′ E. long.), a post town, telegraph, telephone, money-order office, and Government savings bank, bounded by Prospect creek, two miles from the Fairfield railway station, to which coach 20 miles S. of Sydney, and two miles from Prospect Waterworks. It is in the county of Cumberland, electorate of Sherbrooke, and police district of Liverpool. It has two hotels, one public school, with average attendance of 130 scholars, a Methodist and a Baptist chapel, an Episcopal church (St. James'), Roman Catholic church (St. Gertrude's), and three stores. It is an agricultural and fruit-growing district. In the vicinity are the Sherwood brick and tile works, and a large tannery. Water from Prospect Reservoir. The district is incorporated, and has ratable property of the annual value of £6,530. Population about 1,600.

SMITHTOWN (31° 6′ S. lat., 152° 56′ E. long.), county Dudley, a post town, with money-order office, savings bank and telegraph office, situated on the Macleay river, about 18 miles from the Heads; police district of Kempsey, electorate of Raleigh, 324 miles N. of Sydney, to which communication is by Clarence and Richmond River Company's steamers, three times a week. Hexham is the nearest railway station, 216 miles distant. There are 2 hotels (Shamrock and Centennial), public school, average attendance 61, Primitive Methodist, Episcopalian, and Roman Catholic churches, School of Arts, and several large stores. The district is noted for its agricultural products, maize being cultivated in great abundance. Dairy farming is also largely followed. Population 220.

SOFALA (33° 5′ S. lat., 149° 47′ E. long.), a pretty little goldfields township, on the Turon river, 149 miles (166 postal) NW. of Sydney, and 30 miles N. from Bathurst, electorate of Macquarie. Coach to Bathurst, 29 miles distant (fare 5s.), thence rail, form the means of communication with Sydney. The principal hotels are the Royal and the Commercial. It has post, money-order office, savings bank, and telegraph station. The district in which it is situated is altogether a mining one. In the early days of mining large quantities of gold were obtained from this district, and a large number of reefs have been discovered in various parts of the district, and give employment to several crushing machines. The whole river has now been taken up for dredging purposes, and a great impetus has been given to the progress of the district. Places of worship: Episcopal and Roman Catholic. Presbyterian service monthly. There is a hospital, public school with average attendance 75, four stores, Roman Catholic convent and school, an Oddfellows' lodge, court-house, police station, and literary institute, with 1,000 vols. Bank: City. The population of the town is 310.

SOLFERINO (*See* LIONSVILLE.)

SOMERTON (30° 56′ S. lat., 150° 38′ E. long.), a post town and money-order station, on the Peel river, 301 miles N. of Sydney, and 23 miles NW. of Tamworth, the nearest railway station, reached by coach; coach also to Gunnedah. It is situated in the county of Parry, electoral and police district of Tamworth. There are several farmers and selectors in the district, which is also good grazing country. A public school, average attendance 30, one hotel, two stores, and an Episcopal church. Population about 120.

SOUTH GRAFTON (29° 43′ S. lat., 152 56′ E. long.), a municipality, with money-order, savings bank, and postal and telegraphic facilities in the police and electoral district of Grafton, and county of Clarence, 350 miles N. of Sydney, communication with which is by steamer, and coach daily from Glen Innes Railway Station, 104 miles. It contains a public, and a convent school, Anglican and Roman Catholic churches, and several general stores. South Grafton is the chief shipping centre of a large stretch of agricultural country to the southward, known as the Orara and Don Dorrigo country. A line of railway has been surveyed from SE. to the Dorrigo. The district, though principally agricultural, is also devoted to mining and pastoral pursuits. Geological formation: hilly and mountainous. Population about 1,600. Newspaper: *South Grafton Mercury*.

SOUTH HORNSBY. (*See* HORNSBY.)

SPRING HILL (33° 20′ S. lat., 149° 15′ E. long.), a railway station, with telegraph, post, money-order office and savings' bank, 184 miles W. of Sydney, co. Bathurst, in the police and electoral district of Orange (fares, 36s. 3d. and 24s. 3d.). There is one hotel (the Railway), a public school (average attendance 83), two stores, iron foundry, two places of worship (Wesleyan and Baptist). Geological formation: ironstone. The surrounding district is occupied by farmers, one of whom was the recipient of a first and second Government National prize for the best managed farm. The locality is eminently suited for the growth of every variety of English produce and fruit. Population, 220.

SPRINGWOOD (33° 43′ S. lat., 150° 34′ E. long.), a railway and telegraph station, with post-office, and money-order and Government savings bank facilities, on the G.W. Railway (fares, 8s. and 5s. 2d.), county Cook, and electorate of the Nepean, 47 miles W of Sydney, pleasantly situated on the eastern slope of the table-land, 1,216 feet above sea-level. A favourite resort of visitors to the Blue Mountains, and noted for the mildness of its climate and beauty of the surrounding scenery. Sassafras Gully, Hawkesbury View, 6 miles E. Church of England and Presbyterian services are held weekly, and Roman Catholic every three weeks. There are two hotels, four general stores, Progress Association, a public school (average attendance 60), and English, Roman Catholic and Presbyterian churches. Bee farming is carried on here. Formation: Hawkesbury sandstone, with several caps of Winanamatta shales. There is no permanent water supply.

STANNIFER (29° 57′ S. lat., 151° 21′ E. long.), a post town, 352 miles (425 postal) N. of Sydney and 6 miles N. of Tingha, Inverell electorate, co. Gough. Communication is by coach to Guyra railway station, thence rail to Sydney. It sprang into existence in 1880, and has public hall, two State schools, Roman Catholic church (other denominations visit), and saw-mill. The erection of buildings is extending towards Middle Creek, where there are two hotels, one store and other buildings. It is the centre of a rich tin-mining district. Population 200.

STEWART'S BROOK (32° 3′ S. lat., 151° 12′ E. long.), a post town with money-order office and telephone station in the county of Durham, 229 miles north-east from Sydney. Communication with the capital is by coach to Scone, thirty-five miles; fare, 10s.; thence by rail. There is one hotel, a public school, with an average attendance of 61; a School of Arts and Mechanics' Institute The district, which is almost exclusively devoted to gold-mining, has a population of about 250. Geological formation, slate and diorite.

STOCKTON (32° 53′ S. lat., 151° 50′ E. long.), a post town, with savings bank, money-order and telegraph office, about 1 mile from Newcastle (to which telephone), on the northern side of the harbour, and 101 miles N. of Sydney, county Gloucester, and electorate of Newcastle East. Among the industrial institutions are limekilns, steam saw-mills, and the extensive ship-building yards of Messrs. O'Sullivan & Co. The patent slip connected with these yards is capable of taking up vessels of very large tonnage; the workshops are provided with every appliance for the repair and construction of ships, with powerful shears capable of lifting 30 tons. Extensive foreshore reclamations are being made by the Government; the Northern Breakwater is in process of construction. The Stockton Coal Colliery is in full work, the output for 1899 being 98,173 tons, valued at £32,990; this mine employs about 300 hands. The public school has an average attendance of 400; there is also a Roman Catholic school, Church of England (St. Paul's), Roman Catholic, Congregational, and Primitive Methodist places of worship. Fire brigade has manual and steam engine, reel and 2,500 feet of hose. There is also a Temperance hall, Masonic lodge, a School of Art, and six hotels. The water supply is obtained from Hunter river, stored in three large wells, also tank holding 6,000 gallons. The district is incorporated, and has ratable property of the annual value of £11,560. Population, 2,600.

STRATHFIELD (33° 51′ S. lat., 151° 7′ E. long.), a railway station, with savings bank, money-order office, and telegraph and post-office, situated 7 miles S. of Sydney; fares 8d. and 6d. In the county of Cumberland and police and electoral district of Canterbury. There are two private schools (public school South Strathfield), Episcopalian, Congregational and Wesleyan places of worship, and a large number of private palatial residences; the recreation ground near the station (in the borough of Binwood) is the most extensive institution of its kind in the Colony. The district is incorporated, is lighted with gas, has a permanent water supply, and has 42 miles of roads, with ratable property of the annual value of £36,350. The Great Northern railway branches off from here. Population, 2,850. Newspaper: *Australian Courier*.

STROUD (32° 28′ S. lat., 151° 58 E. long., is situate near the centre of the police district of Port Stephens, a short distance from the Karuah river, 32 miles north from Raymond Terrace, and 152 miles north of Sydney, in the county and electoral district of Gloucester. A special coach runs from Raymond Terrace to Stroud on Tuesdays, Thursdays and Saturdays, returning to meet the W.R.S.N. boats from Clarence. Train to Newcastle. It was formerly the headquarters of the Australian Agricultural Company, to whom a grant of 464,640 acres was made in fee simple in 1826. The sale of portions of this to actual cultivators, and the granting of leases

to them and others of larger areas, has now left but a small portion in the occupation of the Company within many miles of Stroud. It has a public school (average attendance 70), a School of Arts, with a library of 1,860 volumes, money-order and telegraph office, Government savings bank, Episcopal, Roman Catholic, Presbyterian, and Wesleyan churches, Oddfellows (G.U.) lodge, two hotels—Australian Inn and Central, branch of the Bank of Australasia, court of petty sessions, and Crown Lands office. The district, which is noted for its excellence of climate and beauty of scenery, is an agricultural and pastoral one, well watered, with an abundance of the finest timber, employing about 12 saw-mills. In the NW. portion of it is situate what is commonly known as the Copeland gold-field. A magnificent copper lode has lately been discovered near Bullahdelah. Count Strezlecki, forty years ago, said that Stroud would become the Birmingham of Australia. Maize is extensively grown all round the district. Formation: sandstone, coal, and iron. The population of Stroud numbers about 400: district, 4,000 persons.

STUART TOWN (late IRONBARK), (32° 56′ S. lat., 149° 7′ E. long.), a post, telegraph, savings bank, money-order, and mining township, in the police district of Stony Creek, and electoral district of Wellington, on the Kugaberga creek, (228 miles by rail) W. of Sydney. Ironbarks is reached from Sydney by railway, fares 45s., 30s. Hotels: Railway and Carrington. The district abounds in quartz reefs, many of them being profitably worked and capable of further development; there are also some alluvial workings; dredging is done in the Macquarie. There are churches belonging to the Episcopal and Roman Catholic bodies, one public school, average attendance 60, a court-house, police-station, lock-up, and seven stores. It lies 1,730 feet above sea-level. Formation: basalt and slate. Population about 400; of district, about 800.

SUMMERHILL, a rising suburb, about 4 miles SW. of Sydney, with postal, money-order, telegraphic, and savings bank facilities and railway station, in the county of Cumberland, electorate of Ashfield, and police district of Newtown, borough of Ashfield. Railway fares, 5d. and 4d. It has two hotels, a branch of the A.J.S. Bank, one public school, average attendance 550, and several private schools, Episcopalian, Wesleyan, and Congregational churches, several public halls, bedding factory, lead pipe and sheet lead and galvanized iron factory, and a number of large private and business premises.

SUNNY CORNER, a silver-mining township, with postal, money-order, telegraph, and Government savings bank facilities, 124 miles W. of Sydney, county Roxburgh, police district of Bathurst, electorate of Macquarie, the nearest railway station being Piper's Flat, 9 miles distant; coaches run to Rydal (14 miles), thence train; and Bathurst (fare 6s.). Principal hotels are the Royal, Tattersall's, Star, Royal Exchange, and Court House. Public and Roman Catholic schools, former with an average attendance of 220; latter school, average 60. Episcopalian, Roman Catholic, Presbyterian, and Wesleyan places of worship, seven general stores, and a court-house. M.U. Oddfellows (No. 155). Away from the mining centre a few farms for produce are carried on. The town possesses a water supply. The principal mine, the Sunny Corner, has six furnaces, but has been shut down some time. The gold mines working are St. George and Paddy Lackey. Population, about 900, all principally engaged in mining pursuits.

SUTHERLAND (34° 0′ S. lat., 151° 0′ E. long.), a railway station, with postal, telegraphic, money-order and savings bank facilities, in the county of Cumberland, electorate of Woronora, and Metropolitan police district, 15 miles S. of Sydney, fares 1s. 6d. and 11d. It contains a post-office, public school, Anglican and Congregational churches, two hotels, and one or two general stores. The district is well adapted for agricultural pursuits; it is also in a mining centre. Geological formation: carboniferous and sandstone. Population about 300.

SUTTON FOREST (34° 19′ S. lat., 153° 35′ E. long.), a post town, with money-order, savings bank, and telegraph station, about 3½ miles south of Moss Vale railway station (to which coach runs), in the county of Camden, police district of Berrima, electorate of Bowral, 89 miles SSW. of Sydney. It lies on the Medway creek. There are two hotels: Royal and Commercial; three places of worship, belonging to the Anglican, Presbyterian, and Roman Catholic bodies, a public school (average attendance 55), and several gentlemen's residences, including the Governor's country seat. The district is a pastoral one, but cultivation is carried on to a limited extent. Coal and iron abound, but have not yet been worked. Formation: carboniferous with sandstone. Population of the town and neighbourhood is about 400.

SWAMP OAK, a rising mining township, 325 miles N. of Sydney, in the Tamworth district, 3¼ miles from Moonbi Railway Station. There is a post office, three hotels, several stores, public school, and a population of about 500. About 90 leases have been taken out, the average size being 10 acres, and several mines are now engaged crushing gold-bearing quartz.

SYDNEY (33° 51′ 41″ S. lat., and 151° 11′ 40″ E. long.), the capital and seat of government of the Colony of New South Wales, is also the parent city of Australia. It is picturesquely situated on the southern shore of Port Jackson—named after Sir George Jackson, the then Secretary to the Lords of the Admiralty—Sydney itself being named after Viscount Sydney, who first suggested the idea of establishing a Colony in N.S. Wales, and who was Secretary of State for the Colonies when the territory was taken possession of for Great Britain. The outside boundaries of the city include the locality known as Pyamont, Strawberry Hills, Surrey Hills, Elizabeth Bay, and Woolloomooloo Bay. The City was founded on the 26th January, 1788, by Captain A. Phillip, who came here with a fleet of store and transport ships, for the purpose of founding a convict establishment. He had six days previously landed at Botany Bay, but finding it unsuitable for settlement, abandoned it for the site of Sydney. The locality chosen for the future city was a delightful spot at the head of what has since been named Sydney Cove, near a limpid stream of water, which has long since been covered in, but which was then, or soon after, known as the Tank Stream. The city proper is situated at a distance of four miles from the mouth of the harbour. The entrance to Port Jackson from the Pacific Ocean is upwards of a mile in breadth, and is well lighted during the night on its southern cliffs. On the South Head, 1¼ mile from the entrance, in 33° 51′ 30″ S. lat., and 151° 19′ E. long., was the Macquarie lighthouse, 76 feet high, erected on cliffs 268 feet above the sea-level, the light being visible at 25 miles distance. This lighthouse has been superseded by a larger building, from which the electric light now flashes its rays across the ocean. It is one of the most powerful lights in the world, and can be seen at a distance of about 30 miles. On the Inner South Head is the Hornby Tower, painted in vertical stripes of red and white, with a fixed light, that can be seen from a ship's deck at 15 miles. This light shows the entrance to the harbour. Vessels drawing as much as 27 feet can enter at low water, and in many parts can lie close inshore. This last natural advantage has been greatly utilized, and the water is skirted with wharves, stores, and warehouses. On the Western side, where the shores are a little more precipitous, there is also an unbroken line of wharfage, used mainly by the inter-colonial and other large steamers, and by coasters. The harbour is not an uniform expanse of water, but is broken up in all directions into capacious open-mouthed bays by the numerous promontories jutting out into it. Several of these bays are harbours in themselves; and a few of them, principally on the northern side, are the continuation of other harbours or rivers, which are navigable for several miles. The watery indentations that partially encircle the city allow the very heart of it to be easily reached from the water.

The public traffic of the city and suburbs is carried on by a large number of hansom cabs, omnibuses, and trams. The water communication between the city and its transmarine suburbs, Balmain, North Sydney, Manly, Lane Cove, Mosman's Bay, Middle Harbour, Parramatta, Watson's Bay, and other localities, is maintained by numerous steam ferry-boats, which ply at frequent intervals during the day and at night. The steam tramway system is extended to most parts of the suburbs, but Parliament has sanctioned a proposal to change the whole of the present steam tramway system into electric traction; the lines at present in full working order are those from the terminus in Bridge Street to railway station, Redfern; Randwick, Coogee Bay, Crown Street, Surrey Hills, Glebe Point, Forest Lodge, Waverley, Woollahra, Newtown, Marrickville, Botany, Bondi, Leichhardt, Dulwich Hill, and Five Dock, Forest Lodge, and Balmain. A cable tram runs from King Street to Ocean Street, Double Bay and Rose Bay, also one from Milson's Point to the Lane Cove road, North Sydney. An electric tram runs from the North Sydney Reserve to Middle Harbour Spit road, down to Mossman's Bay. The leading hotels are the Australia, Royal, Petty's, Pfahlert's, Exchange, Metropole, Tattersalls, the Oxford, Metropolitan, Grosvenor, Empire, and Roberts'; but the present Licensing Act has been the means of considerably improving the average character of hotel accommodation throughout the whole of the City and suburbs, and the small hovels which once did duty as hotels have entirely disappeared, being replaced with substantially built and roomy buildings.

There are several features of the city of Sydney which bear a striking resemblance to those of an English town. Some of the streets are narrow, tortuous, and without any pretensions to modern architecture. Of late years the older portions of the city have been pulled down to make way for business establishments of modern design and great capacity; while some of the worst tenements in the lower localities, through the efforts of the corporation, are being rapidly swept away. Several of the business premises in Pitt, George, Bridge, Clarence, and York streets, in Wynyard Square, and in the neighbourhood of the Circular Quay, are capacious and elegant, and rank high in order of architectural merit. The principal streets are laid out to the cardinal points of the compass, and intersect each other at right angles. They are designated George, Pitt, York, Clarence, Elizabeth, Castlereagh, Sussex, Market, King, Hunter, and Bridge, the leading one being the first-named, which starts from near the water's edge at Dawes point, and runs through the city into the country, being called George Street West when it passes beyond the railway station. The greatest length of the city is 3⅜ miles north and south, and breadth 2⅜ miles east and west, the total area being about 2,600 acres.

The modern public buildings of Sydney, as well as the hotels, warehouses, banks, and churches, are for the most part handsomely designed and substantially constructed edifices. The city and suburbs abound in sandstone, which is easily quarried, capable of being worked into the most ornate designs at little expense, hardens on exposure to the weather, and is of a substantial nature. The Sydney University, which is built of this stone in the Gothic style of the 15th century, is an elegant building. The dimensions of the great hall are 135 feet long, 45 feet wide, and 73 feet high. The building is on a gentle acclivity, and commands a magnificent view; it has a frontage of nearly 400 feet. The colleges of St. Paul, St. John (R.C.), and St. Andrew are of the Gothic of the 14th century; a large lecture hall has been added, the whole of the University buildings are surrounded by a large park beautifully laid out with gardens and plantations, and to which the public have access. St. Andrew's Cathedral, the foundation of which was first laid

HOTEL METROPOLE,

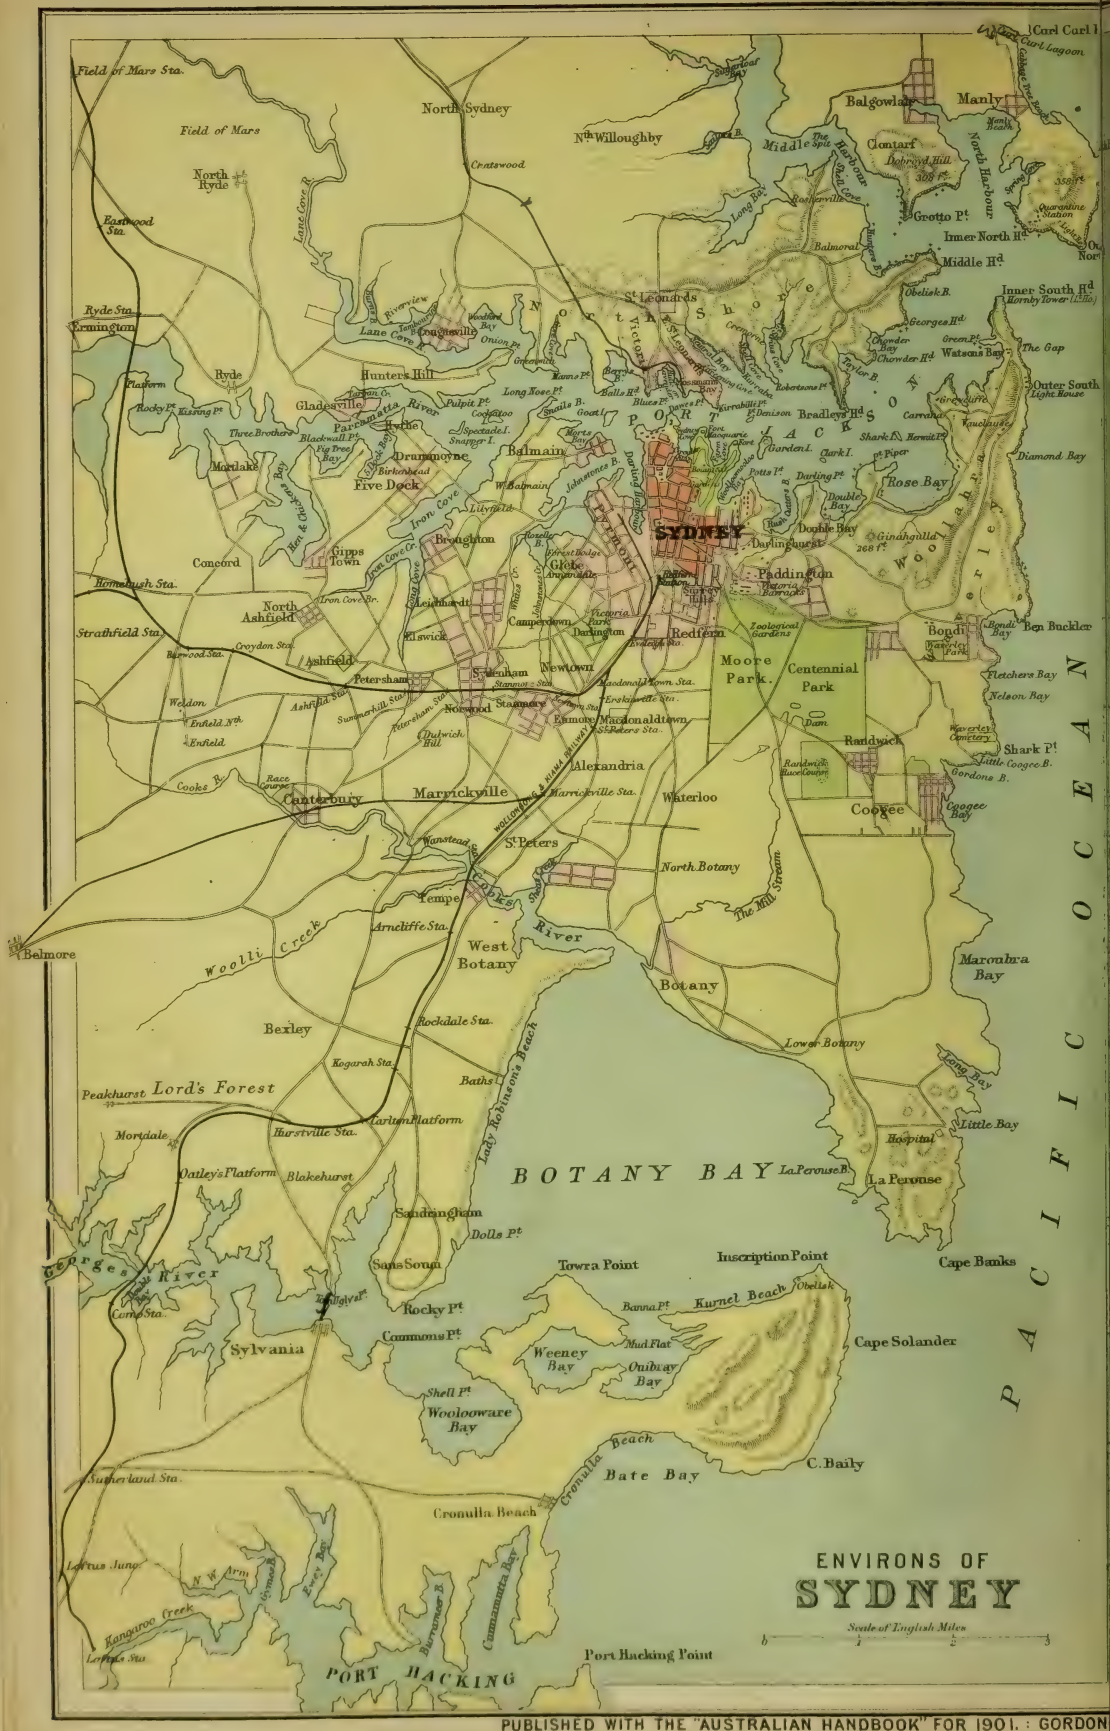
Bent, Phillip, and Young Streets,

SYDNEY, N.S.W.

This magnificent building occupies 400 feet frontage, and was opened at a cost of £155,000. The situation is the highest and best in the city, being opposite the Union and Australian Clubs, and the Tram Terminus, and within two minutes' walk of Government and Parliament Houses, the Domain Gardens, and Circular Quay.

EVERY MODERN CONVENIENCE, ELEVATORS, ELECTRIC LIGHT THROUGHOUT, &c., has been furnished in the hotel.

LARGE PROMENADE ON ROOF WITH FULL VIEW OF THE LOVELY HARBOUR AND DOMAIN.



Visitors have the option of booking apartments with or without board.

INCLUSIVE TARIFF, £3 3s. per week,

Or rooms may be engaged separately from 3s. per day.

Letters and Telegrams addressed to the Manager have prompt attention.

Hotel Metropole, Limited, Proprietors.

COMPANY'S BUILDING, MARTIN PLACE, SYDNEY, N.S.W.

Australasian Department: Z. C. RENNIE, General Manager.

Branch Offices:

SYDNEY—Company's Building, Martin Place.
MELBOURNE—289, Collins Street.
BRISBANE—210, Queen Street.
ADELAIDE—73, King William Street.
PERTH—St. George's Terrace.
HOBART—93, Macquarie Street.

on July 1, 1819, by Governor Macquarie, has been pulled down and re-erected thrice (the last time on May 16th, 1837, by Governor Bourke), and eventually consecrated on November 30, 1868; now it is a very handsome building with two towers, and belongs to the Gothic of the 14th century. Its internal decorations are finished off in the most beautiful style; the front of the building, unfortunately, does not face George Street. A Chapter House adjoins the building. St. Mary's Cathedral (R.C.), after being twice burned, is being completed on a grander scale than ever; when fully completed its length will be 350 feet, width within transepts 118 feet, width of nave and aisles 74 feet, height about 90 feet; the central tower 120 feet high, and two towers with spires at the southern end rise to an altitude of 260 feet. On September 9th, 1900, it was consecrated with great ceremonial. From first to last the great cathedral has cost close on £200,000, and as it stands it is a building of which Sydney may be justly proud, but when completed according to the original plan it will be one of the finest structures of modern times, and a monument to its Australian designer, Mr. W. W. Wardell. Other places of worship are:—St. Patrick's (R.C.), St. George's, St. John's, St. Philip's (one of the oldest in Sydney, though the present structure is not altogether the original building), and St. James' (the old Cathedral Church, opened on January 6th, 1822), which has undergone considerable alterations. Besides these there are about 200 other ecclesiastical buildings throughout the city and suburbs, some of which will compare favourably with the edifices of older countries. The Jewish Synagogue, in Elizabeth Street, which was completed in 1878, belonging to the Byzantine order of architecture, is also an elegant edifice. The new buildings for Government offices—the Colonial Secretary's and Public Works forming one lofty massive building facing Macquarie, Bridge and Phillip Streets, and the Crown Lands Offices occupying the square between Gresham Bridge and Bent Streets—are specimens of the skill of the architect which are rarely surpassed for elegance and comprehensiveness of construction. Government House, which belongs to the Tudor style, is delightfully situated, overlooking Farm Cove, or Man-of-War Bay, and has a splendid view of the harbour down to South Head, the building is surrounded by the Domain and Botanical garden. This building was commenced in 1837, and cost upwards of £25,000. It was occupied for the first time by Governor Gipps in 1845. It was overtopped by "The Garden Palace," where the first International Exhibition of Australia was inaugurated on the 17th of September, 1879, and was unfortunately totally destroyed by fire on the morning of September 22, 1882.

The banks are all imposing buildings, and may be said to belong to the Florentine, Roman, Italian, and Greek orders of architecture; they comprise — the N.S. Wales, Commercial, Australian Joint-Stock, English and Scottish, Australasia, New Zealand, Union, Queensland National, Commercial Bank of Australia, and the City Bank of Sydney. The last-named and the A.J.S. are undoubtedly two of the most handsome buildings in Australia.

All these, as well as the savings bank in Barrack Street, would reflect credit on many of the towns in the mother country. The Exchange buildings near the Circular Quay are also admired for their substance of construction, and are admirably adapted to the shipping business of the port. Among other buildings which attract the attention of visitors are the offices of the Australian Mutual Provident Society, Pitt Street, one of the largest Life Insurance Institutions in the world; the offices of the Mutual Life Association of Australasia, corner of George and Wynyard Streets, the Equitable Life Insurance Company of New York, George Street, the New York Life Insurance Company, Martin Place, the New Naval Home, Church Hill, the *Sydney Morning Herald*, *Daily Telegraph*, *Evening News* and *Australian Star* offices.

The Sydney Morning Herald is the oldest "daily" in New South Wales. Its mechanism, typography and printing places it in these respects on an equality with the chief newspapers in Great Britain. The machinery of the *Herald* is unsurpassed. Another of Messrs. Hoe and Co.'s Double-web, Supplement-perfecting and Inserting Machines has recently been erected, making three of these high-class machines now in use, enabling the printer to run at the rate of 72,000 copies per hour of the ordinary issue of the *Herald*, or 36,000 per hour of Saturday's sixteen-page paper. The Queen's Record Reign Commemoration *Herald* consisted of twenty-four pages. The reduction of the price of the *Herald* to one penny has increased its circulation beyond expectation. The *Sydney Mail* is a high-class illustrated newspaper, published weekly. It deals with subjects relating to Agriculture, Pastoral Pursuits, Horticulture, Mining, and Commercial matters; Shipping, Social Functions, Household and Domestic Affairs, and Sporting in all its branches. Its illustrations are under the direction of a highly accomplished English artist; and generally the work of the *Sydney Mail* in Australia is similar to that performed for the English public by the *Illustrated London News* and the *Graphic*.

The offices where the *Evening News* and the *Town and Country Journal* are issued, in Market Street (between Pitt and George Streets), cover a large area of ground, the buildings being replete with the very latest machinery, comprising seven Foster's Rotary Printing Presses, capable of turning out 70,000 eight-page papers per hour, Linotype setting machines, a splendid electro-typing plant and photo-nature department, and complete one of the best equipped newspaper printing offices in the Southern hemisphere; the business is carried on by Messrs. Frank and Christopher Bennett for the trustees of the late Samuel Bennett. The buildings of the *Sydney Bulletin* in George Street are substantial and well designed. The *Daily Telegraph* has handsome buildings in King Street, splendidly fitted up, and replete with all the latest improvements in machinery necessary for the production of its large circulation, including the Linotype type-setting machine, the first of its kind introduced into any newspaper office in Australia. The plant consists of two of Hoe's patent three-roll machines and two of Foster's well-known Web machines, the four being capable of turning out 76,000 eight-page papers per hour. The *Daily Telegraph* ranges from eight to sixteen pages daily. A photo-etching department has also been established. The enterprise of the proprietary is shown in their erection of new premises in Kent Street fitted with a duplicate plant in case of fire or other emergency. The Australian *Star* has also splendid offices in Castlereagh Street, and the paper is fairly established on the road to prosperity. There are also the magnificent warehouses occupied by Messrs. Robert Reid & Co., Lark, Sons & Co., Henry Bull & Co., Lassetter & Co., Walter Friend & Co., Farmer and Co., John Keep and Son, E. Vickery, S. Hoffnung and Co., Collins, Sons and Co., Gardiner and Co., Elliott Brothers, Sargood, Ewen & Co., Cowan and Co., W. and A. MacArthur, David Jones and Co., Nicholson and Co., Paling & Co., Feldheim, Gotthelf and Co., Anthony Hordern & Sons, and an immense number of premises of other merchants and warehousemen in and around York Street, Wynyard Square, Pitt Street, and the Circular Quay, which indicate the large business that is now carried on by importers and manufacturers in New South Wales. The wool warehouses of Messrs. Harrison, Jones and Devlin, Goldsbrough, Mort and Co., Hill, Clark and Co., Winchcombe, Carson and Co., J. H. Geddes and Co., John Bridge and Co., Dalgetty and Co., are among the most substantial and elegant buildings in the city, and replete with every convenience for carrying on the business in connection with the great staple product of the country. Hinchcliffe and Tate, the New Zealand Mortgage, Loan and Agency Company have also spacious wool stores at the Circular Quay Messrs. Goldsbrough, Mort and Co., John Bridge and Co., and Winchcombe, Carson and Co. have immense stores at Darling Harbour to meet the growing requirements of the wool trade. Messrs. Dixson and Sons have a large and substantially-built new factory in Elizabeth and Park Streets, and carry on a tobacco business to an extent unequalled in the Australian colonies. The Post Office is of the Venetian and Florentine Italian order, and is one of the most imposing buildings in the Southern hemisphere, colonnaded on two sides, with a frontage of 353 feet. It is built of Pyrmont stone, the colonnade being formed of pillars of polished grey granite. It was opened in September, 1874; the building extends through from George to Pitt Street, in the most central part of the city. The tower, also built of stone, reaches an altitude of 250 feet, and the clock is 15 feet 8 inches in the clear in diameter, with a splendid peal of bells for chiming, the hour bell weighing 5 tons; the total cost of the building being estimated at £400,000. A handsomely designed street about 100 feet wide faces the whole length of the building from George to Pitt Streets, lighted by electricity, and is continued through to Castlereagh Street. The Town Hall is of great size, with a tower 156 feet high, and a clock which chimes each quarter of an hour, and is an architectural ornament to the city; the hall is one of the largest in the world, its length being 166½ feet, width 85 feet, height 65 feet, representing a superficial area of 14,110 feet, thus exceeding in size the Preston Town Hall, Glasgow Public Hall, Liverpool Philarmonic Hall, Manchester Free Trade Hall, Exeter Hall (London), St. James's Hall (London), Freemasons' Hall (London), House of Lords, and other public buildings. On each side of the great hall are corridors 9 feet wide, terminating in an open colonnade at one end, and joining the present corridors at the other. The open colonnades are 60 feet long and 9 feet wide, and constitute an agreeable promenade. They are connected with the rear of the building by iron balconies, giving access to lavatories and other conveniences, so situated as to prevent effluvia from them entering the building. From the corridors, the colonnades, and the vestibule the great hall is entered by thirteen doorways, opening outwards. At the western end is a covered recess, 85 feet by 26 feet, for the organ, which is the largest and most powerful instrument in the world, costing about £13,000; at the opposite end of the hall is a fine gallery capable of seating between 300 and 400 persons. The building will accommodate 5,000 persons. It is called the Centennial Hall, to commemorate the commencement of Australasian colonization at Sydney in 1787. It occupies the site that was formerly the old burial place, when the brilliant future of Sydney was undreamt of. The last remains of the occupants of this interment ground were transferred to the Necropolis at Rookwood. The Museum, on the eastern side of the city, overlooking Hyde Park, is a fine structure, with a bold Grecian front, and is extensively patronized, some 120,000 persons visiting it annually. It is open to the public on Sunday afternoons. The Treasury is a very good building, of the usual freestone. Then there is the Prince Alfred Hospital, the Sydney Hospital, Protestant Hall, Parliament Houses, new Masonic Hall, the Mint, Royal Hotel, Grosvenor Hotel, Pettys' Hotel, Central Coffee Palace, Australia Hotel, Australian Club, Hotel Metropole, Union Club, Tattersall's Club and others, while one of the sights of the city is the "Marble Bar," at Geo. Adam's Tattersall's Hotel, which cost upwards of £30,000. The various Insurance Companies and Building Societies and other financial institutions, have substantial buildings in various parts of the city, and the old dilapidated corner public-houses are now a thing of the past. The Royal and Sydney arcades are now much frequented, they are well lighted, lined with handsome shops, and have considerable architectural

merit; there are two arcades of smaller dimensions in George Street West, an extensive one running from Castlereagh to Elizabeth Streets, a most elaborate arcade (the Imperial) running through from Pitt to Castlereagh Streets, and "The Strand" running from George to Pitt Streets. Turning to the private residences, principally in the suburbs, many of them have been erected at enormous expense, and are surrounded with pleasure grounds and gardens, which, with the natural beauty of the scenery, lend them a peculiar charm, most of the handsomest mansions being in the neighbourhood of Darling Point, Potts Point, Woollahra, North Sydney, and Glebe.

The streets are lighted with gas, at a cost of about £14,200 per annum to the corporation, and the electric light is availed of to a great extent by business people.

In 1831 a market building in four sections was erected by Governor Bourke, and was handed over to the Sydney Corporation in 1846, and in 1859 the four sections were all joined in one by the construction of a central roof. In 1891 the old buildings were taken down, and the foundation stone of the present palatial markets was laid in 1891.

The ground measurements of the new markets opened on the 21st July, 1898, are 610 feet 10½ inches to George and York Streets: Druitt Street 80 feet, and Market Street 98 feet 2 inches. The estimated land value of the site is £447,770, and the building cost £252,230, total value, £700,000. The basement is 600 feet long and nearly 100 feet wide. On the ground floor there are 53 shops, 14 feet by 15 feet 6 inches, up to 38 by 36 feet. At the north end there is a grand coffee palace or hotel, with 57 bedrooms, with dining and drawing room conveniences, and other modern appointments. There is also a concert hall, to hold 450 or 500 people, besides 31 more rooms, and a photographic gallery. The central cupola is 62 feet in diameter, in which there is an iron spiral staircase to the top, 190 feet from the pavement.

It is a magnificent pile of buildings, and the markets, town hall and the cathedral of the Church of England form a trinity of buildings unrivalled on this side of the line.

There are also the Belmore markets, a splendid building erected at a cost of over £30,000, used principally for the sale of vegetables, fruit, and market-garden produce. The theatres are the Theatre Royal, Lyceum, Tivoli, Criterion, Her Majesty's, and the Palace Theatre; and notwithstanding the distance from the great centres of high civilization, Sydney is well supported with theatrical stars of all kinds. Besides the theatres, the new Masonic Hall, Protestant Hall, Temperance Hall, Tattersall's Hall, Young Men's Christian Association Hall, the Old Exhibition building, Victoria Hall, Centenary Hall, Carrington Hall, and others, are used as places of public entertainment.

Although Sydney has few reserves answering to the shrubberied squares of most of the large cities of Great Britain, it has excellent park lands and gardens within its boundaries, easily accessible to the citizens. Hyde Park is a beautiful plateau of forty acres, nearly in the centre of the city, with a statue to "Albert the Good," directly opposite which in Hyde Park Square is one to Her Majesty Queen Victoria, another to Captain Cook, and one recently erected to the Right Hon. W. B. Dalley. A considerable amount of money is yearly expended towards beautifying and improving this park, which in the early days of Sydney was used for the racecourse. All unsightly fences have been removed, and the intersection of walks converted into beautiful shrubberies and flower beds with a magnificent ornamental pond enclosure at the southern end. Several fountains are continually at work, and bands of music perform in the park on special afternoons during the week. The Domain, a charming expanse of park land of 138 acres, is on the north-eastern side of Sydney, surrounding the pretty inlet called Farm Cove. Near the main entrance is an excellent bronze statue of Sir Richard Bourke, by Edward Hodges Baily, R.A., and a beautiful statue of Governor Phillip. The Botanical Gardens embrace 38 acres, and are considered as among the finest in the colonies; as in addition to the immense collection of exotics from every clime, the locality is one of great beauty, the grounds encircling the waters of Farm Cove, where the men-of-war belonging to the Australian station are anchored. Added to this is a most beautifully laid out area on the site of the Garden Palace. Other reserves are Prince Alfred Park, 18 acres, Belmore Park in the south, 10 acres, Callan Park, near Balmain, where the new lunatic asylum has been erected, a tract of 600 acres on the south-east side of the city named Moore Park, Wentworth Park, laid out on a site formerly known as Blackwattle Swamp, and the National Park at Port Hacking. The latest proclaimed park, the "Centennial," is an area of 768 acres, formerly used as the water reserve, situated between Moore Park, Waverley, and Randwick. This is to form a monument to celebrate the colony's centenary, and was secured to the people by the foresight of Australia's great statesman, the late Sir Henry Parkes, and a considerable amount of money has been spent in laying it out in drives, walks, ornamental lakes, pleasure grounds of various descriptions. Its central position and natural advantages give every facility for making this one of the most extensive and beautiful parks in the world. Adjoining Moore Park is the Metropolitan racecourse (Randwick), which has an area of about 202 acres. The course is about 1¼ mile in circumference, and is now reached by tramcar, and considered one of the best running grounds in the southern hemisphere. Kensington Course also adjoins this, but is used only for pony racing. In addition to the above reserves there are others of a less extensive area in different parts of the suburbs.

The Circular Quay, at the head of Sydney Cove, has a length of 1,300 feet, available for the largest vessels. It is provided with piers and pavilions for the ferry steamers. The Government have expended a large sum of money in extending the wharfage accommodation, and erecting goods sheds, which add much to the convenience of shipping and improve the appearance of the Quay. The fine vessels of the Orient Line, reputed for the rapidity of their voyages to Europe, and Messageries Maritimes boats now discharge at the Circular Quay, and the mail steamers of the P. and O. Company berth at the wharf, also those of the German line, the Canadian-Australian line, and the China and Japanese lines. Woolloomooloo Wharf, to the east, is 3,000 feet long, and was constructed at a cost of £26,000, a large tract of valuable land being reclaimed; the American mailboats and other large steamers discharge here, and the wharf is largely used by small coasting vessels for the discharging of coal, timber, &c.

The eastern side of Darling Harbour has its frontage entirely occupied with wharves and quays. Here several steam companies, Howard Smith's, A. U. S. N., North Coast Company, Tasmanian, New Zealand, Dalgetty's, the Hunter river, the Illawarra, Huddart, Parker, and others, have their stations, and the gas company its large works. The Grafton Wharf is one of the completest and best appointed in Sydney; with its building it occupies an area of 3¼ acres. There is a wharf frontage of 800 feet, with three piers, extensive sheds, and ten five-storey warehouses. On the north, from Miller's Point to Dawes' Point (which includes all one end of the city), and thence round the largest headland of the port, the waterside is also fully taken up by commercial premises, with the exception of the site at Dawes' Point, on which there is a battery.

The Fitzroy Dry Dock at Cockatoo Island, some few miles to the west of the city, is a Government establishment, originally intended for the repair and overhauling of vessels of the Royal Navy—length, 450 feet; width on floor, 35 feet; width between coping, 86 feet; width at entrance, 59 feet; depth of water over sill, 21 feet. The establishment is well provided with the largest, most powerful, and recently improved kinds of machinery. A much larger graving dock, called the Sutherland dock, has been constructed by the Government, and situated at Cockatoo Island, excavated almost entirely out of sandstone rock. The length is 630 feet, and the width 108 feet. The depth of water over the sill is 32 feet at neap and 30½ feet at spring tides. The width of entrance 84 feet. It is said to be the largest single graving dock constructed, and that it is capable of receiving the largest vessel afloat. Other great dock works are those of Messrs. Mort and Co., at Waterview Bay, which is 410 feet long (and is now being lengthened), with an entrance 66 feet wide, and a depth of water over the sill of 19 ft. It is fitted with patent keel blocks—length of blocks, 390 feet; is partly cut out of the rock, and partly built up very compactly with stone masonry. This dock is capable of taking in vessels of very large tonnage; but a second is to be built at the site of the Atlas Works, so as to take in vessels of 12,000 tons, now trading to Sydney. The workshops of the former cover an area of 5 acres, with a bay frontage of 1,500 feet, employing when in full work 700 hands. A substantial patent slip is also here available for vessels of 1,000 tons; the length of carriage is 200 feet. The company undertake forgings up to 7 tons, and castings up to 14 tons. Some very extensive and important wharfage improvements are completed on the site of the old Australian Steam Navigation Company's Works, Darling Harbour. They represent altogether an expenditure of about three-quarters of a million of British and Australian capital, and have been purchased by the Government. Between 10 and 15 powerful stationary and travelling hydraulic cranes are provided to load or unload trucks for the railway. Machinery for freezing and electric lighting is also provided, and cold storage space of several thousand tons capacity is provided, besides space for grain, wool, &c. The two stores, each of eight stories, give an available floor space of about 400,000 ft. The wharfage space is 2,154 ft. The entire enterprise represents an investment mainly for the purpose of facilitating the shipment of food and wool, and other produce, to the European market, and in this respect is of great public importance. The Railway Commissioners have also erected here an immense goods shed capable of stowing ten thousand bales wool. Other docks are Goodall's, Rountree's, the Atlas, Jubilee and Drake's, situated in the neighbourhood of Balmain.

The city has been placed in a state of defence, and batteries carrying Armstrong guns of large calibre now protect it, from North and South Head, in a great measure from attacks from a hostile fleet. The conformation of the shores affords the best facilities for the erection of fortifications, and seawards there is nothing to prevent the city being made practically impregnable. A military road now connects all the forts on the northern side of the harbour, and at present it would be a difficult matter for any ship to run the gauntlet of the numerous guns that could be brought to bear upon it even before entering the Heads, while every elevated position inside the harbour is fully mounted. Among the large guns are two 10in. 25-ton guns firing charges of powder of 180lb. (nearly two barrels), giving to a projectile of 400lb. weight a muzzle velocity of about 1,900ft. a second, and a power capable of perforating 18in. of solid iron armour. These guns are mounted *en barbette* behind earthen parapets, in such a manner that they have a very large angle of lateral training, and can thus cover a large area with their fire. The gunners and the loading gear are completely protected. Forts are also constructed at Newcastle, Botany Heads, Wollongong, and other points along the coast.

A torpedo corps has been established, and an electric light

apparatus placed at the South Head, which will throw a light a radius of 30 miles.

The trade of Sydney is considerable, and gives employment to a large fleet of steamers. It is the head-quarters of the Pacific mail steamers, the E. and A. steamers, the P. and O. steamers, the vessels of the Orient, and Messageries Maritimes lines, and others; besides there are always four or five men-of-war anchored in the harbour.

The water supply of the city is obtained from the Nepean at Prospect. The number of houses in the city is estimated at 22,877. In 1899 the annual assessed value of ratable property was £2,026,010 at 1s. 4d. in the £; capital value £43,123,600; estimated extent of roads and streets, 115 miles. All the main streets are paved with wooden blocks, and the system is being rapidly extended to the minor streets, the area already laid being 81 acres 1 rod 7 perches, a length of 14 miles 4 chains, exclusive of the Circular Quay, which was paved by Government. The revenue of the City Council for 1899 amounted to £188,550. The public vehicles are under the control of the Metropolitan Transit Commissioners.

The charitable institutions of the capital are numerous, and are partly supported at the expense of Government, aided by private benevolence. Some of the leading institutions are: the Sydney Hospital, a magnificent new building in Macquarie Street, covering an area of about three acres, opened officially on August 10th, 1894; the Prince Alfred Memorial Hospital, opened on Sept. 25, 1882; the Good Samaritan Institution; Sydney Female Refuge, Children's Hospital at Glebe; the Shaftesbury Reformatory, South Head; Gladesville Asylum, Callan Park Asylum, Deaf, Dumb, and Blind Institute, Newtown; City Night Refuge, Kent Street; St. Vincent Hospital at Darlinghurst; Benevolent Asylum at George Street South, Children's Asylum at Randwick, and other minor public and private institutions for the relief of the aged destitute and suffering.

The suburbs of Sydney comprise Balmain, on the opposite side of Darling Harbour; the Glebe, adjoining the city, on the south-west: Newtown, Redfern, Marrickville, Waterloo, all to the south; Paddington, Randwick, Waverley and Woollahra, on the east; Concord, on the south-west; North Sydney, Mosman's Bay, and Manly on the north shore of the harbour, and there are other places within a radius of 10 miles, and usually considered as suburban to the metropolis; these are Alexandria, Annandale, Ashfield, Botany, Burwood, Camperdown, Canterbury, Darlington, Enfield, Five Dock, Gladesville, Home Bush, Hunter's Hill, Macdonald Town, Kogorah, Hurstville, Leichhardt, Marrickville, North Willoughby, Petersham, Ryde, and Watson's Bay. Favourite sites for pleasure resort are Chowder Bay, Balmoral, Pearl Bay, Clontarf, Coogee, Botany, Bondi, Double Bay, Watson's Bay, Manly Beach, Mosman's Bay, Randwick, La Perouse, Middle Harbour, South Head, Long Bay, Lane Cove, Sydney Cricket ground, Moore Park, Centennial Park, Botanic Gardens, Fern Bay, Agricultural Society's Grounds, Zoological Gardens, Sandringham, Sans Souci, &c., and the various stations along the Illawarra and Northern Railway lines.

Sydney is the seat of an Anglican Archbishop and a Roman Catholic Cardinal. The city is under municipal government, being divided into eight wards, named respectively Bourke, Brisbane, Cook, Denison, Fitzroy, Gipps, Macquarie, and Phillip, which return three aldermen each. It has a fine School of Art, in Pitt Street, with a library of about 70,000 volumes, and a commodious lecture hall attached. The free public library in Bent Street, is largely patronized, and open on Sundays. To this library is attached a lending branch, of which a large number avail themselves. There are at present about 100,000 volumes in the institution. The Art Gallery, situated in the outer Domain, overlooking Woolloomooloo Bay, is a substantial building, well-stocked with valuable exhibits of various descriptions; this building is also open on Sundays.

Numerous factories are in full work; also several large steam joinery establishments. The coach factories are extensive, and splendid cloths are turned out at Vicar's Tweed Mill. There are also several large foundries and engineering works, including Mort's Dock and Engineering works, and others in which large castings and every description of mechanical appliances are turned out, even up to locomotive engines for the Government railways, and others of smaller dimensions. On the north side of the harbour, coal has been struck at a depth of 3,000 feet, and a company formed with a capital of £240,000 to work the seam.

The Sydney Harbour Colliery, Ltd.:

The company's works are situated on the western shore of Balmain, 580 feet to Long Cove, opposite Sutherland and Fitzroy Dry Docks and Government works at Cockatoo Island. The company was formed, £240,000, in England to work the coal underlying the waters of Port Jackson, the area of the royalty being about 10,000 acres, and the estimated quantity of coal available for working is about 113,000,000 tons. The bore proved the Bulli seam at a depth of 2,927 feet, or about 2,880 feet below sea level, the thickness of the coal being 10 feet 3 inches, of which 9 feet 2 inches is good clean spent and bituminous coal, the analysis of the core showing it to be an excellent steam and generally useful coal. The Bentley downcast shaft is down 360 feet in solid rock and is bricked for 132 feet, and in 1900 it is expected that the coal will be raised and placed in the vessels at the works at the mine's mouth.

Stock returns (area 260,000 acres): 16,357 horses, 15,881 cattle, 9,383 sheep.

The geological formation of Sydney is sandstone, overlying part of an immense carboniferous deposit, extending from beyond Newcastle to Jervis Bay.

The population of the city proper by the census of 1891 was 111,980; of the suburbs, 268,060, a total of 380,040. The approximate population on 1st February, 1900, was, City proper, 98,750, suburbs, 339,550. Sydney is divided into 11 electoral divisions. They are Belmore, Bligh, Lang, Cook, Denison, Fitzroy, Flinders, Gipps, King, Phillip, and Pyrmont. Each electorate returns one member to Parliament.

Newspapers: Morning daily: *The Sydney Morning Herald, the Sydney Daily Telegraph*, and the *Daily Guide*. Evening dailies: *The Evening News*, and *Australian Star*. Weeklies: *The Sydney Mail, Town and Country Journal, Freeman's Journal, Stock and Station Journal, Churchman, Australian Record, Referee, The Arrow, Australian Hebrew, Chinese Herald, Deutsche Post, Courier Australienne, Jewish Herald, Catholic Press, Meat Trades Journal, Methodist, Sun, Weekly Budget, Wheelman, Wool and Produce Journal, Christian World, Builders' and Contractors' News, Presbyterian, War Cry, Sunday Times, Truth, Mining Standard, The Bulletin, Workman, Government Gazette* (bi-weekly), *Australian Home Journal, Australian Independent, Chemist and Druggist, Scribner's Magazine, Home and Farm, Law Chronicle, Liberty, Our Boys and Girls, Railway Budget, Young Australia*. Monthlies: *Rural Australian, Australian Journal, Medical Gazette, Field, Australian Agriculturist, Dawn, Licensed Victuallers' Gazette, Colonial Military Gazette, Australian Temperance World, Photographic Journal, Pastoralists' Review*.

TABULAM (28° 50′ S. lat., 152° 30′ E. long.), distant 40 miles W. from Casino, electorate of the Richmond, on the Clarence river, at the crossing place from Lawrence to Tenterfield, is a small postal, money-order, savings bank, and telegraph township, with one hotel, and a Government punt. It is in the county of Drake, electoral and police district of Richmond river. The means of reaching Sydney (530 miles S.) is by coach to Lawrence, thence by the Grafton steamer, or *viâ* the Tenterfield railway station, distant 50 miles. Mining and pastoral (principally cattle stations) district. Formation: granite and trap. Population about 100.

TAMBAROORA (33° 1′ S. lat., 149° 30′ E. long.), a mining township with postal and money-order office on the Tambaroora creek, 168 miles (206 postal) NW. of Sydney, 25 miles W. from Sofala, in the electorate of Wellington. Bathurst is about 60 miles distant south by coach and 40 by bridle track. Hotels: Dagger's and Smith's. The district is very hilly, and is principally taken up for gold mining, the workings being both alluvial and quartz. The country is clay slate, with quartz veins, and including Hill End, has been one of the richest gold-reefing districts in Australia; but though enormous quantities of gold have been obtained, the early promise of the locality has not been fulfilled. The town itself is situated on a rugged tableland, through which the watercourses have cut deep channels. Hill End is about 3 miles distant, and with vicinity had in its palmy days a population of about 4,500 souls. It lies at the summit of the famous Hawkins Hill, on undulating land stretching northwards towards Tambaroora. Places of worship, Episcopal, Wesleyan, and Roman Catholic. Public school, average attendance 49. There are several gold mines in the immediate vicinity. Population, 260.

TAMBAR SPRINGS (31° 19′ S. lat., 150° 1′ E. long.), a post town, with money-order office, telephone exchange, 42 miles SW. of Gunnedah, 336 miles N. of Sydney, situated on the slopes of the Tambar Range, in the electorate of Gunnedah, co. Pottinger. It derives its name from the many springs in the vicinity. Mail communication three times a week from Gunnedah, 42 miles distant. Coach fare, 25s. Has hotel and public school, average attendance 20. Pastoral district.

TAMWORTH (31° 4′ S. lat., 150° 57′ E. long., 282 miles N. of Sydney, and 163 miles from Maitland) is a railway township on the Peel and Cockburn rivers and Goonoo Goonoo creek, in the county of Inglis, and the railway branch line runs from Tamworth to Altunga and to Manilla, 30 miles, thence daily coach to Warialda. The Peel river divides it in the centre, and is spanned by a handsome iron bridge. There are two stations, one on the Peel River Company's side, a mile from town (Tamworth West), the other in the town proper; fares from Newcastle, 183 miles, 36s. 3d. and 24s. 3d.; or direct from Sydney 48s. 3d. and 32s. Coaches run to Nundle, and Gunnedah. The principal hotels are the Royal, Imperial, Caledonian, Norfolk, Criterion, Post Office, and Great Northern; there are also about a dozen others. The town is situated on low ground, surrounded by a range of undulating mountains, in the midst of a fine pastoral, agricultural, and mining district, and is gradually growing into importance as these interests become developed. The principal goldfields in the neighbourhood are at Spring Creek (15 miles), Swamp Oak (30 miles), Bowling Alley Point (28 miles), Nundle (37), Hanging Rock (40), near Barraba (60), and at Bingera (110 miles north). Near the latter place diamonds in large quantities have been obtained. The town of Tamworth has been incorporated since March 17, 1876; it has 23¼ miles of streets (most of which are planted with ornamental and foliage trees, while the reserves and other public grounds are being greatly improved), and ratable property of the annual value of £37,010; well-built stores; branches of the Commercial, Joint-Stock, Australasian, and N.S. Wales Banks; also local offices, for the leading insurance companies. In the municipal chamber is established a free public library, with about 1,300 vols. There are three steam flour-mills, several steam saw-mills, galvanized iron manufactory, fine extensive coach and buggy factories, a boot and rubber stamp factory, one brewery, a fine malting establishment, a substantial court-house, also gaol, lock-up, and police barracks, hospital, mechanics' institute, with 1,200 vols., Oddfellows' hall, Council chambers, Temperance hall, a fine pleasure garden and casino. An excellent

recreation ground (the oval), and of cyclists, cricketers, footballers, lawn-tennis players, &c., two public schools, each being splendid buildings, with commodious teachers' residence detached, average attendance, 600; a Roman Catholic school (presided over by the Dominican Nuns), who have a Convent, 3 stories high, containing 40 rooms, which is the handsomest building north of Maitland, also several private schools. There are two churches, belonging to the Anglican community (St. Paul's and St. John's), also Wesleyan, Baptist and Presbyterian chapels, and a very handsome cathedral belonging to the Catholic body; the Salvation Army has also erected a very fine brick barracks. It has a post and telegraph, money-order office, and a branch of the Government savings bank, a magnificent building, with a four-dial clock, striking the hours, and self-illuminating at night, clock-tower, and every telegraphic and postal convenience. There is an "Agricultural and Pastoral Association" and a Fire Brigade with fire engine, reel and 1,050 feet hose. The M.U.I.O.O.F. has a lodge of over 200 members. The Foresters' Court, Royal Oak, has some 160 members. There is a Masonic Lodge called the Peel, with a membership roll of over 60, also a flourishing branch of the H.C. Guild, and a volunteer corps of infantry, with a roll of about 100 men. A Gas Company, with a capital of £8,000, has been in existence several years, and is now paying a dividend of 10 per cent. per annum. The Municipal Council has abandoned gas and now illuminates the streets with electric lights, Tamworth being the first Australian town lighted with electricity; the scheme is now working splendidly. About 20,000 acres of land are under tillage, the products being wheat, maize, barley, potatoes, tobacco, wine, and oats. Stock returns 1899: 25,355 horses, 69,970 cattle, 2,321,081 sheep, area 3,994,126 acres. A large area of land in the vicinity of Tamworth is held by the Peel River Land and Mineral Company. Tamworth, which is situated in the electorate of the same name, is the most important town in the Northern District. Geological formation: Upper Devonian or Lower carboniferous, granite, basalt, &c. The town is supplied with water from Moor Creek, 12 miles distant, The town population numbers over 5,740 persons. Papers: the *Tamworth News* and *Tamworth Observer*.

TARAGO (35° 2′ S. lat., 149° 39′ E. long.), a railway township on Mulwarrie Creek, with postal, money-order, savings bank, and telegraphic facilities, in the police district of Braidwood, county of Argyle, electorate of Braidwood, 157 miles S. of Sydney, fares, 31s. 3d. and 20s. 9d. Buildings: public school, Anglican church, police barracks, and two hotels. Coach to Braidwood twice daily. Lake Bathurst is in the district. Principal pursuits, agricultural and pastoral. Geological formation: hilly. Population, 200.

TARALGA (34° 17′ S. lat., 150° 51′ E. long.), a township, in the county and electoral district of Argyle and police district of Goulburn, on the Corroboree creek, 30 miles NE. of Goulburn, the nearest railway station, distant 30 miles, and 164 miles SW. of Sydney, with telegraph and money-order and Government savings bank facilities. Hotels: Royal, Richland, Argyle, and Commercial. It has a post, money-order, savings bank, and telegraph office, a Court of Petty Sessions, School of Arts, and numerous small stores. Places of worship: Episcopal, Roman Catholic, Presbyterian, Wesleyan. Bank: New South Wales. Schools: public (average attendance, 40), and Roman Catholic, taught by the nuns. The district is both agricultural and pastoral, but on the north-west the country is of a very auriferous nature, bearing strong indications of mineral deposits. Twelve miles distant are the Wombeyan limestone caves, one of the sights of the colony. Population about, 450; of district, 1,750.

TARANA (33° 30′ S. lat., 149° 50′ E. long.), a railway station, with post, telegraph, and money-order office, on the Western line, 120 miles from Sydney (fares, 23s. 9d. and 15s. 9d.); county Roxburgh, police district of Rydal, and electorate of Macquarie. There is one hotel (the Railway), Episcopalian and Wesleyan churches, one store, and a private boarding establishment. Coaches run to Oberon and the celebrated Jenolan Caves, which is the resort of a great number of holiday-seekers. Geological formation: granite. The place is private property. Population about 70.

TARCUTTA (35° 14′ S. lat., 147° 47′ E. long.), a money-order, telegraph, telephone to Humula, savings bank, and postal township, on the Tarcutta creek, 30 miles east of Wagga-Wagga, and 288 miles (324 postal) SW. of Sydney. It is in the county of Wynyard, electoral district of Tumut, and police district of Wagga-Wagga, with postal, telegraphic, money-order, and savings bank facilities. A coach runs to Wagga-Wagga, Germanton, and Gundagai, and a horse mail thrice a week to Humula. Wagga-Wagga is the nearest railway station, distant 26 miles. There are two stores, one hotel, assembly hall, and police barracks. Public school, average attendance 45, and a Union church. The district is principally taken up for pastoral purposes. Tobacco is grown in some parts. Population about 250.

TAREE (31° 54′ S. lat., 152° 33′ E. long.), county of Macquarie, is the chief postal township in the police district of the Manning river and electorate of The Manning, with a money-order, Government savings bank, and telegraph office. Mail coach runs from Hexham, on Northern Railway line, to Taree, distant 116 miles, and from Taree to Camden Haven, Port Macquarie, and Kempsey six times a week. Communication with Sydney is by steamer twice a week, and by sailing vessels, distance 170 miles; or by coach to Hexham – fare, 42s. 6d., thence rail and steamer. Hotels: the Windsor Castle, Commercial, Royal, and the Steam Packet. It is situated on the north bank of the Manning river, about 20 miles from the junction with the sea, and 4 miles from the junction of the Dawson with the Manning, and is the stopping place of the ocean-going steamers; the "Brothers," three high mountains (named by Captain Cook) near the sea-coast, bearing north-east, and Mount Talawak, bearing south-west. The district is agricultural, dairying, gold-mining and pastoral, principally the two first-named; the soil on the banks of the river is rich, deep and fertile. There is a large butter factory on Mitchell's Island, owned by the Lower Manning Dairy Company, and another large one owned by the Australian Dairying Company at Purfleet, opposite Taree, besides a large number of creameries and private hand-separators all over the district. The town contains branches of the N.S. Wales and Commercial Banks, a superior public school, with average attendance of 180 scholars, two cordial factories, a court-house, gaol. Land office, Protestant hall, Agricultural hall and grounds, a School of Arts, one of the finest hospitals in the colony, Masonic and Oddfellows' halls, Orange, Rechabites, and Good Templars' lodges, and it is the headquarters of the police magistrate, district coroner, road superintendent, and forester. The places of worship, which are brick buildings, comprise Episcopal, Roman Catholic, Presbyterian and Wesleyan churches, the latter being a very fine building, with a substantial two-story brick parsonage; a service is also held every third week by the Presbyterian Church of Eastern Australia, and occasionally by the Church of Christ; the Salvation Army have also a branch here. Fire brigade has fire-engine and 300 ft. hose. Water supply from Manning river and tanks. The main road from Maitland to Port Macquarie passes through Taree. Quarter Sessions and District Courts are held twice a year. A Court of Petty Sessions is held when necessary at Taree, at Wingham and Cundletown every three weeks, and at Coopernook, Tinonee, Forster and Camden Haven once a month. Good roads radiate from Taree to Tinonee (3 miles), Wingham (8 miles), Cundletown (4 miles), Coopernook (14 miles), and Forster (24 miles). The township is incorporated, and has ratable property of the annual value of £4,660. Population 800. Area under cultivation 24,000 acres, producing wheat, maize, barley, oats, potatoes, millet, lucerne, wine, tobacco, oranges, &c. Geological formation: limestone. Local paper: *Manning River Times*, published Wednesday and Saturday.

TEMORA (34° 12′ S. lat., 147° 20′ E. long.), a post, telegraph, money-order and savings bank township, and railway station, situated in the parish of Bundawarrah, county of Bland, district of Lachlan, and between the Trigalong and Deep Creeks, the first-named lying two miles to the west, and the second five miles to the east, electoral district of Young and police district of Temora, 291 miles S. of Sydney (fares 57s. 9d. and 38s. 6d.). Yeo Yeo, or Bland Creek, is 20 miles distant, and is the nearest permanent water, and a dam has been constructed by the Government about 3 miles from the township. It is distant 38 miles NW. from the Cootamundra station on the Great Southern Railway. There is a daily train service from Sydney *viâ* Cootamundra to Temora, and this line will probably be extended to Wyalong (41 miles). Chief hotels: Royal Exchange, Talbot's, Royal, Queensland, Smith's Club, Tattersall's, the Australian, Empire, Shamrock, Cashman's Family, Terminus, Railway, and Westminster. A court-house, the Bank of New South Wales and Union Bank have branches, and there are numerous stores, and other places of business, one theatre, Dobbs's hall, and Oddfellows' hall. The places of worship comprise Anglican, Roman Catholic, Wesleyan, and Presbyterian. Oddfellow and Good Templar lodges, Roman Catholic Guild. Public school has an average attendance of 220. There is also a R.C. school, Salvation Army and a convent. Telegraph communication with Cootamundra, Barmedman, and Wyalong has been established. Coaches run to Barmedman, 5s.; Young, 12s. 6d.; Edmunds's, 2s. 6d.; Reefton, 4s.; Robert's, 7s. 6d.; Wyalong, 10s.; Merool Creek, 10s.; also from Temora to Morangarell. Numerous nuggets of various sizes, from 175 ozs. downwards, have been found. The sinking was from 56 to 145 feet in depth, and the wash dirt varied in thickness from 18 inches to as many feet, the bottom being pipe-clay, and occasionally slate. Alluvial is practically exhausted, but reefing is being developed. The country is undulating, and timbered chiefly with box, pine, and ironbark, and well suited for agricultural operations. The climate is specially adapted to wheat growing, the yield being exceptionally good. A Pastoral, Agricultural, Horticultural, and Industrial Association has been established, also a Farmer's Union. The district is incorporated, with ratable property of the annual value of £9,600. Geological formation: Silurian. Population about 1,800. Newspapers: *Temora Independent* and *Temora Star*. The mining village of Reefton lies about 16 miles north-west of Temora, several payable reefs being worked. Springdale, a rising mining centre, is 15 miles to the east. Population about 100.

TEMPE, a postal suburb, about 6½ miles S. of Sydney, with railway station and money-order facilities, situated on Cook's river, county Cumberland, electorate of St. Peter's, and police district of Newtown; fares 5d. and 4d. There are several hotels, a public and private school, former with average attendance 352, Episcopalian, Wesleyan and Roman Catholic places of worship, and a population of about 500. The township is lighted with gas, and supplied with water from the Nepean. Electric tram running.

TENTERFIELD (29° 0′ S. lat., 152° 0′ E. long.) is a border town and railway station in New England, on the main northern line, and on the creek of the same name, county of Clive, electoral and police district of Tenterfield, at the head of the river Dumaresq, 314 miles (480 postal) to the N. of Sydney. Fares from Newcastle, 69s. 3d. and 47s. 3d., or direct from Sydney, 81s and 50s. The principal hotels are the Commercial,

Royal, Burgess', and the Criterion. The town is located on a plain, and is environed by lofty granite hills. It owes its rise and increasing importance to the large extent of pastoral, agricultural, mineral (tin), and auriferous ground by which it is surrounded. The diggings are known as Timbarra, Drake, Poverty Point, Boorook, Lunatic (antimony and plumbago have also been found here), Slatey Creek, Boro (silver also found here), and Boonoo Boonoo, and consist of alluvial and reef. They are variously situated from Tenterfield, east, north-east, and north, and are within from 15 to 35 miles of the town Maryland tin mines are from 22 to 40 miles N. of Tenterfield, Brassington creek and the Scrub, 12 miles SE., and the Mole Tableland mines from 30 to 40 miles SW. The public buildings comprise the Episcopal church (of brick), the Wesleyan and Presbyterian churches (of wood), the Roman Catholic (of stone), the post and telegraph offices, and the court-house, both very handsome buildings: a money-order office, savings bank, a public school, with average attendance of 250; there are also five other public schools in the neighbourhood, also a Church of England Grammar School, and a ladies' seminary; the Prince Albert Memorial Hospital; the School of Art, with a library of 2,400 vols.; and branches of the Joint-Stock and N.S. Wales Banks. Fire brigade has engine and 480 ft. hose. Water supply from wells and tanks. The district has many advantages of soil and climate, and is well suited for farming and pastoral purposes. About 5,800 acres of land are under cultivation, mostly for cereal crops. Stock returns, 1899: 8,065 horses, 89,997 cattle, 159,060 sheep; area 1,647,344 acres. The district was created into a municipality in 1871. Estimated annual value of ratable property, £14,680. Tenterfield has a telegraph station, with savings bank, money-order office, and bonded store. The principal industries are: a soap factory, chilled meat works, butter factory, two flour mills, a tannery, and a boot factory. Coaches leave six times a week for Drake, Fairfield, Tabulam, Casino, and Lismore. Wallangarra, the nearest Queensland town, is 11 miles N., and connects with the N.S. Wales line. The nearest point of Queensland territory is 10 miles distant. Formation: granite. The population of the municipality, 2,500. Local newspapers: *Tenterfield Star* and *Tenterfield Courier*.

TERARA. *See* SHOALHAVEN.

THACKARINGA (32° 4′ S. lat., 141° 7′ E. long.), a rising township, in the county of Yalcowinna, electorate of Sturt, and police district of Mitchell, 975 miles from Sydney, with post and telephone office. Mode of conveyance, coach to Cockburn, S.A., six times a week, thence rail. There is one hotel, a public school, average attendance 26, and general store, and a population of about 100. Geological formation: slate and ironstone.

THE OAKS (33° 55′ S. lat., 150° 40′ E. long.), a postal, telegraphic, and money-order office township, on the Werriberri creek, in the county, electorate, and police district of Camden, 66 miles SW. of Sydney. Picton railway station is 10 miles distant, and Camden 9 miles. The surrounding country is tableland, chiefly pastoral, but also adapted for farming pursuits. It has long been celebrated for the quality and quantity of its timber. The principal kinds are the oak (whence the place takes its name), iron bark, stringy bark, blackbutt, gum and every variety of hard wood, well adapted for building purposes. In the town are about 100 residents, a public school, with average attendance of 40, a church, and two stores. In the district the inhabitants are reported at 410.

THIRLMERE (about 34° S. lat., 150° 5′ E. long.), a railway station, with postal, telegraphic, and money-order facilities, in the electorate and county of Camden, police district of Picton, 58 miles S. of Sydney; railway fares: 8s. 3d. return, 6s. 6d. single; on Friday night 4s. 9d. return from Sydney; containing a public school, Church of England, one hotel, and a hospital for consumptives, taken over by Queen Victoria Hospital Fund Authorities. Water from underground tanks. Firewood industry. District, agricultural. Geological formation: sandstone. Population, 150.

THORNLEIGH (33° 47′ S. lat., 151° 4′ E. long.), a post town, with money-order office, telegraph office and railway station, in the county of Cumberland, police district of Ryde, electorate of Willoughby, 18 miles NW. of Sydney, on the Great Northern Railway. Railway fares, 1s. 9d. and 1s. 1d. It contains one hotel, two stores, a public school, School of Arts, Eddy Railway Orphanage, Episcopalian, Wesleyan, and Presbyterian churches. The district, which is essentially a fruit-growing one, has a flourishing horticultural society. Thornleigh, on account of its height above the sea-level (600 feet), convenient distance from Sydney, and salubrious climate, is a favourite resort, especially during the summer months. Geological formation: sandstone. Population about 400.

THURGOONA (35° 56′ S. lat., 147° 0′ E. long.), a postal centre with telephone, on the main Sydney road, about 6 miles from Albury and 350 (392 postal) from Sydney S., in the electorate of Albury, comprising an Episcopal (St. John's) and Roman Catholic church, a convent school, an orphanage, a public school, with an average attendance of 45. It is a wine-producing district, the late Mr. Fallon's and other well-known vineyards being in the immediate vicinity. Communication is by rail to Albury, 6 miles distant, and coach thence.

TIBOOBURRA (29° 50′ S. lat., 142° E. long.), a mining and pastoral township, situated 892 miles NW. from Sydney, 30 miles from Queensland border, in co. Tongowoko, electorate and police district of Wilcannia. It has postal, money-order, telegraph office, and savings bank facilities. Mode of conveyance, coach to Broken Hill, Wilcannia, Cobar, Wanaaring and Bourke: coaches also run to Yalpunya and Wompah. There are two hotels, a public school with average attendance 45, and a police station. Mining and pastoral district. Population 300, principally engaged in mining.

TIGHE'S HILL (33° 45′ S. lat., 151° 40′ E. long.) is a postal township, and telegraphic and money-order office, situated on a slight eminence, commanding a good view of the city of Newcastle. It is in the electorate of Wickham. It has sprung into prominence during the last decade. "The Sydney Soap and Candle Company" have a factory here, doing a good business. Another industry of moment is the Port Waratah Copper Smelting Works, situated a short distance from the "Hill." At this establishment about 50 hands are employed smelting and refining copper, which is brought chiefly from South Australia. Tighe's Hill is not a separate corporation, but lies within the precincts of the Wickham Municipality. The local wants are abundantly supplied by two places of worship, a public school, where the average daily attendance is 300, a police-station, mechanics' institute, with a library of 200 volumes, a number of good general stores, and hotels, together with numerous friendly societies, &c. There are two fire brigades with three reels, hose-cart, and 3,774 ft. hose and Hunter district water supply. Population of over 1,200 inhabitants, the majority of whom are employed in coal mining.

TIMBARRA (28° 58′ S. lat., 152° 30′ E. long.), a small gold fields township, in the county of Drake, and electoral and police district of Tenterfield, situate on Colongan creek, 539 miles (497 postal) N. of Sydney, about 77 miles from Grafton, and 17 miles from Tenterfield, which is the nearest railway station. The hotel is the Timbarra; there are, besides, three stores, and some tradesmen's shops. Thousands of acres of unexplored auriferous ground lie within a radius of 10 or 15 miles from the township. The physical features of the country are undulating quartz ridges and quartz, sandstone, and alluvial flats. Tin has been found within three miles. Population of town and district about 300.

TINGHA (28° 48′ S. lat., 151° 18′ E. long.), an important township in the county of Hardinge and electoral district of Bingara, about 418 miles north of Sydney, 40 miles from Glen Innes, 105 miles north of Tamworth, and midway between Bundarra and Inverell, situated on Cope's Creek, nearest railway stations are Guyra, Glen Innes and Uralla, distant 42, 45 and 75 miles respectively. Hotels: Commercial, Royal, and Caledonian. It was established in 1872, on the opening of the tin fields of New England, of which it is the centre. The public offices here are court-house, police quarters, Warden's office, telegraph office, post, savings bank, and money-order office, public school (with an average of 130 scholars), Roman Catholic convent (with average of 60), and a public hall. Good Templars' lodge, and a School of Art. Coaches run from Uralla, Guyra, and Glen Innes. The business places are: four large stores, and a number of smaller ones. Places of worship: English, Roman Catholic, and Chinese churches. In the vicinity is one saw-mill. The principal production is tin ore. It has been officially stated that payable stanniferous wash extends in the district 25 miles. The richest deposits have been found from Stony Creek to the township of Stannifer, a distance of seven miles. The mining made considerable progress during 1900. Population of town and district, 1,200, of which 400 are Chinese.

TINONEE (32° 0′ S. lat., 152° 20′ E. long.), a post town, with telegraph station, savings bank, and money-order office, on the south bank of the Manning river, 230 miles N.E. of Sydney, and on the main postal route from Raymond Terrace to Port Macquarie. A coach runs daily (except Saturday), leaving at 7.30 p.m., to the Hexham railway station, distant 120 miles; fare 39s. There is also steam communication with Sydney twice a week. Hotel: Commercial. The town is a small one; Government buildings, which are new and built of brick, being the principal structures; it is in the county of Gloucester, and police and electoral district of the Manning. It has a public school, average attendance 85; three churches—Episcopal, Wesleyan, and Presbyterian—Good Templars' lodge and Progress Committee. Temperance hall, one steam saw-mill, and several stores, two blacksmiths' shops, broom factory. Maize growing, dairying, and timber-getting. Surrounding forests abound in cedar, beech, mahogany, and all hardwoods. Formation: trap rock. The population of town, 300, and district is about 2,000.

TINTENBAR (28° 48′ S. lat., 153° 30′ E. long.), a post-town with money-order office, savings bank, and telephone station, situated on Emigrant Creek, a tributary of the Richmond River, in the county of Rous, electorate of Ballina, 350 miles north of Sydney. Mode of communication with capital is by coach to Ballina, thence by steamer. The nearest railway station is at Bangalow, ten miles distant, on the Lismore-Tweed line. There is one hotel, a public school, with an attendance of sixty, and an Anglican church. The district is devoted almost exclusively to sugar-cane growing and dairying. Population about 800.

TOCUMWAL (35° 47′ S. lat., 145° 35′ E. long.), a post town, with telegraph, money-order, and savings bank facilities, on the river Murray, about 100 miles W. of Albury, and 485 miles S. of Sydney, in the Murray electorate, police district of Deniliquin, and land district of Corowa. The Deniliquin and Albury coach passes through the town, and there is a daily mail from Melbourne, and thrice a week from Jerilderie and Berrigan. There is a railway station both at Corowa and Berrigan, 60 miles and 18 miles distant respectively, by which train may be taken to Sydney. A branch of the Commercial Bank of Sydney, a public school, average attendance, 55, Wesleyan, Anglican, and Roman Catholic churches, post-office, police-station, court house, four hotels, custom house, and a number of general stores. A Court of Petty Sessions is held once a month. The wool from surrounding stations, also grain, are conveyed with teams to Yarroweyah and Strathmerton (Victoria), ten miles

south. The soil is composed of sandy loam, and is very rich in agricultural productions. Population 850.

TOMINGLEY (32° 33′ S. lat., 148° 16′ E. long.), a small post town, with money-order, Government savings bank telegraph and telephone office, 4 miles from Tomingley Creek, in the county of Narramine, police district of Peak Hill, and electorate of Condobolin, 278 miles NW. of Sydney. Communication is by coach to Narramine, 22 miles, fare 5s., or to Dubbo, 33 miles, fare 10s., thence by rail to Sydney. There is one hotel, a public school, average attendance 68, and a model farm. District, farming and mining. Formation: slate with intrusive bars of diorite. Population, 300.

TOOLOOM (28° 38′ S. lat., 152° 18′ E. long.), a post town, on the Tooloom river, a northern tributary of the river Clarence, 345 miles (570 postal) NNE. of Sydney. It is in the county of Buller, electorate of Richmond, police district of Casino. Tenterfield is the nearest railway station, distant 90 miles, and Killarney in Queensland. Formation: trap. Population of town about 50, with neighbourhood about 120.

TOONGABBIE (33° 40′ S. lat., 150° 59′ E. long.), co. Cumberland, a railway platform and post-office (postal notes issued), on the Suburban line, 18 miles from Sydney, and 3 miles NW. of Parramatta; fares from Sydney 1s. 9d. and 1s. 1d. This locality is frequently mentioned in the early annals of the colony, having been the site of a penal stockade, and where a mill was set up. Public school here, with average attendance of 50, Anglican and Primitive Methodist churches, Loyal Orange lodge, and a School of Arts. Fruit-growing, poultry-farming and agriculture. The district, which is agricultural, contains a population of about 500.

TORONTO (33° 1′ S. lat., 151° 38′ E. long.), a northern watering place and pleasure resort, situated on the western shore of Lake Macquarie, in the electorate and county of Northumberland, and police district of Brisbane Water, distant 17 miles S. of Newcastle, and 87 miles N. of Sydney by rail. A private tramway connects with the Great Northern Railway at Fassifern (two miles). Steamers convey passengers to Belmont, Swansea, and other parts of the lake. There is a post-office; also savings bank, money-order, and telephonic facilities, a magnificent hotel, containing 45 rooms, built specially for the tourist traffic, and replete with all the most modern appointments, a public school, School of Arts (600 vols), and a number of general stores. The principal industries are mining, fishing, bee-farming, and fruit-growing. The colliery on the estate is supposed to be the pioneer coal-mine of the colony. Owing to the growing popularity of the place as a holiday and seaside resort a number of furnished cottages have been erected for hire at reasonable rates. Boating, fishing and swimming (enclosed salt water baths) are the chief amusements, but there are numerous pleasant and pretty walks. From Mount Waring (1½ miles) a magnificent view of the Lake may be obtained. Return fare from Sydney, 20s. 7d. and 12s. 11d. Population about 400.

TRANGIE, 321 miles W. of Sydney, a post town and railway station, with money-order, telegraph and savings bank facilities, county Narramine, electorate of Dubbo and police district of Bathurst; train fare 60s. 3d. and 40s. 9d. Coaches run to Dandaloo and Tinandra, fares 12s. 6d. and 20s. There are four hotels, Royal, Trangie, Railway, and Union Club, public school, average attendance 119, Presbyterian, Anglican and Roman Catholic places of worship, 3 saw-mills and a population of about 500 in agricultural and pastoral district.

TRUNKEY CREEK (33° 45′ S. lat., 149° 28′ E. long.), a post, money-order and telegraph station, with Government savings bank, on the Goulburn road, 159 miles (182 postal) W. of Sydney. It is in the county of Georgiana and electoral district of West Macquarie. Coach to Newbridge railway station (18 miles) six times a week (coach fare 5s.), thence rail, are the means of reaching Sydney. The goldfield, of which this is one of the settled points, consists almost entirely of quartz reefs; there are here Anglican, Roman Catholic and Presbyterian churches, a quartz-mill, a court-house, four stores, and hotel—Commercial. The court here is presided over by the police magistrate, and is held about once a fortnight. Court of Requests is held first Tuesday in each month. Public school here has average attendance of 45. Formation: principally basalt, with mountainous broken country. Abercrombie Caves 8 miles distant. Copper and silver also abound in the district. Population, 200.

TUENA (34° 5′ S. lat., 149° 25′ E. long.), a post, telegraph, money-order station, and Government savings bank, on the creek of the same name, a tributary branch of the Abercrombie, 197 miles postal (180 by road) SW. of Sydney. Newbridge is the nearest railway station, reached by coach. It is in the county of Georgiana and police district of Carcoar, electorate of West Macquarie. Has two hotels; a court-house is here, and public school, with average attendance of 36 children, two stores, Episcopalian, Roman Catholic and Presbyterian churches. It is a mining, agricultural, and pastoral district, with quartz and iron ore abounding. A copper and silver mine is also in the neighbourhood. The Mount Costigan mine has again been closed. The court here is held about once a month, and is presided over by the police magistrate. Formation: slate and basalt. Population estimated at 600.

TUGGERAH LAKES (33° 18′ S. lat., 151° 21′ E. long.), a post town, situated near Tuggerah Lake, in the police district of Gosford, electorate and county of Northumberland, with railway station, 61 miles N. of Sydney, fares 11s. and 7s. 2d. There is a public school, with an average attendance of 47. District, agricultural and pastoral. Timber, dairying, gardening and fishing industries. It is within tourist district; cheap week-end railway fares. Geological formation: carboniferous, Hawkesburn sandstone, alluvial flats. Population about 200.

TUMBERUMBA (35° 45′ S. lat., 148° E. long.), a post town, with telegraph station, savings bank, and money-order office, in the county of Selwyn, police district of Albury, and electoral district of "The Hume," 304 miles (358 postal) SW. of Sydney, on the creek of the same name, 90 miles NE. of Albury. Communication is by train to Wagga-Wagga, thence by coach three times weekly, also rail to Gundagai, thence coach *viâ* Adelong, twice a week, 61 miles. Hotels: The Union, Globe, Tumberumba, Tattersall's, and the Star. It lies at an elevation of 2,300 feet above sea-level, and is noted for its salubrious climate, which is very keen in winter. "The snow-clad peak of Kosciusko, 7,308 ft. above sea-level, forms a commanding point in the landscape"; there are several stores, and a brewery. The public buildings are the court-house, police station, school, Episcopal church, St. Jude's (a brick building), Roman Catholic chapel and Presbyterian church. The public school has an average attendance of 86. Nearest towns are: Adelong (40 miles N.), Tumut (40 miles), and Germanton (57 miles W.). There is a good deal of land under tillage in the district, and in the driest of seasons a fair harvest is gathered, potatoes and oats appearing to thrive remarkably well in the ferruginous soils; apples, pears, plums, gooseberries, strawberries, &c, grow well. The Tumberumba gold-fields have yielded a large quantity of gold, and are still being worked with fair results. At Ournie, 20 miles S. of Tumberumba, some reefs have been found, which bear promise of being very productive. The country is hilly and rich in good timber. Paddy's River Falls are within easy distance. Formation: granite, with belts of basalt; other portions, slate and sandstone. Population of town, 500; of district, 2,000.

TUMBULGUM, a post town, with money-order, telegraphic and savings bank facilities, 421 miles N. of Sydney, on the Tweed river, county Rous, electorate of the Tweed, and police district of the Tweed; mode of communication is steam launch, *viâ* Tweed Heads, thence coach to South Port station, Queensland; a steam launch runs to Murwillumbah and Tweed Heads. There are three hotels, principal being the Metropolitan, a public school, average attendance 40, Episcopalian and Presbyterian churches, police station, several stores, and a population of about 100.

TUMUT (35° 16′ S. lat., 148° 14′ E. long.), a pretty little town, located on the south bank of the river Tumut, an important tributary of the Murrumbidgee, 80 miles SW. from Yass, 20 miles from Gundagai railway station, and 264 miles (307 postal) SW. of Sydney, with which the communication is by two daily coaches to Gundagai railway station, one *viâ* Gocup and Brungle alternately, fare, 5s., and the other *viâ* Adelong, fare 7s. Hotels: Commercial, Royal, Wynyard, Star, Woolpack, Oriental, Globe, Killarney, Gilmore. It is in the counties of Buccleuch and Wynyard, and police and electoral district of Tumut, and has a post, money-order, Government savings bank, and telegraph office. The district was incorporated on 27th April, 1887, and has 19½ miles of roads and ratable property of the annual value of £9,030. Churches: Church of England (All Saints'), Wesleyan, Presbyterian, Roman Catholic, and Salvation Army barracks; public buildings: court-house and lock-up, public school (average attendance 220), and Roman Catholic school. Banks: N.S. Wales, Commercial; Mechanics' Institute, with library of 1,400 vols.; several insurance agencies. Societies: Agricultural and Pastoral Association, Freemasons, Oddfellows, Hibernian, and Sons of Temperance. The district environing Tumut is mainly rich agricultural land, of which 11,000 acres are under cultivation. Tumut has long been famed for its cereals, the alluvial deposit being extremely rich and the growth little affected by change of season. It is also a splendid pastoral district, to which stock are consigned in times of drought. A deal of mining, principally alluvial, is also carried on in the district. Formation: granite. The population of the town numbers about 1,300 persons, and of the census district 2,450. Newspaper: *Tumut and Adelong Times.*

TURON (33° 0′ S. lat., 149° 39′ E. long.) is the name given to numerous and extensive diggings on the Turon river and its tributaries, in the county of Roxburgh. The Turon was first occupied in June, 1857. It is 177 miles W. from Sydney, Bathurst being the nearest railway station, distant 42 miles.

TWEED HEADS (28° 8′ S. lat., 153° 33′ E. long.), an agricultural and dairying township (also known as COLOON), with post (G. Palmer Postmaster), money-order office, telephone and telegraph station, situated at the mouth of the Tweed river, 430 miles N. of Sydney, county Rous, and electorate of the Tweed; mode of conveyance is by steamer direct (fare 30s.), or by coach to Southport, thence by train to Brisbane, and overland or by steamer to Sydney. The favourite route is by launch to Murwillumbah (4s.), rail to Byron Bay (4s.), steamer thence (30s.). There is a public school (P. Tweedie, Head Master), average attendance 60, one hotel (Pacific), pilot station, School of Art, Custom-house, police-station, stores. Coaches run to Southport, daily, fare 10s. 6d., return 19s., and steam launches to Tumbulgum and Murwillumbah. Lismore and the Tweed are connected by railway at Murwillumbah. The chief industry is sugar growing. Sea walls are being built in connection with harbour works to confine the river and thus cause it to force its passage to the sea, and clear away the shifting sandbar, which is at present a menace to the shipping. There is good fishing and shooting. Geological formation: basaltic rock and sandstone. Population, about 250.

ULLADULLA (35° 18′ S. lat., 150° 30′ E. long.), a small seaport and Government township, in the electoral district of Moruya and police district of Milton, about 42 miles S. of Shoalhaven and 164 miles S. of Sydney, to which steamers ply regularly thrice a week. Nowra is the nearest railway station, and coaches run six times a week between

Nowra *via* Ulladulla to Moruya, Bega, Nimity Belle, and Cooma railway station, and Moruya and Tarago railway station. The harbour, which is about half a mile across from east to west, by a quarter of a mile from north to south, is a good one, protected by high land, with a sufficient depth of water for large vessels, and is well lighted by an iron light-house, 54 feet high, on Warden's, or the South Head. A commodious pier was erected at considerable expense; it is 200 feet long, with a rubble-stone approach, and affords ample facilities for the loading and discharge of vessels of large tonnage. There is a money-order, Government savings bank, and telegraph office; other buildings are: police quarters, public school (average attendance 45), free public library with 900 vols., and one hotel; Church of England, Wesleyan, and Independent churches hold services periodically. Dairy-farming is the principal industry of the district, and large quantities of produce find their way to Sydney. There is plenty of good timber, and one saw-mill turns out about 15,000 feet weekly. The entire district is a municipality consisting of three wards, proclaimed April 14, 1874, each represented in council by three members. There are 68 miles of roads in the district, and property of the annual ratable value of £14,830. Population of the district about 1,300. Local newspaper: *Ulladulla and Milton Times*.

ULMARRA (29° 40′ S. lat., 153° 2′ E. long.), electorate of Clarence, a postal, telegraph, Government savings bank, and money-order town, on the Clarence river, nine miles NE. of Grafton, with which city communication by steamer is had with Sydney, 342 miles S., and *via* Grafton and Glen Innes railway station. Hotels: the Commercial and Exchange. The chief product of the district is maize, which is largely grown. The principal buildings in the place are: three churches, two public schools (with average attendance of 106), five stores, School of Art, assembly hall, and council chambers. It was proclaimed a municipal district November 16, 1871. It has 120 miles of roads, and ratable property of the annual value of £11,240. Population, 1,400.

UNANDERRA (34° 17′ S. lat., 150° 59′ E. long.), a postal village and railway station, on the main south-coast road, in the police district of Wollongong, electorate of Illawarra, about four miles distant from the latter town and port, and 52 miles S. of Sydney, fares 9s. and 5s. 9d. It is in the tourist district. Public school here, with average attendance, 158. The Central Illawarra Municipal Council are building a very handsome council chamber, and maintain a public library for the use of the ratepayers. The Illawarra railway passes through the village. The principal industry is a coke manufactory and dairy farming.

URALLA (30° 40′ S. lat., 151° 31′ E. long.), a rising township, in the county of Sandon, police district of Armidale, electorate of Uralla-Walcha, with money-order, telegraph, and savings bank facilities, and railway station on the main northern road, situated 3,335 feet above sea-level on the Urralla creek 300 miles (343 postal) N. of Sydney, 14 miles S. from Armidale, and 245 miles from Newcastle; to which the fares are 48s. 3d. and 32s. 3d., or direct to Sydney 60s. 6d., 40s. Coaches run to Bundarra, Tingha and Inverell. The hotels are the Royal, Uralla, Tattersall's, Great Northern, and Locomotive. The township consists of a main street, which is the Great Northern Road, besides several intersecting streets, with an Episcopal church, Presbyterian, Wesleyan, and Roman Catholic chapels, Salvation Army barracks, Oddfellows' hall, also a convent school. There are eight stores, a money-order and telegraph office, Government savings bank, a court-house, lock-up, public school of brick, average attendance, 160, Masonic hall, and Literary Institute, with 300 vols. Uralla also possesses a clerk of petty sessions, a resident Church of England clergyman, and three resident medical officers. The Northern Railway is open beyond Uralla to Wallangarra on the Queensland border. Alluvial gold diggings, known as the Rocky, are in the vicinity. Gold-bearing reefs are also being developed to the south and west of the town which bid fair to open out and be payable. There are also a very large number of farms and several large stations in the district, within 3 to 12 miles of the town. The Bank of N.S. Wales has a branch here. The district is rich in minerals, and is a splendid wheat-growing and pastoral country. The district is incorporated; ratable property of the annual value of £3,740. Population about 700 persons. Geological formation, granite. Newspaper: *Uralla Times*.

URANA (35° 20′ S. lat., 146° 18′ E. long.), a post, money-order, savings bank, and telegraph station, on the Urana creek, which empties itself into Lake Urana, 393 miles S. of Sydney, in the county of Urana, and electoral district of the Murray. The communication is by railway to The Rock railway station, 55 miles, coach fare 15s.—also railway to Coonong Siding (Jerilderie line), 18 miles (5s.); also communication by coach (25s.) with Corowa, distant 55 miles, and Jerilderie, (10s.) 35 miles. Hotels: Royal, Royal George, Commercial. It has Episcopal, Presbyterian and Roman Catholic churches, a Presbyterian manse, branch of the N.S. Wales Bank, a hospital, a brick court-house, a public school, with average attendance of 80, Oddfellows' lodge and a School of Art, with a library of 600 vols., five stores, about ten tradesmen's shops, and a common comprising 2,000 acres. The country is both pastoral and agricultural, and, in good seasons, crops are very productive. Stock returns, 1899: 2,582 horses, 2,154 cattle, 517,492 sheep. Area, 1,026,947 acres. Free selections are on the increase, and there is plenty of fine land suitable for tillage, but the country is indifferently watered. Wagga-Wagga Land Board holds meetings when required. A scheme is now being prepared by the Government, by which a large area of land in this neighbourhood will be irrigated by water conveyed from the Murrumbidgee river; the country round Urana is admirably adapted for irrigation, being level and of great fertility. Population, 350.

WAGGA-WAGGA (35° 7′ S. lat., 147° 27′ E. long.), situated in the electorate of the same name, a pastoral and agricultural town in the county of Wynyard, on the south or left bank of the Murrumbidgee. It is 309 miles distant SW. from Sydney, and is connected with the metropolis by the Great Southern railway, the connection with South Wagga being completed on September 1, 1879; fares 58s. 3d. and 39s. 6d. The principal hotels are the Criterion, Australian, Commercial, Pastoral, and Union Club. Here is an extensive station ground, on which have been erected a handsome and commodious passenger station, a goods shed 150ft. by 45ft., an engine shed to accommodate 12 engines and tenders, a 50ft. turntable, and about three miles of sidings. Communication with Melbourne, 267 miles distant, is *viâ* Albury and thence from Wodonga. The principal engineering difficulty has been the bridge over the Murrumbidgee and its approaches. These latter consist of heavy embankments connecting the viaducts, containing about 70,000 cubic yards of earthwork. On the north side there are 215 spans of 29½ft., and on the south side 51 spans of the same width, varying from 9 to 24 feet in height. These are to allow for the escape of the flood waters; all the spans are constructed of timber, which is so rapidly decaying that the authorities are re-erecting the whole structure in iron. The main channel of the river is spanned by a bridge having two continuous wrought iron lattice girders of 636 feet each in total length, 12ft. 1in. deep, and placed 14ft. apart. These are divided into four spans of 150ft., each span being supported on two cast-iron cylinders 9ft. in diameter. These piers are filled with concrete, and are strongly braced together with wrought iron stays. The town does a large trade with the surrounding districts. A mail coach runs to Tumberumba on Tuesdays, Thursdays, and Saturdays, returning Mondays, Wednesdays, and Fridays; fare 25s. Coaches also run to Tarcutta, Grong-Grong, Kyambah, Upper Tarcutta, &c. Fitzmaurice Street is the main thoroughfare. It is a fine street, about one mile in length. There are several extensive stores, and three or four respectable public buildings, among which may be named the new Oddfellows' Hall, the Town Hall, the Protestant Hall in Baylis Street, the fire brigade station, and the hospital. There are 5 branch banks, Joint-Stock, N.S. Wales, Union, Commercial and Australasia; four places of worship, Episcopal (St. John's), Presbyterian (St. Andrew's), Wesleyan, and Roman Catholic (St. Michael's), a fine stone building, of which only a portion has yet been erected. Three public schools, with average attendance of 550. A very fine convent of the Presentation Nuns is here, charmingly situate on Mount Erin. The School of Arts has a library of 3,000 vols.. Fire brigade has engine, two reels and 1,600 feet hose. It has been a municipality since March 15, 1870. It has 52 miles of roads, and ratable property to the annual value of £37,420; the town is lighted with gas, and supplied with water from the Murrumbidgee; the water is pumped up into the reservoir on Willan's Hill, and thence circulates through pipes into the streets; reservoir holds 1,000,000 gallons. The country round Wagga-Wagga is principally pastoral, though experience has proved it to be well suited for agricultural purposes, and a considerable area of land has been selected and brought under cultivation. Produce: wheat, maize, barley, oats, potatoes, tobacco, wine, rye. Stock returns, 1899: horses, 12,848; cattle, 17,783; sheep, 1,033,197. Area, 2,731,755 acres. There is a considerable amount of gold-mining in and around the immediate vicinity of the town, the principal fields being on the Pomingalarna Common and Pullitop, where good prospects have been discovered. Wagga-Wagga has a post, money-order, and telegraph office, and a Government savings bank, and one of the most complete pastoral and agricultural show grounds in the colony. The racecourse, about half a mile from the town, is reputed to be one of the finest in the colony: the grand stand can accommodate 2,000 people. The population is about 5,000, the entire district being 12,747. The local newspapers are: *Wagga-Wagga Advertiser* and *Wagga-Wagga Express*, both published Tuesday, Thursday and Saturday.

WAGONGA (36° 9′ S. lat., 150° 6′ E. long.), a post town, in the county of Dampier, police district of Broulee, and electoral district of Eden, 260 (275 postal) miles S. of Sydney, situated about 7 miles south of the Bodalla Estate, and 5 miles north-west of Montague Island. The entrance to the river here—the Wagonga—is a good one, and the bay is of capacious size. Communication is by sailing vessel and steamer, or overland, to the Tarago railway station, distant 114 miles, or by way of Moruya and Bateman's Bay. A line of coaches runs daily to and from Moruya *viâ* Bodalla, Tilba-Tilba, Cobargo, Brogo, and Bega; through fare 35s. There are two places of worship, one hotel (the Wagonga), and two saw mills, a mining Registrar and Warden's office, and two stores. Formation: granite, slate, and quartz. About 3 miles from the head of the river the ascent of the N. side of the Dromedary commences; the principal products of the district are gold, butter, cheese, bacon, timber, and bark. Population of district, 300. At Wagonga-heads, or Nooroomo, as the village is called, there is one saw mill, an hotel, and a public school.

WAHROONGA, 13 miles N. of Sydney. Railway station on the railway line between Milson's Point and Hornsby Junction, with postal, telegraph, money-order, savings bank and telephone facilities. It is a residential suburb. The population is increasing fast, and its popularity is due to the fertility of the soil, and being the highest point above sea level near Sydney—604 feet.

WAITARA. *See* HORNSBY.

WALBUNDRIE (35° 43′ S. lat., 146° 44′ E. long.), a small postal township, telephone and telegraph station, with money-order office and savings bank, on the right bank of the Billabong Creek, 36 miles NW. from Albury, 25 miles N. from Howlong, on the main road to Urana, and 376 miles (418 postal) S. of Sydney, in the county and electorate district of Hume. Conveyance by coach to Brockelsby station, thence train. Coach also to Albury and Mahonga daily. There is a hotel, two stores, Progress Association, police station and blacksmith's shops. Roman Catholic services are held monthly. District is pastoral and agricultural. Population, 160.

WALCHA (31° 5′ S. lat., 151° 30′ E. long.) (county of Vernon), a postal, telegraph, savings bank, and money-order town, on the river Apsley, 40 miles S. of Armidale, and 332 miles N. of Sydney, police district of Armidale and electorate of Uralla-Walcha. Daily coach to Walcha Road railway station, 12 miles N., on the Great Northern line, is the means of travelling to the metropolis. The hotels are the Commercial, Royal, New England, and the Apsley. There is also a very good mountain road to the coast; to the Manning, Port Macquarie, or Raymond Terrace; also to Bendemeer. There are eight stores, also a druggist's shop, 4 blacksmiths' shops, and Temperance hall. Places of worship: Episcopal (with a resident clergyman), Presbyterian, Salvation Army, and Roman Catholic. Bank: Commercial. There is also a School of Art, with 3,000 vols. and public school, with average attendance of 115 scholars. Farming and mining are the principal industries of the district, and there are several stations in the neighbourhood, Ingleba, Aberbaldie, Branga Park, Orundumbie, Europambela, and others. Waterloo Falls, 12 miles distant. The Glen Morison goldfields lie 17 miles S. of Walcha. The Tia goldfield is about 24 miles east of Walcha. The Niangala goldfield is distant about 30 miles, with a good road. There is a land office here, with a resident clerk of petty sessions. Population is about 1,150. The district is incorporated, with ratable property of the annual value of £5,570. Local newspaper: *Walcha Witness*.

WALGETT (30° 2′ S. lat., 148° 10′ E. long.) is situated at the junction of the Barwon and Namoi rivers, 476 miles NNW. of Sydney. It has a money-order and savings-bank office and telegraph station, and is in the electoral district of the Barwon, county of Baradine, and police district of Walgett. It is a town of rising commercial importance, as it forms the business centre of all the outlying districts to the north and west, and on to the Queensland border. The town is situated on the borders of the central and western pastoral divisions, large areas of land are open for homestead occupation in the western district, and conditional purchase in the central. The route to the metropolis is *viâ* Narrabri, 125 miles distant, to which place coaches run three times a week carrying mails, and thence by Great Northern railway *viâ* Newcastle. Communication with the Western line of railway is also kept up by coaches running twice a week *viâ* Coonamble and Dubbo, fare 50s., and *viâ* Coonamble, Mudgee, and Wallerawang. There are also well organized mail services between Walgett and the Narran river, by which the Queensland borders can be reached at Mungindi or Brenda. There are seven hotels, namely, the Court House, Commercial, Royal, Australian, Imperial, Exchange, Sportsman's Arms, and five stores. Government buildings are the telegraph and post-office, the court-house, lands office, police barracks, new gaol, and lock-up, and there is a good public school, with average attendance of 100, hospital, Masonic and Oddfellows' lodges, convent school, school of arts, a brewery, and a brickyard. A Court of Quarter Sessions held here. Banks: Commercial, Australian Joint-Stock and New South Wales. The district is almost entirely occupied by sheep and cattle stations. Stock returns, 1899: 4,847 horses, 5,244 cattle, 1,058,186 sheep. Area, 3,803,681 acres. A substantial bridge has been erected over the Namoi, about a mile above the junction, and within easy distance of the town, and two other large bridges over the Two-mile, Warrambool, and Barwon rivers at Eumanbah, and one bridge over Five-mile Warrambool, which greatly facilitate traffic towards the back country. Occasionally the river is utilized as a means of traffic, but it is very uncertain, from its fluctuating depth. Population is about 750, of census district 2,950. Newspapers: the *Walgett News* and *Spectator*.

WALLABADAH (31° 20′ S. lat., 151° 30′ E. long.), a post town with money-order office and telephone to Quirindi, in the county of Buckland, electorate of Quirindi, situated on the Quirindi creek, and Great Northern Road, 253 miles N. of Sydney, surrounded with land adapted for farming and grazing. Quirindi is the nearest railway-station (9¾ miles distant). There is a Roman Catholic church, and Wesleyan and Presbyterian services are held in the Wesleyan Hall, three stores, creamery and butter factory, one hotel, a public school, average attendance 50. Population, 150.

WALLENDBEEN (34° 26′ S. lat., 148° 19′ E. long.) is a post, telephone, money-order, railway station, and savings bank, 241 miles SW. of Sydney, fares, 47s. 9d. and 31s. 9d., co. Harden, police district of Cootamundra, electorate of Boorowa. Has one hotel, a public school, average attendance 60, Anglican and Presbyterian churches, flour-mill and a general store. Pastoral and agricultural district. A gold mine has been opened at Cullinga, 9 miles SE. from Wallendbeen, which is the railway station. The mine is valued at £100,000. Annual value of ratable property, £9,220. Population about 250.

WALLERAWANG (33° 20′ S. lat., 150° 7′ E. long.), a post town, with money-order and telegraph office, in the county of Cook, and electoral district of Hartley, 105 miles due W. of Sydney, situate on the banks of Cox's river. It is in direct railway communication with the metropolis, fares 20s. 9d. and 14s., and is the junction of the line to Mudgee. Hotels: principal are Royal, Commercial, and Railway Inn. There are churches belonging to the Wesleyan, Church of England, Presbyterian, and Roman Catholic bodies; and a public school, with average attendance of 115 children. Bank: Commercial. It lies about 2,928 feet above the sea-level. Wolgan Gap, about 5 miles distant, is very picturesque. Among the minerals found are coal in large quantities, iron ore, limestone, alum, gold, and silver in small quantities. Population about 500.

WALLSEND (32° 57′ S. lat., 151° 42′ E. long.) is the chief colliery township in the coal district of Northumberland, and lies in a valley running in a NE. direction from the head waters of Lake Macquarie to the banks of the Hunter, about 8 miles from Newcastle; fares 1s. 2d. and 7d. by tram, or direct from Sydney 13s 5d., 8s. 1d. It is situated 85 miles (107 postal) WNW. of Sydney, having telegraph, money-order, and savings bank offices. Wallsend is connected with Newcastle by rail, tramway, and omnibus. It is the site of the Newcastle and Wallsend Coal Company's works, one of the wealthiest companies in Australia, the pit being situated about a quarter of a mile from the township. There is also a tunnel tapping the SE. portion of the field, from which a large output is available. The seam is a continuation of the Borehole seam. This colliery employs about 650 men and boys, and is capable of sending out upwards of 2,000 tons of coal per diem, which is considered equal to that of the largest collieries in England. A private line connects the collieries with the Great Northern near the township of Waratah. There is also an iron foundry situated in the borough, where extensive castings are frequently done for the adjacent collieries. Wallsend is lighted by gas and electricity, and possesses a School of Art, described as a magnificent structure, with a library of 2,700 vols., a public school (with an average attendance of 660), seven churches, Church of England, Roman Catholic, Primitive Methodist, Presbyterian, Wesleyan, Congregational, and Welsh Church (Independent), six hotels, several benefit societies, and Banks of Australasia and Joint-Stock. Fire brigade has fire engine, two reels, hose-cart and 3,000ft. hose. Wallsend returns a representative to the Legislative Assembly. There are also several friendly societies in a prosperous condition. The town is lighted with gas, and has a permanent water supply. Wallsend was proclaimed a municipality on Feb. 27, 1874. It has 8 miles of streets, and property of the annual ratable value of £18,430. Population of borough 3,800, and district, 7,000.

WAMMERAWA (30° 28′ S. lat., 147° 40′ E. long.) is in the pastoral district of Wellington and electoral district of Bourke, about 450 miles (postal) NW. from Sydney. The Wammerawa is the stream which starts from the Macquarie marshes on the opposite side to which the Macquarie enters them, and is, in fact, a continuation of that river. The country is of the finest pastoral description, there being extensive reed beds for cattle, which are irrigated by every rise in the river, the country being almost a dead level. Travellers' route is *viâ* Nevertire and Warren. Population about 20.

WANAARING (lat. 29° 50′ S., long. 144° 10′ E.), a post town, 616 miles W. of Sydney, with money-order, telegraph and government savings bank facilities, county Urana, electorate and police district of Bourke, connection with the Metropolis being coach to Bourke, 113 miles distant, thence rail; coaches also ply to Wilcannia, Hungerford, Brewarrina Downs, Bourke and Milparinka. Stock returns, 1899: 1,975 horses, 3,840 cattle, 555,533 sheep. Area, 5,984,837 acres. There are two hotels (Royal and Victoria), a public school, average attendance 30; police barracks, several general stores, and a population of about 130. Wool-growing industry.

WANDANDIAN (34° 54′ S. lat., 150° 33′ E. long.) is a small quiet hamlet situated on the creek of the same name which is navigable up to this point for vessels of thirty tons. The tide flows about half a mile beyond the hamlet. The creek empties into the shallow lake called on the maps St. George's Basin, connected with the sea by the narrow gut, or natural canal, known as the Berrewerree. The mouth of the Berrewerree is a noted place of resort for fish, and frequented at certain seasons by Chinese and other fishermen. Inside the bar there is good shelter for vessels not exceeding the tonnage mentioned, but the frequent changes in the channel and depth of water, caused by inundations from the large extent of country drained by the lake, make the entrance hazardous for any strangers. It is a postal town, with money-order office, and is 137 miles S. of Sydney. It is in the county of St. Vincent, and police and electoral district of Shoalhaven. Nowra is the nearest railway station, connected by mail coach twice daily, and Jervis Bay the nearest shipping port, nine miles distant. Has hotel, State school, Anglican and Roman Catholic churches, and Progress Association. It is an agricultural and pastoral district of sandstone formation. It abounds in fine timber, chiefly spotted gum and blackbutt. In the hamlet are 30 persons, in the district about 130.

WARATAH (32° 56′ S. lat., 151° 45′ E. long.), a post town, with money-order, and telegraph and savings bank offices, and also a municipality, about 4 miles from Newcastle, and 103 miles N. of Sydney. The municipality comprises the township of Hanbury, Georgetown, and North Waratah. Waratah, which is situated in the electorate of the same name, is a station on the Great Northern railway. The line from Sydney connects here; direct fare being 12s 6d. and 8s. There are four hotels. It is in the county and electoral district of Waratah, and police district of Waratah. Coal mining, quarrying, copper smelting, brick making, and fruit growing are the industries of the district. Two public schools; churches two Episcopal, two Wesleyan, two Roman Catholic, and one Primitive Methodist. Benevolent Asylum, Deaf and Dumb Institution, and Monastery of Redemptionist Fathers, a court-house, a post and telegraph office, with money-order and

savings bank, a School of Art, with a library of 1,100 vols.; town hall with municipal offices, council chamber, Masonic and other lodges. Fire brigade has engine, two reels, hose-cart, and 2,100 ft. hose; the Sydney Soap and Candle Company has brigade with 650 ft. hose. In the vicinity are the Crystal Palace gardens, a favourite resort for holiday makers. Copper smelting works are in operation, and there are stone quarries in the vicinity, also a municipal gasworks, a permanent water supply, and an extensive pottery. Owing to the large mining population, it is one of the busiest stations on the Great Northern Railway. Besides the coal-mining and copper smelting industries, large quantities of fruit — oranges, grapes, bananas, &c. — are grown in and exported from the gardens of North Waratah. The municipality was proclaimed February 23, 1871. It has 42 miles of streets, and ratable property of the annual value of £15,590. Population about 2,840.

WARDELL, in lat. 28° 50′ S. and 153° 24′ E. long., is a rising township, with post, telegraph station (telephone to Woodburn), savings bank, and money-order office, on both sides of the Richmond river, about 10 miles above Ballina. It is in the counties of Rous and Richmond, electorate of Ballina, and police district of the Richmond river, and is distant 353 miles (postal) N. of Sydney, with which the means of communication are steamers direct, and Clarence river steamers *viâ* Harwood Island and Woodburn. There is one saw-mill in the township, also Anglican and Roman Catholic churches; four stores, public school, with enrolment 100, two hotels, two commodious halls, and police station. The principal industry is cane growing. Population, 400.

WARIALDA (29° 35′ S. lat., 150° 37′ E. long.), a township, with savings bank, money-order office, and telegraph station on Reedy creek, 406 miles N. of Sydney, in the county of Burnett, electorate of Moree, and police district of Warialda. Daily coach to Manilla railway station is the means of travelling to Sydney; coach fare 30s. The hotels are the Royal, Commercial, White Swan, and Tattersall's; there are three large stores. Banks: N.S. Wales and Commercial of Sydney. Episcopal, Roman Catholic, Wesleyan and Presbyterian services held. Public buildings: court-house, police barracks, post-office, lock-up, public school, with average attendance of 125 scholars, hospital, Mechanics' Institute, with 800 vols., Oddfellows' and Good Templars' lodges. The nearest gold-fields are at Bingera, 28 miles south, but the district is mainly a pastoral one. Stock returns, 1899: 11,643 horses, 58,736 cattle, 1,132,661 sheep. Area 2,731,965 acres. Population of town, 800, with the district it is 4,700. Newspaper: *Standard*.

WARKWORTH (32° 33′ S. lat., 151° 2′ E. long.), a post town (issuing postal notes), with telephone station, on Cockfighter creek, 159 miles N. of Sydney It is in the county of Northumberland, and electorate of Singleton, and police pistrict of Patrick's Plains. A coach connects with the Singleton railway station (12 miles W.), fare 4s. There are in the township a wineshop, a public school, with average attendance 30, mission hall, and an Episcopal church. Agricultural and pastoral district, of sandstone formation. Population about 120.

WARNETON (31° 2′ S. lat., 152° 59′ E. long.), a post town, in the county of Dudley, electorate of Hastings, and police district of Kempsey, 280 miles (318 postal) N. from Sydney. Communication is by Macleay river steamer. Hexham is the nearest railway station, 210 miles distant. It has one school and a church, and is principally a farming and grazing locality. Population 50, with 150 in the district.

WARREN (31° 43′ S. lat., 147° 52′ E. long.), a post town and municipality, with money-order, savings bank, and telegraph office, 353 miles W. of Sydney. It lies on the left bank of the Macquarie river, in the electoral district of Coonamble and police district of Dubbo, and is connected by rail (12 miles) with the Great Western line; also connected by telephone with all the chief stations in a 50 miles radius. Coaches run to Coonamble, Lower Macquarie, Quambone, and Tenandra. Hotels Club-house, Royal, Commercial, Ravenswood, Bridge, Railway, and Albion. Public school has an average attendance of 250 scholars; a convent school, a court-house, land office, seven large stores, and Episcopal, Roman Catholic, and Presbyterian churches. Banks: Commercial and New South Wales, and Mechanics' Institute. Principally a squatting district. There are two saw-mills and wool washing establishment. Population, 1,350. Water from artesian bore. The district is incorporated, and has ratable property of the annual value of £9,990. Newspaper: *Warren Herald*. Geological formation, alluvial.

WATERLOO (33° 54′ S. lat., 151° 13′ E. long.), a suburban municipality, in the same electorate, on the road from the city to Botany, 2½ miles from Sydney. It was proclaimed May 16th, 1860, extended on the east, and reproclaimed November 19th, 1861. The Western Ward (now the borough of Alexandria) was separated, and the municipality again proclaimed August 27, 1868. Borough of Waterloo has 17¼ miles of streets, and total annual value of ratable property, £53,040, and borough of Alexandria 20 miles of roads and ratable property of the annual value of £45,510. Places of worship are Episcopalian, Roman Catholic, Congregational, Primitive Methodist, and Wesleyan. The district is lighted by gas, with a permanent water supply, and is fast becoming a manufacturing centre, already containing a large number of industrial works, including the establishments of Sydney Wool Scouring and Fellmongery Co., Sydney Glass Bottle Co., Australian Brewery Co., Adams's Paper Mills, Forsythe's Rope Works, and numerous others; 18 hotels. Communication from city is by tram-car and omnibus. Two public schools here (with average attendance 460), also two Roman Catholic and several private educational establishments, and there are post, telegraph, money-order, and savings bank facilities, branch of Commercial Bank, and a free public library of 1,300 vols. Population about 9,600.

WATSON'S BAY (33° 47′ 40″ S. lat., 151° 14′ 30″ E. long.), a favourite resort of Sydney people, is situate on the shores of an indentation of Port Jackson, a short distance from the South Head, situated 7 miles distant by road, and 4½ miles by water S. of Sydney; coaches run from the Rose Bay train terminus past the convent and Macquarie lighthouse to Watson's Bay; lighted by gas, and with postal, money-order office, Government savings bank, and telegraphic facilities. It forms a portion of the electoral district of Woollahra, and is in the police district of Sydney. It is a portion of the municipality of Vaucluse, with ratable property of the annual value of £6,840. Steamers ply half-hourly during the day from Circular Quay. It is a pleasant drive from the city by the South Head road. There are three hotels here, the Palace, Pier, and Signal, one public school, with an average attendance of 110, and three places of worship, Episcopalian, Roman Catholic, and Congregational. The portion of cliff facing the ocean has been strongly fortified, and supplied with modern appliances for defence, including torpedo works. A detachment of N.S.W. Artillery is located here in barracks. There are two lighthouses here, viz., Hornby and Macquarie; also a Reformatory for girls. The surrounding land is rocky and hilly, and affords splendid views both citywards and seawards. Not far from here is the place known as the Gap, where the unfortunate *Dunbar*, with all on board, save one, was lost on the 25th August, 1857. The pilots live here, and board incoming vessels by means of a steamer stationed off Camp Cove. There is a permanent water supply.

WATTLE FLAT (33° 5′ S. lat., 149 40′ E. long.), a postal township, with savings bank, telegraph and money-order office, on the Bathurst road, five miles from Sofala, and 161 miles W. from Sydney, in the electorate of Macquarie. Bathurst is the nearest railway station, 20 miles distant. It has two hotels, Star and Post Office, and three stores. It is in the county of Roxburgh. The district is a mining one, mountainous in character, and well timbered. Public school here, with average attendance of 65. Population, 530.

WAUCHOPE (31° 34′ S. lat., 152° 45′ E. long.), a township, with telegraphic, money-order, postal and savings bank facilities, situated on the Hastings River, in the electorate of Hastings and Macleay, and county and police district of Macquarie, 288 miles N. of Sydney. Mode of conveyance to Port Macquarie, distant 12 miles, is by drogher, thence to Sydney by steamer, which runs about twice a week. It contains two hotels, School of Arts, a public school, and Anglican and Presbyterian churches. The district is chiefly agricultural, and has a butter factory and a saw-mill. Geological formation, humous soil. Population about 300.

WAVERLEY (33° 53′ S. lat., 151° 17′ E. long.) is suburban to Sydney, lying E. about 4 miles. Access is by the old South Head road, along which tram-cars pass from Sydney every 20 minutes. The fare from Sydney to Charing Cross is 3d., and to the terminus near the cemetery 3d. Waverley is under municipal government, and has postal, money-order, telegraphic, and savings bank facilities, and returns a representative to the Legislative Assembly. The Council are trustees for the cemetery for the eastern suburbs, which is one of the most beautiful in the colonies, being situated on one of the picturesque heights fronting the Pacific, its area being 47 acres, and is ornamented with many handsome monuments. The borough is lighted by gas, and connected with the city water supply. The tramway is now extended to the Bondi Beach, passing the Waverley Park, a reserve of 27 acres, upon a portion of which is the high-level reservoir, for supplying the eastern suburbs. The borough has 53 miles of road, and property of the annual ratable value of £98,730. Banks: English and Scottish, New South Wales; three public schools (with average attendance of 640), Roman Catholic and Church of England, a convent, a large seminary for daughters of the clergy. Churches: two Episcopalian, two Presbyterian, Congregational, three Wesleyan, and two Roman Catholic, and Salvation Army barracks. There are about ten hotels in the borough. M.U.I.O.O.F., Protestant Alliance, Druids, Orange, and Rechabite Societies; boot factory, baking-powder factory, and ostrich farm. Population, 10,750.

WEE WAA (30° 14′ S. lat., 149° 26′ E. long.), a postal, telegraph, savings bank, and money-order township, on a lagoon of the same name, near the Namoi river, about 25 miles W. from Narrabri, and 376 miles NW. of Sydney. It is situated in the county of White, electoral district of Narrabri, and police district of Wee Waa and Narrabri. Coach to the Narrabri railway station, fare, 7s. 6d., thence rail, is the means of reaching Sydney. The hotels are Royal, Commercial, Imperial, and Club. There is one public school, with average attendance of 117, a court-house, police-station, four stores, a School of Arts, Anglican, Presbyterian, and Roman Catholic churches, and a branch of the Commercial Bank. The district is principally a pastoral one. Population is about 700, district 2,100. Newspaper: *Namoi Echo*.

WELLINGROVE (29° 38′ S. lat., 151° 33′ E. long.), a township on the Wellingrove creek, 13 miles W. from Glen Innes, and 385 miles (439 postal) N. of Sydney. It is in the county of Gough, electorate and police district of Glen Innes. The travellers' route is *viâ* Glen Innes railway station, 16 miles distant, thence coach. The mail is carried by coach twice a week. Has hotel, State school, and a Presbyterian church. A good many farmers and free selectors are now settled upon the land, which is highly spoken of for farming pursuits. Copper and tin are found within a radius of 8 miles or so. Formation: granite. Wellingrove station is about 2½ miles from this

township. Population is about 120; the district, which is principally pastoral, numbering upwards of 2,600 persons.

WELLINGTON (32° 35′ S. lat., 149° E. long.) is distant from Sydney 248 miles NW., and includes the township of Montefiore, on the opposite side of the Macquarie. The town and environs are incorporated, and mayor and aldermen were chosen for the first time in 1879. In the municipal district are 30 miles of roads and streets, and property of the annual ratable value of £13,090. It is picturesquely situated on the left bank of the Macquarie river, at its junction with the Bell river, about 1,000 feet above the sea-level, at the foot of a mountain range. At this point the river is spanned by a fine bridge of iron-work, which cost £8,000. It is in the county, police, and electoral district of Wellington. The railway to here was opened on June 1, 1880; fares, 49s. and 32s. 6d. The principal hotels are Royal, Federal, Grand, Grand Central and Club; there are about eight others. The railway bridge over the Macquarie is a work of some magnitude. It consists of two continuous wrought-iron lattice girders, 477 feet long, 12 feet 1 inch deep, placed 14 feet apart, divided into spans of 150 feet, each span resting upon two cast-iron cylinders, 9 feet in diameter. The churches comprise a handsome brick edifice used by the Episcopalians, a Roman Catholic church, Wesleyan, and a Presbyterian. Masonic, Oddfellow, and Protestant Alliance societies. There are also a public school (average attendance 260) and R.C. denominational school, and convent, a telegraph, money-order, savings bank, and post office of brick, one steam flour-mill, hospital, large court-house, gaol, free public library, with 570 vols., Mechanics' Institute, public hall, Temperance hall, Masonic hall, and Oddfellows' hall. Many new buildings have been erected, including two handsome banks—the Bank of N.S. Wales, Commercial Bank; and the leading Insurance Companies are represented by agents. Over 200 buildings have been erected in the past two years. The water supply to the town is excellent, and a £10,000 water supply by gravitation has been constructed. Coaches run to Yeoval, Parkes, Guntawang, Coonabarabran, Spicer's Creek, Gulgong, Cobbora, Mudgee, &c. The district has the threefold advantage of being admirably suited for agricultural and pastoral purposes, and of being highly auriferous, the reefs of the neighbourhood being many and rich. Dredging is a growing industry. A considerable breadth of land is under cultivation for wheat (over 90,000 acres), oats and maize, the soil being most suitable for the former. Wheat farming is making considerable progress. Rearing stock is most extensively followed, the different grasses growing luxuriantly and affording excellent pasturage. Land is admirably suited for vine growing, and there are several vineyards. Nearly the whole district has been taken up by free selectors. Fruit is largely grown. The Wellington caves in the vicinity are famous for their beauty, and are much frequented by visitors. Dubbo is 30 miles distant, NW., Stuart Town 20 miles, and Orange about 60 miles distant, SE.; bi-weekly coach runs to Mudgee. District Court and Quarter Sessions are held three times a year, Petty Sessions daily, and a Court of Requests weekly. Formation: limestone, slate, and rich alluvial flats. Population, town, 3,500; district, 11,000 inhabitants. Newspapers: *Wellington Gazette* and *Wellington Times*.

WENTWORTH (34° 8′ S. lat., 141° 58′ E. long.), a municipal district, proclaimed January 23, 1879, having 9 miles of roads and streets, and property of the annual ratable value of £4,290, telegraph, savings bank, and money-order station, and a permanent water supply (tank of 35,000 gallons), situated on the banks of the River Darling, near its confluence with the Murray, 500 miles W. (731 postal) of Sydney, 407 miles NW. from Melbourne. It is in the county, police district and electorate of Wentworth. Coaches leave regularly for Adelaide Monday and Thursday evenings, and for Menindie and Wilcannia Monday and Friday mornings, for Sydney and Melbourne *viâ* Hay, on Sundays, Tuesdays, and Thursdays. Broken Hill direct on Mondays. Communication is held with Adelaide by weekly steamer to Morgan, thence by rail. Steamers also ply regularly to Echuca, Wilcannia, and Bourke. Hay is the nearest railway station. The hotels are the Crown, Wentworth, Royal, and Commercial; the churches are Episcopal, Roman Catholic Wesleyan, and Presbyterian, the former being the finest church, with parsonage; banking establishment, the Joint-Stock; public school, with average attendance of 100; St. Ignatius convent, custom house, court-house, lock-up, gaol, wharf, police barracks, a Mechanics' Institute, large hospital, the Mechanics' Institute, Lending Library, with 1,200 volumes, a fire brigade, with reel and 1,100 feet of hose, and three principal stores. There are a number of societies and clubs, including a "Horticultural" and Pastoral and Agricultural society. The river steamer traffic is large and yearly increasing. The district, which embraces the south-eastern portion of the pastoral district of the Darling, is a pastoral one, principally sheep stations. Stock returns, 1899: 1,634 horses, 2,468 cattle, and 394,501 sheep. Area 6,207,183 acres. This town is the present depôt for the supply of the interior when the river is unnavigable, as it too often is, and with a railway to carry the supplies it would become the central city of Australia. Court of Petty Session is held daily, Court of Requests on the second Wednesday in each month, District Court and Quarter Sessions three times a year, and Land Court at intervals throughout the year. Population of 640 inhabitants, the municipality numbering 1,500. In the census district are 1,260 persons. Newspaper: *Wentworth Federal Standard*.

WENTWORTH FALLS, one of the principal tourists districts on the Blue Mountains, situated on Jamieson Creek, 62 miles WNW. of Sydney, to which there is railway communication daily, fare 11s. 3d. and 7s. 2d. It has a post town, telegraph, money-order, and savings bank office, in the county of Cook, electorate of the Nepean and police district of Penrith. There are two splendid hotels, the Hotel Wentworth and Wentworth Falls, and a number of public boarding establishments, a public school, enrolment 43, Episcopalian church. Several stores and a permanent population of about 250, but during the summer months large numbers of tourists take advantage of the salubrious climate and magnificent scenery, the following being the principal sights:—The Wentworth Falls, one of the grandest sights in the Colonies; the Valley of Waters, a splendid sight; through this valley the tourist can enter the Jamieson and Kanimbla Valleys; Weeping Rock; Lillian's Bridge, extremely pretty; Sublime Point, from which a magnificent view can be obtained; Water Nymph's Dell, &c. Last summer a local committee, by local subscriptions, were enabled to construct a magnificent swimming bath, with two substantial dressing-rooms, and very centrally situated. It was a great attraction, and was liberally patronised. It is a public bath, under control of local trustees, and no charge is made to bathers. Geological formation: sandstone, ironstone, and coal.

WERRIS CREEK (31° 15′ S. lat., 150° 40′ E. long.), co. Buckland, a station on the Great Northern line, being the point whence the branch line to Narrabri takes its departure, 155 miles from Newcastle, fares 30s. 9d. and 20s. 6d., and 254 miles N. of Sydney, fares direct to Sydney, 43s. and 28s. 3d. Hotels: The Royal and Railway. It has post and telegraph station, savings bank and money-order office, and lies at an altitude of 1,245 feet. Public school here, with average attendance, 82. There are three stores, Episcopalian and Roman Catholic places of worship, a Good Templars' lodge and hall, meat-chilling works, and several small business places; the district is principally pastoral, but agricultural pursuits are also carried on, principally in wheat, barley, and oats. It is situated in the electorate of Quirindi. There is a permanent water supply obtained from the creek. Mount Terrible, 3,000 feet high, is only 3 miles distant. Population about 500.

WEST BOTANY. *See* ARNCLIFFE.

WHEEO, a post town, 169 miles S. of Sydney, situated on the Wheeo Creek, county of King, electorate of Yass Plains, and police district of Crookwell; communication is by coach to Goulburn, distant 26 miles, thence rail to Sydney. There is a public school, several stores, and a district population of about 300. The district is devoted principally to agricultural pursuits.

WHITE CLIFFS, a post town, in Yungunlgra county, 780 miles distant from Sydney, is situated about 60 miles NW. of Wilcannia, which town it is in the electoral and police district of. There is a post, money-order, and telegraph office, savings-bank, Town Hall, five hotels, public school, Roman Catholic church, police barracks, Mechanics' Institute, and a number of general stores. Opals are found in district. Water from Government tanks. Geological formation: limestone, sandstone and ironstone. Population of district, about 1,700.

WHITTON, a post town with money-order, telegraph office, savings bank and railway station, county Cooper, electorate of Hay, and police district of Hay, 375 miles SW. of Sydney, fares 68s. 6d. and 45s. There are three hotels (Commercial, Hulong and Albion), public school, average attendance 60, Episcopalian and Roman Catholic churches, and three large stores; coaches run to Merool Creek, 5s.; Mount Elliott, fare 10s.; Rankins Springs, 25s.; Lake Cudgellico, 35s.; Mount Ida, 15s.; Pleasant Valley, 15s.; Darlington Point, 5s. Population about 300. Geological formation: clay.

WICKHAM (32° 16′ S. lat., 150° 32′ E. long.), an important suburb of Newcastle, which includes Linwood, Port Waratah, Smedmore, Islington, and Tighe's Hill, situate about 1 mile from Newcastle city. It lies about 60 miles (104 postal) N. by E. ½ E. of Sydney. There are here telegraph, savings bank, and money-order offices. Wickham was proclaimed a municipality on February 25, 1871. It has 13 miles of roads, property of the annual ratable value of £31,050. There are also other industries, viz.: Goninan & Company's, large engineering establishment, Ellis & Company's Saw Mills, Redman's Cordial Factory, fourteen hotels, Bryant's Tannery, several stores, branch of Joint-Stock Bank, &c., a Church of England, and handsome parsonage. The Wesleyans and Primitive Methodists have also their places of public worship. A large superior public school and teachers' residence have been erected, which cost, with value of land, £4,000; average attendance, 370. A School of Art was established in June, 1882, in a handsome and substantial building, and has about 1,500 vols. There are also a fire brigade with two reels and 1,800 feet of hose, and a permanent water supply. Wickham is on the Hunter river and Throsby's creek, in the county of Northumberland, and electorate of Wickham, and lighted by gas. In the vicinity is the extensive brewery known as the Castlemaine Brewery, the property of Messrs. Prendergast and Wood Bros. Estimated population, 6,700.

WILBERFORCE (33° 30′ S. lat. 151° E. long.), a small postal village, with money-order and telegraphic facilities, in the county of Cook, and the electoral district of the Hawkesbury, lying 38 miles W. of Sydney. It is about 3 miles distant from Windsor (the nearest railway station), across the Hawkesbury. Hotel: the Old Retreat. The Episcopal church is a neat stone building; Wesleyan, a brick building; a public school, with average attendance of 60, a watchhouse, two stores, and a leather factory. The district is of a rich agricultural character, but low, and subject to floods; the staple crop is maize, and the yield at times is very large. Formation: sandstone. Population of district about 500.

WILCANNIA (31° 31′ S. lat., 143° 23′ E. long.), county of Young and electoral district of Wilcannia, a prosperous and thriving township, with post, telegraph station, savings bank,

and money-order office, on the west bank of the Darling river, 583 miles (726 postal) NW. by W. of Sydney. The most comfortable route from Sydney is by rail to Broken Hill, through Victoria and South Australia; from Broken Hill here by bi-weekly coach, fare £3 10s. The railway has been opened to Cobar, and will ultimately be continued to Wilcannia, which will divert the Middle Darling and South Queensland trade to Sydney. A tri-weekly mail now runs between Wilcannia and Cobar being the cheapest and most direct route to Sydney. The hotels in the town are Mount Murchison, Court House, Club, Queen's Head, Mechanics' Arms, View Point, Commercial, Crown, Globe, Bacon's, and the Royal. There are bonded stores, several general stores, and a public school, with average attendance of 110. Banks: Australian Joint-Stock, Commercial, and London. There is a brewery, 1 cordial manufactory, wool-scouring establishments, and several boarding-houses. A boiling-down establishment has been erected at Moorabin, 3 miles from the town, by the Menindie Meat Preserving Company, which, owing to bad seasons, is now in liquidation. Episcopal, Wesleyan, Presbyterian, and Roman Catholic clergymen are here, and the Roman Catholics worship in the School church; there is also a Wesleyan School church, and a convent. Church of England is a handsome stone building. It is a place of Petty Sessions, and Courts of Quarter Sessions, and District Courts are held three times a year. The district is entirely occupied for grazing and mining purposes. There are promising copper, silver, and lead indications, excellent opals have been found at White Cliffs about 60 miles from here, several leases have been taken up, and at present there are upwards of 1,600 men on the field. The stability of the White Cliffs Opal Field has been fully proved by the steady increase in the population since its opening. The principal gem merchants in Europe have now agents on the field for the purchase of opal, which is a great convenience to the miners. All the claims are being fully worked, and several leases have been purchased by an English company, who are working them in a systematic manner. The returns for 1899, estimated by the Warden, are valued at £135,000. Mount Browne (of which Wilcannia is the *entrepôt*) will eventually become valuable. At a distance of 160 miles to the west lies Broken Hill, the centre of the celebrated Barrier Ranges silver and tin fields. The Wertago copper field, 70 miles NW. is being opened up, and promises to be an important mining centre. Wilcannia is on the main line of traffic from Western Queensland, but the opening of the Bourke railway has diverted part of the stock trade from Wilcannia, which is, however, still a great crossing place for stock, and there is a large amount of wool shipped from the town when the Darling is navigable, and by teams when the river is closed. There are some handsome stone-built public buildings, court-house, police-barracks, gaol, post and telegraph offices, Athenæum, with a library of about 1,100 vols., and the hospital. A wharf has been constructed and steamers can load and discharge cargo with comparative ease. The town has been incorporated, and the council have, without Government loans, performed several useful works, such as forming streets, &c., the annual value of ratable property being £9,050. The Council have erected water supply works, from which the township is supplied; the main street is planted with trees. There are racing, rowing, tennis, and cricket clubs, and lodges of Masonic fraternity, Oddfellows, Druids, Good Templars, and headquarters of the Pastoral Protection Association. A strong pastoral and agricultural society has been formed, with a good working committee. The town is the centre of trade for many smaller settlements, such as Milparinka, Tibooburra, Wanaaring on the north. Menindie to the south, and other places. Stock returns, 1899, give 3,992 horses, 12,126 cattle, 527,946 sheep. Area, 10,100,443 acres. Population about 1,000 persons. Newspaper: *Western Grazier*, published on Wednesday and Saturday.

WILLIAM TOWN (32° 28′ S. lat. 151° 40′ E. long.), a post town, with telephone exchange, in the county of Gloucester, electorate of Gloucester and police district of Raymond Terrace, 92 miles N. of Sydney. There are Anglican and Wesleyan churches and a school, with average attendance 42. I.O.G.T. lodge and Band of Hope. Farming and grazing district. Hexham is the nearest railway station, 9 miles distant, thence punt over Hunter to Newcastle, thence train or steamer. Population about 200.

WILLOUGHBY (33° 50′ S. lat., 151° 10′ E. long.), a postal suburb, with money-order office, savings bank, telephone and telegraph station, about 5 miles N. of Sydney, in the electorate of Willoughby, county of Cumberland, and police district of St. Leonards; mode of conveyance, rail from Milson's Point to Chatswood, or tram from Milson's Point: cable tram to N. Sydney Reserve, thence electric car to Denshurst Street. It is a municipality, and contains branch Commercial Banking Co., Sydney; Fire Brigade, telephone exchange, public park, Masonic and Oddfellows' (M.U.) lodges, Council Chambers, Chatswood, Victoria and Assembly halls, three public and six private schools, Wesleyan, Congregational, Roman Catholic, Presbyterian and Episcopalian churches, four hotels, six stores, three potteries, two brick manufactories, a cornflour mill, twelve tanneries, a permanent water supply, and a number of market gardens worked by Chinese. The district is lighted by gas, has 59 miles of roads, and ratable property of the annual value of £33,310. Large quantities of fruit of all descriptions are produced and sent to the Sydney market. Geological formation: clay. Population, 4,800.

WINDEYER (32° 45′ S. lat., 149° 32′ E. long.), a township and money-order station, on the Meroo creek, 123 miles (171 postal) W. of Sydney, and 24 miles S. from Mudgee railway station, whence the coach runs. It is in the county of Wellington, and electoral district of Mudgee. Three places of worship, Episcopal, Free Church, and Roman Catholic; two hotels; a public school, with average attendance of 50, a police barracks, two general stores, and 360 residents. The district is a mining one. Formation: slate.

WINDSOR (33° 35′ S. lat., 150° 53′ E. long.), a borough town, on the Hawkesbury river, 34 miles NW. from Sydney, in the Hawkesbury electorate, with which it is connected by railway; fares, 4s. 2d. and 2s. 6d. It was proclaimed March 4, 1871. It has 19 miles of roads, and ratable property to the annual value of £11,130. It is situated in the county of Cumberland, and police district of Windsor; it has a post, money-order, Government savings bank, and telegraph office. It is one of the oldest settled places in the colony, and but for the frequency of the floods in the district, it would hold a much higher position than it now does. In 1867 the river rose 63 feet above its ordinary level, and the whole country was converted into one large lake 10 to 60 feet deep, villages and farms being submerged. The town itself is built on a hill, and is therefore not much affected by the floods that occasionally sweep over the district. The soil is of unrivalled fertility, and produces the cereals and other farm products to perfection. The principal streets are George Street and Macquarie Street. There are about 12 principal stores. Hotels: the leading being the Fitzroy, Royal Exchange, the Royal, Commercial and Carrington. The School of Art is a substantial building, with a library of about 1,100 volumes. The public school is a fine building, costing about £1,500, and having an average attendance of 302 scholars, there are four other schools, including a high school, grammar school and a ladies' school. The places of worship are the Church of England (St. Matthew's), a brick building with tower and belfry, the foundation stone of which was laid by Governor Macquarie in 1819, Roman Catholic church (St. Matthew's), built in the Gothic style, Wesleyan chapel, and Presbyterian church, both of brick, the Congregational church, and the Salvation Army barracks, a wooden building. Masonic and Oddfellows' lodges. The Fitzroy bridge crossing the South creek has been replaced by a new iron structure, on iron cylinders. The Windsor bridge, built on iron cylinders and spanning the river Hawkesbury, is a fine substantial work. The Bank of N.S. Wales, and Commercial Banking Co. of Sydney have branches here. There is also a hospital and benevolent asylum combined, a court-house, four tanneries, a butter factory, and a gaol, also a private observatory, kept by Mr. John Tebbutt, F.R.A.S., astronomer. Water is laid on, the supply having cost £6,500. The town is lighted with gas. Formation: sandstone and slate. Surrounding the town are the famed Wilberforce, Pitt Town and Cornwallis bottoms, which are unsurpassed for fertility, producing as much as 100 bushels of maize to the acre. Stock returns, 1899: horses, 7,106; cattle, 16,495; sheep, 1,269. Area, 183,038 acres. Produce of the district: wheat, maize, oats, potatoes, wine, oranges, barley, rye. Dairy produce: butter, bacon and ham. The river is navigable, and vessels of any draught can reach Churchill's wharf, on the Sackville Reach, which is 22 miles by river, and 10 by land. Population: town, 2,000; district, 12,000. Local papers: the *Windsor and Richmond Gazette* and *Australian*.

WINGEN (31° 55′ S. lat., 150° 54′ E. long.), a railway and telephone station and postal township, on the Great Northern Railway, 204 miles N. of Sydney, and 106 miles from Newcastle; fares to Newcastle, 21s. and 14s. 0d., or direct to Sydney, 33s. and 21s. 9d. It is in the county of Brisbane, electoral district of Robertson, and police district of Scone, and is situated on the Kingdon Ponds creek, 1,002 feet above the sea-level. The town contains one store, two wine shops, but no buildings of magnitude. Public school has an average attendance of 20. Convent, Anglican and Roman Catholic churches. The surrounding district has good agricultural soil, and the mountains are rich in mineral wealth in the form of coal of good quality, kerosene shale, and the baser metals. A great natural curiosity exists within two miles of Wingen, a burning mountain, 1,820 feet high, being the only one on the continent, so far as is known. The fire is not volcanic, but is supposed to be the combustion of a coal seam that has in some way become ignited. Formation: schist and trap. Population, 120; of the district, 15,500.

WINGHAM (31° 53′ S. lat., 152° 22′ E. long.), a rapidly rising township, with telegraph station, post, and money-order offices and savings bank, situate at the head of navigation of the Manning river, in police district of that name, electorate of the Manning, and county Macquarie, on the road leading, on the one hand to Port Macquarie, and on the other to New England. Sydney lies 233 miles south. Communication by steamer once or twice a week, or by coach *viâ* Gloucester to Hexham railway station, 124 miles distant, thence to Newcastle, thence per rail or steamer. Postal communication daily. Hotels — the Australian and the Wingham. The town is well laid out, with a reserve in the centre, and contains some good buildings, built with bricks from yards in the neighbourhood of the town. The chief buildings are Fotheringham's hotel, with 46 rooms, a grand brick store, built arcade fashion; handsome brick bank—the Commercial, post-office, court-house and lock-up, School of Art, with library of over 1,000 well-selected volumes, and a large assembly room; very pretty superior public school (with average attendance of 160), and teachers' residence, Oddfellows' hall, Agricultural hall, Federal hall, to seat 800 (lighted with acetylene gas), nine stores, and five private boarding establishments. Several Insurance Companies have agencies there. There are four churches—Church of England, Free Church of Scotland, Roman Catholic, and Presbyterian: the Church

of England parsonage and Presbyterian manse are ornaments to the town. There are lodges of Freemasons, Oddfellows and Orangemen here, who hold periodical meetings, cricket club, football club, and a most successful Agricultural Society. The water supply is obtained from the river and private tanks. The town is incorporated, and has ratable property of the annual value of £2,580; Courts of Petty Sessions held at stated periods. This town is of great and increasing importance, being the only outlet for the produce from the large outlying districts of Upper Manning, Dingo Creek, Marlee, Cedar Party Creek, Killawarra, &c., &c. A road has been opened to Ellenborough Falls, one of the most beautiful in the colony. The principal produce of district is: maize, barley, oats, potatoes, wine, tobacco, cheese, and bacon. Dairying has made great progress during the past two years, the export increasing from *nil* to nearly four tons per week. A bacon curing company has been formed. Of wool there is only a small quantity. There is an almost inexhaustible supply of fine timber, and it will be from this district that the future supply of railway girders will be drawn. The population of the town is about 610, and of the district 8,500. The local paper is the *Wingham Chronicle and Manning River Observer*, bi-weekly.

WISEMAN'S FERRY (33° 17′ S. lat., 151° 2′ E. long), (so named after Solomon Wiseman), a post, telegraph, Government savings bank, and money-order station, on the Hawkesbury river, in the county of Cumberland, electorate of Northumberland and police district of Windsor, 64 miles NW. of Sydney. Steamers ply to Hawkesbury railway station (fare 1s. 6d. return), and Sydney direct, meeting 9 A M. train from Sydney at Hawkesbury about 10.30 A.M. Windsor is the nearest railway station, 26 miles by coach. It is more a postal and telegraph centre than a town, and consists, besides a few private buildings, of one hotel, Anglican church, Progress Association, and a public school, with average attendance of 35. It is principally a fruit-growing and farming district. Formation: sandstone. The ferry here connects the Great Northern road with the South, and is the principal place of crossing for the large herds of cattle from the North that supply the Sydney market. The district is one of the beauty spots of New South Wales; the boats call regularly at Mangrove, Langtondale, Macdonald's River, Leet's Vale, Portland, and to within 10 miles of Windsor. Population, 50.

WOLLOMBI (32° 56′ S. lat., 151° 13′ E. long.) is a small postal, money-order, telegraph, and savings bank township on the Sugar-loaf and Wollombi Brook, 110 miles (155 postal) to the N. of Sydney, and 36 miles from Maitland. Communication is had with the metropolis by the Farley railway station, 35 miles distant, or *viâ* Maitland by coach daily; fare, 10s. The principal hotel: Kenny's. It is in the county and electorate of Northumberland. The churches are Episcopal and Roman Catholic; there is also a public school, with average attendance of 50, a court-house, police barracks, and lock-up, two stores, and a steam flour-mill. The surrounding country is largely occupied with small farms, nearly 9,000 acres being under cultivation, producing wheat, maize, barley, oats, potatoes, oranges, and tobacco. Formation: principally sandstone. The district is at times subject to flood. The population numbers about 180 persons, the district 1,200. There is no permanent water supply.

WOLLONGONG (34° 25′ S. lat., and 150° 56′ E. long.), county Camden, electorate of Illawarra, is a seaport town and harbour, distant 49 miles S. from Sydney. It is the principal harbour on the south coast, and ranks in tonnage and number of shipping the third seaport of the colony. Large steamers ply three times a week with Sydney, and there is overland communication by railway, fare 8s. 0d. and 5s. 2d. single. The present harbour, known as Belmore Basin, and excavated out of the solid rock to a depth of 18 feet at low water, has an area of about 3 acres, giving 1,700 feet of wharfage. On the end of the old breakwater there is a circular iron lighthouse, 56 feet above water-level, with fourth-class (catadioptric) white light (gas light), visible 10 miles off, to lead shipping into harbour. The breakwater has recently been extended, but the work being incomplete no benefit has resulted. Wollongong is the chief port for the Osborne-Wallsend and Mount Pleasant collieries, which are 600 feet above sea-level, worked by adit into the side of the mountain, about 3 miles distant, and are connected with the port by railways; the Mount Kembla colliery and the Corrimal colliery are each about 6 miles distant. In 1899 the collieries in the Southern and South-Western districts employed about 3,108 miners; 1,374,039 tons of coal, of the value of £361,202 were raised. The town is well built, lighted with gas, and prettily situated near the base of Mount Keira (1,540 feet high), one of the highest points in the Illawarra range; its environs for beautiful mountain and ocean scenery are not surpassed by any part of the world. The hotels are the Freemasons', Brighton, Commercial, Royal Alfred, Terminus, Harp, Royal, and Cricketers' Arms. The Commercial, New South Wales, Australian Joint-Stock, and English, Scottish and Australian Banks, post and telegraph office, fire brigade with engine and 600 feet of hose, court-house, town hall, and public school, are all fine buildings. The Albert Memorial Hospital is one of the principal buildings. Places of worship: Anglican, Roman Catholic, Wesleyan, Presbyterian, Congregational, and Primitive Methodist churches. Masonic, Druids, M.U.I.O.O.F., G.U.I.O.O.F., and Protestant Alliance Societies. The public school ranks first among the second-class schools in the colony, and has an average attendance of 415; there are also the Roman Catholic and private schools. The School of Arts, Municipal Free Library, with about 1,000 vols., Protestant hall, and Church-street hall are all roomy buildings. There are numerous and well-appointed stores in the principal streets (Crown, Corrimal, and Keira). Extensive seams of fireclay and iron ore abound. There are six seams of coal from 5 to 17 feet thick, but only one of these is worked. The steamships of Her Majesty's Navy, P. and O. Co., Orient, and Pacific mail lines, and all large ocean-going steamers prefer these coals to any other in the Southern Hemisphere. The Illawarra railway connecting the town with Sydney passes through the National Park, Clifton, Bulli, Wollongong, Dapto, on to Kiama, Gerringong, Berry and Nowra. The Wollongong district has long been noted for its dairy farming, and is one of the principal sources whence the metropolis is supplied with milk, of which the daily export (per train) amounts to upwards of six thousand gallons. The other exports include pigs, poultry, calves, eggs, cheese, and bacon. The town was proclaimed a municipality February 22, 1859, and has ratable property to the annual value of £19,400. The harbour is defended by a company of artillery and a fortification on Signal Hill, mounted with a six-inch hydromatic 5-ton gun, throwing 100 lb. shot, also a battery of two 5-ton rifled 80-pounder guns, on Smith's Hill. Formation: carboniferous, ironstone and limestone. The town was lighted with gas in August, 1883, by a local company. Water from underground wells and tanks. Population about 3,600. Local papers, *Illawarra Mercury* (Tuesday, Thursday, and Saturday), and *South Coast Times* (Saturday). Export of produce and imports of merchandise is about 60,000 tons yearly.

WOLUMLA (36° 27′ S. lat., 149° 59′ E. long.), a township on the main Monaro and Eden road, at its junction with the Bega and Eden road, being 30 miles from Eden, 10 from Candelo, and 326 miles S. from Sydney, situate on the Camberwell Creek, in the county of Auckland and electorate of Bega. Cooma is the nearest railway station, 84 miles distant. Hotels: Railway Junction and Wolumla. It has a post, telegraph and money-order office, savings bank, two stores, and a tannery. Public school (average attendance of 21), one church, and a School of Arts, with a library of about 200 vols. It is the centre of a large, fertile, and pastoral district, and has several large dairies and cheese factories, which are the principal support of the place. Gold, copper and tin have been found in small quantities. Population about 511.

WOMBAT (34° 25′ S. lat., 148° 10′ E. long.), a postal and money-order village, on the Wombat creek, in the county of Harden, electorate of Boorowa, 241 miles WSW. of Sydney, 10 miles from Young, and about 55 miles from Yass. Coach to Murrumburrah railway station, 11 miles distant (fare 5s.), thence the Southern line, are the means of reaching Sydney. Hotels: the Commercial and the Australian Arms. An Episcopal church, a Roman Catholic church, and Wesleyan chapel represent the places of worship. A public school, average attendance 49, police barracks, and three stores are here. Great sheep-grazing district; considerable quantities of wheat are also grown. Formation: granite. Population, 319.

WOODBURN (29° 3′ S. lat., 153° 22′ E. long.), a township in the Richmond river district above Wardell, about 308 miles (337 postal) N. by E. of Sydney, and 30 miles from Harwood on the Clarence river. It is in the county of Richmond, Casino electoral district, and police district of Richmond river. It is on both banks of the river, has two post-offices, with money-order office, telegraph station and savings bank on both sides of the river, a public school, average attendance 100, Presbyterian and Anglican churches, three stores, one sugar manufactory, three hotels, branch of the Joint-Stock Bank, and a School of Arts, with about 360 vols. It is a great dairying centre. Formation: alluvial clay subsoil, country flat on the north bank of the river, very hilly and broken towards the south. Agricultural, sugar-growing, and pastoral district. A court of Petty Sessions is held once a month. Several lines of coaches run between Woodburn and the Lower Clarence, and river steamers daily to and from Ballina and Lismore, also steamers direct with Sydney three times a week. Daily mail to Chatsworth and Woodburn. Estimated population, 850.

WOODHOUSLEE (34° 30′ S. lat., 149° 30′ E. long.), a post town, in the county of Argyle, electorate of Argyle, and police district of Goulburn, 148 miles SW. of Sydney. A coach runs to and from the Goulburn railway station (14 miles distant), three times a week. In or near the township is a public school, with 22 average attendance, and an Episcopal church. The district is employed mainly for farming and grazing purposes. Formation: ironstone and slate. Woodhouslee is within 4 miles of the dividing range between the Bathurst and Goulburn districts. Population, 200.

WOODSIDE (31° 50′ S. lat., 152° 16′ E. long.) is a grazing and farming locality, with a post and telephone office, 249 miles N. of Sydney, in the county of Macquarie, electorate of the Manning, and police district of Manning river. Hexham is the nearest railway station, 138 miles distant. Has State school and Union church. *See* TAREE.

WOODSTOCK (33° 32′ S. lat., 148° 49′ E. long.), a post town with railway station, savings bank, money-order and telegraphic facilities, in the electorate of Cowra, county of Bathurst, and police district of Cowra, 207 miles W. of Sydney, fares, *viâ* Blayney, 41s. and 27s. 3d.; *viâ* Harden, 58s. and 39s. 3d. Coaches run to Milburn Creek, Mount McDonald, and Canowindra. There are two hotels (the Royal and Commercial), Roman Catholic church, public school. Mining, agricultural and pastoral district. Formation: volcanic. Population about 210.

WOOLLAHRA (33° 53′ S lat., 151° 14′ E. long.) is a beautiful, picturesque, and thickly populated municipal and electoral suburb of Sydney, about 3 miles distant SE., having frequent tramway and 'bus communication from the city, fare, 2d. and 3d. respectively. It is lighted by gas, and has a permanent water supply. Members of the professions and leading Sydney trades-

men reside here. Four Episcopalian, two Roman Catholic, two Congregational, Presbyterian, and one Wesleyan churches. Three public schools, several private educational establishments, a brewery and iron foundry; several hotels; post, money-order office, savings bank and telegraph office. Assessed value of ratable property, £128,090. Population 11,700.

WOOMARGAMA (35° 48′ S. lat., 147° 13′ E long.), a postal township, with telephone, on the Main South Road, 28 miles NE. of Albury, and 347 (404 postal) SW. of Sydney in Goulburn county, electorate of The Hume. It has a public school (average attendance of 22), Roman Catholic, Anglican and Presbyterian churches, Good Templars' lodge (No. 793), one hotel (the Woomargama), one store and a blacksmith's shop. Good agricultural and pastoral district, wheat being the leading crop. The nearest railway stations are Culcairn and Albury, 20 and 28 miles distant respectively. Population about 100.

WOONOONA (34° 29′ S. lat., 151° 4′ E. long.), a postal village in the county of Camden, electoral district of Woronora, 44 miles S. of Sydney, and 6 miles from Wollongong, whence the steamer can be taken for Sydney; also by rail *vid* Bulli station, one mile. Hotel: The Royal. There are ten stores, a School of Art, a post and money-order office, telegraph station, and Government savings bank, branch of the English and Scottish Bank, and a Presbyterian church, Oddfellows' and Orange lodges, also a public school, with average attendance, 300. The Bulli coal mines are about a mile distant. Population, 900.

WOY WOY (33° 37′ S. lat., 151° 17′ E. long.), a small post town, with telegraphic station on the Great Northern Railway, 45 miles N. of Sydney, fare 7s. 3d. and 4s. 8d. It is situated on the banks of Brisbane Water, in the electoral, police district, and county of Northumberland. It is a popular fishing and excursionist resort, and is patronized largely during the summer months. Geological formation: sandy flats. Population, 60.

WYALONG, a mining township, situated in the county of Gipps, parish of Mugga, 332 miles W. of Sydney, and 40 miles N.W. of Temora railway station. Electoral and police district of Grenfell. It has a post and telegraph office, money-order and savings bank, court-house, police-station, public school, clerk of petty sessions and mining registrar's office, School of Arts, cordial factory, hospital, five hotels, two drapery stores, Roman Catholic, Anglican, and Wesleyan churches. Coaches run daily to Temora. The mining division contains one battery, one chlorination and two cyanide plants, and forty-five mining claims. Newspaper: *Argus*.

WYALONG WEST, a mining township, situated in the county of Gipps, parish of Mugga, 335 miles W. of Sydney, and 42 miles NW. of Temora railway station. Police and electoral district of Grenfell, with post, telephone and telegraph office, money-order and savings bank, mining registrar's office, court-house, and warden's court. Banks: New South Wales and Union of Australia; police station, public school, convent school, Anglican, Roman Catholic, Presbyterian and Wesleyan churches, sixteen hotels, two cordial factories, and two theatres. Coaches run daily to Temora; bi-weekly to Yalgagin, Marsden, Buddigower, Ugarie, and Forbes. The mining division contains three batteries, one Huntingdon mill, seven cyanide plants, and two chlorination works, 379 claims, and 66 leases. The greatest depth at which ore is being obtained is 700 feet, yielding 23 ozs. per ton; sulphide ore, yielding 19 ozs. per ton, obtained at a depth of 700 feet. Many claims are down 400 and 500 feet. The machinery on the field is valued at £70,000. Value of gold each year, viz.: 1894, £35,946; 1895, £91,683; 1896, £130,000; 1897, to September 30th, £156,000; 1898, £160,000; 1899, £178,700. Population, both towns and field, 5,250. Newspaper: *Wyalong Star*. Geological formation of field: granite, slate, diorite and porphyry. Surrounding district consists of rich agricultural land.

WYBONG (32° 20′ S. lat. and 150° 41′ E. long.), a postal district, on the creek of the same name, in the county of Brisbane, electorate of Robertson, and police district of Muswellbrook, 194 miles N. by W. of Sydney, and 16 miles W. from the Muswellbrook railway station. Two churches; one school, with average attendance of 17. Saw-mill and dairies. Formation: volcanic rocks with black alluvial soil in the flats, and light sandy soil on the ridges. Agricultural and pastoral. Population about 112 in the entire district.

WYNDHAM, a mining, agricultural, and dairying township, county of Auckland, with postal, money-order, telegraph station and savings bank facilities, 358 miles S. of Sydney, communication being by coach to Eden, fare 7s. 6d., thence steamer 30s.; it is situated on the Mattaganah river, in the electorate of Eden-Bombala, and police district of Eden. Coaches run to Bombala, Cathcart, Cooma, Rocky Hall and Pambula. There is one hotel, and public school with average attendance of 40, School of Arts, Presbyterian and Episcopalian churches, and police station, and a population of about 400.

WYRALLAH (28° 48′ S. lat., 153° 20′ E. long.), a post town, with money-order, telegraph station, and savings bank, in the electorate of Lismore, police district of Richmond river, and county of Rous, situated on the left bank of the north arm of the Richmond river, distance N. of Sydney 389 miles; communication by steamer. There is a public school, Anglican, Wesleyan and Presbyterian churches, several general stores, and one hotel. The soil is extremely fertile, being formed by the decomposition of luxuriant vegetation, with which it was originally covered, and by the disintegration of rock. The hills, right to their summits, are covered with waving fields of sugar-cane, while on the plains at their base magnificent crops of maize are grown. Wyrallah is now the chief sugar-cane centre on the river, nearly all the cane being grown for the Colonial Sugar Refining Company's mill at Broadwater, to which place it is conveyed in large punts by river. The average yield of sugar-cane is 30 tons per acre, reaching in some instances to as much as 70 tons per acre. Bananas, citrons, lemons, oranges, pine-apples, dates, mulberries, grapes, yams, pea-nuts, ginger, guavas, passion-fruit, arrowroot, limes, Cape gooseberries, are all grown here to perfection. Dairying and bee farming are also carried on. The climate is delightful. Geological formation: volcanic ridges and alluvial plains. Population, 450.

YALWAL (34° 48′ S. lat., 150° 20′ E. long.), a mining township and post office and telephone station, county St. Vincent electorate and police district of Shoalhaven, situated on Dangerer creek, 112 miles S. of Sydney; mode of conveyance, coach to Nowra, thence rail. There is one hotel (the Pioneer), School of Arts, several small stores, a public school, average attendance 65, and a population of about 300, engaged almost solely in mining. The principal mines in full work are the Homeward Bound, the Pioneer, Eclipse, and Pinnacles—all showing moderate results.

YAMBA (29° 27′ S. lat., 153° 26′ E. long.) is a seaport town, situated at the mouth of the south side of the Clarence river, 307 miles N. of Sydney, in the Clarence electorate. Vessels can enter at any time. The genial climate of Yamba renders it a favourite seaside resort, and a great number of people take advantage of the daily communication with Grafton by steamer, especially during the summer months. Yamba possesses a large boarding-house, a large hotel, two small stores, post, money-order and telegraph office, savings bank, gaol, lighthouse, and a public school, with an average attendance exceeding 40. A pilot station has been established here for many years. The population numbers 350.

YASS (34° 49′ S. lat., 148° 56′ E. long.), an important town on the main southern road, on the banks of the river Yass, 190 miles SW. of Sydney, with which it is connected by the Great Southern Railway; fares 37s. 9d. and 25s. 3d. Coaches run to Ginninderra, 8s., Canberra, 9s., and other places. The hotels are the Royal, Commercial, Yass, Salutation, Australian, Builders' Arms, Farmers' Home Hotel, and the North Yass Inn. Yass is in the counties of King and Murray, and electoral district of Yass, and lies 1,657 feet above sea-level. The town consists of one main street, intersected by numerous other streets, which cross at right angles, all of them the sites of respectable business and private buildings. North Yass, which forms part of the town, and is connected by a handsome iron lattice bridge of 285 feet span crossing the Yass river, also a steel railway bridge; is well populated, and the site of numerous private residences, as well as a few business places. O'Connelltown is also included within the boundaries of Yass. Both the public edifices and the places of business are substantial erections, and are tangible evidences of its growing prosperity. The Mechanics' Institute is a very notable building, with a large hall, capable of accommodating over 300 persons. The institute has a reading-room, and well-selected library of 4,000 vols. There is a Guild Hall, Temperance Hall, and Protestant Hall. The Oddfellows have also erected a new hall in the centre of the town. The town is lighted with gas at a cost of £8,700. A large and handsome public school, with pretty cottage residence for teachers, built at a cost of over £5,000, was opened in January, 1879, and has an average attendance of 220. There is also a Roman Catholic school. A court-house, with necessary offices, erected at a cost of over £15,000. The surrounding country will, no doubt, be some day remarkable for its mining wealth, as it is rich in copper, silver, and lead ore, samples of which were shown at the International Exhibition in Sydney, but at present the district depends upon its agricultural and grazing resources. About 10,000 acres of land are under cultivation; producing wheat, maize, barley, oats, potatoes, wine, rye. Stock returns, 1899: 3,992 horses; 12,126 cattle; 527,946 sheep. Area, 928,003 acres. On March 12th, 1873, the town was incorporated; it has a mayor and eight aldermen, and 37 miles of roads, and ratable property of the annual value of £15,510. Circuit courts (presided over by judges of the Supreme Court of the colony) are held twice a year, and Courts of Quarter Sessions and District Courts at least three times a year. Courts of petty sessions are held daily before a resident police magistrate, and Small Debt Courts every fortnight at the court-house. Commercial Joint-Stock and Bank of New South Wales have branches here. There is also a Government savings bank, money-order and telegraph office; lands office and gaol; the Mutual Provident Society and a large number of similar societies have agencies here. The Church of England, Roman Catholic, Presbyterian, and Wesleyan Methodist denominations have each handsome churches, in which divine service is regularly held. There is one Roman Catholic besides private schools, a number of handsome private and business places, and two steam flour-mills. In addition to these, there is a large building, the Convent of Mount Carmel, connected with which is a large number of Sisters of Mercy, who keep a well-attended select school, as well as one in a separate building, erected for the purpose, as a girls' school; also a special separate school at the convent, presided over by the nuns, for the education of the blacks, at which there is a daily attendance of about 20 children. Gold is found in payable quantities up and down the Yass river, also at Nanang and Gooda Creeks rich deposits have been struck, yielding from 10 to 80 oz. to the ton. Formation: granite, limestone, and slate. The population numbers, within the municipality 2,000, the district 8,800. The local journals are the *Yass Courier* and the *Yass Tribune*, both issued twice a week.

YETMAN (28° 43′ S. lat., 150° 52′ E. long.), a post town, with money-order office, savings bank and telegraph station, on the banks of the river M'Intyre, 433 miles (547 postal) N. of

Sydney, electoral district of Inverell and police district of Warialda. It is about 200 miles from Grafton, where the steamer can be met. Communication *viâ* Glen Innes, to which coach. Gravesend is nearest railway station. Hotel: the Yetman. Two stores, Anglican church, a public school with average attendance of 30. District, pastoral. Formation: alluvial. Population 50.

YOUNG (34° 17′ S. lat., 148° 18′ E. long.), a pleasant township, on the north side of the Burrangong or Main creek, 256 miles SW. of Sydney, with which the communication is now by rail, fares, *viâ* Harden, 49s. 3d. and 32s. 9d., *viâ* Blayney 51s. 6d. and 34s. 6d., with postal, money-order, telegraph and Government savings bank facilities. The principal hotels are the Royal Australian and Albion. It is in Monteagle county, Young police and electoral district, and lies 1,416 feet above sea-level. Coaches run to Grenfell, Forbes, Burrowa, Marango, Thuddungra. Temora, Morangarell, Marsden, Williams, &c. Gold was accidentally discovered in June, 1860, and the gold-fields in the immediate neighbourhood, known as the Burrangong Goldfields, principally alluvial, have from time to time attracted large numbers of miners. It has many resources in mineral wealth that have yet to be developed, though dredging operations are now being carried on on the Burrangong Creek, Spring Creek and Currarong Creek; four dredging companies have been floated, and the immense volume of water which hitherto retarded the winning of gold will now be a factor in the success of the work; over 40,000 acres of land are under cultivation, produce being wheat, maize, barley, oats, potatoes, wine, rye, besides green crops, &c. The land in the district is eminently suited for agriculture, and surrounding Young are permanent homesteads, settled populations and cultivated soil. There are three main streets—Main, Burrowa, and Lynch. There are five banks—City, N.S. Wales, Commercial, Union, and Bank of Australasia; and agencies of the leading insurance companies; court-house, hospital, Wesleyan chapel, pretty little Episcopal church (St. John's), Roman Catholic (St. Mary's), and Presbyterian churches; superior public school with an enrolment of 500, average attendance of 350, and a Roman Catholic school, free library with about 1,000 volumes, two flour-mills (one co-operative), and a gaol. Circuit Court is held twice and General Sessions three times a year. Besides Young, the post towns of the district are Marengo, Murrumburrah, Musgrave (10 miles distant on the Grenfell road), Wombat, Grogan, and Morangorell. The municipal district has ratable property to the annual value of £19,839. The borough is lit by electricity on the high potential or transformer system. The town is connected by railway with the Southern and Western systems, *viâ* Harden south, or Blayney west. The local Pastoral and Agricultural Association and Horticultural Society hold a show each year, at which valuable prizes are largely competed for. The post office, a most commodious and attractive structure, is situated in Lynch Street. Stock returns, 1899: 8,654 horses, 16,356 cattle, 1,338,197 sheep. Area, 2,053,160 acres. Population of the town, 2,900. Newspapers: the *Burrangong Chronicle* and the *Burrangong Argus* (both bi-weekly).

THE STATE (LATE THE COLONY) OF VICTORIA.

THE STATE (LATE THE COLONY) OF VICTORIA.

THE STATE OF VICTORIA is situated at the south-east of the continent of Australia, and lies between the parallels of 34° and 39° south latitude, and the meridians of 141° and 150° east longitude. Its boundaries are—on the north and north-east, the colony of New South Wales, from which it is separated by the river Murray, and an imaginary line running in a south-easterly direction from The Springs on Forest Hill to Cape Howe; on the west by South Australia—the 141st meridian of east longitude dividing the two colonies; south and south-east, the Southern Ocean, Bass's Strait and the Pacific Ocean. Its extreme length from east to west is about 420 miles; its greatest breadth about 250 miles; and its area 87,884 square miles, or 56,245,760 acres. The coast line, broken by several bays and capes, is about 600 geographical miles. It is estimated to be about one thirty-fourth part of the entire continent, and, compared with Great Britain (which, exclusive of the islands in the British Seas, contains 88,006 square miles, while the area of Victoria is 87,884 square miles), it is slightly smaller.

The Colony, which, from 1835 to 1st July, 1851, formed a portion of New South Wales, under the name of Port Phillip, may be said to have been practically discovered in January, 1802, by Lieutenant John Murray, the commander of the *Lady Nelson;* although its existence had been known some time before.

Captain Cook in the *Endeavour* first sighted its coast near Ram Head at Point Hicks (so named after Lieutenant Hicks, who discovered it, now called Cape Everard) on 19th April, 1770. Cape Everard lies in 37° 49′ S. lat., 149° 17′ E. long., about midway between Cape Howe and the mouth of the Snowy River.

Mr. Clarke, the supercargo, and some of the crew of the *Sydney Cove*, wrecked in February, 1797, at Furneaux Islands, Bass's Straits, and who while endeavouring to reach Sydney in the launch were driven on shore to the southward of Cape Howe, are believed to be the first Europeans who trod what is now Victorian soil.

On December 3rd, 1797, Dr. Bass, who was at the time officiating as surgeon to H.M.S. *Reliance*, set out in an open whale boat on a voyage of discovery. He was accompanied by six seamen, and was provisioned for six weeks. He coasted the greater part of the way, and sedulously examined every inlet along the shore. On 19th January, 1798, he discovered Twofold Bay, and on the following day rounded Cape Howe, landing in the evening at the entrance of a lagoon one mile north of Ram Head. Bass returned in safety to Sydney on February 24th. Up to this time the southern portion of Australia was supposed to be connected with Tasmania.

On March 17th, 1800, the sloop *Lady Nelson*, 60 tons, under the command of Lieutenant James Grant, left Portsmouth for the purpose of surveying and exploring the Southern Coast of New Holland. After a long voyage, several places being touched at *en route*, the Australian land was made on 3rd December at Cape Northumberland; subsequently Cape Bridgewater, and other points, including Cape Albany Ottway (now called Cape Otway), were seen and named, the *Lady Nelson* reaching Port Jackson on 16th December, being the first vessel to pass through Bass's Strait from the westward.

Soon afterwards the *Lady Nelson* was despatched from Sydney on her first exploring trip. During this expedition the coast was surveyed from Western Port to Wilson's Promontory, the return to Sydney being made on 14th May, 1801. In the course of this voyage Grant landed on an island in Western Port Bay, and according to his own version cultivated some portion of it.

Lieutenant Murray, having succeeded Lieutenant Grant (who returned to England on 9th November, 1801) in the command of the *Lady Nelson*, started from Sydney on the important cruise which resulted in the discovery of Port Phillip Bay. He passed through Port Jackson Heads on 12th November, 1801, and from the log of the vessel it appears that Port Phillip Bay was discovered on 5th January, 1802, but owing to unfavourable weather an entrance could not be effected. Some days later Mr. Bowen, the first mate of the *Lady Nelson*, was despatched from Western Port in a launch to examine the entrance before a second attempt was made to take the *Lady Nelson* in. Mr. Bowen was successful in his survey, and succeeded in entering the Heads on 1st or 2nd February; soon after his return the *Lady Nelson* was brought round, and on 15th February threaded the narrow channel that forms the gateway to this "noble harbour," as Lieutenant Murray terms it, which was first called Port King, in honour of Governor King, but afterwards Port Phillip, in honour of Captain Phillip, the first governor of New South Wales. Some days were spent in exploring the shores, and on 9th March, 1802, the "United Colours of Great Britain and Ireland" were hoisted on land and ship, and in the midst of a discharge of small arms and artillery the port was taken possession of, in the name of "His sacred Majesty George III." On 12th March the vessel left Port Phillip Bay, reaching Port Jackson on the 24th, after a stormy passage.

On 18th July, 1801, Captain Matthew Flinders was despatched from Spithead to New Holland for the purpose of making a complete examination and survey of the coast. The sloop *Investigator* (334 tons), in which he sailed, arrived at Cape Leeuwin on December 6th, and thence sailed along the shores of South Australia, reaching the westernmost extremity of Victoria on 18th April, 1802. On the 27th of the same month Flinders took his vessel through the Heads into the Bay, whose vast expanse occasioned him no little surprise. His original intention was to have sailed round the Bay, but this plan he afterwards abandoned, and explored the coast by boat. He left the Bay on 3rd May, arriving on 9th May in Sydney Harbour. It is an interesting historical fact that Sir John Franklin was a midshipman of the *Investigator* during this voyage.

In the same year (1802) Governor King despatched Mr. Charles Grimes (then Surveyor-General of New South Wales), in the colonial schooner the *Cumberland*, of 29 tons, with orders to "walk round" Port Phillip. The little craft was under the command of Lieutenant Charles Robbins, of H.M.S. *Buffalo*, who carried despatches to "warn off" the French Commodore Baudin, known to be on the coast with the vessels *Geographe* and *Naturaliste* under his command, and to be meditating the annexation of the South Coast of Australia for the French Government. The *Cumberland* left Sydney on 23rd November, and on 8th December fell in with Commodore Baudin, at Sea Elephant Bay, on the east coast of King's Island, and the despatches were then and there delivered. After exploring King's Island, the *Cumberland* proceeded on her voyage entering Port Phillip Heads on 20th January, 1803. This vessel was the same in which Flinders, a year afterwards, was made prisoner in the Isle of France. "The Journal of the Exploration of Charles Grimes, kept by James Flemming," found by Mr. J. J. Shillinglaw, in the archives of the Colonial Secretary's Office at Sydney, shows that the greater portion of the coast line of Port Phillip, to some little distance inland, was explored by Mr. Grimes and his party. The first ascent of the Yarra was made on 2nd February, 1803. On one occasion the party breakfasted on Batman's Hill (which has been swept away for the Melbourne (Spencer Street) Railway Station), and consequently had the honour of being the first white men who trod the site of the Victorian capital. On the 7th of February Mr. Grimes went up the river as far as Dight's Falls (Studley Park). In its first mention it is called by Mr. Flemming, the Great River. Mr. Flemming concludes his report by saying, "The most eligible place for a settlement that I have seen is on the Freshwater River (Yarra). In several places there are small tracts of good land, but they are without wood and water. The country in general is excellent pasture and thin of timber, which is mostly low and crooked." On 27th February the *Cumberland* cleared Port Phillip Heads on her return trip, anchoring in Sydney Cove on 7th March.

During the same year Lieutenant-Colonel David Collins, who was judge advocate in Captain Phillip's expedition that colonized N. S. Wales, was sent out from England, with a small armed force and a party of convicts, in order to form a settlement on the shores of Port Phillip similar to that at Sydney Cove. This expedition, consisting in all of 402 souls, comprised 15 Government officials, 9 officers of marines, 2 drummers and 39 privates, 5 soldiers' wives and a child, 307 convicts, 17 convicts' wives and 7 convicts' children, carried in H. M. ship *Calcutta*, 50 guns, 1,200 tons, Captain Daniel Woodriff (who had previously been in the Colony of N. S. Wales in 1792 and 1793), and the *Ocean* (storeship of 600 tons), owned by Mr. Hurriss of Newcastle, John Mertho master, sailed from Spithead 24th April, 1803, and from Yarmouth Roads, Isle of Wight, on the following Thursday, the 28th. On the voyage out the *Calcutta* called at Teneriffe, Rio de Janeiro, and Simon's Bay, at which places stock and seed were purchased for the new settlement. The *Ocean* arrived at Port Phillip on the 7th, and the *Calcutta* on the 11th October. Collins first landed at "Seal Island," near the entrance to the Bay, and after examining the coast for several days, disembarked his party not far from the present township of Sorrento. During the voyage two convicts died, a third was drowned, a convict's wife died, and there was one birth. For mutiny three men were transferred from the *Rio Nova*, which was spoken on the passage, to the *Calcutta*. Several explorations were made into the country, resulting generally in a belief of the unsuitability of the locality for a settlement. The first interviews with the natives were friendly, but on one occasion there was a disposition to attack the settlers, when the apparent chief, after being warned, was shot dead. Divine service was held on 23rd October, "to return thanks for the prosperous voyage and safe arrival in the harbour." Finding no water (all that could be obtained was from casks sunk in the sand) Collins abandoned such an apparently sterile and inhospitable spot on 27th January, 1804, after a short sojourn of a little over three months, tempted, too, no doubt, by the glowing accounts he had heard of the beauty and fertility of the opposite shores of Tasmania, to which place he removed. The General Orders issued by Colonel Collins during his stay at Sullivan's Bay (which were printed on the spot on a small press set up under a gum tree) have been made public. In the order of 31st December he regrets that circumstances compel him to employ the Sunday in labour (in loading the *Ocean* for their departure), but defends it on the ground that "the sooner we are enabled to leave this unpromising and unproductive country, the sooner shall we be able to reap the advantages and enjoy the comforts of a more fertile spot."

In a letter to Lord Hobart, Collins concludes by saying: "When all the disadvantages attending this Bay (Port Phillip) are publicly known, it cannot be supposed that commercial people will be very desirous of visiting Port Phillip." The first sermon preached in Port Phillip was on 13th November, 1803, by the chaplain, the Rev. Robert Knopwood. The first death was that of John Skilhorne, which occurred at Sullivan's Bay on 10th October. The first child born in "the settlement of Port Phillip" was William James "Hobart" Thorn, who first saw the light on 25th November, and was publicly baptized on Sunday (Christmas Day), 25th December. The first marriage was on 28th November,

the contracting parties being Richard Garratt, prisoner, and Hannah Harvey, free.

Victoria, or, as it was then called, Port Phillip, does not appear to have attracted any attention for the twenty years following this cursory visit, and, in fact, all that is known of the country in the interior is the meagre information obtained from one William Buckley, one of the convicts, a soldier and a native of Macclesfield, in Cheshire, who escaped into the bush during Collins's encampment on the bay, and dwelt for many years with the aborigines.

In the year 1824 two squatters, named Hamilton Hume and W. H. Hovell, living near Lake George, in New South Wales, determined to explore the unknown country to the south of them in search of new pastures. They set out from the district of Appin on 3rd October, accompanied by six prisoners of the Crown, and after a laborious and protracted journey of four hundred miles, during which they passed over the Australian Alps, and crossed the rivers now known as the Hume or Upper Murray (on the 16th November), the Ovens, and the Goulburn or Hovell, and on the 16th December came out on the shores of Port Phillip Bay, which Hovell imagined to be Western Port, but which Hume maintained was Port Phillip. There is but little doubt now that it was the western arm of Port Phillip, somewhere about where now stands the large and flourishing town of Geelong. It is believed that the exact spot was Bird Rock Point, some twelve miles to the east of Geelong. Sixteen weeks were occupied in this journey; Hume and Hovell made no attempt at settlement in the new country they had found.

In 1826, in order to forestall a supposed design of the French to occupy some portion of the southern coast, an expedition, consisting of detachments of the 3rd and 30th Regiments (the Buffs), under the command of Captain S. Wright and Lieutenant B. I. Burchall, was despatched (18th Nov.) from Sydney in H.M. ship *Fly* (Captain Wetherall) and the brig *Dragon* to the shores of Western Port Bay, at a place called Old Settlement Point, facing French Island. Hovell was attached to this party as guide. The place was occupied for about a year, and then abandoned at the instance of Governor Darling, on the ground that the place was not fit for colonization, though the reports of Hovell and the military officers hardly afford the reasons for such a decision; the ruins of the dwellings are yet to be seen.

On 19th November, 1834, Messrs. Edward and Francis Henty, a firm engaged in whaling pursuits in Tasmania, crossed the Straits and established a branch station at Portland, in the south-western district, and imported sheep and cattle to feed on the rich grass of that favoured locality. This was, indeed, the first real attempt at settlement in Victoria, and these gentlemen may be considered the first founders of Victoria. The Messrs. Henty were followed by other flock-owners from Tasmania. In the early part of 1835 an association was formed in Van Diemen's Land to colonize Port Phillip. Its members were John Batman, Joseph Tice Gellibrand, James Robertson, William Robertson, Henry Arthur, John Sinclair, Charles Swanston, James Simpson, John Thomas Collicott, Anthony Cottrill, William George Sams, Michael Connolly, Thomas Bannister, and John Helder Wedge. It was arranged that John Batman should be sent to Port Phillip with the object, as stated in his journal, of secretly ascertaining the general character and capabilities of Port Phillip as a grazing and agricultural district. Batman, who was a native of Parramatta, New South Wales, but then resident in Tasmania, sailed from Launceston on 12th May, 1835, for Port Phillip, in the *Rebecca* (Captain Robson), a small schooner of about 30 tons, with three other white men and seven N. S. Wales aborigines. Adverse winds detained the little craft, which did not clear the Tasmanian coast till 27th May, the heads of Port Phillip being made two days later, on 29th May. On or about 31st May the little party landed on the shores of the bay (first of all at Indented Heads on the west side), afterwards ascending the Yarra to a little below the Falls, near the present Customs House, whence Batman explored a portion of the new country to the banks of the Merri Creek, near Northcote, where he entered into negotiations with the principal chiefs, namely, three brothers Jaga Jaga, Jaga Jaga, Jaga Jaga and Bungarie, Yan Yan, Moowhip, and Momarmallar, of a native tribe called Dutigallar, and induced them to assign "to him and his heirs for ever," in consideration of receiving a certain quantity of apparel, and other miscellaneous wares, particularized as "20 pairs of blankets, 30 tomahawks, 100 knives, 50 pairs of scissors, 30 looking-glasses, 200 handkerchiefs, 100 lbs. of flour, and 6 shirts," a tract of land estimated at about 600,000 acres. This "bargain" was, however, ignored and nullified by the Government; as was a similar one dealing with 100,000 acres of land in the Geelong district. Ultimately the Governor of New South Wales allowed the Batman Association £7,000 in the remission of the purchase of land at Port Phillip, as compensation in respect of their claims. Batman was followed in the same year by John Pascoe Fawkner, who despatched the schooner *Enterprise* (50 tons) from Launceston on 27th July, 1835, which sailed up the Yarra, and on 25th or 30th August was moored by its captain, John Lancey, to a tree, where the Australian Wharf now is. Prevented by sickness from accompanying his vessel on her first trip, Fawkner and his family joined her on her next voyage, reaching Melbourne on 18th October. As a child, Fawkner accompanied his father (in the *Calcutta*) in the expedition under Colonel Collins. To him may fairly be ascribed the honour of founding the settlement which has since grown into the colossal city of Melbourne, while to Batman may be credited the fame of being the first colonizer of the shores of Port Phillip Bay. Fawkner died on 4th September, 1869. Batman died on 6th May, 1839 (aged 39), at his residence on the slope of Batman's Hill, and was buried in the Old Cemetery on Flagstaff Hill. In the early part of 1882 an obelisk of dressed bluestone, raised by public subscription, was placed over his grave. Batman's journal, and also the deed made with the natives, are now in the Melbourne Public Library.

J. H. Wedge, a member of Batman's Association and formerly Assistant Surveyor-General in Van Diemen's Land, soon after the arrival of Batman's pioneer party, explored, about 13th August, some portion of the country round Port Phillip, on the western side, discovering and naming the Barwon and other rivers. In his report he states: "On the whole, I think favourably of the country for the general purposes of colonization."

On 10th November, 1835 the *Norval* (Captain Coltish) landed the first of the flocks and herds, consisting of 50 pure Hereford cows and 500 sheep. About the same time there came over Messrs. Cowie, Stead, Steiglitz and Ferguson. The first overlander with stock was John Gardiner. He set out from the Murrumbidgee, N. S. Wales, towards the end of 1835, accompanied by Messrs. Hovell and Hepburn, and conducted a "mob" of cattle to the Yarra in the short space of three weeks.

The very favourable reports which spread far and wide as to the capabilities of the new country soon produced their natural effects, and although the short-sighted government of the day endeavoured by all means in their power to prevent occupation, shepherds and stockmen soon spread overland from the more settled districts of New South Wales, and across the Strait from Tasmania, so that when what may be called the first official census was taken, on 25th May, 1836, by Mr. George Stewart, under instructions from Governor Bourke, the population consisted of 142 males and 35 females. The second census taken by order of Captain Lonsdale, on November 8th of the same year, showed an increase of 47 souls, the number being 186 males and 38 females. In the same year the stock was estimated at 75 horses, 155 horned cattle, and 41,332 sheep; there being besides 50 acres of land under cultivation. It was about this time (12th July, 1835) that Buckley, the convict who escaped from Collins's party, returned to civilization, after having spent thirty-two years among the blacks. He had almost forgotten his native language, and had become chief of the savage tribe with whom he had dwelt so long. In April, 1836, the Rev. Mr. Orton, a Wesleyan minister, held Divine service in Melbourne for the first time, the congregation worshipping at Batman's Hill, under the shade of the Casuarina or Sheoaks, which at that time adorned its crest.

In 1837 the population had increased fivefold, although there had been but eight births, and in that year (June 1) the first land sales took place, comprising 100 half-acre allotments, which realized from £25 to as high as £95 each, the average price being £35; Mr. Robert Hoddle, surveyor in charge of the district, acted as auctioneer; in the November following the second sale took place, when the average price was £42. At this sale Mr. John Fawkner purchased the allotment at the corner of Collins and Market Streets for £10.

James Backhouse, the Quaker Missionary, who arrived by the *Edora*, gives the following description of Melbourne at this time (13th November, 1837):—"The town of Melbourne, though scarcely more than fifteen months old, consists of about 100 houses, among which are stores, inns, a gaol, a barrack, and a school-house. Some of the dwelling-houses are tolerable structures of brick. A few of the inhabitants are living in tents or in hovels, resembling thatched roofs, till they can provide themselves with better accommodation. There is much bustle and traffic in the place, and a gang of prisoners are employed in levelling the streets. The town allotments (of half an acre each) were put up here a short time since at £5 each, the surveyor thinking £7 too much to ask for them; but the fineness of the country has excited such a mania for settling here that they sold for from £25 to £100 each."

In the meantime the steady influx of population had gone on, and parties had penetrated inland in all directions, more particularly to the westward, over that part of the country now so well known as the Ballarat goldfield. In 1836 Major Thomas Mitchell (afterwards Lieutenant-Colonel Sir), then Surveyor-General of New South Wales, proceeded on a journey of exploration down the Murray river, and striking south, crossed the Loddon, the Avoca, the Wimmera, and other rivers draining the enormous territory forming the western portion of Victoria, and reached the sea at the mouth of the Glenelg, near Cape Bridgewater. Partially retracing his steps, he re-ascended the river to Fort O'Hare (Dartmoor), thence to Eckersley, and travelled from here to Portland, where he arrived on 29th August, and obtained a supply of stores from Messrs. Henty. So delighted was he with the nature of the country through which he had passed, that he bestowed on it the suggestive title of "Australia Felix." Returning to the Murray, he passed by way of Mount Macedon and Mount Alexander, now known as Castlemaine, through what has since turned out to be one of the richest and most extensive goldfields in the world.

On the 29th of September, 1837, Captain William Lonsdale, of the 4th Regiment, arrived at Port Phillip, in H.M.S. *Rattlesnake*, Captain Hobson (after whom Hobson's Bay is named), and assumed the position of resident magistrate. He selected the present site of Melbourne for that of the future city, his selection being endorsed by Sir Richard Bourke on his visit some six months after, in April, 1837. There accompanied Governor Bourke at this time Captain Hunter, as military secretary; G. K. Holden, as private secretary; Captain P. P. King; and Robert Hoddle, as surveyor. Mr. Hoddle laid out the town of Melbourne, and the Governor gave it its name, after the then Prime Minister of Great Britain, and also named the principal streets. Prior to this time the settlement was variously

known as Beargrass, Bearpurt, Batmania, Yarrow Yarrow, and Glenelg.

In 1837 the first exports, consisting of wool, tallow, and hides, are recorded, the value of the two last being estimated at £50, and that of the wool at £11,639. The imports for the same year amounted to £115,379. During that and the following year immigrants crowded in from all parts of Great Britain. Labour, provisions, and rent rose to enormous prices, the four-pound loaf being sold for 3s. 6d., and the veriest huts let for £2 per week. On 1st January, 1838, the first newspaper, a miniature sheet of four foolscap pages, called the *Melbourne Advertiser*, was issued as a weekly, the first nine numbers being in manuscript. The tenth number was printed with ink and type. Owing to non-compliance with the requisite legal formalities, the paper had to be suspended for some time, reappearing on 16th February, 1839, under the new title of the *Port Phillip Patriot and Melbourne Advertiser*. The first number of the *Port Phillip Gazette* (owned by Messrs. Arden and Strode) appeared on 27th October, 1838. The *Port Phillip Herald* appeared in January, 1840, and the *Geelong Advertiser* in October of the same year. The *Argus* commenced in 1846. On 30th September, 1839, the first governor, Mr. C. J. Latrobe, entered on his duties under the title of Superintendent of the District of Port Phillip. By this time the third census showed that the population had increased to a total of 3,511 persons, of whom, however, only 431 were females. Extensive land sales took place, although only 150 acres were under cultivation, attention being mainly given to the raising of stock, which in two years had increased to 524 horses, 13,272 horned cattle, and 310,946 sheep; the exports of wool being computed at 320,383 lbs., of tallow 18,114 lbs., to the value of £22,120, and hides and skins to the value of £117. Attention also began to be directed to the requirements of the young, and four schools, with 78 scholars, are returned as the educational statistics of the year. The official returns also show that there were six places of worship in existence at the time.

Matters progressed pretty much as usual with young countries for the following two years, the settlement steadily progressing, when, in 1841, its prosperity received a considerable check through a monetary crisis taking place, which operated injuriously on the colony, and which may be said to have lasted till 1848. At the same time the population continued to increase, and land settlement to extend, much greater attention being devoted to agriculture than formerly; so that in 1843 there were 12,073 acres under cultivation. In 1841 the land funds of Port Phillip, which had up to that time been appropriated by the general government of New South Wales, were surrendered, and, despite the determined opposition of a very influential party in Sydney, Port Phillip practically acquired a separate existence, returning six members to the Legislative Council of New South Wales. The first public meeting of colonists on the Separation question took place on the 30th December, 1840, in the store of J. Hind, a wooden building, situated at the south-east corner of the Market Square, Melbourne. In 1842 (12th August) Melbourne obtained a Municipal Corporation under 5 & 6 Vict. c. 66, Henry Condell, a brewer, and colonist from Tasmania, being elected the first mayor.

The Separation movement, under the energetic leadership of Mr. Edward Curr, continued to grow, being materially assisted by the efforts of the late Dr. Lang, at that time one of the representatives of the Port Phillip district, and the favourable consideration given by the Home authorities (the Earl of Derby then being Colonial Secretary) to the memorial of the colonists. A change of ministry, however, retarded the movement, which was again quickened into active progress by the election, by the residents of Port Phillip of Earl Grey, the Secretary of the Colonies, as their representative to the N. S. Wales Legislature. The matter was referred by Earl Grey to a committee of the Privy Council, who reported in favour of erecting the district into a separate colony, suggesting the name of Victoria. In November, 1850, the Act for the separation of the colony from New South Wales was passed.

The first Congregational minister in Melbourne was the Rev. W. Waterfield, who arrived in May, 1838. Wesleyan services were first held in the house of Mr. John Gardiner, afterwards in the large room of Fawkner's Hotel. The Rev. John C. Grills, Church of England clergyman, arrived in Melbourne in October, 1838, and conducted public worship in a wooden building near the spot where St. James's Church now stands. The Rev. P. B. Geoghan, D.D., for many years Vicar-General (R.C. Church), arrived on 15th May, 1839, and the first Mass offered in Melbourne was on 19th May following, in an unroofed store then building, now the site of the Colonial Bank. The first regularly ordained Baptist minister to officiate in Melbourne was the Rev. John Ham, who preached in the hall of the Mechanics' Institute. Mr. Forbes, who arrived 28th January, 1839, was the first resident Presbyterian minister.

On 15th August, 1838, a branch of the Bank of Australasia was opened in Melbourne, in a small brick building on the north side of Little Collins Street, near Elizabeth Street. On 17th October of the same year a branch of the Union Bank was established in a weather-board building in Queen Street.

In January, 1839, the barque *Thomas Laurie*, 300 tons, W. B. Price, master, sailed for London, being the first vessel which left Port Phillip bound direct for a European port; in addition to a mail, she took away 400 bales of wool, valued at £6,500. In June following, the barque *Midlothian*, George Morrison, master, from Leith, put in an appearance, being the first ship to open a direct trade with the infant settlement.

In the years following 1842 the population continued steadily to increase both by natural progress and immigration and settlement and culture of the land went on, so that when the fifth census was taken, on 2nd March, 1846, the numbers were 20,184 males, 12,695 females, a total of 32,879; and in 1850, the year previous to the gold discovery, the population numbered 76,162, viz.: 45,495 males and 30,667 females; the stock numbered 21,219 horses, 378,806 cattle, and 6,032,783 sheep; 52,341 acres of land were under crop; the exports amounted to £1,041,796, and the revenue to £259,433. The ships which arrived numbered 555, of an aggregate tonnage of 108,000, and those which departed numbered 508, of an aggregate tonnage of 87,000. More than half a million bushels of wheat, 100,000 bushels of oats, and 21,000 tons of hay were grown. The wool exported amounted to 18,000,000 lbs., of the value of £826,000, and the tallow to 10,000,000 lbs., valued at £133,000.

On 26th June, 1847, Melbourne was erected into a city, and gazetted as such in Sydney on 5th February, 1848.

On 23rd January, 1848, the Rev. Charles J. Perry, the first Anglican Bishop of Melbourne, arrived, and was installed in the Cathedral Church of St. James on 28th January. On 13th February the Letters Patent constituting Melbourne a bishopric and Dr. Perry its first Bishop were read in St. James'. About the same time Dr. Gould, the first Roman Catholic Bishop of Melbourne, arrived in the colony.

In the year 1851 another crisis took place, and one so important in its character, so potent in its effects, that Victoria in a night, as it were, was uplifted from being an unconsidered nook in an out-of-the-way wilderness to the position of a nation and a power in the world.

This was due to the practical discovery of the existence of gold. So early as January, 1849, gold had been found by a shepherd, of the supposed name of Thomas Chapman, in the Pyrenees range, who brought it to Melbourne, and sold it to Mr. Charles Brentani, a jeweller in Collins Street, Melbourne. In 1839 Count Strzelecki, detected gold in the Australian Alps; and in 1841 the Rev. W. B. Clarke discovered gold in the mountainous country to the west of the Vale of Clwyd, in the county of Cook, New South Wales. In March, 1850 it was discovered at Clunes by the Hon. W. Campbell, but the fact was not publicly announced till 10th of June, from fear that the station would be injured. In June 1851, it was found at Burnbank or Lexton; on 5th July by H. J. Michel and six others in the quartz rocks of the Yarra Ranges at Anderson's Creek; about the same time by James Esmond in the quartz rocks of the Pyrenees, near Mr. Donald Cameron's station; on the 20th July, at Mount Alexander by Christopher Thomas Peters; on the 8th August, at Buninyong, by Mr. Thomas Hiscock; and on the 8th September, at Ballarat. Up to this time the Government had done all in its power to prevent men searching for gold, and to withhold the knowledge of its presence in the soil becoming public. But these finds, coming so rapidly one after another, created a gold fever, and all the obstacles the Government could present, were swept away as a sand barrier would be by the rising tide. Finding that it was totally in vain to attempt to stem the flood, the Government gave way—the first licenses to mine for gold being issued on the 1st September, 1851. No sooner had gold-digging been declared a recognised pursuit than the entire population became, as has been aptly said, "drunk with gold." Settlers left their homesteads, merchants their desks, professional men their offices, tradesmen their avocations, sailors their ships, and all engaged in the hazardous and laborious search for the precious metal.

For a time there was an excitement in the land which nothing could allay, and it was not until the hardships, privations, and dangers of a digger's life, to say nothing of its uncertain results, began to prove that none but the strong, hardy, and experienced could hope to succeed, that things began to resume anything like their normal state.

The first ship that took gold from the colony was the *Honduras*, which left on 29th August, 1858, for London, with eighteen ounces; the second one, the *Melbourne*, which sailed on the 22nd December, took 54,000 ounces. The *Eagle*, on 30th August of the following year, carried 145,843½ ounces.

To return to the history of the development of the colony: Up to 1851 Port Phillip was merely an appanage to, or rather a portion of, the original colony of New South Wales. On the 1st of July of that year, and by virtue of Act 13 & 14 Vict c. 59, the recommendation of the Committee of the Privy Council took effect, and it was severed from N. S. Wales and erected into an independent colony under the name of VICTORIA; Mr. Latrobe exchanging the title of Superintendent for that of Lieutenant-Governor, being sworn in on 15th July, and a Legislative Council of thirty members, twenty of whom were elected, and ten nominated by the Governor, being constituted, who held their first meeting on 11th November, 1851, Dr. Palmer being the first speaker. In 1852 Mr. Hugh Childers, then Auditor-General (Finance Minister), obtained leave to propose to the Legislative Council the establishment of a University for Melbourne. A Bill was introduced for its founding and endowment, and passed on 23rd January, 1853; the Council being gazetted on the following 11th April. In 1853 road districts, the origin of the present shires, were established, and in 1854 the Municipal system, the origin of the present cities, boroughs, &c., came into force. On 22nd June, 1854, Sir Charles Hotham, K.C.B., succeeded Mr. Latrobe who had retired on the 5th of the previous month, after a term of office extending over fifteen years. He died in England on 4th December, 1875, at the age of seventy-four. After the departure of Mr. Latrobe the Government of the colony was, from 8th May to 22nd June, administered by Mr. J. V. F. Foster. The new Governor's rule was not a popular one, and on the last day of the following year he died, his end having been hastened, as is generally thought, by the harassing nature of his office. In 1854 what is known as the Ballarat riots, took place. These arose out of the increased tax demanded from the diggers as a mining license, and the vexatious manner of its collection. The miners fortified
